Portable Technologies Robert Tinker, Joseph Krajcik.2012-12-06 Education has traditionally studied the world by bringing it into the classroom. This can result in situated learning that appears to students to have no relevance outside the classroom. Students acquire inert, decontextualized knowledge that they cannot apply to real problems. The obvious solution to this shortcoming is to reverse the situation and bring the classroom to the phenomena: to learn in a rich, real-world context. The problem with the real world is that it is complex and filled with interactions that are hard to sort out. The editors and authors believe that the right tools might help students with this sorting process and result in learning in rich contexts. This book is an account of a series of experiments designed to explore the validity of this insight.

World Development Report 2020 World Bank.2019-11-19 Global value chains (GVCs) powered the surge of international trade after 1990 and now account for almost half of all trade. This shift enabled an unprecedented economic convergence: poor countries grew rapidly and began to catch up with richer countries. Since the 2008 global financial crisis, however, the growth of trade has been sluggish and the expansion of GVCs has stalled. Meanwhile, serious threats have emerged to the model of trade-led growth. New technologies could draw production closer to the consumer and reduce the demand for labor. And trade conflicts among large countries could lead to a retrenchment or a segmentation of GVCs. World Development Report 2020: Trading for Development in the Age of Global Value Chains examines whether there is still a path to development through GVCs and trade. It concludes that technological change is, at this stage, more a boon than a curse. GVCs can continue to boost growth, create better jobs, and reduce poverty provided that developing countries implement deeper reforms to promote GVC participation; industrial countries pursue open, predictable policies; and all countries revive multilateral cooperation.

King of Ashes Raymond E. Feist.2018-05-08 The first volume in legendary master and New York Times bestselling author Raymond E. Feist's epic heroic fantasy series, The Firemane Saga—an electrifying tale of two young men whose choices will determine a world's destiny. For centuries, the five greatest kingdoms of North and South Tembria, twin continents on the world of Garn, have coexisted in peace. But the balance of power is destroyed when four of the kingdoms violate an ancient covenant and betray the fifth: Ithrace, the Kingdom of Flames, ruled by Steveren Langene, known as the Firemane for his brilliant red hair. As war engulfs the world, Ithrace is destroyed and the Greater Realms of Tembria are thrust into a dangerous struggle for supremacy. As a Free Lord, Baron Daylon Dumarch owes allegiance to no king. When an abandoned infant is found hidden in Daylon's pavilion, he realizes that the child must be the missing heir of the slain Steveren. The boy is valuable—and vulnerable. A cunning and patient man, Daylon decides to keep the baby's existence secret, and sends him to be raised on the Island of Coaltachin, home of the so-called Kingdom of Night, where the powerful and lethal Nocusara, the Hidden Warriors, legendary assassins and spies, are trained. Years later, another orphan of mysterious provenance, a young man named Declan, earns his Masters rank as a weapons smith. Blessed with intelligence and skill, he unlocks the secret to forging King's Steel, the apex of a weapon maker's trade known by very few. Yet this precious knowledge is also deadly, and Declan is forced to leave his home to safeguard his life. Landing in Lord Daylon's provinces, he hopes to start anew. Soon, the two young men—an unknowing rightful heir to a throne and a brilliantly talented young swordsmith—will discover that their fates, and that of Garn, are entwined. The legendary, long-ago War of Betrayal has never truly ended . . . and they must discover the secret of who truly threatens their world.

The Delta Model Arnaldo C. Hax.2009-11-27 Strategy is the most central issue in management. It has to do with defining the purpose of an organization, understanding the market in which it operates and the capabilities the firm possesses, and putting together a winning plan. There are many influential frameworks to help managers undertake a systematic reflection on this issue. The most dominant approaches are Michael Porter's Competitive Strategy and the Resource-Based View of the Firm, popularized by Gary Hamel and C.K. Prahalad. Arnaldo Hax argues there are fundamental drawbacks in the underlying hypotheses of these approaches in that they define strategy as a way to achieve sustainable competitive advantage. This line of thinking could be extremely dangerous because it puts the competitor at the center and therefore anchors you in the past, establishes success as a way of beating your competitors, and this obsession often leads toward imitation and congruency. The result is commoditization - which is the worst outcome that could possibly happen to a business. The Delta Model is an extremely innovative view of strategy. It abandons all of these assumptions and instead puts the customer at the center. By doing that it allows us to be truly creative, separating ourselves from the herd in pursuit of a unique and differentiated customer value proposition. Many years of intense research at MIT, supported by an extensive consulting practice, have resulted in development of powerful new concepts and practical tools to guide organizational leaders into a completely different way of looking at strategy, including a new way of doing customer segmentation and examining the competencies of the firm, with an emphasis on using the extended enterprise as a primary way of serving the customer. This last concept means that we cannot play the game alone; that we need to establish a network among suppliers, the firm, the customers, and complementors - firms that are in the business of developing products and services that enhance our own offering to the customer. Illustrated through dozens of examples, and discussion of application to small and medium-sized businesses and not-for-profits, the Delta Model will help readers in all types of organizations break out of old patterns of behavior and achieve strategic flexibility -- an especially timely talent during times of crisis, intense competition, and rapid change.

Islam and Muslim Societies .2019-04 Islam is more than a religion in the strict theological sense. If we confine ourselves to doctrinal normativity and Islamic law to analyse what Muslims motivate and how they build religious landscapes and life worlds, we seriously narrow down our understanding of Islam. Islamic society is a universal society, found at every place, in East and West, in south and north, and found at all time. It was not only found at the time of the Prophet, but also before his time, and at the time of other Messengers from Adam to Jesus (peace be upon them all), and after their time. Koranic teachings promote an ascetic ethic of self-control that bears on virtually all aspects of everyday activity. For Muslims, faith has not merely been a matter of private life and a personal relation with God. It has had pervasive social consequences. The Holy Qur'an and the traditions of the Prophet are concerned about Muslim and Islamic society. In many ways these holy books focuses on the importance of Islamic society. Because Allah and his prophet believes that Muslims Ummah are the best among all Adam's generation. Consequently, Islamic religion takes them out from the darkness into the light in order to achieve happiness, felicity in this world and the Hereafter. This book Islam and Muslim Societies consists of studies dealing with political, economic, legal, and social policies that affect every facet of the social life of Muslims. This book is aimed at bridging the gap between the textual and contextual approaches to Islamic Studies; and solving the dichotomy between 'orthodox' and 'heterodox' Islam. It contains a selection of studies written by scholars and authors dealing with Islam and Muslim societies as its central focus of academic inquiry and to encourage comprehensive consideration of its many facets; to provide an opportunity for the study of Islam and Muslim societies in their global context; to encourage interdisciplinary studies of the Islamic world that are cross-national and comparative; to promote the diffusion, exchange and discussion of research findings; and to encourage interaction among academics from various traditions of learning.
