Kuby Immunology Jenni Punt,Sharon Stranford,Patricia Jones,Judy Owen.2018-10-16 Janis Kuby's groundbreaking introduction to immunology was the first textbook for the course actually written to be a textbook. Like no other text, it combined an experimental emphasis with extensive pedagogical features to help students grasp basic concepts. Now in a thoroughly updated new edition, Kuby Immunology remains the only undergraduate introduction to immunology written by teachers of the course. In the Kuby tradition, authors Jenni Punt, Sharon Stranford, Patricia Jones, and Judy Owen present the most current topics in an experimental context, conveying the excitement of scientific discovery, and highlight important advances, but do so with the focus on the big picture of the study of immune response, enhanced by unsurpassed pedagogical support for the first-time learner. Punt, Stranford, Jones, and Owen bring an enormous range of teaching and research experiences to the text, as well as a dedication to continue the experiment-based, pedagogical-driven approach of Janis Kuby. For this edition, they have worked chapter by chapter to streamline the coverage, to address topics that students have the most trouble grasping, and to continually remind students where the topic at hand fits in the study of immunology as a whole.

Structure & Function of the Body Gary A. Thibodeau.2004 There are many wonders in our world, but none is more wondrous than the human body. This is a textbook about that incomparable structure. It deals with two very distinct and yet interrelated sciences: anatomy and physiology. As a science, anatomy is often defined as the study of the structure of an organism and the relationships of its parts. Physiology is the study of the functions of living organisms and their parts. - p. 1.

Aspects of the Performative in Medieval Culture Manuele Gragnolati, Almut Suerbaum. 2010-04-29 The volume assesses performative structures within a variety of medieval forms of textuality, from vernacular literature to records of parliamentary proceedings, from prayer books to musical composition. Three issues are central to the volume: the role of ritual speech acts; the way in which authorship can be seen as created within medieval texts rather than as a given category; finally, phenomena of voice, created and situated between citation and repetition, especially in forms which appropriate and transform literary tradition. The volume encompasses articles by historians and musicologists as well as literary scholars. It spans European literature from the West (French, German, Italian) to the East (Church Slavonic), vernacular and Latin; it contrasts modes of liturgical meditation in the Western and Eastern Church with secular plays and songs, and it brings together studies on the character of 'voice' in major medieval authors such as Dante with examples of Dante-reception in the early twentieth century.

Textbook of Medical Physiology .2009 Dit is het e-book uittreksel behorend bij het boek 'Textbook of Medical Physiology' (11e druk; ISBN 9780721602400) van Arthur C. Guyton & John E. Hall. Uittreksels van StudentsOnly bieden je een goede manier om de stof uit het boek nog sneller en makkelijker onder de knie te krijgen. Ze geven beknopt - in ca. 10% van het aantal pagina's van het boek - een compleet overzicht van alles wat belangrijk is. In het uittreksel wordt regelmatig naar pagina's, paragrafen, tabellen of figuren in het boek verwezen; het is dan ook moeilijk te gebruiken zonder het boek, maar des te beter samen met het boek. Inmunología Molecular, Celular Y Translacional, 1e Lennin Pavón, María del Carmen Jiménez, María Eugenia Garcés. 2016

Fisiología + StudentConsult Linda S. Costanzo. 2011-04-19 Nueva edición de la obra de Linda Costanzo, una fisióloga reconocida que ha publicado numerosos libros en el área de la fisiología. También tiene una

abundante productividad científica en el ámbito de la fisiología renal hasta el año 2000. A partir de entonces se dedica exclusivamente a los libros de texto. En EEUU se ha convertido en una de las autoras favoritas de los estudiantes por su forma de enseñar, con un estilo asequible, y explicando paso a paso todos los procesos fisiológicos que tienen lugar en el ser humano. Sin duda es autora de referencia cuando se necesita un texto de fisiología en donde se describan los procesos básicos. El objetivo de la autora es reducir una asignatura, tremendamente extensa como la fisiología, a los conceptos básicos y esenciales, presentándolos en capítulos cortos y fáciles de leer, y en el que se razonan escrupulosamente, paso a paso, cada uno de los procesos, y en el que se guía al alumno hasta la resolución detallada de los problemas fisiológicos y matemáticos. La obra se focaliza fundamentalmente en los procesos. La obra cubre la disciplina, tanto a nivel celular como de órgano, presentando a lo largo de toda su extensión textos concisos y fáciles de leer. El libro contiene 10 capítulos. El primer capítulo titulado 'Fisiología celular' contiene los conceptos básicos y generales que luego se utilizan en el resto de capítulos para cada sistema en particular (cardiológico, renal...). Cada capítulo, además de unas ilustraciones a todo color y altamente explicativas por su sencillez, presenta una serie de problemas resueltos en donde se aplican algunos de los conceptos presentados en el texto. Asimismo, cada capítulo incluye uno o más casos clínicos relacionados con los conceptos tratados en esa parte. Los casos clínicos son especialmente interesantes para enfatizar la correlación entre las ciencias básicas y la clínica. En estos casos se destaca, específicamente, los principios fisiológicos en los que se sustenta el problema clínico, y permiten, a la vez, una aproximación integrada de las relaciones entre los diferentes sistemas del organismo. Otro elemento didáctico de gran interés es la presencia de una serie de preguntas que permiten al alumno hacer su propia autoevaluación. (Challenge yourself). Las respuestas a cada una de las preguntas se encuentran detalladas al final del libro. Otro elemento didáctico de gran interés es la presencia de cuadros resumen de cada capítulo, para repaso rápido de las cuestiones fundamentales explicadas en el mismo. El libro incluye el recurso Student Consult, el cual incluye la siguiente información:

Renal Pathophysiology Helmut G. Rennke, Bradley M. Denker. 2014 This text offers medical students a case-based approach to learning the mechanisms of renal disease. Issues of differential diagnosis and therapy are linked to pathophysiologic mechanisms. Short questions interspersed throughout the text require students to apply their knowledge. Detailed answers to the questions are included. New to this edition: Full-color artwork and design New color photomicrographs of clinical conditions Additional end-of-chapter summaries Up-to-date information based on new medical findings
