Department for International Development annual report 2007 Great Britain: Parliament: House of Commons: International Development Committee.2007-11-15 The Committee's report reviews the Department for International Development's 2007 annual report (HCP 514, session 2006-07, ISBN 9780102945195), focusing on issues of efficiency and effectiveness. The Committee welcomes the increase in the DFID's budget under the Comprehensive Spending Review Settlement for 2008-11, in line with the target of 0.7 per cent of Gross National Income to be allocated to Official Development Assistance by 2013. However, it notes the significant challenge for DFID in using this funding effectively when it is also required to reduce its administrative costs, and therefore staff numbers, at a time when its focus is shifting increasingly towards fragile states where providing assistance is resource-intensive. Concerns are raised that DFID continues to emphasise inputs rather than outcomes, although DFID's new Public Service Agreement Delivery Agreement and the plans to establish the Independent Advisory Committee on Development Impact should make it easier to identify whether DFID's expenditure is effective in reducing poverty in developing countries. Four areas for improvement in DFID's work are highlighted relating to gender equality, climate change, governance and agricultural development.

**Contemporary Migration to South Africa** Aurelia Segatti.2011-08-23 Building on global interest in migration development, the volume draws attention to one of the most important migration systems in sub-Saharan Africa. It reviews South Africa's approach to international migration in the post-apartheid period from a regional development perspective, highlighting key policy issues, debates, and consequences. The authors find at least three areas where migration is resulting in important development impacts. First, by offering options to those affected by conflict and crises in a region that has limited formal disaster management and social protection systems. Second, by mitigating shortcomings and distortions in regional labour markets. Third, by providing support to struggling rural economies and ever expanding urban areas in terms of livelihoods and social capital transfers. Chapter One consists of a study of the country's historical experience of migration and, in particular, analyses the changes in official attitudes throughout the twentieth century, indicating the roots of contemporary ideas and policy dilemmas. Chapters Two, Three, Four and Five complement this analysis of the South African State's capacity to reform and manage the South African migration situation by looking at often neglected dimensions: the first explores the question of skilled labour, a crucial question given the unbalanced structure of the South African labour market; the second examines the impact of migration on local government in South African cities and specifically implications for urban planning, service delivery, health, security, and political accountability; the third analyses the nature of undocumented migration to South Africa and the challenges it raises to both State and non-State actors; The book concludes with an examination of health as a critical issue when examining the relationship between migration and development in South Africa, in light of recent empirical data.

**Transformation Audit 2011** Jan Hofmeyr.2012-03-08 The 2011 Transformation Audit presents a collection of articles by South African thought leaders, which asks how the country can set goals and achieve them in a hostile global climate that threatens developmental gains that have been painstakingly achieved. For nearly two decades, South Africans have conducted exhaustive analyses of the countrys challenges, embarked on bold scenario exercises and, more recently, produced forward looking strategies aimed at addressing these challenges. The most eminent of these in recent years were the Department of Economic Developments New Growth Path, and the National Planning Commissions Draft National Development Plan. We know now what the problems are and, by and large, what needs to change to address them. Courage is required now to forge consensus, to take decisions on strategies, and to start implementing them. As in previous years, this publication, with its slightly different format and appearance, seeks to provide analysis and provoke debate on how this might be achieved.

**Devil's Peak** Deon Meyer.2008-03-26 From rising South African thriller writer Deon Meyer, a gripping suspense novel about revenge, forgiveness, and the race to catch a trained killer. A young woman makes a terrible confession to a priest. An honorable man takes his own revenge for an unspeakable tragedy. An aging inspector tries to get himself sober while taking on the most difficult case of his career. From this beginning, Deon Meyer weaves a story of astonishing complexity and suspense, as Inspector Benny Griessel faces off against a dangerous vigilante who has

everything on his side, including public sympathy. A gruesome abuse case has hit the newsstands, and one man has taken it upon himself to stand up for the children of Cape Town. When the accused is found stabbed through the heart by spear, it's only the beginning of a string of bloody murders - and of a dangerous dilemma for detective Griessel. The detective is always just one step behind as someone slays the city's killers. But the paths of Griessel and the avenger collide when a young prostitute lures them both into a dangerous plan - and the two find themselves with a heart-stopping problem that no system of justice could ever make right.

**Environmental Concerns and Sustainable Development** Vertika Shukla,Narendra Kumar.2019-07-03 The prevailing global environmental crisis is primarily because of non-standardized parameters for environmental regulation. Unplanned expansion of economic activities, consideration for environmental conservation and several associated problems are emerging due to degradation in quality of ambient environment such as clean air, safe drinking water and quality of food, particularly in developing nations. Due to poor/casual execution of EIA protocol, newly developing countries are preferred destination for establishing pollution emitting industries, which results in degradation and depletion of natural resources. Lack of environmental policy intervention is another major attraction for establishing such industries in these nations. In order to ensure sustainable development, the highest priority issues include the monitoring and eradication of environmental problems which arise due to economic development. Initiation of any form of economic development primarily results in loss of forests and thus biodiversity, followed by deterioration in quality of air and contamination of natural resources. The worst impact of non-standardized economic development is the contamination of air, water and soil. Sustainable development ensures responsible interface with the environment to minimize the depletion or degradation of natural resources and ensure long term environmental quality. It involves integrated approaches in understanding the importance of environmental management systems and policy inventions leading to improved environmental performance. The present book is proposed to address the environmental concerns associated with economic development and approaches involved to attain sustainable economic development, which include monitoring of the quality of air, deforestation, quality of water resources, soil erosion and degradation of the natural environment.

**Molecular Biology and Biotechnology** John M Walker,Ralph Rapley.2007-10-31 As a textbook, Molecular Biology and Biotechnology has always been

immensely popular. Now in its fourth edition, it has been completely revised and updated to provide a comprehensive overview and to reflect all the latest developments in this rapidly expanding area. Written by recognised experts, the book aims to identify the impact that molecular biology has had on the development of biotechnology, with each of the nineteen chapters describing a specific subject area relevant to the subject. The impressive breadth of coverage includes areas such as plant biotechnology; food technology; vaccine development; the production of transgenic plants and animals; and the addition of an appropriate and timely new chapter devoted to bioinformatics. Presenting information in an easily assimilated form, *Molecular Biology and Biotechnology* makes an ideal undergraduate text. It will be of particular interest to students of biology and chemistry, as well as to scientists from outside the field requiring a rapid introduction to the subject.

Sharing Knowledge, Transforming Societies Tor Halvorsen, Skare Orgeret. 2019-10-22 In June 2016, the Norwegian Programme for Capacity Development in Higher Education and Research for Development (Norhed) hosted a conference on the theme of knowledge for development in an attempt to shift the focus of the programme towards its academic content. This book follows up on that event. The conference highlighted the usefulness of presenting the value of Norheds different projects to the world, showing how they improve knowledge and expand access to it through co-operation. A wish for more meta-knowledge was also expressed and this gives rise to the following questions: Is this way of co-operating contributing to the growth of independent post-colonial knowledge production in the South, based on analyses of local data and experiences in ways that are relevant to our shared future? Does the growth of academic independence, as well as greater equality, and the ability to develop theories different to those imposed by the better-off parts of the world, give rise to deeper understandings and better explanations? Does it, at least, spread the ability to translate existing methodologies in ways that add meaning to observations of local context and data, and thus enhance the relevance and influence of the academic profession locally and internationally? This book, in its varied contributions, does not provide definite answers to these questions but it does show that Norhed is a step in the right direction. Norhed is an attempt to fund collaboration within and between higher education institutions. We know that both the uniqueness of this programme, and ideas of how to better utilise the learning and experience emerging from it, call for more elaboration and broader dissemination before we can offer further guidance on how to do things better. This book is a first attempt.
