Science Teachers' Learning National Academies of Sciences, Engineering, and Medicine,Division of Behavioral and Social Sciences and Education,Teacher Advisory Council,Board on Science Education,Committee on Strengthening Science Education through a Teacher Learning Continuum.2016-01-15 Currently, many states are adopting the Next Generation Science Standards (NGSS) or are revising their own state standards in ways that reflect the NGSS. For students and schools, the implementation of any science standards rests with teachers. For those teachers, an evolving understanding about how best to teach science represents a significant transition in the way science is currently taught in most classrooms and it will require most science teachers to change how they teach. That change will require learning opportunities for teachers that reinforce and expand their knowledge of the major ideas and concepts in science, their familiarity with a range of instructional strategies, and the skills to implement those strategies in the classroom. Providing these kinds of learning opportunities in turn will require profound changes to current approaches to supporting teachers' learning across their careers, from their initial training to continuing professional development. A teacher's capability to improve students' scientific understanding is heavily influenced by the school and district in which they work, the community in which the school is located, and the larger professional communities to which they belong. Science Teachers' Learning provides guidance for schools and districts on how best to support teachers' learning and how to implement successful programs for professional development. This report makes actionable recommendations for science teachers' learning that take a broad view of what is known about science education, how and when teachers learn, and education policies that directly and indirectly shape what teachers are able to learn and teach. The challenge of developing the expertise teachers need to implement the NGSS presents an opportunity to rethink professional learning for science teachers. Science Teachers' Learning will be a valuable resource for classrooms, departments, schools, districts, and professional organizations as they move to new ways to teach science.

Arts-Based Methods for Decolonising Participatory Research Tiina Seppälä,Melanie Sarantou,Satu Miettinen.2021-04-18 In an effort to challenge the ways in which colonial power relations and Eurocentric knowledges are reproduced in participatory research, this book explores whether and how it is possible to use arts-based methods for creating more horizontal and democratic research practices. In discussing both the transformative potential and limitations of arts-based methods, the book asks: What can arts-based methods contribute to decolonising participatory research and its processes and practices? The book takes part in ongoing debates related to the need to decolonise research, and investigates practical contributions of arts-based methods in the practice-led research domain. Further, it discusses the role of artistic research in depth, locating it in a decolonising context. The book will be of interest to scholars working in art history, design, fine arts, service design, social sciences and development studies.

Trojan Horse of Western History Беляков Анатолий,Матвейчев Олег Анатольевич.2015-01-30 What is this book about? This book is about an exciting journey to Troy, both ancient and modern. About the fact that the Trojans defeated the Greeks (not the other way around, as is commonly believed). And that the well-known Greek religion with its anthropomorphism was created artificially for political reasons. The authors assert that the information warfare, the falsification of history — is not an innovation, but the oldest essence of Western way of thinking. The book refutes the conventional wisdom that history is written by the winners. On the

contrary, authors have shown: those who write history become winners. The book is written in bright, vivid and interesting manner for laymen. At the same time it is absolutely scientific and opposed fancy sensational historical fast food. This book is about the struggle for historical truth and justice, which roots us in the world, because without the truth we are orphans.

Elementary Art Workbook - Teacher Edition Eric Gibbons. 2013-05-16 From FirehousePublications.com comes the elementary version of our bestselling book, *The Art Student's Workbook*. This elementary version was created by a 20+ year certified veteran teacher and curriculum writer for classes in drawing, painting and sculpture designed for grades three through eight. The lessons are broad and easily adjusted to accommodate different grade levels, special needs students, and material appropriate for many environments from the school classroom, or home based instruction, to a fine arts camp program. It includes nearly three years worth of lesson ideas in painting, drawing, sculpture, and clay, project samples, vocabulary, worksheets, sample tests, research paper samples, grading rubrics, sketch and note taking pages, and short creative five minute writing assignments, critiquing pages, and daily closure statements to meet district observational requirements. This book is also a helpful aid in fulfilling State and Federal accommodation requirements (504/ IEP) by providing special needs students additional documented and written material that may be taken home. Every lesson is designed to be personal and expressive fine art. There are NO crafty projects or cookie-cutter lessons where everyone has the same outcome. This book stresses a divergent thinking processes approach and creative problem solving, with an art therapy undertone. Most lesson suggestions may be done in different media to work within tight budgets. Anecdotal evidence from the author's guidance department indicates that students who take this course with this workbook are 50% less likely to fail standardized testing. These are real numbers that can grab the attention of your administration and Board of Education if you have the same results. These lessons combine information from core curriculum and merge it with fine art. Art is the meeting place for all subjects. When we grid-we use geometry. When we make sculptures-we use engineering. When we mix colors-we reveal information about physics. When we create illustrations for stories-we learn about literature. When we review the styles of art from da Vinci to Warhol-we teach history. Students not only come to understand the concepts, but use them, and manipulate them for deeper understanding on multiple sensory levels of thinking. This workbook is divided by multicurricula units so that this concrete connection to academic core courses is more easily seen. ALL projects are designed to have successful divergent results, incorporate creative problem solving, and bring relevant connections to students' lives. This book is built for student success on many levels from gifted to challenged. This in turn is helpful in fulfilling mandated accommodations so that no child is left behind. We recommend that you pair this book with the student edition of the same name. For those that teach in middle or high school, find our other title, *The Art Student's Workbook*.

The Paradoxes of Transparency Douglas Clyde Wilson. 2009 The International Council for the Exploration of the Sea (ICES) is the central scientific network within the massive set of bureaucracies that is responsible for Europe's Common Fisheries Policy (CFP). While spending the past 25 years failing to sustain Europe's fish stocks, this management system also became adept at making the lives of its scientists miserable. Now it is being confronted by the complex challenge of an ecosystem-based approach to fisheries management. If this combination of a multi-national bureaucracy, hard politics, and scientific uncertainty has made it impossible to maintain many individual fish stocks, how are decisions going to be made that consider everything from sea birds to climate change? The old political saw that if you can't solve a problem, make it bigger has never been put to a test like this! Yet ICES has begun to rise in an impressive way to the scientific challenge of providing advice for an ecosystem approach within the world's most cumbersome fisheries management system. This book lays out the results of extensive sociological research on ICES and the decision making systems into which it feeds. ICES is finding ways to provide effective advice in the many situations where scientific advice is needed but a clear, simple answer is out of reach. In spite of the difficulties, scientists are beginning to help the various parties concerned with management to deal with facts about nature in ways that are more useful and transparent--Publisher's description.

Alms for Jihad J. Millard Burr, Robert O. Collins. 2006 There has been a dramatic proliferation of Islamic charities recently. While most are legitimate, considerable evidence reveals that others have more questionable intentions, and that funds have been diverted to support terrorist groups, such as al-Qaeda. The authors examine the contention through a detailed investigation of the charities involved, their financial intermediaries, and the terrorist organizations themselves. What they discover is that money from these charities has funded conflicts across the world, from the early days in Afghanistan, to subsequent terrorist activities in Asia, Africa, Palestine and, most recently, Europe and the United States.

Skin for Skin Gerald M. Sider. 2014-02-17 Since the 1960s, the Native peoples of northeastern Canada, both Inuit and Innu, have experienced epidemics of substance abuse, domestic violence, and youth suicide. Seeking to understand these transformations in the capacities of Native communities to resist cultural, economic, and political domination, Gerald M. Sider offers an ethnographic analysis of aboriginal Canadians' changing experiences of historical violence. He relates acts of communal self-destruction to colonial and postcolonial policies and practices, as well as to the end of the fur and sealskin trades. Autonomy and dignity within Native communities have eroded as individuals have been deprived of their livelihoods and treated by the state and corporations as if they were disposable. Yet Native peoples' possession of valuable resources provides them with some income and power to negotiate with state and business interests. Sider's assessment of the health of Native communities in the Canadian province of Labrador is filled with potentially useful findings for Native peoples there and elsewhere. While harrowing, his account also suggests hope, which he finds in the expressiveness and power of Native peoples to struggle for a better tomorrow within and against domination.

Citizen Spies Joshua Reeves.2017-03-28 The history of recruiting citizens to spy on each other in the United States. Ever since the revelations of whistleblower Edward Snowden, we think about surveillance as the data-tracking digital technologies used by the likes of Google, the National Security Administration, and the military. But in reality, the state and allied institutions have a much longer history of using everyday citizens to spy and inform on their peers. Citizen Spies shows how "If You See Something, Say Something" is more than just a new homeland security program; it has been an essential civic responsibility throughout the history of the United States. From the town crier of Colonial America to the recruitment of youth through "junior police," to the rise of Neighborhood Watch, AMBER Alerts, and Emergency 9-1-1, Joshua Reeves explores how ordinary citizens have been taught to carry out surveillance on their peers. Emphasizing the role humans play as "seeing" and "saying" subjects, he demonstrates how American society has continuously fostered cultures of vigilance, suspicion, meddling, snooping, and snitching. Tracing the evolution of police crowd-sourcing from "Hue and Cry" posters and America's Most Wanted to police-affiliated social media, as well as the U.S.'s recurrent anxieties about political dissidents and ethnic minorities from the Red Scare to the War on Terror, Reeves teases out how vigilance toward neighbors has long been aligned with American ideals of patriotic and moral duty. Taking the long view of the history of the citizen spy, this book offers a much-needed perspective for those interested in how we arrived at our current moment in surveillance culture and contextualizes contemporary trends in policing.

Getting the Joke Oliver Double.2013-12-16 'This is the kind of book that troubles grey-suited committees of academic peers. It's too enjoyable. But that, given its subject, is just what it ought to be, and it treats that subject seriously . . . There isn't a "dull" page anywhere in the book.' - Professor Peter Thomson, *Studies in Theatre and Performance* Comedy is changing: stand-up comedians routinely sell out stadia, their audience-figures swollen by panel-show appearances and much-followed Twitter feeds. Meanwhile, the smaller clubs are filling up, with audiences as well as aspirants. How can we make sense of it all? This new edition of *Getting the Joke* gives an insider's look at the spectrum of modern comedy, re-examining the world of stand-up in the internet age. Drawing on his acclaimed first edition, Oliver Double focuses in greater detail on the US scene and its comedians (such as David Cross, Sarah Silverman, Louis CK, Demetri Martin and Margaret Cho); the 'DIY' comedy circuit and its celebrated apostles and visionaries, from Josie Long to Stewart Lee; the growing importance of the solo stand-up show; the role played by Twitter (including an interview with the organiser of the world's first comedy gig on Twitter), and the driving force that is the TV guest slot, be it on *Mock the Week* or *Live at the Apollo*. With expanded sections on joke construction, as well as ways to challenge the audience, and a host of new and updated exercises to guide the aspiring comedian, this new edition of *Getting the Joke* is the only book to combine the history of stand-up comedy with an analysis of the elements and methods that go into its creation. Featuring a range of interviews with working comedians - from circuit veterans to new kids on the block - combined with the author's vast experience, this is a must read for any aspiring stand-up comedian.

A Carver Policy Governance Guide, The Policy Governance Model and the Role of the Board Member John Carver, Miriam Carver.2009-04-13 The Carver Policy Governance Guide series includes six booklets that offer board members a description of John Carver's Policy Governance model of board leadership. Policy Governance enables a board to fulfill its accountability to its organization's owners, whether the owners are association members, city residents, company shareholders, or a community of interest. Policy Governance addresses the board's engagement in financial, programmatic, and personnel matters; roles of officers and committees; reporting and evaluation; agendas; and other aspects of the board job. The Policy Governance Model and the Role of the Board Member sets out a clear vision for excellence in board leadership. It gives board members an understanding of the concepts and principles that are at the very heart of John Carver's innovative Policy Governance model. This guide details members' main tasks and presents the guidelines needed to transform a board into an effective group that consistently leads powerfully. The Policy Governance model is based on the functions rather than the structure of a governing board. It outlines commonsense principles about governing that fit together into an entire system. The practices of the Policy Governance board, which are consistent with the principles, allow it to control without meddling, focus on long-term organizational outputs, powerfully delegate to a CEO and staff, and discharge its fiduciary responsibility in a visionary, strategic manner. Because the model is a total system, the Carver Policy Governance Guide series offers boards a complete set of principles for fulfilling their various obligations.
