**Petite encyclopédie de culture générale** Alexis Chabot, Emmanuel Auber, David Elkaim, Xavier Lardoux, Sandra Michel, Dominique Prévot. 2019-12-03 Loin d'être une vaine accumulation de connaissances disparates, la Culture générale se veut une interrogation complexe et rigoureuse sur le monde. Elle est le produit du regard croisé de disciplines qui, toutes, à leur manière, réfléchissent, questionnent, éclairent la réalité qui est la nôtre. La Petite encyclopédie de Culture générale aspire à mettre en commun l'apport de l'histoire, de la philosophie politique, du droit public, de la science politique mais aussi de la littérature, des beaux-arts, de la musique et du cinéma. Chacun de ses 600 articles - de « Administration » à « Zweig » - propose un savoir factuel indispensable mais surtout une analyse que viennent compléter des citations et des références permettant à chacun d'approfondir sa réflexion. Rédigée par enseignants et membres de la haute fonction publique dans une optique généraliste et avec un souci de clarté, cette Petite encyclopédie s'adresse donc aussi bien aux étudiants qu'aux citoyens en attente de la mise en perspective d'une culture ouverte et diverse.

**Manuel de sculpture sur bois** Giuseppe Binel. 1999 Ce manuel présente tout l'éventail des techniques, notions et astuces qui concernent la création d'une sculpture sur bois, depuis le choix des matériaux et des outils jusqu'aux caractéristiques de l'atelier, sans oublier les traitements des surfaces et les différentes phases d'élaboration du projet, de dégrossissage et d'entaille. Sans imposer de solutions toutes prêtes, il illustre une vaste gamme de techniques qui permettront de réaliser des sculptures de tout genre. Il présente également cinq exemples de bas-reliefs, hauts-reliefs et sculptures qui illustreront pour les débutants les matériaux, l'outillage et les techniques d'exécution d'œuvres plus ou moins compliquées.

**Manuel de sculpture** John Plowman. 1998 Ce Manuel de sculpture est véritablement le premier guide complet des techniques de sculpture. Il traite à la fois des matériaux traditionnels tels que le bois, la pierre et l'argile, mais aussi du béton cellulaire, du plâtre, du polystyrène, des résines et autres matériaux modernes. Vous y apprendrez à planifier votre travail, à choisir le bon support, à combiner les matières et les techniques, à utiliser les outils et l'équipement appropriés à chaque projet. De nombreuses illustrations vous guideront pas à pas, dans la mise en oeuvre de différentes techniques, de la fabrication de l'armature à la coloration et au montage sur socle. La taille, le modelage, le soudage, le moulage, et tout le savoir-faire des artistes professionnels n'auront plus de secret pour vous... Enfin, un éventail de créations vous permettra d'observer comment des sculpteurs expérimentés ont traité des sujets abstraits et figuratifs tels que les bustes et les bas-reliefs, avec pour objectif de vous aider à développer votre propre style.

*One Place after Another* Miwon Kwon. 2004-02-27 A critical history of site-specific art since the late 1960s. Site-specific art emerged in the late 1960s in reaction to the growing commodification of art and the prevailing ideals of art's autonomy and universality. Throughout the 1970s and 1980s, as site-specific art intersected with land art, process art, performance art, conceptual art, installation art, institutional critique, community-based art, and public art, its creators insisted on the inseparability of the work and its context. In recent years, however, the presumption of unrepeatability and immobility encapsulated in Richard Serra's famous dictum to remove the work is to destroy the work is being challenged by new models of site specificity and changes in institutional and market forces. *One Place after Another* offers a critical history of site-specific art since the late 1960s and a theoretical framework for examining the rhetoric of aesthetic vanguardism and political progressivism associated with its many permutations. Informed by urban theory, postmodernist criticism in art and architecture, and debates concerning identity politics and the public sphere, the book addresses the siting of art as more than an artistic problem. It examines site specificity as a complex cipher of the unstable relationship between location and identity in the era of late capitalism. The book addresses the work of, among others, John Ahearn, Mark Dion, Andrea Fraser, Donald Judd, Renee Green, Suzanne Lacy, Inigo Manglano-Ovalle, Richard Serra, Mierle Laderman Ukeles, and Fred Wilson.

Ensuite, la réalisation de sculptures permet de mettre en pratique la technologie avec des exemples facilement réalisables car présentés à l'échelle 1.
