Colour and colour naming: crosslinguistic approaches João Paulo Silvestre,Esperança Carneira,Alina Villalva.2016-09-01 The Colour and Colour Naming conference, held in 2015 at the University of Lisbon, offered a chance to explore colour naming processes from a cross-linguistic approach. The conference was an initiative of the working group Lexicography And Lexicology from a Pan-European Perspective, itself part of the COST action European Network of Lexicography. The working group investigates the various ways by which vocabularies of European languages can be represented in dictionaries and how existing information from single language dictionaries can be displayed and interlinked to better communicate their common European heritage. The proceedings gather together a selection of studies originally presented at the conference. The first section of the volume outlines a Pan-European perspective of colour names; the second section is devoted to the categorisation and lexicographic description of colour terms.

Touches of Sweet Harmony S. K. Heninger.2013-06-15 The notion of a harmonious universe was taught by Pythagoras as early as the sixth century BC, and remained a basic premise in Western philosophy, science, and art almost to our own day. In Touches of Sweet Harmony, S. K. Heninger first recounts the legendary life of Pythagoras, describes his school at Croton, and discusses the materials from which the Renaissance drew its information about Pythagorean doctrine. The second section of the book reconstructs the many facets of this doctrine, and the final section shows its influence on Renaissance poetics. Professor Heninger's magisterial work introduces the reader not only to Pythagoras but to a host of other classical, medieval, and Renaissance figures as well--from Plato and Aristotle through St. Augustine and Macrobius down to Sidney and Spenser.

Planning non existent dictionaries João Paulo Silvestre,Alina Villalva .2015 There is an increasing number of dictionary types and lexical search-tools designed to respond to an ever-growing array of user needs. The quest for innovation, however, is not over and this is what this book shall shed light on. In the autumn of 2013, a conference entitled Planning non-existent dictionaries was held at the University of Lisbon. Scholars and lexicographers were invited to present and submit for discussion their research and practices, focusing on aspects that are traditionally perceived as shortcomings by dictionary makers and dictionary users. The topics for debate were intended to be provocative: the identification of dictionary types that have never been developed for certain languages or for a given lexical domain, as well as typological and linguistic problems that may compromise the development of lexicographic projects. We hoped that the discussion would lead to the presentation of problem-solving strategies, especially those related to corpora documentation, information technology and data presentation. We received an incredible response and have had the opportunity to acknowledge several projects that are different in size, novelty and degree of accomplishment.

Collected Writings Brian Ferneyhough.1995 Given the fact that his music is being heard with increasing frequency both on CDs and at new music festivals throughout the world, it is somewhat of an understatement to say that Brian Ferneyhough's reputation as a composer is certainly not in need of bolstering. Until now, however, Ferneyhough's writings about music, although numerous, have appeared in various languages, widely scattered and difficult, if not impossible, to find. The present collection brings together the majority of the composer's extant writings, many of them appearing here in English for the first time, along with some edited transcripts of informal talks, and a number of major interviews. Although the vast majority of the texts deal with Ferneyhough's compositions, there are others which reflect his activities as a highly influential composition teacher, and some which touch on his recent work as a poet. Together, the writings provide a fascinating and engaging means of insight into the workings of the mind of a composer whose output could be

regarded as one of the most significant of this century.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

The Revolution of Hope Erich Fromm.2022-06-17 What is society's effect on the individual? This book is a compelling appeal to the humanization of an evermore technological society. Social theorist Erich Fromm gives a classic description of the madness of modern culture, so applicable to the 21st century. He writes: A specter is stalking in our midst whom only a few can see with clarity. It is not the old ghosts of communism and fascism. It is a new specter: a completely mechanized society, devoted to maximal material output and consumption directed by computers. Humankind itself is being transformed into a part of the total machine: well-fed and entertained, yet passive and un-alive, with little feeling.

The Landscape of Lexicography Alina Villalva,Geoffrey Williams.2019-08-01 This book consists of a series of papers that look at three different aspects of the landscape as seen in dictionaries from across Europe. Multilingual diachronic case studies into lexicographical descriptions of flora, landscape features and colours concentrate on three supposedly simple words: daisies (*Bellis perenis* L.), hills and the colour red. The work is part of the ongoing LandLex initiative, originally developed as part of the COST ENeL - European Network for e-Lexicography - action. The group brings together researchers in lexicography and lexicology from across Europe and is dedicated to studying multilingual and diachronic issues in language. It aims to valorise the wealth of European language diversity as found in dictionaries by developing and testing new digital annotation tools and a historical morphological dictionary prototype. Funded by the Horizon 2020 Framework Programme of the European Union

Secrets of the Soil Peter Tompkins,Christopher Bird.1989 This book,a fascinating companion to *The Secret Life of Plants* by the same authors, tells the story of the innovative, nontraditional, often surprising things that certain scientists, farmers, and mystics are doing to prevent the slow degradation of our planet. For example, using the techniques of Rudolf Steiner's biodynamic agriculture with its reliance on ethereal forces from the planets,Dan Carlson's growth stimulating *Sonic Bloom*, and rock dust fertilizer to revitalize depleted soils; or gardening with the help of truly amazing new technologies to reverse serious agricultural problems.The authors illustrate,in a truly enlightening and convincing manner, the pivotal role that the natural elements play in ourlives, and the necessity of cultivating and sustaining a relationship with one most basic of them the soil.

The Colonial System Unveiled Baron De Vastey.2016-01-25 Long neglected in mainstream history books, the Haitian Revolution (1791-1804) is now being claimed across a range of academic disciplines as an event of world-historical importance. The former slaves' victory over their French masters and the creation of the independent nation of Haiti in 1804 is being newly heralded not only as a seminal moment in the transnational formation of the 'black Atlantic' but as the most far-reaching manifestation of 'Radical Enlightenment'. The best known Haitian writer to emerge in the years after the revolution is Baron de Vastey (1781-1820), who authored over ten books and pamphlets between 1814 and his murder in 1820. His first and most incendiary work, *Le système colonial dévoilé* (1814), provides a moving invocation of the horrors of slavery in pre-revolutionary Saint-Domingue. Its trailblazing critique of colonialism anticipates by over a hundred years the anticolonial politics (and poetics) of Césaire, Fanon, and Sartre. Translated here for the first time, Vastey's forceful unveiling of the colonial system will be compulsory reading for scholars across the humanities.

Latin Via Ovid Norma Goldman,Jacob E. Nyenhuis.1982 Using an introduction to mythology by the master storyteller Ovid himself, the authors have prepared a unique teaching tool designed to achieve proficiency at Latin in one year at the college level, two years at the high school or intermediate level. The volume provides students with imaginative, connected reading, beginning with introductory prose versions of Ovid's simple myth tales and progressing to the rich poetry of Ovidian Latin (with appropriate teaching aids) within forty lessons. The grammatical approach is traditional, but the central emphasis is on reading. In each chapter the reading appears first, followed by the vocabulary, the grammar, exercises, and etymology relating to the vocabulary. The exercises begin with a group of questions in Latin (based on the reading), to be answered in Latin. Each tale is preceded by a brief discussion in English of the story and its mythological significance. The myths retold by Ovid and the attractive format are conceived to impel the student into acquiring the skill to read the author in the original language. For additional complimentary materials on this topic, please see *Latin Via Ovid* Audio materials (available via downloadable flash drive and cassette tapes) by Norma Goldman and Jacob E. Nyenhuis and the accompanying text *Practice, Practice: A Latin Via Ovid Workbook* by Norma Goldman and Michael Rossi.

Theories of Translation John Biguenet,Rainer Schulte.2017-12-12 Spanning the centuries, from the seventeenth to the twentieth, and ranging across cultures, from England to Mexico, this collection gathers together important statements on the function and feasibility of literary translation. The essays provide an overview of the historical evolution in thinking about translation and offer strong individual opinions by prominent

contemporary theorists. Most of the twenty-one pieces appear in translation, some here in English for the first time and many difficult to find elsewhere. Selections include writings by Scheiermacher, Nietzsche, Ortega, Benjamin, Pound, Jakobson, Paz, Riffaterre, Derrida, and others. A fine companion to *The Craft of Translation*, this volume will be a valuable resource for all those who translate, those who teach translation theory and practice, and those interested in questions of language philosophy and literary theory.

Lagoa Santa Karst: Brazil's Iconic Karst Region Augusto S. Auler, Paulo Pessoa. 2020-01-22 This book discusses the Lagoa Santa Karst, which has been internationally known since the pioneering studies of the Danish naturalist Peter Lund in the early 1800s. It covers the speleogenesis, geology, vegetation, fauna, hydrogeology, geomorphology, and anthropogenic use of the Lagoa Santa Karst and is the first English-language book on this major karst area. The area, which has been at the heart of the debate on the origin and age of human colonization in the Americas, is characterized by a classical and scenic karst landscape with limestone cliffs, karst lakes and karst plains, in addition to numerous solution dolines. More than 1,000 caves have been documented in the area, many with significant archeological and paleontological value. Despite its great importance, the Lagoa Santa Karst faces severe environmental threats due to limestone mining and the expansion of the metropolis of Belo Horizonte and its surrounding towns. The growing recognition of the area's remarkable significance has led to increasing concern, and a number of protected areas have now been established, improving the conservation status of this landmark karst area.
