A Corpus Study of Collocation in Chinese Learner English Yuanwen Lu.2016-12-08 Collocation is an important tool in describing lexical behaviour in language and has received increasing attention in recent years. Based on two corpora: LOCNESS (the Louvain Corpus of Native English Essays) and MLC (the Non-English major Mainland Chinese Learner Corpus), this book explores the features of Chinese learner English with analysis of grammatical and lexical collocations. The findings show that Chinese university students use collocations with considerably less variety and Chinese language and culture exert a substantial influence on their English writing. It also discusses ways to tackle the problems Chinese English learners face and the pedagogical implications for teaching English and learning English collocations. As one of the first systematic studies to investigate collocations in Chinese learner English based on learner corpora, this book not only analyzes how Chinese learners use collocations in their English writing, but also provides significant implications for foreign language teaching and learning.

Engaging with Carol Bacchi Angelique Bletsas,Chris Beasley.2012 Carol Bacchi's scholarship is both substantial and wide-ranging. Beginning her academic career as a historian in the field of English-Canadian women's suffrage, Bacchi has made innovative and insightful contributions to the fields of

feminist theory, critical policy studies, and post-structuralist theory. One of the characteristic traits of her scholarship is her interest in revising and revisiting analytic problems from a range of perspectives... This resolute analytical rigour is undoubtedly evident in Bacchi's 'What's the Problem Represented to be?' ('WPR') approach, which is perhaps her most crucial contribution to intellectual inquiry and certainly one of the most innovative analytical frameworks developed in recent times... This book illuminates, commemorates, and builds upon Bacchi's 'WPR' approach. It outlines the trajectory of the development of the 'WPR' approach from Bacchi's early engagements with feminist thinking, as an academic in scholarly environments which were often the preserve of men, towards the theoretical sophistication of an approach which requires an ongoing critical assessment of assumptions about the social world, social 'problems', policy agendas deemed to respond to those 'problems', and the researcher's positioning. This book arose out of a conference organised by the Fay Gale Centre for Research on Gender at The University of Adelaide honouring Carol Bacchi's work and is intended to make that work accessible to a range of audiences. - from the Introduction, by Angeliques Bletsas and Chris Beasley.

Our Marvelous Bodies Gary Merrill.2008-03-07 Our Marvelous Bodies offers a unique perspective on the structure, function, and care of the major systems of the human body. Unlike other texts that use a strictly scientific approach, physiologist Gary F. Merrill relays medical facts alongside personal stories that help students relate to and apply the information. Readers learn the basics of feedback control systems, homeostasis, and physiological gradients. These principles apply to an understanding of the body's functioning under optimal, healthy conditions, and they provide insight into states of acute and chronic illness. Separate chapters are devoted to each of the body's systems in detail: nervous, endocrine, cardiovascular, respiratory, renal, gastrointestinal, musculoskeletal, reproductive, and immune. Through a series of real-life examples, the book also shows the importance of maintaining careful medical records for health care professionals, scientists, and patients alike.
