Paris Primitive Sally Price.2007-10-15 In 1990 Jacques Chirac, the future president of France and a passionate fan of non-European art, met Jacques Kerchache, a maverick art collector with the lifelong ambition of displaying African sculpture in the holy temple of French culture, the Louvre. Together they began laying plans, and ten years later African fetishes were on view under the same roof as the Mona Lisa. Then, in 2006, amidst a maelstrom of controversy and hype, Chirac presided over the opening of a new museum dedicated to primitive art in the shadow of the Eiffel Tower: the Musée du Quai Branly. *Paris Primitive* recounts the massive reconfiguration of Paris's museum world that resulted from Chirac's dream, set against a backdrop of personal and national politics, intellectual life, and the role of culture in French society. Along with exposing the machinations that led to the MQB's creation, Sally Price addresses the thorny questions it raises about the legacy of colonialism, the balance between aesthetic judgments and ethnographic context, and the role of institutions of art and culture in an increasingly diverse France. Anyone with a stake in the myriad political, cultural, and anthropological issues raised by the MQB will find Price's account fascinating.

Physics of Semiconductor Devices Massimo Rudan.2017-09-27 This textbook describes the basic physics of semiconductors, including the hierarchy of transport models, and connects the theory

with the functioning of actual semiconductor devices. Details are worked out carefully and derived from the basic physical concepts, while keeping the internal coherence of the analysis and explaining the different levels of approximation. Coverage includes the main steps used in the fabrication process of integrated circuits: diffusion, thermal oxidation, epitaxy, and ion implantation. Examples are based on silicon due to its industrial importance. Several chapters are included that provide the reader with the quantum-mechanical concepts necessary for understanding the transport properties of crystals. The behavior of crystals incorporating a position-dependent impurity distribution is described, and the different hierarchical transport models for semiconductor devices are derived (from the Boltzmann transport equation to the hydrodynamic and drift-diffusion models). The transport models are then applied to a detailed description of the main semiconductor-device architectures (bipolar, MOS, CMOS), including a number of solid-state sensors. The final chapters are devoted to the measuring methods for semiconductor-device parameters, and to a brief illustration of the scaling rules and numerical methods applied to the design of semiconductor devices.

Encyclopedia of Early Modern History Friedrich Jaeger, Graeme Dunphy. 2016 The Encyclopedia of Early Modern History offers 400 years of early modern history in one work. Experts from all over the world have joined in a presentation of the scholarship on the great era between the mid-15th to the mid-19th centuries. The perspective is European. That does not mean, however, that the view on the rest of the world is blocked. On the contrary: the multifaceted interrelatedness of European and other cultures is scrutinized extensively. The Encyclopedia of Early Modern History addresses major historical questions: - which ideas, inventions, and events changed people's lives? - in which ways did living conditions change? - how do political, social, and economic developments interlock? -

which major cultural currents have begun to become apparent? - how did historical interpretation of certain phenomena change? The individual articles are connected to one another as in a web of red threads. The reader who follows the threads will keep coming upon new and unexpected contexts and links.

The Savage Father Pier Paolo Pasolini. 1999 This is one of Pasolini's least known books, it is one of his most important challenges to himself and to the world. The book pits assumed Western cultural supremacy against the battle for Africa's freedom and self-assertion. The Savage Father offers a deep analysis of the internal struggles between the coloniser and the colonised, as well as showing us the externalised conditioning to which both are prey.

Post-Structuralism and the Question of History Derek Attridge, Geoff Bennington, Robert Young. 1987 Recent developments in literary theory, such as structuralism and deconstruction, have come under attack for neglecting history, while historically-based approaches have been criticized for failing to take account of the problems inherent in their methodological foundations. This collection of essays is unique in that it focuses on the relation between post-structuralism and historical (especially Marxist) literary theory and criticism. The volume includes a deconstructive reading of Marx, essays that relate history to the philosophical and institutional context, and a number of studies of particular texts, literary and non-literary, which pose the question of history and literary theory with particular force.

Child Migration and Human Rights in a Global Age Jacqueline Bhabha. 2016-05-17 The first comprehensive look at the global dilemma of child migration Why, despite massive public concern, is child trafficking on the rise? Why are unaccompanied migrant children living on the streets and routinely threatened with deportation to their countries of origin? Why do so many young refugees

of war-ravaged and failed states end up warehoused in camps, victimized by the sex trade, or enlisted as child soldiers? This book provides the first comprehensive account of the widespread but neglected global phenomenon of child migration, exploring the complex challenges facing children and adolescents who move to join their families, those who are moved to be exploited, and those who move simply to survive. Spanning several continents and drawing on the stories of young migrants, *Child Migration and Human Rights in a Global Age* provides a comprehensive account of the widespread and growing but neglected global phenomenon of child migration and child trafficking. It looks at the often-insurmountable obstacles we place in the paths of adolescents fleeing war, exploitation, or destitution; the contradictory elements in our approach to international adoption; and the limited support we give to young people brutalized as child soldiers. Part history, part in-depth legal and political analysis, this powerful book challenges the prevailing wisdom that widespread protection failures are caused by our lack of awareness of the problems these children face, arguing instead that our societies have a deep-seated ambivalence to migrant children—one we need to address head-on. *Child Migration and Human Rights in a Global Age* offers a road map for doing just that, and makes a compelling and courageous case for an international ethics of children's human rights.

[The Atlas of New Librarianship](#) R. David Lankes. 2016-09-02 An essential guide to a librarianship based not on books and artifacts but on knowledge and learning. Libraries have existed for millennia, but today the library field is searching for solid footing in an increasingly fragmented (and increasingly digital) information environment. What is librarianship when it is unmoored from cataloging, books, buildings, and committees? In *The Atlas of New Librarianship*, R. David Lankes offers a guide to this new landscape for practitioners. He describes a new librarianship based not on

books and artifacts but on knowledge and learning; and he suggests a new mission for librarians: to improve society through facilitating knowledge creation in their communities. The vision for a new librarianship must go beyond finding library-related uses for information technology and the Internet; it must provide a durable foundation for the field. Lankes recasts librarianship and library practice using the fundamental concept that knowledge is created through conversation. New librarians approach their work as facilitators of conversation; they seek to enrich, capture, store, and disseminate the conversations of their communities. To help librarians navigate this new terrain, Lankes offers a map, a visual representation of the field that can guide explorations of it; more than 140 Agreements, statements about librarianship that range from relevant theories to examples of practice; and Threads, arrangements of Agreements to explain key ideas, covering such topics as conceptual foundations and skills and values. Agreement Supplements at the end of the book offer expanded discussions. Although it touches on theory as well as practice, the Atlas is meant to be a tool: textbook, conversation guide, platform for social networking, and call to action. Copublished with the Association of College & Research Libraries.

Conservation and Restoration of Built Heritage Salvatore D'Agostino. 2021-08-16 The word conservation, when used in the context of the preservation of built heritage, implies an intrinsically complex concept that evolved over time, since it has been influenced by the perception of history throughout time. This volume emphasises why an understanding of the cultural evolution of the conservation approach must be considered a prerequisite for architects and engineers if they are to cooperate in full harmony with historic-artistic culture for the preservation of global built heritage. In particular, the volume highlights how, during the second half of the last century, the preservation process also involved engineering - the science of making practical applications of knowledge -

which, for a long time, made an uncritical use of techniques and materials and devised interventions on historical heritage that were heavily invasive. The volume also devotes special attention to the problems related to seismic risk, to which Italy, Greece and Portugal are particularly prone. Problems that emerge during the crisis and reconstruction phases are dealt with in detail, as is scheduled maintenance, as this latter approach always constitutes an improvement in the performance of the monument and is the most appropriate tool for the conservation of the built heritage. Finally, the volume collects examples of building restoration with case studies of many outstanding monuments. The work will appeal to professionals and academics in the broader fields of civil engineering (both geotechnical and structural engineering), architecture, art history, the history of architecture, restoration and cultural heritage management. This book will: Provide a critical reading of the history of conservation; Discuss materials and techniques of ancient architecture; Cover seismic vulnerability and preservation of the historic integrity of the monument; Advocate an approach based on programmed maintenance; Feature numerous case histories, including St Mark's Basilica in Venice and the complex restoration of the cathedral of Notre-Dame in Paris.

Greek and Roman Maps Oswald Ashton Wentworth Dilke.1998 In Greek and Roman Maps, O. A. W. Dilke follows the development of map-making skills, beginning in Babylonia and Egypt, through the contributions of Greek scientists and Roman administrators and surveyors, to the Age of Discovery. He provides examples of the full range of Greek and Roman maps, including town and building plans, itineraries and road maps, sea itineraries, and maps in art form. It is an extremely useful book, packed with information, simply and succinctly expressed... there is no doubt that it was Greek

theoretical thinking and a growing knowledge of geography, combined with the practical demands imposed upon the administrators of the Roman Empire, which led to the development and widespread use of maps more or less as we know them. -- Mary E. Hoskins Walbank, *Echos du monde classique*

A History of Postcolonial Lusophone Africa Patrick Chabal, David Birmingham.2002-06-13 . . . useful, timely, and important . . . a good and informative book on the Lusophone countries, Portuguese colonialism, and postcolonial influences. —Phyllis Martin, Indiana University This book, produced by the obvious—and distinguished—corps of country specialists . . . fills a real gap in both state-level and 'regional' (broadly defined) studies of contemporary Africa. —Norrie MacQueen, University of Dundee Although the five Portuguese-speaking countries in Africa that gained independence in 1974/75—Angola, Mozambique, Guinea-Bissau, Cape Verde, and São Tomé e Príncipe—differ from each other in many ways, they share a history of Portuguese rule going back to the 15th century, which has left a mark to this day. Patrick Chabal and his co-authors assess the nature of the Portuguese legacy, using a twofold approach. In Part I, three analytical, thematic chapters by Chabal examine what the five countries have in common and how they differ from the rest of Africa. In Part II, individual chapters by leading specialists, each devoted to a specific country, survey the histories of those countries since independence. The book places the postcolonial experience of the Lusophone countries within the context of their precolonial and colonial past and compares and contrasts their experience with that of non-Lusophone African states. The result is a comprehensive, readable, and up-to-date text and reference work on the evolution of postcolonial Portuguese-speaking Africa.

The overarching theme of the conference INPUT 2021 was “Integrating Nature-Based Solutions in Planning Science and Practice”, with contributes focusing on functionality of urban ecosystems toward more healthier and resilient cities, planning solutions for socio-ecological systems, technologies and hybrid models for spatial planning, geodesign, urban metabolism, computational planning, ecosystems services, green infrastructure, climate change adaptation and mitigation, rural landscapes, cultural heritage, and accessibility for urban planning. The conference brought together international scholars in the field of planning, civil engineering and architecture, ecology and social science, to build and consolidate the knowledge and evidence on NBS in urban and regional planning.

Carlos Raul Villanueva Paulina Villanueva,Maciá Pintó.2000 Villanueva was born in London, he grew up and was educated in Paris at the Ecole des Beaux Arts and was acquainted with the contemporary artists of the Parisian Avant-garde. In 1929 he founded his own architectural office in Caracas, where he designed and realised many large buildings including the university campus in Caracas which consists of approximately 100 buildings; the lecture theatre with its curved white ceiling from which large colored tiles from Calder are suspended is particularly remarkable. In

addition he designed the Olympic stadium and housing estates. Villanueva's architecture combines the radical style of Modernism with a dynamic and personal use of color and form. Concrete is much in evidence in his work and he lays great value on allowing the structural elements to become visible in expressive forms. In cooperation with Tanais Ediciones, Princeton Architectural Press and Logos Art.

How the Other Half Lives Jacob A. Riis. 2011 Jacob Riis's famed 1890 photo-text addressed the problems of tenement housing, immigration, and urban life and work at the beginning of the Progressive era. David Leviatin edited this complete edition of *How the Other Half Lives* to be as faithful to Riis's original text and photography as possible. Uncropped prints of Riis's original photographs replace the faded halftones and drawings from photographs that were included in the 1890 edition. Related documents added to the second edition include a stenographic report of one of Riis's lantern-slide lectures that demonstrates Riis's melodramatic techniques and the reaction of his audience, and five drawings that reveal the subtle but important ways Riis's photographs were edited when they were reinterpreted as illustrations in the 1890 edition. The book's provocative introduction now addresses Riis's ethnic and racial stereotyping and includes a map of New York's Lower East Side in the 1890s. A new list of illustrations and expanded chronology, questions for

consideration, and selected bibliography provide additional support.

Brazil on the Move John Dos Passos. 2011-11-16 John Dos Passos, the distinguished American novelist and historian has been personally interested in Brazil for the last fifteen years. He first visited the country in 1948, and returned again in 1956 and 1962. This book, which is based on his experiences in Brazil, presents the people and landscapes of a young country on the move. Here you will find several extraordinary reports on Brasilia, first in the planning stage, second in the wildly frantic period when it was a half-finished group of buildings, and, finally, as it appeared to Mr. Dos Passos in the summer of 1962 when it was at last beginning to function as a city. Here, too, is the story of Brazil's great road building program designed to unify the country, and of the political battles in this enormous country which totters on the verge of a Communist takeover. From traveling the length and breadth of the land and from interviewing all kinds of people: politicians like Carlos Lacerda and religious leaders like Bishop Sales, Mr. Dos Passos has been able to transmit some of the flavor of the most important of Latin American nations. Mr. Dos Passos himself is of Portuguese descent, and he speaks Portuguese as well as Spanish. He begins this readable and fascinating book with a much needed short sketch of the history of Brazil and how the Portuguese tradition differs from the Spanish in South America.

Archeologie Du Frivole Jacques Derrida. 1987-01-01 In 1746 the French philosophe Condillac published his Essay on the Origin of Human Knowledge, one of many attempts during the century to

determine how we organize and validate ideas as knowledge. In investigating language, especially written language, he found not only the seriousness he sought but also a great deal of frivolity whose relation to the sober business of philosophy had to be addressed somehow. If the mind truly reflects the world, and language reflects the mind, why is there so much error and nonsense? Whence the distortions? How can they be remedied? In *The Archeology of the Frivolous*, Jacques Derrida recoups Condillac's enterprise, showing how it anticipated--consciously or not--many of the issues that have since stymied epistemology and linguistic philosophy. If anyone doubts that deconstruction can be a powerful analytic method, try this.

De la vanidad Michel Eyquem de Montaigne. He envejecido mucho desde mis primeras publicaciones, que tuvieron lugar en el año 1580. Pero dudo que me haya vuelto una pulgada más sabio. Yo entonces y yo ahora somos por cierto dos: cuál es mejor no puedo decirlo. Sería bonito ser viejo si uno no se encaminara a otra cosa que al mejoramiento. Es un titubeante andar de borracho, vertiginoso, informe, o de juncos que el aire maneja azarosamente según los designios de la brisa."Todo es relativo. Ésa es la gran lección que sobrevuela este texto, extraído del libro III de los Ensayos de Montaigne. Pilar de un auténtico monumento literario, *De la vanidad* nos acerca una propuesta esencial: conservar el espíritu crítico, pues ningún conocimiento es absoluto. En un siglo en el cual reinan las guerras de religión, la miseria y la vanidad, Montaigne reclama el derecho a dudar, para defender el eclecticismo y la tolerancia. Michel Eyquem de Montaigne (1533-1592) fue uno de los escritores más influyentes del Renacimiento francés. En sus escritos demuestra una asombrosa habilidad para mezclar la especulación teórica más rigurosa con anécdotas casuales y autobiográficas. Buena parte de la literatura moderna de no ficción debe su génesis a Montaigne, quien dejó su huella en autores como Shakespeare, Rousseau y Nietzsche.

Technologies for Sustainable Urban Design and Bioregionalist Regeneration Dora

Francesca. 2016-02-22 This book explores the role of technology in ecological urban design and regeneration. Part I provides theoretical and methodological insights into technological approaches that offer optimum respect to existing cultural and natural environments, while offering minimum impact and carbon footprint. Parts II and III provide contextualised examples that demonstrate the use, or proposal of, sustainable technologies and solutions for regenerating parts of the urban and peri-urban. The case studies offer insights from the Mediterranean and the Middle East in a diverse range of spaces, from central urban squares, oblique cities, urban waterfronts, decaying suburbs, to peri-urban areas such as touristic waterfronts, former industrial areas, hyper-commercial areas, humid zones and parks.

The Ethnographic Self as Resource Peter Collins, Anselma Gallinat. 2010-05-30 It is commonly acknowledged that anthropologists use personal experiences to inform their writing. However, it is often assumed that only fieldwork experiences are relevant and that the personal appears only in the form of self-reflexivity. This book takes a step beyond anthropology at home and auto-ethnography and shows how anthropologists can include their memories and experiences as ethnographic data in their writing. It discusses issues such as authenticity, translation and ethics in relation to the self, and offers a new perspective on doing ethnographic fieldwork.

Invisible Cities Italo Calvino. 2013-08-12 Italo Calvino's beloved, intricately crafted novel about an Emperor's travels—a brilliant journey across far-off places and distant memory. “Cities, like dreams, are made of desires and fears, even if the thread of their discourse is secret, their rules are absurd,

their perspectives deceitful, and everything conceals something else.” In a garden sit the aged Kublai Khan and the young Marco Polo—Mongol emperor and Venetian traveler. Kublai Khan has sensed the end of his empire coming soon. Marco Polo diverts his host with stories of the cities he has seen in his travels around the empire: cities and memory, cities and desire, cities and designs, cities and the dead, cities and the sky, trading cities, hidden cities. As Marco Polo unspools his tales, the emperor detects these fantastic places are more than they appear.

The Architecture of Pica Ciamarra Associati Antonietta Iolanda Lima.2019-04 Since 1970, based in an isolated building situated on the peninsula of Posillipo, Pica Ciamarra Associati (www.pcaint.eu) has acted as a laboratory of architectural and urban design which has gradually incorporated new members and new energies over the time: using a multidisciplinary approach, the roots of the architectural practice lie in the intensive theoretical and practical work begun in the early 1960s by Massimo Pica Ciamarra. Since then the practice has been marked by a continuous relationship with Le Carré Bleu Feuille internationale d'architecture and leading members of the cultural milieu of Team 10: this has led to constant attention to everything that lies beyond form, to the relationship with contexts that also include non-spatial contexts, and to high levels of integration and dialectical discussion. According to Pica Ciamarra Associati, a design transcends the approaches of a single sector, providing simultaneous solutions to contradictory requirements, combining utopia and practicality. The poetics of the fragment: it mediates between architecture and the urban dimension; some designs also have the aim of becoming absorbed within a context as 'informed fragments'. This monograph is the result of an intensive period of work and consists of two interacting parts. It stems from research into the archive of the studio Pica Ciamarra and conversation with the members of the architectural practice. Organised diachronically, the book tells the long story, unfolding over a

period of over fifty years of a team of Neapolitan architects and designers, who have maintained the lively spirit of the practice which is still geared towards the future. The textual and iconographic account tells a story and offers an interpretation that highlight the vibrant atmosphere of the studio, based on a consistency of thought and action, and fuelled by an interest in many different forms of knowledge. The contextualisation of the events related to the studio, as they unfolded over time, is wide-ranging, coherent and connotative. Antonietta Iolanda Lima, professor of history of architecture at the University of Palermo, has always tried, through theory, teaching and design, to disseminate the importance of history which can embracing innovation and tradition to an equal degree, forming a new architectural language. According to her view of architecture, history and design are closely connected, a 'single entity' as is reflected by her career. Since the 1980s, her academic work has gained increasing importance, a way of avoiding narrow sectoral approaches in the training of future architects, offering a holistic stance of the history of architecture and an architecture that contributes to shaping critical thought and a thriving cultural life.

Palestinian Refugees in International Law Francesca P. Albanese, Lex Takkenberg.2020-05-21
The Palestinian refugee question, resulting from the events surrounding the birth of the state of Israel seventy years ago, remains one of the largest and most protracted refugee crises of the post-WWII era. Numbering over six million in the Middle East alone, Palestinian refugees' status varies considerably according to the state or territory 'hosting' them, the UN agency assisting them and political circumstances surrounding the Israeli-Palestinian conflict these refugees are naturally associated with. Despite being foundational to both the experience of the Palestinian refugees and the resolution of their plight, international law is often side-lined in political discussions concerning

their fate. This compelling new book, building on the seminal contribution of the first edition (1998), offers a clear and comprehensive analysis of various areas of international law (including refugee law, human rights law, humanitarian law, the law relating to stateless persons, principles related to internally displaced persons, as well as notions of international criminal law), and probes their relevance to the provision of international protection for Palestinian refugees and their quest for durable solutions.

If Venice Dies Salvatore Settis.2016-09-10 In the tradition of Jane Jacobs' *The Death and Life of Great American Cities* comes an urgent plea from internationally renowned art historian Salvatore Settis to preserve Venice's future. What is Venice worth? To whom does this urban treasure belong? Venetians are increasingly abandoning their hometown — there's now only one resident for every 140 visitors — and Venice's fragile fate has become emblematic of the future of historic cities everywhere as it capitulates to tourists and those who profit from them. In *If Venice Dies*, a fiery blend of history and cultural analysis, internationally renowned art historian Savatore Settis argues that "hit-and-run" visitors are turning landmark urban settings into shopping malls and theme parks. He warns that Western civilization's prime achievements face impending ruin from mass tourism and global cultural homogenization. This is a passionate plea to secure Venice's future, written with consummate authority, wide-ranging erudition, and élan.

Constructing Messapian Landscapes G.-J. L. M. Burgers.1998 Over the last three decades, archaeologists have progressively embarked on field-walking projects all around the Mediterranean basin. The aim of most of these projects is to investigate the ancient settlement and landscape dynamics of specific Mediterranean regions. They greatly contribute to the new liveliness which characterizes present-day classical archaeology, not only by introducing new research methods but

also, and in particular, by widening its subject matter to include the history of societies in the margins of the Graeco-Roman urban world. It is within this recent tradition that the present book has been written; the author aims to examine the ancient settlement and societal dynamics of the Brindisi region, in the north-east of the Salento peninsula. The field surveys indicate that during the pre-Roman period the regional society was characterized by processes of centralization and urbanization. Subsequently, from the 3rd century BC onwards, it gradually integrated into the Roman orbit. Burgers emphasizes an active indigenous role in the successive colonial situations in southern Italy. He focuses on the internal dynamics of the local communities and investigates how social strategies manifested themselves, especially in external contacts and in the organization of settlement and landscape.

Wikibooks is a collection of open-content textbooks, which anyone with expertise can edit - including you. Unlike Wikipedia articles, which are essentially lists of facts, Wikibooks is made up of linked chapters that aim to teach the reader about a certain subject. Booktastik has free and discounted books on its website, and you can follow their social media accounts for current updates. Because this site is dedicated to

free books, there's none of the hassle you get with filtering out paid-for content on Amazon or Google Play Books. We also love the fact that all the site's genres are presented on the homepage, so you don't have to waste time trawling through menus. Unlike the bigger stores, Free-Ebooks.net also lets you sort results by publication date, popularity, or rating, helping you avoid the weaker titles that will inevitably find their way onto open publishing platforms (though a book has to be really quite poor to receive less than four stars). Wikibooks is a useful resource if you're curious about a subject, but you couldn't reference it in academic work. It's also worth noting that although Wikibooks' editors are sharp-eyed, some less scrupulous contributors may plagiarize copyright-protected work by other authors. Some recipes, for example, appear to be paraphrased from well-known chefs. Once you've found a book you're interested in, click Read Online and the book will open within your web

Reading Mode looks like an open book, however, all the free books on the Read Print site are divided by chapter so you'll have to go back and open it every time you start a new chapter. Free Kindle Books and Tips is another source for free Kindle books but discounted books are also mixed in every day. Ensure you have signed the Google Books Client Service Agreement.
