*The Senses of the Text* William C. Dowling. 1999-01-01 In recent years the notion of determinate meaning?the idea that a word or a line in a literary text means one thing rather than another thing, X rather than Y?has been widely rejected in the name of Derrida and différance, reader-response criticism, and ideological approaches proclaiming meaning to be no more than a site of political contestation. ø Yet determinate meaning, says William C. Dowling, cannot be rejected in this way. Like the ratio named by p or the primeness of prime numbers in mathematics, it has been there all along, waiting for our theories to catch up. The proof that this is so, he argues, is today most compellingly available in the New Intensionalism of Jerrold J. Katz, which provides a powerful demonstration that the method of close reading developed by New Criticism remains the only valid basis for higher-order interpretation. For readers with no technical background in linguistics or logic, *The Senses of the Text* provides a clear and easily-understood introduction to the Chomskyan revolution in linguistic theory and to major issues in the philosophy of language, including the work of Frege,

Wittgenstein, Quine, Carnap, Kripke, and Davidson.

*Furniture Standards Australia International, Standards Australia International Limited.* 2000 The objective of this Standard is to provide specifiers and manufacturers with a Standard for the determination of stability of rocking chairs and chairs with tilting or reclining mechanisms when fully reclined and enables purchasing authorities, retailers and users to use these criteria to assist in selection and evaluation.
