Ion Implantation in Semiconductors 1976 Fred Chernow.2012-12-06 The Fifth International Conference on Ion Implantation took place in Boulder, Colorado between the 9th and 13th of August 1976. Papers were delivered by scientists and engineers from 15 countries, and the attendees represented 19 countries. As has become the custom at these conferences, the sessions were intense with the coffee breaks and evenings given to informal meetings among the participants. It was a time to renew old friendships, begin new ones, exchange ideas, personally question authors of papers that appeared in the literature since the last conference and find out what was generally happening in Ion Implantation. In recent years it has become more difficult to get funding to travel to such meetings. To assist the participating authors financial aid was solicited from industry and the Office of Naval Research. We are most grateful for their positive response to our requests. The success of the conference was in part due to their generous contributions. The Program Committee had the unhappy task of the reviewing of more than 170 abstracts. The result of their labors was well worth their effort. Much thanks goes to them for molding the conference into an accurate representation of activities in the field. Behind the scenes in Boulder, local arrangements were handled ably by Graeme Eldridge. The difficulty of this task cannot be overemphasized. Our thanks to him for a job well done.

Accelerating Decarbonization of the U.S. Energy System National Academies of Sciences, Engineering, and Medicine,National Academies Of Sciences Engineeri,Division on Engineering and Physical Sciences,Board on Energy and Environmental Systems,Committee on Accelerating Decarbonization in the United States.2021-12-02 The world is transforming its energy system from one dominated by fossil fuel combustion to one with net-zero emissions of carbon dioxide (CO₂), the primary anthropogenic greenhouse gas. This energy transition is critical to mitigating climate change, protecting human health, and revitalizing the U.S. economy. To help policymakers, businesses, communities, and the public better understand what a net-zero transition would mean for the United States, the National Academies of Sciences, Engineering and Medicine convened a committee of experts to investigate how the U.S. could best decarbonize its transportation, electricity, buildings, and industrial sectors. This report, Accelerating Decarbonization of the United States Energy System, identifies key technological and socio-economic goals that must be achieved to put the United States on the path to reach net-zero carbon emissions by 2050. The report presents a policy blueprint outlining critical near-term actions for the first decade (2021-2030) of this 30-year effort, including ways to support communities that will be most impacted by the transition.

Macroeconomic Stability and Financial Regulation Mathias Dewatripont,Xavier Freixas,Richard Portes.2011 The G20 meeting in London in spring 2009 was a historical moment of global cooperation to deal with the global financial crisis. This book collects essays from leading economists, first presented as an eBook in January 2009, advocating many of the policies that were eventually agreed on, including the headline-grabbing global fiscal stimulus. But it goes further, calling for: Reforms to address global imbalances by a) creating insurance mechanisms for countries that forgo reserve accumulation and stimulate domestic expansion; and b) accelerating the development of financial systems in emerging markets.

Macroeconomic policy to meet any threat of deflation promptly, with a zero interest rate policy and quantitative easing, and an inflation target to avoid expectations of deflation. Adjustment of the Basel II capital requirements to mitigate procyclicality. Creation of a centralised clearing counterparty for credit default swap trades. Severing the link between credit rating agencies and issuers and monitoring the former's power. Establishment of a harmonised bankruptcy regime for banks that gives regulators strong powers over bank managers and shareholders before the bank is technically insolvent, especially in the case of cross-border banks. Creation of an International Financial Stability Fund that takes equity positions in the financial institutions of participating countries and monitors their activities. Many of these suggestions are still being debated today.

Aligning MDM and BPM for Master Data Governance, Stewardship, and Enterprise Processes Chuck Ballard,Trey Anderson,Dr. Lawrence

Dubov,Alex Eastman,Jay Limburn,Umasuthan Ramakrishnan,IBM Redbooks.2013-03-08 An enterprise can gain differentiating value by aligning its master data management (MDM) and business process management (BPM) projects. This way, organizations can optimize their business performance through agile processes that empower decision makers with the trusted, single version of information. Many companies deploy MDM strategies as assurances that enterprise master data can be trusted and used in the business processes. IBM® InfoSphere® Master Data Management creates trusted views of data assets and elevates the effectiveness of an organization's most important business processes and applications. This IBM Redbooks® publication provides an overview of MDM and BPM. It examines how you can align them to enable trusted and accurate information to be used by business processes to optimize business performance and bring more agility to data stewardship. It also provides beginning guidance on these patterns and where cross-training efforts might focus. This book is written for MDM or BPM architects and MDM and BPM architects. By reading this book, MDM or BPM architects can understand how to scope joint projects or to provide reasonable estimates of the effort. BPM developers (or MDM developers with BPM training) can learn how to design and build MDM creation and consumption use cases by using the MDM Toolkit for BPM. They can also learn how to import data governance samples and extend them to enable collaborative stewardship of master data.

Holy Blood, Holy Grail Michael Baigent, Richard Leigh, Henry Lincoln.2007-12-18 Is the traditional, accepted view of the life of Christ in some way incomplete? • Is it possible Christ did not die on the cross? • Is it possible Jesus was married, a father, and that his bloodline still exists? • Is it possible that parchments found in the South of France a century ago reveal one of the best-kept secrets of Christendom? • Is it possible that these parchments contain the very heart of the mystery of the Holy Grail? According to the authors of this extraordinarily provocative, meticulously researched book, not only are these things possible — they are probably true! so revolutionary, so original, so convincing, that the most faithful Christians will be moved; here is the book that has sparked worldwide controversy. Enough to seriously challenge many traditional Christian beliefs, if not alter them. — Los Angeles Times Book Review Like Chariots of the Gods?...the plot has all the elements of an international thriller. — Newsweek

Bird Species Dieter Thomas Tietze.2018-11-19 The average person can name more bird species than they think, but do we really know what a bird “species” is? This open access book takes up several fascinating aspects of bird life to elucidate this basic concept in biology. From genetic and physiological basics to the phenomena of bird song and bird migration, it analyzes various interactions of birds - with their environment and other birds. Lastly, it shows imminent threats to birds in the Anthropocene, the era of global human impact. Although it seemed to be easy to define bird species, the advent of modern methods has challenged species definition and led to a multidisciplinary approach to classifying birds. One outstanding new toolbox comes with the more and more reasonably priced acquisition of whole-genome sequences that allow causative analyses of how bird species diversify. Speciation has reached a final stage when daughter species are reproductively isolated, but this stage is not easily detectable from the phenotype we observe. Culturally transmitted traits such as bird song seem to speed up speciation processes, while another behavioral trait, migration, helps birds to find food resources, and also coincides with higher chances of reaching new, inhabitable areas. In general, distribution is a major key to understanding speciation in birds. Examples of ecological speciation can be found in birds, and the constant interaction of birds with their biotic environment also contributes to evolutionary changes. In the Anthropocene, birds are confronted with rapid changes that are highly threatening for some species. Climate change forces birds to move their ranges, but may also disrupt well-established interactions between climate, vegetation, and food sources. This book brings together various disciplines involved in observing bird species come into existence, modify, and vanish. It is a rich resource for bird enthusiasts who want to understand various processes at the cutting edge of current research in more detail. At the same time it offers students the opportunity to see primarily unconnected, but booming big-data approaches such as genomics and biogeography meet in a topic of broad interest. Lastly, the book enables conservationists to better understand the uncertainties surrounding “species” as entities of protection.

5G Radio Access Network Architecture Sasha Sirotkin. 2020-11-13 Written by an industry insider with state of the art research at their fingertips, this book describes the Radio Access Network (RAN) architecture, starting with currently deployed 4G, followed by the description of 5G

requirements and why re-thinking of the RAN architecture is needed to support these. Based on these considerations, it explains how 5G network architecture, which is currently being defined, is likely to evolve. The aim is not merely to cover relevant standards and technologies as a purely academic exercise (although a significant part of the book will be dedicated to these), but to augment these by practical deployment, to illustrate why the RAN architecture is changing and where it is going. With 5G deployments on the horizon, there is a desire within companies to both re-think the RAN architecture and to change the proprietary nature of the RAN. Correspondingly, there is increased interest in academia, standards bodies and commercial entities involved in the area.
