Confronting Academic Mobbing in Higher Education: Personal Accounts and Administrative Action Crawford, Caroline M. 2019-09-27 Academic mobbing, a bullying behavior that targets a specific faculty member, is growing in higher education. It is a dangerous phenomenon that often attacks competent researchers and scholars who are ethical, outspoken in support of others, and normally reflect professional achievement that is coveted, resented, and perceived as intimidating by lesser faculty and administrators. Therefore, it is important to understand how academic mobbing begins, expands amongst faculty and administrators, is actually supported by faculty and administrators by either proactive efforts or actively ignoring, and results in a weakening of the higher education institution due to the reputation being detrimentally, and many times irreparably, impacted.

Confronting Academic Mobbing in Higher Education: Personal Accounts and Administrative Action is an essential research publication that provides comprehensive research on the development of academic mobbing as a prevalent form of bullying within higher education and seeks to explore solutions and provide support for professionals currently dealing with this phenomenon. Highlighting a range of topics such as ethics, faculty outcomes, and narcissism, this book is ideal for higher education faculty, deans, department chairs, provosts, chancellors, university presidents, rectors, administrators, academicians, researchers, human resources faculty, policymakers, and academic leaders.

Dynamic Assessment of Students' Academic Writing Prithvi N. Shrestha. 2020-09-11 This book explores the application of an innovative assessment approach known as Dynamic Assessment (DA) to academic writing assessment, as developed within the Vygotskian sociocultural theory of learning. DA blends instruction with assessment by targeting and further developing students' Zone of Proximal Development (ZPD). The book presents the application of DA to assessing academic writing by developing a set of DA procedures for academic writing teachers. It further demonstrates the application of Hallidayan Systemic Functional Linguistics (SFL), combined with DA, to track undergraduate business management students' academic writing and conceptual development in distance education. This work extends previous DA studies in three key ways: i) it explicitly focuses on the construction of a macrogenre (whole text) as opposed to investigations of decontextualized language fragments, ii) it offers the first in-depth application of the powerful SFL tool to analyse students' academic writing to track their academic writing trajectory in DA research, and iii) it identifies a range of mediational strategies and consequently expands Poehner's (2005) framework of mediation typologies. *Dynamic Assessment of Students' Academic Writing* will be of great value to academic writing researchers and teachers, language assessment researchers and postgraduate students interested in academic writing, alternative assessment and formative feedback in higher education.

Engineering Design Cory J. Mettler.2023-06-01 Engineering Senior Design is perhaps the course that most resembles what an engineering

professional will be required to do during their career; it is the bridge between the academic classroom and the engineering profession. This textbook will support students as they learn to apply their previously-developed skills to solve a complex engineering problem during a senior-level design course. This textbook follows the design life cycle from project initiation to completion and introduces students to many soft engineering skills, such as communication, scheduling, and technical writing, in the context of an engineering design. Students are instructed how to define an engineering problem with a valid problem statement and requirements document. They will conceptualize a complex solution and divide that solution into manageable subsystems. More importantly, they will be introduced to Project Management techniques that will help students organize workloads, develop functional engineering-teams, and validate solutions, all while increasing the likelihood of a successful completion to the project. Throughout the experience, students are instructed that a well-intentioned solution is not particularly useful unless it can be communicated and documented. To that end, this textbook will help students document their work in a professional manner and to present their ideas to stakeholders in a variety of formal design-reviews. With the support of this textbook, by the end of a student's senior design experience, each individual will be ready to communicate with other engineering professionals, effectively support engineering design-teams, and manage complex project to solve the next generation's engineering challenges.

Advanced Work-based Practice in the Early Years Samantha McMahon, Mary Dyer. 2018-09-30 Inspired by the first-hand experiences of those studying early childhood education and care, this book supports students as they gain advanced knowledge and skills, and embark on the journey from inexperienced student to graduate professional. Bringing together advanced theory, links to research, and illustrative case studies, *Advanced Work-based Practice in the Early Years* enables students to consolidate learning by applying theory to practice and identifying the skills, knowledge and personal traits which will help them succeed as a graduate practitioner. Chapters address a wealth of topical issues relating to both the development of the child and the student's own professional development. Areas of focus include ethical practice, safeguarding and child protection, the voice of the child, the role of the mentor, observation, assessment and the social and cultural factors which may impact on a child's development. Including reflective activities, practical tips, and examples of student experience throughout, this is an essential text for all early years students as they make the transition from academic study to professional practice.

Management Angelo Kinicki, Brian K. Williams. 2010-10-01 Blending scholarship and imaginative writing, ASU business professor Kinicki (of Kreitner/Kinicki *Organizational Behavior* 8e) and writer Williams (of Williams/Sawyer *Using Information Technology* 7e and other college texts) have created a highly readable introductory management text with a truly unique student-centered layout that has been well received by today's visually oriented students. The authors present all basic management concepts and principles in bite-size chunks, 2- to 6-page sections, to optimize student learning and also emphasize the practicality of the subject matter. In addition, instructor and students are given a wealth of classroom-tested resources.

The SWOT Analysis Anja B. Hm, Anja Bhm. 2009-09 Seminar paper from the year 2008 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 1,0, University of Applied Sciences Berlin, language: English, abstract: Marketing offers numerous valuable tools to analyze a company's current situation. Though, most of them have the weakness of providing only a very isolated view that is not suitable for a long-term entrepreneurial decision. The SWOT analysis, however, pursues an integrated approach including key company and environmental variables. The objective is the confrontation of the company's internal strengths and its weaknesses as well as company-external business opportunities and risks in order to generate possible strategic options. The SWOT analysis particularly supports a combined and integrated approach of the current company situation enabling well-balanced and comprehensive decisions. One main benefit is thus the reduction of complexity through the integrated approach, leaving the key factors and strategies as analytical residue. In practice, the SWOT method is a well established tool to analyze business units in larger companies and smaller start-ups in particular during their launch. The SWOT analysis though reveals limited possibilities when analyzing all business units of large companies. For this task other, more holistic, approaches as the share-holder-value concept or the portfolio analysis are appropriate. However, this large field of tools will not be treated in this assignment. The SWOT analysis is though, despite its disadvantages, one of the most important instruments for the internal analysis of a company's situation that - in every case - delivers a pretty comprehensive and resilient foundation for further entrepreneurial decisions and strategic planning.

What To Consider if You're Considering University — Knowing Your Options Bill Morrison, Ken S. Coates. 2014-07-02 Going to university used to be a passport to future success, but that's no longer the case. For some students, it's still a good choice that leads to a successful career after graduation, but for many their degrees are worthless pieces of paper. Choose the wrong program and graduation is more likely to lead to disillusionment and debt than a steady paycheck. Yet parents, guidance counselors, and politicians still push higher education as if it's the only option for building a secure future. In this book, Ken S. Coates and Bill Morrison set out to explore the many educational opportunities and career paths open to Canadian high-school students and those in their twenties. This book is designed to help young adults decide whether to pursue a degree, enrol for skills training, or investigate one of the many other options that are available. In this special excerpt, we take the crucial action of pondering the right future for you, including such steps as 1. The Crossroads: Making Choices That Matter, 2. Know Yourself, 3. The University Option, 4. The College Option, and 5. Polytechnics. This book will help you consider all the options in a clear, rational way.
