Gran Fury .2015 Gran Fury: Read My Lips is the first comprehensive catalogue on the AIDS activist art collective's work from 1987-95. Naming itself after the Plymouth automobile model used by the New York City Police Department, Gran Fury made public projects that were simultaneously scathing, provocative, stylish and often funny. Gran Fury's billboards, postcards, videos, posters and paintings raised public awareness of AIDS and put pressure on politicians, while sparking debate in sites ranging from the Illinois Senate to Italy's tabloid press. Bridging the gap between Situationist site-specific art strategies, postmodern appropriation and Queer activism, the influential work of Gran Fury elucidates the political and collectivist art practices that flourished in 80s/90s downtown New York. This catalogue, designed by Gran Fury, is the first major publication solely devoted to their output. It reprints historical interviews between Gran Fury and Robert Gober, David Deitcher and Douglas Crimp, plus three never-before-published conversations by Gran Fury from late 2010. Read My Lips was created in conjunction with the retrospective curated by Michael Cohen and Gran Fury at NYU.

The Sociology of Hope Henri Desroche.1979 This book focuses on hope as a religious phenomenon, as the inspiration for various kinds of millenarianism, their cults of possession and utopian experiments. Drawing in particular on anthropology and the sociology of religion, the author presents a survey of millenarianism in many cultures, including Judaism, Islam and the early Christians. He also considers more recent millenarianisms such as the Fifth Monarchy Men, the Mormons, the Doukhobors and 'Black Messiah' movements in the Third World. He goes on to indicate the relationships between revolutionary ideologies and religious messianism, and points to the contrast between older movements, which were predominantly religious, and more recent forms of millenarianism, which tend to be social in character. He stresses, however, that both have or had a common aim -- the achievement of a perfect society.

The Shadow Man Geoff Andrews.2015-09-07 James Klugmann appears as a shadowy figure in the legendary history of the Cambridge spies. As both mentor and friend to Donald Maclean, Guy Burgess and others, Klugmann was the man who manipulated promising recruits deemed ripe for conversion to the communist cause. This perception of him was reinforced following the release of his MI5 file and the disclosure of Soviet intelligence files in Moscow, which revealed he played the key part in the recruitment of John Cairncross, the 'fifth man', as well as his pivotal war-time role in the Special Operations Executive in shifting Churchill and the allies to support Tito and the communist partisans in Yugoslavia. In this book, Geoff Andrews reveals Klugmann's story in full for the first time, uncovering the motivations, conflicts and illusions of those drawn into the world of communism and the sacrifices they made on its behalf.

Drawing France Joel E. Vessels.2010-09-03 In France, Belgium, and other Francophone countries, comic strips---called bande dessinée or BD in French---have long been considered a major art form capable of addressing a host of contemporary issues. Among French-speaking intelligentsia, graphic narratives were deemed worthy of canonization and critical study decades before the academy and the press in the United States embraced comics. The place that BD holds today, however, belies the contentious political route the art form has traveled. In *Drawing France: French Comics and the Republic*, author Joel E. Vessels examines the trek of BD from it being considered a fomenter of rebellion, to a medium suitable only for semi-literates, to an impediment to education, and most recently to an art capable of addressing social concerns in mainstream culture. In the mid-1800s, alarmists feared political caricatures might incite the ire of an illiterate working class. To counter

this notion, proponents yoked the art to a particular articulation of Frenchness based on literacy and reason. With the post-World War II economic upswing, French consumers saw BD as a way to navigate the changes brought by modernization. After bande dessinée came to be understood as a compass for the masses, the government, especially François Mitterrand's administration, brought comics increasingly into official culture. Vessels argues that BD are central to the formation of France's self-image and a self-awareness of what it means to be French.

French Rugby Football Philip Dine. 2001-07-01 As France's oldest team sport, rugby football has throughout its 125-year history reflected major changes in French society. This book analyzes for the first time the complex variety of motives that have led the French to adopt and remake this rather unlikely British sport in their own image. A major site for the construction of masculine, class-based regional and national identities, France's tradition of 'Champagne rugby' continues to be as subject to dramatic upheavals as the society that produced it. The game's precocious professionalism and endemic violence have not infrequently caused the French to be cast as international pariahs. Such isolation, exacerbated by internal politics, has led the French not only to encourage the extension of the sport beyond its British imperial base (into Italy and Romania, for instance), but also to engage in some uncomfortable tactical alliances, most obviously with apartheid South Africa. Taking his analysis both on and off the field, the author tackles these issues and much more: the relationship of sport and the state (including particularly the Vichy period and the period under de Gaulle); professionalization; the persistence of colonial and postcolonial structures (including the role of ethnic minorities); and gender issues - especially masculine identities. At the same time he links the evolution of the sport to the broader context of French socio-economic, political and cultural history. This book will be essential reading for anyone interested in the cultural analysis of sport or French popular culture.

Geographies of Peace Fiona McConnell, Nick Megoran, Philippa Williams. 2014-06-20 From handshakes on the White House lawn to Picasso's iconic dove of peace, the images and stereotypes of peace are powerful, widespread and easily recognizable. Yet if we try to offer a concise definition of peace it is altogether a more complicated exercise. Not only is peace an emotive and value-laden concept, it is also abstract, ambiguous and seemingly inextricably tied to its antithesis: war. And it is war and violence that have been so compellingly studied within critical geography in recent years. This volume offers an attempt to redress that balance, and to think more expansively and critically about what peace means and what geographies of peace may entail. The editors begin with an examination of critical approaches to peace in other disciplines and a helpful genealogy of peace studies within geography. The book is then divided into three sections. The opening section examines how the idea of peace may be variously constructed and interpreted according to different sites and scales. The chapters in the second section explore a remarkably wide range of techniques of peacemaking. This widens the discussion from the archetypal image of top-down, diplomatic state-led initiatives to imperial boundary making practices, grassroots cultural identity assertion, boycotts, self-immolation, ex-paramilitary community activism, and 'protective accompaniment'. The

final section shifts the scale and focus to everyday personal relations and a range of practices around the concept of coexistence. In their concluding chapter the editors spell out some of the key questions that they believe a geography of peace must address: What spatial factors have facilitated the success or precipitated the failure of some peace movements or diplomatic negotiations? Why are some ideologies productive of violence in some places but co-operation in others? How have some communities been better able to deal with religious, racial, cultural and class conflict than others? How have creative approaches to sharing sovereignty mitigated or transformed territorial disputes that once seemed intractable? Geographies of Peace is the first book wholly devoted to exploring the geography of peace. Drawing on both recent advances in social and political theory and detailed empirical research covering four continents, it makes a significant intervention into current debates about peace and violence.

Rebalancing Society Henry Mintzberg. 2015-01-05 Enough of the imbalance that is causing the degradation of our environment, the demise of our democracies, and the denigration of ourselves. Enough of the pendulum politics of left and right and paralysis in the political center. We require an unprecedented form of radical renewal. In this book Henry Mintzberg offers a new understanding of the root of our current crisis and a strategy for restoring the balance so vital to the survival of our progeny and our planet. With the collapse of the communist regimes of Eastern Europe, Western pundits declared that capitalism had triumphed. They were wrong—balance triumphed. A healthy society balances a public sector of respected governments, a private sector of responsible businesses, and a plural sector of robust communities. Communism collapsed under the weight of its overbearing public sector. Now the “liberal democracies” are threatened—socially, politically, even economically—by the unchecked excesses of the private sector. Radical renewal will have to begin in the plural sector, which alone has the inclination and the independence to challenge unacceptable practices and develop better ones. Too many governments have been co-opted by the private sector. And corporate social responsibility can't compensate for the corporate social irresponsibility we see around us “They” won't do it. We shall have to do it, each of us and all of us, not as passive “human resources,” but as resourceful human beings. Tom Paine wrote in 1776, “We have it in our power to begin the world over again.” He was right then. Can we be right again now? Can we afford not to be?

Bedtime Stories for Managers Henry Mintzberg. 2019-02-05 If you're like most managers and things keep you up at night, now you can turn to a book that's designed especially for you! But you won't find talking rabbits or princesses here. (There is a cow, but it doesn't jump.) Henry Mintzberg has culled forty-two of the best posts from his widely read blog and turned them into a deceptively light, sneakily serious compendium of sometimes heretical reflections on management. The moral here is this: managers need to leave their castles and find out what's actually going on in their kingdoms. And like real bedtime stories, these essays have metaphors galore. So prepare to grow strategies like weeds and organize like a cow. Discover the maestro myth of managing, find the soft underbelly of hard data, and learn why downsizing is bloodletting and your board should be a bee. Mintzberg writes, “Just try not to be outraged by anything you read, because some of my most outrageous ideas turn out to be my best. They just take a while to become obvious.”

No Discouragement A.H. Halsey, foreword Roy Hattersley. 1996-11-13 This is the autobiography of a working-class boy who became an Oxford professor. A.H. Halsey was born in Kentish Town, London, in 1923 - a railway child in a large clan. The family moved in 1926 to Rutland and then to Northamptonshire because the father had been wounded in the Great War. Halsey 'won the scholarship' to Kettering Grammar School in 1933, left school at 16, went into the RAF as a pilot cadet. The metaphor of travel through time and space is maintained throughout this autobiography. The story begins with daily walks past canal boats in Oxford, flashes to the Pacific to Hong Kong and China, and then to a glimpse of death in the John Radcliffe Hospital, promising to explain the whole journey from a council housing estate to a professorial chair at Oxford.
