The Palgrave Handbook of Critical Menstruation Studies Chris Bobel, Inga T. Winkler, Breanne Fahs, Katie Ann Hasson, Elizabeth Arveda Kissling, Tomi-Ann Roberts. 2020-07-24 This open access handbook, the first of its kind, provides a comprehensive and carefully curated multidisciplinary and genre-spanning view of the state of the field of Critical Menstruation Studies, opening up new directions in research and advocacy. It is animated by the central question: “what new lines of inquiry are possible when we center our attention on menstrual health and politics across the life course?” The chapters—diverse in content, form and perspective—establish Critical Menstruation Studies as a potent lens that reveals, complicates and unpacks inequalities across biological, social, cultural and historical dimensions. This handbook is an unmatched resource for researchers, policy makers, practitioners, and activists new to and already familiar with the field as it rapidly develops and expands.

Assessment in Applied Sport Psychology Jim Taylor. 2017-08-09 Assessment in Applied Sport Psychology is a comprehensive resource that offers both students and professionals the opportunity to hone their skills to help their clients, starting with the initial consultation and lasting through a long-term relationship. In this text, Jim Taylor and a team of sport psychology experts help practitioners gain a deep understanding of assessment in order to build trusting relationships and

effective intervention plans that address the needs and goals of their clients. Part I of *Assessment in Applied Sport Psychology* covers topics such as the importance of assessment, the appropriateness of qualitative and quantitative assessment, ethical issues that can arise from assessment, and the impact of diversity in the use of assessment. Part II introduces readers to six ways that consultants can assess athletes: mental health screening, personality tests, sport-specific objective measures, interviewing, observation, and applied psychophysiology. Chapters in this section explain the strengths and weaknesses of each approach—for example, when traditional pencil-and-paper and observation approaches may be more appropriate than interviewing—and offer consultants a more complete toolbox of assessments to use when working with athletes. Part III addresses special issues, such as career transition, talent identification, and sport injury and rehabilitation. One chapter is devoted to the hot-button issue of sport-related concussions. Tables at the end of most chapters in parts II and III contain invaluable information about each of the assessment tools described, including its purpose, publication details, and how to obtain it. Chapters also contain sidebars that provide sample scenarios, recommended approaches, and exercises to use with clients. *Assessment in Applied Sport Psychology* works toward two main goals. The first is to help consultants gain a complete understanding of their clients through the use of a broad range of assessment tools. The second is to show consultants how to ethically and effectively use assessments to develop a comprehensive understanding of their clients, thus enabling them to assist their clients in achieving their competitive and personal goals.

Infection Control in the Intensive Care Unit Hendrick K.F. van Saene, Luciano Silvestri, Miguel A. de la Cal, Antonino Gullo. 2011-12-26 Intensive care is a rapidly changing area of medicine, and after four years from the 2nd edition the volume editors and authors have deemed necessary to update it.

In the recent years, in fact, five new randomised controlled trials and five new meta-analyses demonstrate that selective decontamination of the digestive tract [SDD] is an antimicrobial prophylaxis to prevent severe infections of not only lower airways but also of blood. Additionally, SDD has been shown to reduce inflammation including multiple organ failure and mortality. An intriguing observation is the evidence that SDD using parenteral and enteral antimicrobials reduces rather than increases antimicrobial resistance. Moreover, a new chapter on microcirculation had been added. The volume will be an invaluable tool for all those requiring in depth knowledge in the ever expanding field of infection control.

A Nuts-and-bolts Approach to Teaching Nursing Victoria Schoolcraft, Jeanne Novotny. 2000 This small book is written in a very clear and succinct manner - allowing for a great deal of content to be presented in a rather small space. Slow Violence and the Environmentalism of the Poor Rob Nixon.2011-06-01 The violence wrought by climate change, toxic drift, deforestation, oil spills, and the environmental aftermath of war takes place gradually and often invisibly. Using the innovative concept of slow violence to describe these threats, Rob Nixon focuses on the inattention we have paid to the attritional lethality of many environmental crises, in contrast with the sensational, spectacle-driven messaging that impels public activism today. Slow violence, because it is so readily ignored by a hard-charging capitalism, exacerbates the vulnerability of ecosystems and of people who are poor, disempowered, and often involuntarily displaced, while fueling social conflicts that arise from desperation as life-sustaining conditions erode. In a book of extraordinary scope, Nixon examines a cluster of writer-activists affiliated with the environmentalism of the poor in the global South. By approaching environmental justice literature from this transnational perspective, he exposes the limitations of the national and local frames that dominate environmental writing. And by skillfully illuminating the strategies these writer-activists deploy to give dramatic visibility to environmental emergencies, Nixon invites his readers to engage with some of the most pressing challenges of our time.

Tattooed Skin and Health J. Serup,N. Kluger,W. Bäumlner.2015-03-26 With about 10-20% of the adult population in Europe being tattooed, there is a strong demand for publications discussing the various issues related to tattooed skin and health. Until now, only a few scientific studies on tattooing have been published. This book discusses different aspects of the various medical risks

associated with tattoos, such as allergic reactions from red tattoos, papulo-nodular reactions from black tattoos as well as technical and psycho-social complications, in addition to bacterial and viral infections. Further sections are dedicated to the composition of tattoo inks, and a case is made for the urgent introduction of national and international regulations. Distinguished authors, all specialists in their particular fields, have contributed to this publication which provides a comprehensive view of the health implications associated with tattooing. The book covers a broad range of topics that will be of interest to clinicians and nursing staff, toxicologists and regulators as well as laser surgeons who often face the challenge of having to remove tattoos, professional tattooists and producers of tattoo ink.

2017 National Survey on the First-year Experience Dallin George Young.2019-06-30 The first-year seminar continues to be a common structure for supporting student success in higher education, yet it represents only one of many first-year programs. With this in mind, the 2017 National Survey on The First-Year Experience marks a change from previous surveys administered by the National Resource Center for The First-Year Experience and Students in Transition by exploring a broad range of initiatives designed to support success in the first college year. Recognizing that individual first-year programs are connected to extensive bodies of literature and practice, authors representing diverse professional networks focused on college student success contribute their voices to the analyses and presentation of results. The report includes an overview of institutional attention to the first year and the prevalence of and connections between first-year programs, a review of the results relating to selected first-year programs, and implications for practice and future research.

Measuring Bullying Victimization, Perpetration, and Bystander Experiences Merle E.

Hamburger,Kathleen C. Basile,Alana M. Vivolo.2014-05-12 Bullying, particularly among school-age children, is a major public health problem both domestically and internationally (Nansel, Craig, Overpeck, Saluja, & Ruan, 2004). Current estimates suggest that nearly 30% of American adolescents reported at least moderate bullying experiences as the bully, the victim, or both. Specifically, of a nationally representative sample of adolescents, 13% reported being a bully, 11% reported being a victim of bullying, and 6% reported being both a bully and a victim (Nansel et al., 2001).

Pursuing Intersectionality, Unsettling Dominant Imaginaries Vivian M. May.2015-01-09 Pursuing Intersectionality, Unsettling Dominant Imaginaries offers a sustained, interdisciplinary exploration of intersectional ideas, histories, and practices that no other text does. Deftly synthesizing much of the existing literatures on intersectionality, one of the most significant theoretical and political precepts of our time, May invites us to confront a disconcerting problem: though intersectionality is widely known, acclaimed, and applied, it is often construed in ways that depoliticize, undercut, or even violate its most basic premises. May cogently demonstrates how intersectionality has been repeatedly resisted, misunderstood, and misapplied: provocatively, she shows the degree to which intersectionality is often undone or undermined by supporters and critics alike. A clarion call to

engage intersectionality's radical ideas, histories, and justice orientations more meaningfully, *Pursuing Intersectionality* answers the basic questions surrounding intersectionality, attends to its historical roots in Black feminist theory and politics, and offers insights and strategies from across the disciplines for bracketing dominant logics and for orienting toward intersectional dispositions and practices.

Generation Z Goes to College Corey Seemiller, Meghan Grace. 2016-01-19 Say Hello to Your Incoming Class—They're Not Millennials Anymore Generation Z is rapidly replacing Millennials on college campuses. Those born from 1995 through 2010 have different motivations, learning styles, characteristics, skill sets, and social concerns than previous generations. Unlike Millennials, Generation Z students grew up in a recession and are under no illusions about their prospects for employment after college. While skeptical about the cost and value of higher education, they are also entrepreneurial, innovative, and independent learners concerned with effecting social change. Understanding Generation Z's mindset and goals is paramount to supporting, developing, and educating them through higher education. *Generation Z Goes to College* showcases findings from an in-depth study of over 1,100 Generation Z college students from 15 vastly different U.S. higher education institutions as well as additional studies from youth, market, and education research related to this generation. Authors Corey Seemiller and Meghan Grace provide interpretations, implications, and recommendations for program, process, and curriculum changes that will maximize the educational impact on Generation Z students. *Generation Z Goes to College* is the first book on how this up-and-coming generation will change higher education.

Maternity and Paternity at Work Laura Addati, International Labour Office, Naomi Cassirer, Katherine Gilchrist. 2014-05-13 This report provides a picture of where we stand and what we have learned so far about maternity and paternity rights across the world. It offers a rich international comparative analysis of law and practice relating to maternity protection at work in 185 countries and territories, comprising leave, cash benefits, employment protection and non-discrimination, health protection, breastfeeding arrangements at work and childcare. Expanding on previous editions, it is based on an extensive set of new legal and statistical indicators, including coverage in law and in practice of paid maternity leave as well as statutory provision of paternity and parental leave and their evolution

over the last 20 years. The report also takes account of the recent economic crisis and austerity measures. It shows how well national laws and practice conform to the ILO Maternity Protection Convention, 2000 (No. 183), its accompanying Recommendation (No. 191) and the Workers with Family Responsibilities Convention, 1981 (No. 156), and offers guidance on policy design and implementation. This report shows that a majority of countries have established legislation to protect and support maternity and paternity at work, even if those provisions do not always meet the ILO standards. One of the persistent challenges is the effective implementation of legislation, to ensure that all workers are able to benefit from these essential labour rights.

The RealAge (R) Makeover Michael F. Roizen. 2004-04-06 Why not live at 60 feeling like you did at 35? Thousands of Americans are younger today than they were five years ago. How is that possible? By following the specific recommendations that reverse aging in Dr. Michael Roizen's bestselling book RealAge®: Are You As Young As You Can Be?, people who were previously much older than their chronological age have now taken up to twenty-nine years off their biological ages. Since that first publication, more than 10 million people have taken the RealAge® test in one form or another, and thousands of people have thanked Dr. Roizen for helping them make simple changes in their lives -- changes that have made them healthier, younger, and more vibrant. In the last several years, Dr. Roizen and his team have learned much more about the aging process. The RealAge® Makeover makes sense of recent critical medical findings -- important new research on inflammation in your arteries, stress reduction, chronic disease management, hormone replacement therapy, and other choices you can make to keep aging at a distance. You'll also find the latest on vitamins and other supplements, which are age-reducing, which are aging, and which ones to avoid if you are taking certain medications. Roizen then offers more than seventy ways to reduce or even prevent 80 percent of the diseases that make you feel older. For example, coffee or the right kind of chocolate in moderate amounts can help reduce inflammation, preserving your arteries, joints, and memory. But the wrong choice can lead to needless aging and loss of energy, such as taking too much Vitamin

A. And The RealAge® Makeover tells you how much (in years) each choice is worth so you can make the choices that are meaningful to you. More potent than any statistic or finding are the personal stories interwoven throughout -- success stories from readers who followed the RealAge program, became biologically younger, and are living happier, healthier lives. With this book, readers have more opportunity than ever to turn back their biological clock to look, feel, and actually be many years younger. Join the RealAge® Revolution and give yourself a RealAge® Makeover!

Present absences Linnea Bodén.2016-08-23 The aim of the study is to explore how school absenteeism as a material-discursive phenomenon is produced in the practices of humans and nonhumans, when absences and presences are registered and managed through digital technologies. How is the phenomenon of school absenteeism produced when absences and presences are digitally registered? How does the phenomenon of school absenteeism emerge when both human and nonhuman entanglements are included in the apparatuses of knowing? Through a posthumanist approach, the study engages empirically with two types of software for the registration of absences and presences at three Swedish schools. The results show that digital registration blurs the division between absences and presences, and queers what is absent and what is present. Digital registration produces school absenteeism as a phenomenon for all students every day, and at the same time as mainly for the students who are present most of the time. A conclusion that is drawn from the study is that digital registration makes absences present, by the visualization and performative repetition of the registration. The study points to how school absenteeism is always 'in the making', and proposes the concept of school absenteeing as a productive way to open up new possibilities in relation to students' absences.

Closing the School Discipline Gap Daniel J. Losen. 2015 Educators remove over 3.45 million students from school annually for disciplinary reasons, despite strong evidence that school suspension policies are harmful to students. The research presented in this volume demonstrates that disciplinary policies and practices that schools control directly exacerbate today's profound inequities in educational opportunity and outcomes. Part I explores how suspensions flow along the lines of race, gender, and disability status. Part II examines potential remedies that show great promise, including a district-wide approach in Cleveland, Ohio, aimed at social and emotional

learning strategies. Closing the School Discipline Gap is a call for action that focuses on an area in which public schools can and should make powerful improvements, in a relatively short period of time. Contributors include Robert Balfanz, Jamilia Blake, Dewey Cornell, Jeremy D. Finn, Thalia González, Anne Gregory, Daniel J. Losen, David M. Osher, Russell J. Skiba, Ivory A. Toldson “Closing the School Discipline Gap can make an enormous difference in reducing disciplinary exclusions across the country. This book not only exposes unsound practices and their disparate impact on the historically disadvantaged, but provides educators, policymakers, and community advocates with an array of remedies that are proven effective or hold great promise. Educators, communities, and students alike can benefit from the promising interventions and well-grounded recommendations.” —Linda Darling-Hammond, Charles E. Ducommun Professor of Education, Stanford University “For over four decades school discipline policies and practices in too many places have pushed children out of school, especially children of color. Closing the School Discipline Gap shows that adults have the power—and responsibility—to change school climates to better meet the needs of children. This volume is a call to action for policymakers, educators, parents, and students.” —Marian Wright Edelman, president, Children’s Defense Fund

A New Culture of Learning Douglas Thomas,John Seely Brown.2011 The twenty-first century is a

world in constant change. In *A New Culture of Learning*, Doug Thomas and John Seely Brown pursue an understanding of how the forces of change, and emerging waves of interest associated with these forces, inspire and invite us to imagine a future of learning that is as powerful as it is optimistic. Typically, when we think of culture, we think of an existing, stable entity that changes and evolves over long periods of time. In *A New Culture*, Thomas and Brown explore a second sense of culture, one that responds to its surroundings organically. It not only adapts, it integrates change into its process as one of its environmental variables. By exploring play, innovation, and the cultivation of the imagination as cornerstones of learning, the authors create a vision of learning for the future that is achievable, scalable and one that grows along with the technology that fosters it and the people who engage with it. The result is a new form of culture in which knowledge is seen as fluid and evolving, the personal is both enhanced and refined in relation to the collective, and the ability to manage, negotiate and participate in the world is governed by the play of the imagination. Replete with stories, this is a book that looks at the challenges that our education and learning environments face in a fresh way. PRAISE FOR A NEW CULTURE OF LEARNING A provocative and extremely important new paradigm of a 'culture of learning', appropriate for a world characterized by continual change. This is a must read for anyone interested in the future of education. James J. Duderstadt, President Emeritus, University of Michigan Thomas and Brown are the John Dewey of the digital age. Cathy Davidson, Professor of Interdisciplinary Studies, Duke University *A New Culture of Learning* may provide for the digital media and learning movement what Thomas Paine's *Common Sense* did for the colonists during the American Revolution- a straightforward, direct explanation of what we are fighting for and what we are fighting against. Henry Jenkins, Provost's Professor, USC *A New Culture of Learning* is at once persuasive and optimistic - a combination that

is all too rare, but that flows directly from its authors' insights about learning in the digital age. Pearls of wisdom leap from almost every page. Paul Courant, Dean of Libraries, University of Michigan Brilliant. Insightful. Revolutionary. Marcia Conner, author of *The New Social Learning* Douglas Thomas and John Seely Brown portray the new world of learning gracefully, vividly, and convincingly. Howard Gardner, Professor, Harvard Graduate School of Education Thomas and Brown make it clear that education is too often a mechanistic, solo activity delivered to the young. It doesn't have to be that way-learning can be a messy, social, playful, embedded, constant activity. We would do well to listen to their message. Clay Shirky, author of *Cognitive Surplus* Anyone who fears, as I do, that today's public schools are dangerously close to being irrelevant must read this book. The authors provide a road map-and a lifeline-showing how schools can prosper under the most difficult conditions. It is a welcome departure from all the school bashing. John Merrow, Education Correspondent, PBS NewsHour American education is at a crossroads. By illuminating how play helps to transform both information networks and experimentation, and how collective inquiry unleashes the power of imagination, *A New Culture of Learning* provides an irresistible path to the future. Joel Myerson, Director, Forum for the Future of Higher Education.

Long-Term Survivorship Care After Cancer Treatment National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Care Services, National Cancer Policy Forum. 2018-08-09 The 2006 Institute of Medicine (IOM) consensus study report *From Cancer Patient to Cancer Survivor: Lost in Transition* made recommendations to improve the quality of care that cancer survivors receive, in recognition that cancer survivors are at risk for significant physical, psychosocial, and financial repercussions from cancer and its treatment. Since then, efforts to recognize and address the unique needs of cancer survivors have increased, including an emphasis

on improving the evidence base for cancer survivorship care and identifying best practices in the delivery of high-quality cancer survivorship care. To examine progress in cancer survivorship care since the Lost in Transition report, the National Cancer Policy Forum of the National Academies of Sciences, Engineering, and Medicine held a workshop in July 2017, in Washington, DC. Workshop participants highlighted potential opportunities to improve the planning, management, and delivery of cancer survivorship care. This publication summarizes the presentations and discussions from the workshop.

The Politics of Performance Funding for Higher Education Kevin J. Dougherty, Rebecca S. Natow. 2015-05-15 One of the striking ways in which state governments have pursued better performance in public higher education is through the use of performance funding. Performance funding involves tying state support directly to institutional performance on specific outcomes such as rates of graduation and job placement. The principal rationale for performance funding has been that the introduction of market-like forces will prod institutions to become more efficient, delivering more bang for the buck. Kevin Dougherty, an expert on state performance funding, finds its development puzzling. First, despite the great interest in it, only half the states have ever adopted performance funding for higher education. Moreover, of the states that did adopt performance funding, over half later dropped it. Finally, in the states that have retained performance funding over a long period of time, their programs have undergone considerable changes in the amount of state funding they devote to performance funding and in the content of the indicators they use to allocate that funding. In spite of this, performance funding continues to attract interest as a way of improving educational outcomes. This book, based on an extensive ten-state study, aims to shed light on the social and political factors affecting the origins, evolution, and demise of these programs--
