Regretting Motherhood Orna Donath.2017-07-11 Women who opt not to be mothers are frequently warned that they will regret their decision later in life, yet we rarely talk about the possibility that the opposite might also be true—that women who have children might regret it. Drawing on years of research interviewing women from a variety of socioeconomic, educational, and professional backgrounds, sociologist Orna Donath treats regret as a feminist issue: as regret marks the road not taken, we need to consider whether alternative paths for women currently are blocked off. She asks that we pay attention to what is forbidden by rules governing motherhood, time, and emotion, including the cultural assumption that motherhood is a “natural” role for women—for the sake of all women, not just those who regret becoming mothers. If we are disturbed by the idea that a woman might regret becoming a mother, Donath says, our response should not be to silence and shame these women; rather, we need to ask honest and difficult questions about how society pushes women into motherhood and why those who reconsider it are still seen as a danger to the status quo. Groundbreaking, thoughtful, and provocative, this is an especially needed book in our current political climate, as women's reproductive rights continue to be at the forefront of national debates.

Faced with fertility obstacles, she quickly became an expert. After nine rounds of IVF, four miscarriages, three acupuncturists, two rabbis, and one reproductive immunologist, she finally became a mother. And she wrote about it all for the New York Times Motherlode blog in her “Fertility Diary” column. Now, Amy has written the book she wishes she’d had when she was trying to get pregnant. With advice from medical experts as well as real women, she outlines your options every step of the way, from questions you should ask to advice on getting your mother-in-law to mind her own beeswax. In this comprehensive road map to infertility, you’ll find topics such as: • whether to freeze your eggs • finding (and affording) a clinic • what to expect during your first IVF cycle • baby envy—aka it’s okay to skip your friend’s shower • whether the alternative route—acupuncture, herbs, supplements—is for you • helpful tips, charts, and more! Empowering, compassionate, and

down-to-earth, *The Trying Game* will show you what to expect when you're not expecting with heart and humanity when you need it the most.

treatment, or you're in the middle of an IVF cycle, you may find yourself in unfamiliar territory and it can be easy to feel bogged down by the science, the statistics, the success stories and, most worryingly, stories of unsuccessful IVF treatment. Written by Silvia Dunn, a writer with personal experience of both successful and unsuccessful IVF treatment, 'How to Cope with IVF' gives a jargon-free breakdown of the IVF process and recommends coping strategies for each stage, from preparing emotionally and physically for your IVF cycle through to coping with the results. This book also explains how to enhance your nutrition by eating a variety of superfoods known for boosting fertility, strengthening and repairing immune systems and keeping bodies strong, happy and healthy. It also recommends simple fertility-boosting juices you can add to your daily routine before, during and after IVF. It also arms you with ways in which you can cope with IVF in a healthy and positive way, from relaxation and meditation exercises through to pampering yourself using natural products to manage any physical side effects of fertility drugs. Whatever your fears, concerns, doubts, misconceptions or worries may be, this book will give you hope: hope that you can and will emotionally and physically survive IVF and hope for the future, no matter what happens.

treatments to support IVF, such as acupuncture and fertility massage, Advice on how to keep it together when the hormonal medication is trying to drag you down, Fertility friendly recipes and a collection of 125 valuable tips on everything from administering shots, to maintaining your relationship, nutrition and much more - both lovingly put together by another IVF veteran, Rachel Campbell of Sprout & Co. Bianca Smith has undergone 8 IVF embryo transfers using her own and donor eggs. Amongst other supporting procedures, she has had a hysteroscopy, laparoscopy, intralipid infusions, endo scratch, embryo glue, assisted hatching, and embryoscope, all of which she describes in detail, including what they are, who should have them and what they involve. All the information in this IVF guide is based on Bianca's personal research, experience and interviews with other women who are or have been through fertility treatments. It does not claim to have any medical endorsement, but is written in a casual, 'girlfriend to girlfriend' manner, and will be a great pocket companion throughout your IVF journey. From the author... If we had known even half the things we know today, we would have been so much better prepared for what was coming. A resource book would have been a lighthouse while I sailed through the dark and so I put together this guide, to equip other individuals or couples embarking on and also still in the middle of this journey with at least the basic knowledge they need to navigate the rough seas of fertility treatments and IVF. The information in this book is only a fraction of all the information out there. All information is an attempt to bring together everything that I have learnt along the way to make life a little easier for you on your journey than it was for me and I sincerely hope it will do exactly that for you. I feel positive that with this guide, much of your initial stress in knowing where to start and what route to pursue will be eliminated.
