Anglicanus Ortus Henry (of Huntingdon), Henry of Huntingdon.2012 Henry, archdeacon of Huntingdon, England (ca 1088-ca 1154) has been admired for centuries as the author of the monumental *Historia Anglorum*. The recent discovery of the *Anglicanus ortus* opens a new window onto this important English author as well as onto the uses of poetry and the knowledge of medicine in medieval England. Written entirely in Latin verse, the *Anglicanus ortus* describes the medicinal uses of 160 different herbs, spices, and vegetables. Henry drew on centuries of learned medicine to compose this work, employing the medical knowledge of ancient authors like Pliny the Elder and Dioscorides and of medieval scholars like Walahfrid Strabo, Macer Floridus and Constantine the African. This critical edition is based on the five extant manuscripts and includes a complete English translation on facing pages and a commentary on every poem. An extensive introduction describes the manuscript witnesses in detail, examines Henry's poetic skill and use of sources, and establishes the place of the *Anglicanus ortus* in a pivotal era in the history of medicine and natural philosophy.

Aristotle, Metaphysics Lambda .2019-06-27 The Clarendon Aristotle Series is designed for both students and professionals. It provides accurate translations of selected Aristotelian texts, accompanied by incisive commentaries that focus on philosophical problems and issues. The volumes in the series have been widely welcomed and favourably reviewed. Important new titles are being added to the series, and a number of well-established volumes are being reissued with revisions and/or supplementary material. Lindsay Judson provides a rigorous translation of the twelfth book (Lambda) of Aristotle's *Metaphysics* and a detailed philosophical commentary. Lambda is an outline for a much more extended work in metaphysics - or more accurately, since Aristotle does not use the term 'metaphysics', in what he calls 'first philosophy', the inquiry into 'the principles and causes of all things'. Aristotle discusses the principles of natural and changeable substances, which include form, matter, privation and efficient cause; he argues that principles of this sort are, at least by analogy, the principles of non-substantial items as well. In the second half of the book he turns to unchanging, immaterial substances, first arguing that there must be at least one such substance, which he calls 'God', to act as the 'prime unmoved mover', the source of all change in the natural world. He then explores the nature of God and its activity of thinking (it is the fullest exposition there is of Aristotle's extraordinary and very difficult conception of his supreme god, its goodness, and its activity), and in the course of arguing for a plurality of immaterial unmoved movers he provides important evidence for the leading astronomical theory of his day (by Eudoxus) and for his own highly impressive cosmology. The commentary on each chapter or pair of chapters is preceded by a Prologue, which sets the scene for Aristotle's often very compressed discussion, and explores the general issues raised by that discussion. The Introduction discusses the place of Lambda in the *Metaphysics*, and offers a solution to the problem of the unity of Aristotle's project in the book.

Teaching Comparative Education Patricia K. Kubow, Allison H. Blosser.2016-03-01 With chapter contributions from seminal scholars in the field of comparative and international education (CIE), this book examines the ways in which comparative education is being taught, or advocated for, in teacher education within higher education institutions worldwide. A particular concern raised by the authors - in locations as diverse as Germany, Singapore, the United Kingdom, and the United States - is the utilitarian approach in teacher education, where that which is valued is that which is measurable. The implications for what and how CIE should be taught is examined in light of the ideological, sociocultural, political, and economic trends influencing education worldwide. The main questions posed in the book include: What are the challenges and opportunities for CIE, and its practice, now and in the future?

Symbolic Interactionism: The Basics Charles Quist-Adade.2018-04-30 This book is a survey of Symbolic Interactionism. In thirteen short chapters, it traces the history, the social philosophical roots, the founders, "movers and shakers" and evolution of the theory. Symbolic Interactionism: The Basics takes the reader along the exciting, but tortuous journey of the theory and explores both the meta-theoretical and mini-theoretical roots and branches of the theory. Symbolic interactionism or sociological social psychology traces its roots to the works of United States sociologists George Herbert Mead, Charles Horton Cooley, and Herbert Blumer, and a Canadian sociologist, Erving Goffman; Other influences are Harold Garfinkel's Ethnomethodology and Austrian-American Alfred Schutz's study of Phenomenology. Symbolic Interactionism: Basics explores the philosophical sources of symbolic interactionism, including pragmatism, social behaviorism, and neo-Hegelianism. The intellectual origins of symbolic interactions can be attributed to the works of William James, George Simmel, John Dewey, Max Weber, and George Herbert Mead. Mead is believed to be the founder of the theory, although he did not publish any academic work on the paradigm. The book highlights the works of the intellectual heirs of symbolic interactionism— Herbert Blumer, Mead's former student, who was instrumental in publishing the lectures his former professor posthumously with the title *Symbolic Interactionism*, Erving Goffman and Robert Park.

Reinardus Van den Abeele Baudouin, Baudouin Abeele, Richard Trachsler, Paul Wackers.2011-12-23 Reinardus aims to promote comparative research in the fields of medieval comic, satirical, didactic, and allegorical literature, with emphasis on beast epic, fable and fabliau, including sources,

influences and later developments into the modern period. The methods and critical interpretations it offers are as wide-ranging as is its subject matter, since it considers discussion and the coexistence of conflicting views as more important than the defence of a specific methodological point of view.

To My Arrogant Boss J. S. Cooper.2021-01-01 To Mr. Tate Howard, You are quite possibly the most infuriating, annoying and grumpy man I've ever met in my life. I know you think that you're God's gift to women, but I have a secret to let you in on: you're not. You're God's gift to yourself. Get over your wanna-be cool surfer self and grow up. I thought it was time that someone addressed your big head and told you straight to your face that you're not all that. Just because you have an Ivy league education doesn't mean you're the smartest man in the world. In fact, I'm not even sure if you would have gotten in if you didn't have rich parents. Yes, I went there. Every woman doesn't want to sleep with you and I'm sure you're not even good in bed. And I'm someone that would know. From, Your Secret Not Admirer

Death Waits in the Dark Mark Edward Langley.2020-08-04 It took all of thirty seconds for two shots to bring the world of Margaret Tabaaha crashing down around her. After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the boys' killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the rest of his life.

Pragmatics Jacob L. Mey.2001-02-08 This is a succinct introduction to the rapidly developing field of pragmatics - the study of language from the point of view of its users, of the choices they make, the constraints they encounter in using language in social interaction, and the effects their use of language has on other participants in communication. The book reviews the work of Austin, Grice, Searle, Levinson and others, examining the implicit meaning of everyday conversation, as well as the social importance and determination of our individually performed 'pragmatic acts'. In this updated and thoroughly revised edition, Mey extends the treatment of metapragmatic phenomena to what is often referred to, in the US anthropological-pragmatic tradition, by the term 'indexing'. He has also given full-fledged treatment to his theory of Pragmatic Acts (including 'embodiment'), and has included new chapters on literary pragmatics and pragmatics across cultures. The final chapter on social aspects of pragmatics covers extensive recent research in what has come to be named the 'critical' orientation of the discipline.

Romans and Blacks (Routledge Revivals) Lloyd A. Thompson.2015-06-10 Roman literature seems to provide plenty of instances of contempt towards foreign or black individuals, but it is an untenable assumption that such distaste amounts to a racist attitude, particularly considering how elusive the definitions of 'race' and 'racism' are. Making extensive use of developments in sociological theory and psychology, *Romans and Blacks*, first published in 1989, presents an innovative and illuminating picture of black-white relations in Roman society. It is argued that 'race' as a somatic identification that entails permanent and genetically transmitted social disabilities was absent, and that the main deference-entitling distinctions in the Roman world were socio-cultural rather than somatic. Therefore, Professor Thompson concludes, references to black skins and negroid features should be interpreted in aesthetic terms. This wide-ranging study brings welcome clarity to the discussion of blacks in the Roman world, and is valuable for all students of race relations as well as classicists and historians.

Women as Scribes Alison I. Beach.2004-04-29 Professor Beach's book on female scribes in twelfth-century Bavaria - a full-length study of the role of women copyists in the Middle Ages - is underpinned by the notion that the scriptorium was central to the intellectual revival of the Middle Ages and that women played a role in this renaissance. The author examines the exceptional quantity of evidence of female scribal activity in three different religious communities, pointing out the various ways in which the women worked - alone, with other women, and even alongside men - to produce books for monastic libraries, and discussing why their work should have been made visible, whereas that of other female scribes remains invisible. Beach's focus on manuscript production, and the religious, intellectual, social and economic factors which shaped that production, enables her to draw wide-ranging conclusions of interest not only to palaeographers but also to those interested in reading, literacy, religion and gender history.

The Histories Book 5: Terpsichore Herodotus.2015-08-24 Herodotus was an ancient Greek historian who lived in the fifth century BC (c.484 - 425 BC). He has been called the Father of History, and was the first historian known to collect his materials systematically, test their accuracy to a certain extent and arrange them in a well-constructed and vivid narrative. The Histories-his masterpiece and the only work he is known to have produced-is a record of his inquiry, being an investigation of the origins of the Greco-Persian Wars and including a wealth of geographical and ethnographical information. The Histories, were divided into nine books, named after the nine Muses: the Muse of History, Clio, representing the first book, then Euterpe, Thaleia, Melpomene, Terpsichore, Erato, Polymnia, Ourania and Calliope for books 2 to 9, respectively.

Re-Visioning Education in Africa Emefa J. Takyi-Amoako,N'Dri Thérèse Assié-Lumumba.2018-01-26 This book presents the case for a conceptual and pragmatic revolution of Africa's formal educational systems. Using the context of Ubuntu-inspired education, the authors explore innovative ways to tackle the challenges faced by governments from the local and national level and beyond. Along the way, the editors and their contributors examine important policy questions to encourage fresh thinking on ways to improve the educational system and, in turn, to buoy the development of the region as a whole.

Ideal Government and the Mixed Constitution in the Middle Ages James M. Blythe.2014-07-14 Ancient Greeks and Romans often wrote that the best form of government consists of a mixture of monarchy, aristocracy, and democracy. Political writers in the early modern period applied this idea to government in England, Venice, and Florence, and Americans used it in designing their constitution. In this history of political thought James Blythe investigates what happened to the concept of mixed constitution during the Middle Ages, when the work of the Greek historian Polybius, the source of many of the formal elements of early modern theory, was unknown in Latin. Although it is generally argued that Renaissance and early modern theories of mixed constitution derived from the revival of classical Polybian models, Blythe demonstrates the pervasiveness of such ideas in high and late medieval thought. The author traces medieval Aristotelian theories concerning the best form of government and concludes that most endorsed a limited monarchy sharing many features with the mixed constitution. He also shows that the major early modern ideas of mixed constitutionalism stemmed from medieval and Aristotelian thought, which partially explains the enthusiastic reception of Polybius in the sixteenth century. Virgil's Aeneid Philip R. Hardie.1989 This book explores Virgil's poetic and mythical transformation of Roman imperialist ideology. The Romans saw an analogy between the ordered workings of the natural universe and the proper functioning of their own expanding empire; between orbis and urbs. In combining this cosmic imperialism with the military and panegyric themes proper to epic, Virgil draws on a number of traditions: the notion that the ideal poet is a cosmologist; the use of allegory to extract natural-philosophical truths from mythology and poetry (especially Homer); the poetic use of hyperbole and the 'universal expression'. Virgil's imagination is dominated by the cosmological poem of Lucretius; the Aeneid, like the De Rerum Natura, is a poem about the universe and how man should live in it, but Virgil's constant inversion of Lucretian values makes of him an anti-Lucretius. Recent criticism has tended to stress the pessimistic and private sides of the Aeneid; but any easy conclusion that the poet was at heart anti-Augustan is precluded by the depth and detail with which he develops the imperialist themes discussed in this book.

Socrates on Trial Thomas C. Brickhouse,Nicholas D. Smith.1990-09-04 Thomas Brickhouse and Nicholas Smith offer a comprehensive historical and philosophical interpretation of, and commentary on, one of Plato's most widely read works, the Apology of Socrates. Virtually every modern interpretation characterizes some part of what Socrates says in the Apology as purposefully irrelevant or even antithetical to convincing the jury to acquit him at his trial. This book, by contrast, argues persuasively that Socrates offers a sincere and well-reasoned defense against the charges he faces. First, the authors establish a consensus of ancient reports about Socrates' moral and religious principles and show that these prohibit him from needlessly risking the condemnation of the jury. Second, they consider each specific claim made by Socrates in the Apology and show how each can be construed as an honest effort to inform the jurors of the truth and to convince them of his blamelessness. The arguments of this book are informed by a critical review of the scholarly literature and careful attention to the philosophy expressed in Plato's other early dialogues.

This volume takes a global look at the obstacles and enablers in girls' education that can have lasting institutional, psychological and social consequences. It looks at many complex issues affecting education for adolescent girls around the world, including the underlying global demands for women in the formal workforce and the universal impact of gender-based violence, and provides a critical framework through which researchers may explore and critique these complexities.
