The Dramatic Portrait Chris Knight.2017-07-13 Without light, there is no photograph. As almost every photographer knows, the word “photograph” has its roots in two Greek words that, together, mean “drawing with light.” But what is less commonly acknowledged and understood is the role that shadow plays in creating striking, expressive imagery, especially in portraiture. It is through deft, nuanced use of both light and shadow that you can move beyond shooting simply ordinary, competent headshots into the realm of creating dramatic portraiture that can so powerfully convey a subject’s inner essence, communicate a personal narrative, and express your photographic vision.

In *The Dramatic Portrait: The Art of Crafting Light and Shadow*, Chris Knight addresses portraiture with a unique approach to both light and shadow that allows you to improve and elevate your own portraiture. He begins with the history of portraiture, from the early work of Egyptians and Greeks to the sublime treatment of light and subject by artists such as Caravaggio, Rembrandt, and Vermeer. Chris then dives into a deep, hands-on exploration of light, shadow, and portraiture, offering numerous lessons and takeaways. He covers:

- The qualities of light: hard, soft, and the spectrum in between
- The relationships between light, subject, and background, and how to control them
- Lighting patterns such as Paramount, Rembrandt, loop, and split
- Lighting ratios and how they affect contrast in your image
- Equipment: from big and small modifiers to grids, snoots, barn doors, flags, and gels
- Multiple setups for portrait shoots, including those that utilize one, two, and three lights
- How color contributes to drama and mood, eliciting an emotional response from the viewer
- How to approach styling your portrait, from wardrobe to background
- The post-processing workflow, including developing the RAW file, maximizing contrast, color grading, retouching, and dodging and burning for heightened drama and effect

America in a Trance .2018-08-09 Niko J. Kallianiotis first monograph, America in a Trance dives into the heart and soul of the Pennsylvania industrial regions, where the notion of small town values exist and sustainable small businesses once thrived under the sheltered wings of American Industry. A mode to promote American values, industrialism provided a place where immigrants from tattered European countries crossed the Atlantic for a better future. The project isn't just about the flushing out of industry and the towns suffering, but something more. Something as deep rooted as these values and traditions of hard work, family, faith, and an attitude of trying to make the best out of a little less as much of the world passes by or looks in with a skew. Kallianiotis, born and raised in Greece but seemingly Northeastern Pennsylvania bred, has called this place home for roughly twenty years. He believes in this place with a whole heart and it's the element of the experience that drives his concept. Although the sway and beliefs from both sides of the fence in the current political climate have a direct effect and interest in these towns, Kallianiotis achieves a certain level of neutrality within the work. Whether it is the hard Pennsylvania coal towns to the East, the shadows of looming steel stacks to the West or every faded American dream in between. Through the use of light and color, an illumination of hope, the photographer explores his own relationship with the land. Within America in a Trance there is the silhouette of what once was, streets and storefronts thriving, and the echo of that time still ringing in the bricks of the houses and churches.

Hand-Coloured New Zealand Peter Alsop.2016-11-21 Every single photo coloured by hand? Using cotton wool? Yes, such was the era of hand-coloured photography - a painting and photograph in one

- the way you got a high-quality colour photo before colour photography became mainstream. Some of New Zealand's best hand-coloured photos were produced by Whites Aviation from 1945. For over 40 years, the glorious scenic vistas were a sensation, adorning offices and lounges around the land; patriotic statements within New Zealand's emerging visual arts. Now, despite massive changes in society and photography, the stunning scenes and subtle tones still enchant, as coveted collectibles; decorations on screen; and as respected pieces of photographic art. But, until now, the inspirational story has not been told; nor have the full stories of Leo White (company founder); Clyde Stewart (chief photographer and head of colouring); and the mission-critical 'colouring girls'. Hand-Coloured New Zealand presents New Zealand's first published collection of hand-coloured photography and reveals the full Whites Aviation story for the first time. Nothing, it seems, can change the appeal of an alluring hand-made craft.

Copper Plate Photogravure David Morrish, Marlene MacCallum. 2003-04-03 Copper Plate Photogravure describes in comprehensive detail the technique of traditional copper plate photogravure as would be practiced by visual artists using normally available facilities and materials. Attention is paid to step-by-step guidance through the many stages of the process. A detailed manual of technique, Copper Plate Photogravure also offers the history of the medium and reference to past alternative methods of practice. Copper Plate Photogravure: Demystifying the Process is part of the current revitalization of one of the most satisfyingly beautiful image-making processes. The range of ink color and paper quality possibilities is endless. The potential for handwork and alteration of the copper plate provides yet another realm of expressive variation. The subject matter and the treatment are as variable and broad as photography itself. This book's purpose is to demystify and clarify what is a complex but altogether do-able photomechanical process using currently available materials. With Copper Plate Photogravure, you will learn how to:

- produce a full-scale film positive from a photographic negative
- sensitize the gravure tissue to prepare it for exposure to the positive
- prepare the plate and develop the gelatin resist prior to etching
- prepare the various strengths of etching solutions and etch the plate to achieve a full tonal scale
- rework the plate using printmaking tools to correct flaws or to adjust the image for aesthetic reasons
- use the appropriate printing inks, ink additives, quality papers, and printshop equipment to produce a high quality print

A historical survey and appendices of detailed technical information, charts, and tables are included, as well as a list of suppliers and sources for the materials required, some of which are highly specialized. A comprehensive glossary introduces the non-photographer or non-printmaker to many of the terms particular to those fields and associated with this process.
