I Say to You Gabrielle Lynch.2011-09-26 In 2007 a disputed election in Kenya erupted into a two-month political crisis that led to the deaths of more than a thousand people and the displacement of almost seven hundred thousand. Much of the violence fell along ethnic lines, the principal perpetrators of which were the Kalenjin, who lashed out at other communities in the Rift Valley. What makes this episode remarkable compared to many other instances of ethnic violence is that the Kalenjin community is a recent construct: the group has only existed since the mid-twentieth century. Drawing on rich archival research and vivid oral testimony, *I Say to You* is a timely analysis of the creation, development, political relevance, and popular appeal of the Kalenjin identity as well as its violent potential. Uncovering the Kalenjin's roots, Gabrielle Lynch examines the ways in which ethnic groups are socially constructed and renegotiated over time. She demonstrates how historical narratives of collective achievement, migration, injustice, and persecution constantly evolve. As a consequence, ethnic identities help politicians mobilize support and help ordinary people lay claim to space, power, and wealth. This kind of ethnic politics, Lynch reveals, encourages a sense of ethnic difference and competition, which can spiral into violent confrontation and retribution.

An Anthology of Modern French Poetry (1850-1950) Peter Broome,Graham Chesters.1976-07-15 This anthology is the companion volume to *The Appreciation of Modern French Poetry*, the aim of which was to give detailed preliminary help with the problems of poetic appreciation. The fourteen poets represented

here provide a varied and exciting introduction to what is probably the richest century of French poetry, from 1850 to 1950. Hugo, the colossus of the nineteenth century, whose work gives new resonance and vitality to imaginative vision, opens the anthology, and Michaux, the most individual and 'modern' of twentieth-century poets in that he bridges the gap between poetry and contemporary science, closes it. Almost all the major poets of the period are included: Nerval, Baudelaire, Mallarmé, Verlaine, Rimbaud and Laforgue from the second half of the nineteenth century; Valéry, Apollinaire, Supervielle and Eluard in the twentieth. The lesser known Cros and Desnos, fresh and spontaneous poets with an immediate appeal, invite a new look at the lyric traditions of french verse and offer an attractive new avenue for study. The choice of poems, dictated above all by their individual poetic value, reflects also the trends of recent criticism and the tastes of present-day readers. The texts are all accompanied by full notes, which not only explain local difficulties of vocabulary, syntax and expression, but lead the reader directly into the heart of the richness of theme, style and interpretation. These will prove of value not only to the student who is grappling with the basics of french verse, or is anxious to give depth to his familiarity, but to the general reader seeking to rekindle his enjoyment of French poetry. In addition, there are introductions to each poet summarizing the essence of his art, useful suggestions for further reading, and groups of discussion topics to stimulate comparative insights and a wider responsiveness.

On the Feminist Philosophy of Gillian Howie Daniel

Whistler, Victoria Browne. 2016-10-20 Over three decades, Gillian Howie wrote at the forefront of philosophy and critical theory, before her untimely death in 2013. This interdisciplinary collection uses her writings to explore the productive, yet often resistant, interrelationship between feminism and critical theory, examining the potential of Howie's particular form of materialism. The contributors also bring to this debate a serious engagement

with Howie's late turn towards philosophies of mortality, therapy and 'living with dying'. The volume considers how differently embodied subjects are positioned within public institutions, discourses and spaces, and the role of philosophy, art, film, photography, and literature, in facing situations such as sexual oppression and life-limiting illness.

Mercury in Liquids, Compressed Gases, Molten Salts and Other Elements H. Lawrence Clever.2013-10-22 An element of obvious importance, mercury is also hazardous in the environment and corrosive to many materials. A knowledge of its solubility is inestimable in addressing problems concerning the element's concentration in our surroundings. This volume presents all relevant data published on the solubility of mercury up to June 1986. By combining these data with the mercury equilibrium vapour pressure, Henry's constant and Ostwald coefficients can be calculated.

Hawaii Place Names John R. K. Clark.2003-05-14 In his latest book, John Clark, author of the highly regarded *Beaches of Hawaii* series, gives us the many captivating stories behind the hundreds of Hawaii place names associated with the ocean--the names of shores, beaches, and other sites where people fish, swim, dive, surf, and paddle. Significant features and landmarks on or near shores, such as fishponds, monuments, shrines, reefs, and small islands, are also included. The names of surfing sites are the most numerous and among the most colorful: from the purely descriptive (Black Rock, Blue Hole) to the humorous (No Can Tell, Pray for Sex). Clark began gathering information for the

Beaches series in 1972, and during the years that followed interviewed hundreds of informants, many of them native Hawaiians, and consulted dozens of Hawaiian reference books, newspapers, and maps. A significant amount of the oral history he collected was unrecorded and remained only in his notebooks and memory. *Hawaii Place Names: Shores, Beaches, and Surf Sites* is the final result of those years of research, and like its popular predecessors, it benefits substantially from Clark's having spent a lifetime surfing and swimming Hawaii's beaches. Presented in the same convenient format as Pukui, Elbert, and Mookini's *Place Names of Hawaii* (UH Press, 1974) this rich compendium of information on Hawaii's surf, shore, and beach sites will satisfy visitors and residents alike.

to achieve the beneficial impacts on health anticipated by both health professionals and patients. This book presents the proceedings of the 32nd Medical Informatics Europe Conference (MIE2022), organized by the European Federation for Medical Informatics (EFMI) and held from 27 - 30 May 2022 in Nice, France. The theme of the conference was Challenges of Trustable AI and Added-Value on Health. Over 400 submissions were received from 43 countries, and were reviewed in a thorough process by at least three reviewers before being assessed by an SPC co-chair, with papers requiring major revision undergoing further review. Included here are 147 full papers (acceptance rate 54%), 23 short papers and 79 posters from the conference. Topics covered include the usual sub-domains of biomedical informatics: decision support and clinical information systems; clinical research informatics; knowledge management and representation; consumer health informatics; natural language processing; public health informatics; and privacy, ethical and societal aspects, but also innovative approaches to the collection, such as organization and analysis of data and knowledge related to health and wellbeing, as well as theoretical and applied contributions to AI methods and algorithms. Providing an overview of the latest developments in medical informatics, the book will be of interest to all those involved in the development and provision of healthcare today.

Covid-19 in Asia Victor V. Ramraj.2021 This is a book for an extraordinary time, about a pandemic for which there is no modern precedent. It is an edited collection of original essays on Asia's legal and policy responses to the Covid-19 pandemic, which, in a matter of months, swept around the globe, infecting millions. It transformed daily life in almost every corner of the planet: lockdowns of cities and entire countries, physical distancing and quarantines, travel restrictions and border controls, movement-tracking technology, mandatory closures of all but essential services, economic devastation and mass

unemployment, and government assistance programs on record-breaking scales. Yet a pandemic on this scale, under contemporary conditions of globalization, has left governments and their advisors scrambling to improvise solutions, often themselves unprecedented in modern times, such as the initial lockdown of Wuhan. This collection of essays analyzes law and policy responses across Asia, identifying cross-cutting themes and challenges. It taps the collective knowledge of an interdisciplinary team of sixty-one researchers both in the service of policy development, and with the goal of establishing a scholarly baseline for research after the storm has passed. The collection begins with an epidemiological overview and survey of the law and policy themes. The jurisdiction-specific case studies and cross-cutting thematic essays cover five topics: first wave containment measures; emergency powers; technology, science, and expertise; politics, religion, and governance; and economy, climate, and sustainability. Chapter 20: Cambodia: Public Health, Economic, and Political Dimensions by Ratana Ly, Vandana Hing, & Kimsan Soy is available for free.

Assessing Aid for Trade Mohammad A Razzaque, Dirk Willem te Velde. 2013-11-25 Aid for Trade (AfT) has been an integral part of official development assistance (ODA) since its inception at the World Trade Organization's Hong Kong Ministerial in 2005. While many observers agree that the initiative has generated momentum in securing more trade support, the policy discourse on AfT continues to be vibrant and dynamic. This volume, comprising 16 chapters prepared by 20 renowned experts from a range of international organisations, think tanks and academic institutions, including Commonwealth Secretariat, ODI, ECDPM, DIE, ICTSD, Saana Consulting, WTI Advisors, and Columbia University, provides a comprehensive review of the Aid for Trade initiative. Part I of this volume uses quantitative and qualitative analysis to examine the effectiveness of different components of Aid for Trade and underlying factors affecting the outcomes. Part II provides analyses of current issues, including regional AfT, global value chains, infrastructure for development for agriculture, AfT adjustment and lessons from emerging economies in aiding exports. Part III looks to the future, proposing a range of possible directions including an alternative way to improve trade outcomes for developing countries from Nobel Prize-winning economist Joseph Stiglitz.

Clitics Andrew Spencer, Ana R. Luis. 2012-07-12 In most languages we find 'little words' which resemble a full word, but which cannot stand on their own. Instead they have to 'lean on' a neighbouring word, like the 'd, 've and unstressed 'em of Kim'd've helped'em ('Kim would have helped them'). These are clitics, and they are found in most of the world's languages. In English the clitic forms appear in the same place in the sentence that the full form of the word would appear in but in many languages clitics obey quite separate rules of placement. This book is the first

introduction to clitics, providing a complete summary of their properties, their uses, the reasons why they are of interest to linguists and the various theoretical approaches that have been proposed for them. The book describes a whole host of clitic systems and presents data from over 100 languages.

Prophets and Patrons: the French University and the Emergence

of the Social Sciences Terry Nichols Clark.1973 Prophets and Patrons is the first detailed account of the emergence of sociology and related social sciences in France. It emphasizes three social and intellectual groupings in the period from 1880 to 1914: the social statisticians who grew out of governmental ministries, the Durkheimians who were consistently housed in the university, and the international sociologists around René Worms, in neither ministries nor the university. Unlike most histories of ideas, Prophets and Patrons portrays the institutional developments that encouraged, discouraged, and rechanneled different styles of research. To understand these developments, a sociological analysis of the French university system is presented. At its center are the patrons (generally Sorbonne professors) who served as informal linkages for the entire system. Around them developed clusters of researchers and teachers throughout France. The workings of this system of relations, analyzed here for the first time, are crucial to understanding the French university. The university is also immersed in the political and ideological currents of the Latin Quarter. Thus Clark's investigation of conflicting elements of French culture and social structure helps illuminate his analysis of the university. This study will be invaluable to social scientists, intellectual historians, and students of French culture and comparative education.

1993 International Symposium on Communications .1993

After Hitchcock David Boyd,R. Barton Palmer.2010-01-01 Alfred Hitchcock is arguably the most famous director to have ever made a film. Almost single-handedly he turned the suspense thriller into one of the most popular film genres of all time, while his *Psycho* updated the horror film and inspired two generations of directors to imitate and adapt this most Hitchcockian of movies. Yet while much scholarly and popular attention has focused on the director's oeuvre, until now there has been no extensive study of how Alfred Hitchcock's films and methods have affected and transformed the history of the film medium. In this book, thirteen original essays by leading film scholars reveal the richness and variety of Alfred Hitchcock's legacy as they trace his shaping influence on particular films, filmmakers, genres, and even on film criticism. Some essays concentrate on films that imitate Hitchcock in diverse ways, including the movies of Brian de Palma and thrillers such as *True Lies*, *The Silence of the Lambs*, and *Dead Again*. Other essays look at genres that have been influenced by Hitchcock's work, including the 1970s paranoid thriller, the Italian giallo film, and the post-*Psycho* horror film. The remaining essays investigate developments within film culture and academic film study, including the enthusiasm of French New Wave filmmakers for Hitchcock's work, his influence on the filmic representation of violence in the post-studio Hollywood era, and the ways in which his films have become central texts for film theorists.

Practical Guide To Principal Component Methods in R

Alboukadel KASSAMBARA.2017-08-23 Although there are several good books on principal component methods (PCMs) and related topics, we felt that many of them are either too theoretical or too advanced. This book provides a solid practical guidance to summarize, visualize and interpret the most important information in a large multivariate data sets, using principal

component methods in R. The visualization is based on the factoextra R package that we developed for creating easily beautiful ggplot2-based graphs from the output of PCMs. This book contains 4 parts. Part I provides a quick introduction to R and presents the key features of FactoMineR and factoextra. Part II describes classical principal component methods to analyze data sets containing, predominantly, either continuous or categorical variables. These methods include: Principal Component Analysis (PCA, for continuous variables), simple correspondence analysis (CA, for large contingency tables formed by two categorical variables) and Multiple CA (MCA, for a data set with more than 2 categorical variables). In Part III, you'll learn advanced methods for analyzing a data set containing a mix of variables (continuous and categorical) structured or not into groups: Factor Analysis of Mixed Data (FAMD) and Multiple Factor Analysis (MFA). Part IV covers hierarchical clustering on principal components (HCPC), which is useful for performing clustering with a data set containing only categorical variables or with a mixed data of categorical and continuous variables.

Slow Violence and the Environmentalism of the Poor Rob Nixon. 2011-06-01 The violence wrought by climate change, toxic drift, deforestation, oil spills, and the environmental aftermath of war takes place gradually and often invisibly. Using the innovative concept of slow violence to describe these threats, Rob Nixon focuses on the inattention we have paid to the attritional lethality of many environmental crises, in contrast with the sensational, spectacle-driven messaging that impels public activism today. Slow violence, because it is so readily ignored by a hard-charging capitalism, exacerbates the vulnerability of ecosystems and of people who are poor, disempowered, and often involuntarily displaced, while fueling social conflicts that arise from desperation as life-sustaining conditions erode. In a book of extraordinary scope, Nixon examines a cluster of writer-activists affiliated with the environmentalism of the poor in the global

South. By approaching environmental justice literature from this transnational perspective, he exposes the limitations of the national and local frames that dominate environmental writing. And by skillfully illuminating the strategies these writer-activists deploy to give dramatic visibility to environmental emergencies, Nixon invites his readers to engage with some of the most pressing challenges of our time.

The UN Sustainable Development Goals Ilias

Bantekas, Francesco Seatzu.2023-10-26 In September 2015, the United Nations General Assembly adopted the 17 Sustainable Development Goals (SDGs). This historic document constituted a transformative 'plan for action for people, planet and prosperity' with regards to the sustainable development efforts of all countries. The Sustainable Development Goals serves as an expert compendium, the most authoritative ready-reference tool for anyone interested in the SDGs. Each chapter comprises a detailed target-by-target analysis of one of the SDGs, including a methodical analysis of the preparatory proceedings that shaped each goal in its present form, an exhaustive examination of their content, and a critical assessment from an international law perspective. This commentary provides readers with the most up-to-date information on normative and legal questions arising from the incorporation of the SDGs into the international economic, social, and environmental legal frameworks, and on their implementation status. Scholars, practitioners, and those interested in the fields of law, politics, development, economics, environmental studies, and global governance will find this book a must-read.

Introduction to Information Retrieval Christopher D.

Manning,Prabhakar Raghavan,Hinrich Schütze.2008-07-07 Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

Varieties of Spoken French Sylvain Detey,Jacques

Durand,Bernard Laks,Chantal Lyche.2016 This book examines the variation found in modern spoken French, based on the research programme 'Phonology of Contemporary French' (Phonologie du Francais Contemporain, PFC). Extensive data are drawn from all over the French-speaking world, including Algeria, Canada, Louisiana, Mauritius, and Switzerland. Although the principal focus is on differences in pronunciation, the authors also analyse the spoken language at all levels from sound to meaning. The book is accompanied by a website hosting audio-visual material

for teaching purposes, data, and a variety of tools for working with corpora. The first part of the book outlines some key concepts and approaches to the description of spoken French. Chapters in Part II are devoted to the study of individual samples of spoken French from all over the world, covering phonological and grammatical features as well as lexical and cultural aspects. The book's companion website provides a class-friendly ready-to-use multimedia version of these 17 chapters, as well as the sound files and full transcription for each extract. Part III looks at inter and intra-speaker variation: it begins with chapters that provide the methodological background to the study of phonological variation using databases, while in the second section authors present case studies of a number of PFC survey points, including Paris, the Central African Republic, and Quebec. Varieties of Spoken French will be an invaluable resource for researchers, teachers, and students of all aspects of French language and linguistics.

Ask a Manager Alison Green. 2018-05-01 From the creator of the popular website Ask a Manager and New York's work-advice columnist comes a witty, practical guide to 200 difficult professional conversations—featuring all-new advice! There's a reason Alison Green has been called "the Dear Abby of the work world." Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say. Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You'll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit "reply all" • you're being micromanaged—or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate's loud speakerphone is making you homicidal • you got drunk at the holiday party Praise for Ask a Manager "A must-read for anyone who works . . . The Chemical Evolution of the Atmosphere and Oceans

Heinrich D. Holland.1984-07-21 In this first full-scale attempt to reconstruct the chemical evolution of the Earth's atmosphere and oceans, Heinrich Holland assembles data from a wide spectrum of fields to trace the history of the ocean-atmosphere system. A pioneer in an increasingly important area of scholarship, he presents a comprehensive treatment of knowledge on this subject, provides an extensive bibliography, and outlines problems and approaches for further research. The first four chapters deal with the turbulent first half billion years of Earth history. The next four chapters, devoted largely to the Earth from 3.9 to 0.6 b.y.b.p., demonstrate that changes in the atmosphere and oceans during this period were not dramatic. The last chapter of the book deals with the Phanerozoic Eon; although the isotopic
