

# Regents Competency Test In Writing P 12

**The Testing Trap** George Hillocks.2002-04-12 Do statewide assessments really do what they are supposed to do? Through interviews with over three hundred teachers and administrators, Hillocks examines whether state writing tests in Illinois, Kentucky, Oregon, New York, and Texas actually improve students' ability to express their thinking in writing. Ultimately, Hillocks argues that the majority of existing tests actually have a harmful effect on the way students are taught to write. In addition to providing analyses of assessments that do not encourage good writing, The Testing Trap contrasts them to those that do. Concluding with practical procedures for examining and evaluating writing assessments, this book is a provocative and essential read for administrators, teachers, policymakers, parents, and all who care about the education of our children.

**Race in America** Herbert Hill,James Edward Jones (Jr.).1993 Most of these essays were originally presented at a conference in Madison, Wisconsin, November 1989. Two contributions giving historical perspective lead off: a personal memoir and discussion of the significance for America and the world of black protest. Fourteen contributions follow, on the legal struggle, the persistence of discrimination, and perspectives on the past and future. Paper edition (unseen), \$17.95. Annotation copyright by Book News, Inc., Portland, OR

**An Age of Accountability** John L. Rury.2023-10-13 An Age of Accountability highlights the role of test-based accountability as a policy framework in American education from 1970 to 2020. For more than half a century, the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment. The theory of change embedded in almost all test-based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools. This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps, which repeatedly failed to materialize. But even after very clear disappointments, no other policy framework has emerged to challenge its hegemony. The American public today has little confidence in institutions to improve the quality of goods and services they provide, especially in the public sector. As a consequence, many Americans continue to believe that accountability remains a vital necessity, even if educators and policy scholars disagree.

**Variation in English** Douglas Biber,Susan Conrad.2014-06-11 Studies in Language and Linguistics General Editors- Geoffrey Leech, Department of Modern English Language, Lancaster University and Jenny Thomas, School of English and Linguistics, University of Wales, Bangor Broad-ranging and authoritative, Studies in Language and Linguistics is an occasional series incorporating major new work in all areas of linguistics. Variation in English- Multi-Dimensional Studies provides both a comprehensive view into a relatively new technique for studying language, and a diverse, exciting collection of studies of variation in English. The first part of the book provides an explanation of multi-dimensional (MD) analysis, a research technique for studying language variation. MD is a corpus-based approach developed by Doug Biber that facilitates large-scale studies of language variation and the investigation of research questions that were previously intractable. The second part of the book contains studies that apply Biber's original MD analysis of English to new domains. These studies cover the historical evolution of English; specialized domains such as medical writing and oral proficiency testing; and dialect variation, including gender and British/American. The third part of the book contains studies that conduct new MD analyses, covering adult/child language differences, 18th century speech and writing, and discourse complexity. Readers of this book will become familiar with the analytical techniques of multi-dimensional analysis, with its applicability to a wide variety of language issues, and with the findings of important studies previously published in diverse journals as well as new studies appearing for the first time.

**Measured Constructs** Cyril J. Weir,Ivana Vidaković,Evelina D. Galaczi.2013-05-23 This volume establishes how English language constructs were measured in Cambridge English examinations over the period 1913 to 2012. An addition to the Studies in Language Testing series, this volume provides an overview of English language testing over the last century, with coverage of key theoretical and practical aspects of the assessment of reading, listening, writing and speaking skills. It includes examples of the Cambridge English exams, old and new, and is the first volume to describe in a systematic way the different theoretical influences which have shaped the development of the constructs underlying Cambridge English exams in the last 100 years.

Desegregation State Annie S. Mendenhall.2022-04-15 The only book-length study of the ways that postsecondary desegregation litigation and policy affected writing instruction and assessment in US colleges, Desegregation State provides a history of federal enforcement of higher education desegregation and its impact on writing programs from 1970 to 1988. Focusing on the University System of Georgia and two of its public colleges in Savannah, one a historically segregated white college and the other a historically Black college, Annie S. Mendenhall shows how desegregation enforcement promoted and shaped writing programs by presenting literacy remediation and testing as critical to desegregation efforts in southern and border states. Formerly segregated state university systems crafted desegregation plans that gave them more control over policies for admissions, remediation, and retention. These plans created literacy requirements—admissions and graduation tests, remedial classes, and even writing centers and writing across the curriculum programs—that reshaped the landscape of college writing instruction and denied the demands of Black students, civil rights activists, and historically Black colleges and universities for major changes to university systems. This history details the profound influence of desegregation—and resistance to desegregation—on the ways that writing is taught and assessed in colleges today. Desegregation State provides WPAs and writing teachers with a disciplinary history for understanding racism in writing assessment and writing programs. Mendenhall brings emerging scholarship on the racialization of institutions into the field, showing why writing studies must pay more attention to how writing programs have institutionalized racist literacy ideologies through arguments about student placement, individualized writing instruction, and writing assessment.
