**The Politics of Religious Apostasy** David G. Bromley.1998-04-23 The current controversy surrounding new religions has brought to the forefront the role of apostates. These individuals leave highly controversial movements and assume roles in other organizations as public opponents against their former movements. **Nuclear Structure** Nederlandse Natuurkundige Vereniging.1981 After the success of the previous summer schools organized by the Nuclear Physics Division of the Netherlands' Physical Society in 1975 and 1977, we thought it worthwhile to continue this tradition. The immediate very positive reactions received from all invited speakers encouraged us to proceed with the organization. Although the number of students had to be restricted to about one hundred, the international character of the School was evident from about thirty nationalities which were represented. The material contained in this book covers the talks given by all speakers invited to lecture on the subject of nuclear structure research. These proceedings should therefore serve as an excellent introduction to many topics of current interest in this exciting field. We hope that the lectures and discussions as well as the many informal contacts made during the various social activities will greatly stimulate interest in nuclear structure investigations among all the participants. The organization of the summer school has been made possible by substantial support given by the Scientific Affairs Division of the North Atlantic Treaty Organization, the Netherlands' Ministry of Education and Science and the Netherlands' Physical Society. The invaluable help of the Bureau Congressen of the Ministry of Education and Science and the friendly assistance of the management of the College of Agriculture in Dronten contributed greatly to the pleasant atmosphere during the summer school.

**The Logic of Education (RLE Edu K)** Paul H Hirst, R S Peters.2012-05-16 This book explores the implications for the curriculum, for teaching and for the authority structure of schools and colleges of an analysis of 'education' in which the development of knowledge and understanding is accorded a central position. It also serves as a succinct introduction to the growing literature on philosophy of education in the UK.

**Narratives of Low Countries History and Culture** Jane Fenoulhet, Lesley Gilbert, Ulrich Tiedau.2016-11-07 This edited collection explores the ways in which our understanding of the past in Dutch history and culture can be rethought to consider not only how it forms part of the present but how it can relate also to the future. Divided into three parts - The Uses of Myth and History, The Past as Illumination of Cultural Context, and Historiography in Focus - this book seeks to demonstrate the importance of the past by investigating the transmission of culture and its transformations. It reflects on the history of historiography and looks critically at the products of the historiographic process, such as Dutch and Afrikaans literary history. The chapters cover a range of disciplines and approaches: some authors offer a broad view of a particular period, such as Jonathan Israel's contribution on myth and history in the ideological politics of the Dutch Golden Age, while others zoom in on specific genres, texts or historical moments, such as Benjamin Schmidt's study of the doolhof, a word that today means 'labyrinth' but once described a 17th-century educational amusement park. This volume, enlightening and home to multiple paths of enquiry leading in different directions, is an excellent example of what a past-present doolhof might look like.

**The Darkroom of Damocles** Willem Frederik Hermans. 2009-10-27 By the acclaimed Dutch author of *Beyond Sleep*: a thriller set in Nazi occupied Holland: "fast-moving, frighteningly real yet verging on the incredible" (Milan Kundera, author of *The Unbearable Lightness of Being*). During the German occupation of Holland, tobacconist Henri Osewoudt is visited by a mysterious man named Dorbeck—a man who bears a strangely striking resemblance to Osewoudt himself. Dorbeck recruits him to perform simple, but top-secret missions on orders from London. But as the assignments keep coming, they get increasingly dangerous. Soon Osewoudt is being asked to commit murder in the name of Gestapo resistance. After the war, Osewoudt is taken for a traitor and captured. To prove his sacrifices for the Resistance, he must find the untraceable doppelgänger in an existential thriller "crackling with tension . . . bringing to mind Camus and the Sartre of *Les Chemins de la Liberté*" (The Telegraph). "Striking, suspenseful . . . Brilliant." —The Observer

**Sure Start children's centres** Great Britain: National Audit Office. 2006-12-19 The Government launched the Sure Start programme in 1998 to help give the best start in life for every child, particularly from disadvantaged backgrounds, by bringing together early education, childcare, health and family support services. From April 2006, local authorities have been responsible for managing the programme for their area and decide whether to do so directly or to contract out management to a private or voluntary provider, whilst the DfES issues guidance to local authorities and monitors performance. The first 800 centres were located in the most deprived areas, but the Government has pledged to create a children's centre for every community by 2010, around 3,500 in all, committing £3.2 billion of funds until 2008. Children's centres also have income from various other sources including grants and fees for childcare charged to parents. This NAO report focuses on the capacity of the centres set up by September 2005 and the performance of responsible local authorities in delivering value for money through sound financial management, in reaching the most disadvantaged families, and in monitoring their performance effectively. It finds that good progress is being made although the full effectiveness of the centres will be measurable only in the long term. The centres are valued by most of the families who use them, although the early signs are that more still needs to be done to reach and support some of the most excluded groups. The costs of centres and activities vary widely, and local authorities and centres that the NAO visited need to understand their costs better and assess whether they were using their funds cost-effectively.

**Visible Learning** John Hattie.2008-11-19 This unique and ground-breaking book is the result of 15 years research and synthesises over 800 meta-analyses on the influences on achievement in school-aged students. It builds a story about the power of teachers, feedback, and a model of learning and understanding. The research involves many millions of students and represents the largest ever evidence based research into what actually works in schools to improve learning. Areas covered include the influence of the student, home, school, curricula, teacher, and teaching strategies. A model of teaching and learning is developed based on the notion of visible teaching and visible learning. A major message is that what works best for students is similar to what works best for teachers - an attention to setting challenging learning intentions, being clear about what success means, and an attention to learning strategies for developing conceptual understanding about what teachers and students know and understand. Although the current evidence based fad has turned into a debate about test scores, this book is about using evidence to build and defend a model of teaching and learning. A major contribution is a fascinating benchmark/dashboard for comparing many innovations in teaching and schools.

**Medical Liability in Europe** Bernhard A. Koch,Ewa Bagińska.2011 Liability law is rapidly changing in quite a number of countries. This is due to various factors, which are interrelated to a large extent: changing case law and legislation as well as increased and still increasing technical and medical knowledge. As a result, various occupational diseases can, for example, be attributed to working conditions or personal injury to specific products. From the very moment that causation can be proven, the question arises of whether or not liability can be established- with far-reaching economic consequences for all parties involved. The rise of phenomena such as mass torts, multiple causation, joint and several liability or various heads of damages (like ecological damage and several diseases and affections) rapidly increases the interest in tort law. In the context of the interrelation between liability and insurance, attention must be paid to the question of whether certain liabilities are still coverable or not, and, if they are, to what amounts. (The question of jurisdictions is of growing importance as is the question of whether a specific liability can be covered by insurance. In this context, one should bear in mind that the affordability of tort law also requires safe and sound insurers. The recent past has shown that there is a limit to their financial stability.)
