Feng Shui for Architecture Simona Manini.2004 Feng Shui for Architecture is an easy-to-use manual to incorporate Scientific Feng Shui into the design, renovation, and decorating of your home. The final goal is to support your well-being, as well as your family's, in all aspects of life. It is also particularly useful during a real estate pre-acquisition inspection, for it offers examples of bad Feng Shui (to avoid), good Feng Shui (to desire), and how to correct any overall problems. This will help you to evaluate the kind of investment to be made and to make the property Feng Shui proof (as well as decide if you want to either buy it or pass on it). The only book on the market written by an architect, interior designer, and Feng Shui expert who has over 20 years of expertise in the fields of architectural planning, design, and Scientific Feng Shui Mastery, Feng Shui for Architecture is largely the result of answering frequent questions that have arisen over the years by concerned Feng Shui and Interior Architecture students in classes taught by the author as well as addressing common issues brought up by professional architects, designers, and clients with whom the author has consulted with during the development of hundreds of projects (and whom are also the same people who encouraged her to write this book).

Editorial Reviews Dr. Simona Mainini has an astonishing ability to interpret and install ancient Chinese formulas in such a way that they change lives today. Her discipline and precision in a field not often distinguished by these qualities is both unique and world class. Richard Ashworth Author of The Feng Shui Diaries Editor-in-Chief of The Journal of the Feng Shui Society Dr. Mainini is one of those few, wonderful people who have managed to weld together the strict disciplines of architectural practice with the aesthetics and philosophies of the ancient Chinese traditions of Feng Shui.

Readers can be assured that what she writes is not founded just on theory alone, but sound, practical experience. Derek Walters Author of The Feng Shui Handbook & The Complete Guide to Chinese Astrology Feng Shui for Architecture is an excellent guide for both the Feng Shui professional and layperson. You can benefit from the knowledge presented here and use it to make your environment as harmonious as possible. Larry Sang Author of The Principles of Feng Shui President & Founder of The American Feng Shui Institute Feng Shui for Architecture has been extremely inspirational to me and many of my students at the School of Architecture and Urbanism at the University of Sao Paulo (Brazil). We are very impressed with Dr.

Mainini's knowledge and experience. She brings a new pattern to design and architecture. Maria Cecilia Loschiavo dos Santos, PhD Author of *Movel Moderno no Brasil* Professor, Design Department, University of Sao Paulo, Brazil The title and subtitle promises a lot-- and this book delivers even more! Dr. Mainini has done a fabulous job organizing and explaining-- in a clear, precise manner-- the principles of Feng Shui and the ancient Chinese art of placement for good energy flow as it applies to the spaces in which we live and work. Not only is this book great for the preparation of buildings, it is also extremely useful even if you are only searching for an energetically superior apartment, house, or office space to rent. If you are looking for an invaluable source of Feng Shui information to help bring harmony to your living and working space and your life, this is a book for you.

I applaud Dr. Mainini for the publishing of this, her first book, and highly recommend it to those who want to learn more about this most fascinating modality of healing. A+!

Hotel and Resort Design Habita Architects.2018 - Renowned Thai architecture and planning firm focused on modern works that fuse contemporary elements with regional, traditional motifs - Wide-ranging selection of luxury resort projects spanning Thailand, the Maldives, and Vietnam Habita Architects is a visionary Thai architectural design firm whose opus of work over several decades has grown into a collective of projects of various

sizes and scales. Yet despite their diversity, the works have been decisively bound within the typological genre of the luxury resort hotel. Blending elements of Thai regionalism and indigenous architectural character with solid programmatic functions, Habita Architects strives to create meaningful and cohesive hotel and resort designs of subtle, understated elegance. Shown throughout in full-color photography, these pages explain Habita's approach to luxury resort design, which is apparent in the well-integrated architecture and interior designs of the firm's projects, stretching throughout Thailand and neighbouring countries. Fully illustrated in sumptuous detail, Hotel and Resort Design showcases the combination of the natural and built environments as a delicate entity with its own character, history, and future. Habita details how technology and innovation marry with the site and overall landscape, and how it's the site's spatial surroundings that ultimately determines whether the accommodation is perched on the side of a rain-forested valley, suspended above an atoll lagoon, or set back at the rear of a tranquil paddy field. Expertise in both historic Thai architecture and conventional Modernist pedagogy provides work that delivers a guest experience inspired by the natural environment and especially the culture of that place. The synergy of Habita's work results in a thoughtfulness towards heritage and a consciously considered approach towards innovation.

World of Resorts Chuck Y. Gee. 2010 In the case of classic hotels, development and management functions are generally treated as separate subjects. Resorts are different. The resort business is built on the fulfillment of dreams and desires, while classic hotels focus on necessity and convenience in serving business travelers. Resort development is not a one-time activity, ending with the opening of the resort, but is rather an ongoing process and a planning responsibility of management on behalf of ownership. The variables of a resort are many. A resort's products go beyond the simple provision of lodging, food, and beverage - although these hospitality basics must not only be provided, but given special attention by resorts. Each variable - type and scope of resort, location, seasonality, range of recreation and amenities, forms of ownership, and other development-related aspects - will have a significant effect on the work of management. Because resorts cater to the leisure traveler, whose wants are diverse and fluid, so management must constantly keep abreast of emerging trends that shape guest preferences and create market appeal. Continual reinvestment in the resort plant or investment into new ROI projects is the price of competition in the resort world. Successful resorts, whether a single resort estate or an entire destination, remain perpetual works in progress. Managers who understand the development process will have greater appreciation of the reinvestment costs required to keep a resort attractive enough to retain current guests and gain new ones--Page xiii

Hotel Design, Planning and Development Sophea Tieng. 2018-12 There is a huge competition between the business resorts and hotels for the sophisticated cadre of travelers all over the world. The operators and developers in hotel industry look forward to interior designers and architects for creating interesting and unique experiences for their guests. For many decades, the hotel industry had primarily focused upon the operations and functionality. The concept of designing and development of a hotel is rooted in the ethnicities of hospitality to the travelers, which dates back to the ancient times. Various kinds of hotels have evolved in many different countries. The interior styling and designing of hotels are very diverse and numerous variations are there like inns, motels, hotels and spas and resort. Many different aspects influence the sense of a place like small details of furnishing, interiors, buildings, and landscapes. In most of the today's high-end developments, a guest room can be a conventional serviced apartment or a hotel room, and even a phenomenon, which has changed the standalone hotel to a mini-community having, lots of different uses. From an architect's perspective the apartment unit or a guestroom is the core building block, which sets a structure for the building. Since architects are involved in the projects of hospitality for decades, it is a fact that there is no one size for all in the hotel industry. Thus, this book will serve the main purpose of guiding as to what is hotel development, planning, and designing. The most happening and unique interiors of a hotel transform a simple stay into a successful and unforgettable experience and makes the guests as the drivers of this journey. In a small frame of time, internet has emerged to become the main source of communication for the development team of the hotels and guests. Rapid advancement in technology has supported the implementation of sustainable practices in operations and design. While detailing the activities, the allocation of space and relationships in the building along with an excellent and resourceful program provides aids in establishing the way a building is situated on a site. The summary of all the space allocation, relationships and activities in a hotel is known as design philosophy or design brief and a building program. This book brings to the readers the planning and development of hotel property, the philosophy behind the designs of a hotel and the types of hotels, which will include the hotel designing for differently abled people. In the later sections, it will also talk about the market analysis and financial feasibility along with the prevalent risks and opportunity in the hotel industry. Above is a very simple sketch of the book on Hotel Planning, Design and Development and a complete study has much more to offer. I look forward to the reader for achieving value-based results by using the techniques and methodologies prescribed in the book. The constructive criticism and the feedback would be most welcome.
