The new edition takes into account past reviewers and users comments by reducing the amount of material on adaptive/innovative cognitive style and replaces this with a wider range of material on the theme of personality and new product phrase. The Urban Forest David Pearlmutter,Carlo Calfapietra,Roeland Samson,Liz O'Brien,Silvija Krajter Ostoić,Giovanni Sanesi,Rocío Alonso del Amo.2017-02-27 This book focuses on urban green infrastructure - the interconnected web of vegetated spaces like street trees, parks and peri-urban forests that provide essential ecosystem services in cities. The green infrastructure approach embodies the idea that these services, such as storm-water runoff control, pollutant filtration and amenities for outdoor recreation, are just as vital for a modern city as those provided by any other type of infrastructure. Ensuring that these ecosystem services are indeed delivered in an equitable

and sustainable way requires knowledge of the physical attributes of trees and urban green spaces, tools for coping with the complex social and cultural dynamics, and an understanding of how these factors can be integrated in better governance practices. By conveying the findings and recommendations of COST Action FP1204 GreenInUrbs, this volume summarizes the collaborative efforts of researchers and practitioners from across Europe to address these challenges.

Shadow State Camaren Peter,Hannah Friedenstein,Haroon Bhorat,Ivor Chipkin,Lumkile Mondli,Mark Swilling,Mbongiseni Buthelezi,Mzukisi Qobo,Nicky Prins,Sikhulekile Duma.2018-07-01 A powerful analysis of events that helped galvanise resistance across civil society The 2017 publication of *Betrayal of the Promise*, the report that detailed the systematic nature of state capture, marked a key moment in South Africa's most recent struggle for democracy. In the face of growing evidence of corruption and of the weakening of state and democratic institutions, it provided, for the first time, a powerful analysis of events that helped galvanise resistance within the Tripartite Alliance and across civil society. Working often secretly, the authors consolidated, for the first time, large amounts of evidence from a variety of sources. They showed that the Jacob Zuma administration was not simply

a criminal network but part of an audacious political project to break the hold of whites and white business on the economy and to create a new class of black industrialists. State-Owned Enterprises (SOEs) such as Eskom and Transnet were central to these plans. The report introduced a whole new language to discuss state capture, showing how SOEs were 'repurposed', how political power was shifting away from constitutional bodies to 'kitchen cabinets', and how a 'shadow state' at odds with the country's constitutional framework was being built. Shadow State is an updated version of the original, explosive report that changed South Africa's recent history.

Transport Justice Karel Martens.2016-07-01 Transport Justice develops a new paradigm for transportation planning based on principles of justice. Author Karel Martens starts from the observation that for the last fifty years the focus of transportation planning and policy has been on the performance of the transport system and ways to improve it, without much attention being paid to the persons actually using - or failing to use - that transport system. There are far-reaching consequences of this approach, with some enjoying the fruits of the improvements in the transport system, while others have experienced a substantial deterioration in their situation. The growing body of academic evidence on the resulting disparities in mobility and accessibility, have been paralleled by increasingly vocal calls for policy changes to address the inequities that have developed over time. Drawing on philosophies of social justice, Transport Justice argues that governments have the fundamental duty of providing virtually every person with adequate transportation and thus of mitigating the social disparities that have been created over the past decades. Critical reading for transport planners and students of transportation planning, this book

develops a new approach to transportation planning that takes people as its starting point, and justice as its end.

This edited collection featuring two books, one in English and one in French, includes important contributions to knowledge and public policy by eminent experts and emerging scholars. Inherit the Dust Nick Brandt.2015 Three years after the conclusion of his trilogy, *On This Earth, A Shadow Falls Across the Ravaged Land*, Nick Brandt returns to East Africa to photograph the escalating changes to the continent's natural world. In a series of epic panoramas, Brandt records the impact of man in places where animals used to roam, but no longer do. In each location, Brandt erects a life size panel of one of his animal portrait photographs, setting the panels within a world of explosive urban development, factories, wasteland and quarries. The people within the photographs are oblivious to the presence of the panels and the animals featured in them, who are now no more than ghosts in the landscape. Some of the animals in the panels appear to be looking out at these destroyed landscapes with sadness, as if lamenting the loss of the world they once inhabited. By the end, we see that it is not just the animals who are the victims in this out of control world, but also the humans. *Inherit the Dust* also includes plates of the original portraits of the animals that are featured in the life-size panels, the unique emotional animal portraiture for which Brandt is recognized. There are also two essays by the artist: a text about the crisis facing the conservation of the natural world in East Africa, and behind-the-scenes descriptions of Brandt's elaborate production process, with accompanying documentary photographs.

Extremely relevant. Peter May, Past President, International Society for Ecological Economics and Professor, UFRRJ, Rio de Janeiro, Brazil The book goes well beyond the Green Economy, offering arguments and blueprints for a complete makeover of the current economic system. With multi- and interdisciplinary contributions ranging from moderately to fundamentally critical of current economics, it raises fundamental questions of value and power, draws on a wide range of theories, opens the eyes for the historical processes that brought about the current crises and demonstrates the value of ecological, but also classical economic thinking to their solution. If better politics require better theories, this is a must read for academics and decision makers in the time of climate crisis.
