Research in Mass Customization and Personalization Mitchell, Frank T. Piller. 2009-12-01 A growing heterogeneity of demand, the advent of 'long tail markets', exploding product complexities, and the rise of creative consumers are challenging companies in all industries to find new strategies to address these trends. Mass customization (MC) has emerged in the last decade as the premier strategy for companies in all branches of industry to profit from heterogeneity of demand and a broad scope of other customer demands. The research and practical experience collected in this book presents the latest thinking on how to make mass customization work. More than 50 authors from academia and management debate on what is viable now, what did not work in the past, and what lurks just below the radar in mass customization, personalization, and related fields. Edited by two leading authorities in the field of mass customization, both volumes of the book discuss, among many other themes, the latest research and insights on customization strategies, product design for mass customization, virtual models, co-design toolkits, customization value measurement, open source architecture, customization communities, and MC supply chains. Through a number of detailed case studies, prominent examples of mass customization are explained and evaluated in larger context and perspective.

Music Hall Suite for Brass Quintet .2004-08 (Music Sales America). Suite of five pieces for brass quintet: two trumpets, horn, trombone and tuba. Full Score. This work was composed in 1964 at the request of the well known American tuba player Roger Bobo. It was soon taken into the repertoire of the Philip Jones Brass Ensemble, who gave the first BBC broadcast. The first recording was on Pye records, by the Halle Brass Ensemble. Since then it has become a regular repertoire piece and recorded as well as broadcast all over the world. The Suite consists of five movements, all illustrating aspects of the Burlesque Theatre, Music Hall, circus and cabaret, so popular at the end of the 19th century and into the 20th. The titles of the short movements are: Soubrette Song, Trick Cyclists, Adagio Team, Soft Shoe Shuffle and Les Girls. The five orchestral brass instruments (two trumpets, horn, trombone and tuba) are exploited in a chamber music manner, but the cumulative effect has a theatrical quality in keeping with the title.

Dead Man's Grip Peter James. 2011-11-22 Carly Chase is still traumatized ten days after being in a fatal traffic accident that kills a teenage American student from Brighton University. Then she receives news that turns her entire world into a living nightmare. The drivers of the other two vehicles involved have been found tortured and murdered. Now Detective Superintendent Roy Grace of the Sussex Police Force issues a stark and urgent warning to Carly: She could be next. The student had deadly connections. Connections that stretch across the Atlantic to America and an organized crime group. Someone has sworn revenge and won't rest until the final person involved in that fateful accident is dead. The police advise Carly her only option is to go into hiding and change her identity. The terrified woman disagrees. She knows these people have ways of hunting you down anywhere. If the police are unable to stop them, she has to find a way to do it herself. But already the killer is one step ahead of her, watching, waiting, and ready. Peter James' Dead Man's Grip is a chilling psychological thriller.

Achtung-Panzer! Heinz Guderian. 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Belgrave Square Anne Perry. 2011-06-28 When an obscure moneylender named William Weems is murdered in the humble Clerkenwell district, there are no mourners—and there is more than a little discreet rejoicing among those whose meager earnings he so mercilessly devoured. Yet when Inspector Pitt finds in the murdered man's office a list containing the names of some of London's most distinguished gentlemen, he begins to realize the magnitude of his duty. William Weems, it transpires, was no common usurer but a vicious blackmailer. Fortunately, Pitt's clever, well-born wife, Charlotte, has entrée to London's best society. Her insights prove to be invaluable to Pitt's investigation as she observes, at glittering balls and over gossipy tea tables, a world of passion, power, and greed that the police are seldom permitted to see.

Non-standard Spatial Statistics and Spatial Econometrics Daniel A. Griffith, Jean H. Paul Paelinck. 2011-01-11 Despite spatial statistics and spatial econometrics both being recent sprouts of the general tree spatial analysis with measurement—some may remember the debate after WWII about theory without measurement versus measurement without theory—several general themes have emerged in the pertaining literature. But exploring selected other fields of possible interest is tantalizing, and this is what the authors intend to report here, hoping that they will suscite interest in the methodologies exposed and possible further applications of these methodologies. The authors hope that reactions about their publication will ensue, and they would be grateful to reader(s) motivated by some of the research efforts exposed hereafter letting them know about these experiences.

The Rejection of Consequentialism Samuel Scheffler.1994-08-11 In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological.

Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

The Passive ANNA. SIEWIERSKA.2024-05 First published in 1984, *The Passive* surveys a wide range of different constructions, which have all been termed 'passives' by linguists, using data from a large number of genetically and typologically diverse languages. Chapter 1 raises questions about the nature of passives and exposes some of the difficulties inherent in the traditional assumptions. Chapter 2 examines the 'personal passive' and includes a discussion on the relationship between the passive and transitivity. Chapter 3 to 5 deal with impersonal, periphrastic and reflexive passives, exploring the varied problems raised by each construction and focusing particularly on English and Southeast Asian languages. The two final chapters look at various attempts to explain exceptions to the passive in both semantic and syntactic terms, with an additional section on pragmatics. This book will appeal to all of those involved in the field of comparative linguistics.

Globalization and Integrated Area Development in European Cities Frank Moulaert.2000-10-26 In this book the author seeks to rebut the somewhat fatalistic argument that socio-economic prosperity in the cities can only be achieved by the application of global market-led policies. He argues that urban society and policy makers do have sufficient freedom of action to make local decisions on the economic and social development of deprived neighbourhoods. Drawing on evidence from six major European cities, he demonstrates that their 'Integrated Area Development' strategies, which rely on grassroots democracy and the empowerment of local communities, can deliver a social, economic, and cultural renaissance which meets the needs of the local population more effectively than the market-forces creed.

Apocalypse Jacques Ellul.2020-05-05 "There has never been a book provoking more delirium, foolishness and irrational movements, without any relationship to Jesus Christ [than the Book of Revelation]." —Jacques Ellul, Introduction Known for his trenchant critique of modernity and of those Christians who celebrate their captivity to it, Ellul here cuts to the heart of the theological intention of the Book of Revelation, and thereby reveals the liberating gospel in all its offensiveness. Neither an exhaustive commentary nor a work of historical-exegetical analysis, *Apocalypse* is a provocative, independent interpretation. Ellul seeks to rescue Revelation from the reassuring and orthodox banality to which commentators often reduce it. The goal is to perceive the totality of the book in its movement and structure. "Architecture in movement" is the key to understanding Revelation's puzzling but simple message. This edition also comes with a new foreword by Jacob Marques Rollison who provides an essential aid for guiding readers through Ellul's thorough engagement with Revelation.
