The Right to Education in India Florian Matthey-Prakash.2019-08-22 What does it mean for education to be a fundamental right, and how may children benefit from it? Surprisingly, even when the right to education was added to the Indian Constitution as Article 21A, this question barely received any attention. The book identifies justiciability—or, more broadly, enforceability—as the most important feature of Article 21A, meaning that children and their parents must be provided with means to effectively claim their right from the State; otherwise, it would remain a ‘right’ only on paper. The book highlights how lack of access to the Indian judiciary means that the constitutional promise of justiciability remains unfulfilled. It deals with the possible alternative means the State may provide for the poor to claim the benefits under Article 21A, and identifies the grievance-redress mechanism created by the ‘Right of Children to Free and Compulsory Education Act, 2009’ as a potential system of enforcement. Even though this system is found to be deficient, the book concludes with an optimistic outlook, hoping that rights advocates may, in the future, focus on improving such mechanisms for legal empowerment.

Language Teachers' Narratives of Practice Lesley Harbon, Robyn Moloney. 2014-08-26 Language Teachers' Narratives of Practice is a collection of seventeen essays that examine personal and professional stories of, and by, language teachers in diverse Australian contexts. The voices of twenty-one Australian language teachers in all, describe teachers' own linguistic and cultural, personal and professional narratives, and how each narrative has informed the construction of their classroom language teaching practice to suit their teaching contexts. We see how teachers make individual responses to emerging pedagogies, developed through the lens of their personal experience and understanding of language and culture. In our invitations to these teachers to contribute chapters to the book, we have encouraged them to make visible the diversity within the Australian language teaching context. This is a new resource for use in a professional development context, for pre-service teachers, in-service teachers, tertiary teacher educators and researchers. This resource will serve as a practical text for teachers to draw on, to extend their own professional knowledge and classroom practice in relevant, useful and diverse areas. The narratives can be examined as case studies of teacher identity and life-worlds, development of pedagogies,

intercultural learning, and the differentiation and adaptation needed in particular environments, within a diverse environment such as Australia.

Europe's Languages on England's Stages, 1590-1620 Marianne Montgomery.2016-04-22 Though

representations of alien languages on the early modern stage have usually been read as mocking, xenophobic, or at the very least extremely anxious, listening closely to these languages in the drama of Shakespeare and his contemporaries, Marianne Montgomery discerns a more complex reality. She argues instead that the drama of the early modern period holds up linguistic variety as a source of strength and offers playgoers a cosmopolitan engagement with the foreign that, while still sometimes anxious, complicates easy national distinctions. The study surveys six of the European languages heard on London's commercial stages during the three decades between 1590 and 1620—Welsh, French, Dutch, Spanish, Irish and Latin—and the distinct sets of cultural issues that they made audible. Exploring issues of culture and performance raised by representations of European languages on the stage, this book joins and advances two critical conversations on early modern drama. It both works to recover English relations with alien cultures in the period by looking at how such encounters were staged, and treats sound and performance as essential to understanding what Europe's languages meant in the theater. *Europe's Languages on England's Stages, 1590-1620* contributes to our emerging sense of how local identities and global knowledge in early modern England were necessarily shaped by encounters with nearby lands, particularly encounters staged for aural consumption.
