Intimate Citizenship Ken Plummer.2011-10-01 Solo parenting, in vitro fertilization, surrogate mothers, gay and lesbian families, cloning and the prospect of designer babies, Viagra and the morning-after pill, HIV/AIDS, the global porn industry, on-line dating services, virtual sex--whether for better or worse, our intimate lives are in the throes of dramatic change. In this thought-provoking study, sociologist Ken Plummer examines the transformations taking place in the realm of intimacy and the conflicts--the intimate troubles--to which these changes constantly give rise. In surveying the intimate possibilities now available to us and the issues swirling around them, Plummer focuses especially on the overlap of public and private. Increasingly, our most private decisions are bound up with public institutions such as legal codes, the medical system, or the media. What impact does the increasingly public character of personal life have on our sense of ourselves and on how we view our own intimate choices? To navigate our way through a world in which people's private lives are so often subject to public scrutiny and debate, and in which the public sphere is increasingly pluralized and contested, we must broaden our understanding of what it means to be a citizen. Through the idea of intimate citizenship, Plummer sets an important agenda for the years to come.

Mad Men And Medusas Juliet Mitchell.2008-01-06 This worthy successor to *Psychoanalysis and Feminism* is both a defense of the long-dismissed diagnosis of hysteria as a centerpiece of the human condition and a plea for a new understanding of the influence of sibling and peer relationships. Juliet Mitchell argues that, because it our first social relationship, the sibling relationship is crucial to development, and that it is a critical failure of psychoanalysis and other psychological theories of development to obscure and ignore the importance of siblings and peers. In *Mad Men and Medusas* Mitchell traces the history of hysteria from the Greek wandering womb to modern-day psychiatric diagnoses, arguing that we need to reclaim hysteria to understand how distress and trauma express themselves in different societies and different times. Using fascinating examples from anthropology, Freud's case studies, literature, and her own clinical practice, Mitchell convincingly demonstrates that while hysteria may have disappeared as a disease, it is still a critical factor in understanding psychological development through the life cycle.

Theory into Poetry .2022-05-20 At the beginning of the 21st century, there is still no generally accepted comprehensive definition of the lyric or differentiated modern toolkit for its analysis. The reception of poetry is largely characterised either by an empathetic identification of critics with the lyric persona or by exclusive interest in formal patterning. The present volume seeks to remedy this deficit. All the contributors ‘theorise’ the lyric to overcome the impasse of an impressionistic and narrowly formalistic critical debate on the genre. Their papers focus on a variety of different questions: the problem of establishing a framework for definition and classification; the search for dynamic and potent critical approaches; investigations of poetry's cultural performance and its fundamental relevance for the construction of group cohesion. The essays collected in this volume offer a consciously polyphonic range of theories and interpretations, suggesting to the reader a variety of theoretical frameworks and practical illustrations of how a discussion of poetry may be firmly grounded in modern literary theory.

On Leopard Rock Wilbur Smith.2019-02-19 The first ever memoir from the Number One global bestselling adventure author Wilbur Smith has lived an incredible life of adventure, and now he shares the extraordinary true stories that have inspired his fiction. I've been writing novels for over fifty years. I was lucky enough to miss the big wars and not get shot, but lucky enough to grow up among the heroes who had served in them and learn from their example. I have lucked into things continuously. I have done things which have seemed appalling at the time, disastrous even, but out of them have come another story or a deeper knowledge of human character and the ability to express myself better on paper, write books which people enjoy reading. Along the way, I have lived a life that I could never have imagined. I have been privileged to meet people from all corners of the globe, I have been wherever my heart has desired and in the process my books have taken readers to many, many places. I always say I've started wars, I've burned down cities, and I've killed hundreds of thousands of people - but only in my imagination! From being attacked by lions to close encounters with deadly reef sharks, from getting lost in the African bush without water to crawling the precarious tunnels of gold mines, from marlin fishing with Lee Marvin to near death from crash-landing a Cessna airplane, from brutal schooldays to redemption through writing and falling in love, Wilbur Smith tells us the intimate stories of his life that have been the raw material for his fiction. Always candid, sometimes hilarious, and never less than thrillingly entertaining, *On Leopard Rock* is testament to a writer whose life is as rich and eventful as his novels are compellingly unputdownable.

Time and Place Thomas Dacosta Kaufmann.2017-11-22 Authors from Herodotus in antiquity to Vasari in the Renaissance related art and architecture to peoples, nations, regions, cities, and environments. Already with Winckelmann and the origins of discussion of art history in the eighteenth century geography was seen as a powerful determinant of art. In the nineteenth century, the perceived connection between nations or races and art flourished, mainly because of the rise of nationalism. Around 1900 the method of geographical analysis received a modern name, 'Kunstgeographie'. But the ideology of 'Blut and Boden' associated with Nazism and related ideologies brought the geography of art into disrepute. This book proposes to return anew to the approach of artistic geography, which had been largely neglected from the Second World War until recently, and to reevaluate the possibilities it provides through a selection of case studies that discuss the connection between art and its place. The introduction and first essay deal with the historiography of the geography of art. Five essays take up specific questions ranging from France and the Low Countries to Mexico and China. The final three essays consider contemporary and broader theoretical issues concerning art in time and place.

New Frontiers Paul J. du Plessis.2013-01-21 Roman law as a field of study is rapidly evolving to reflect new perspectives and approaches in research. Scholars who work on the subject are increasingly being asked to conduct research in an interdisciplinary manner whereby Roman law is not merely seen as a set of abstract concepts devoid of any background, but as a body of law which

operated in a specific social, economic and cultural context. This context-based, 'law and society' approach to the study of Roman law is an exciting new field which legal historians must address. This interdisciplinary collection focuses on three larger themes which have emerged from these studies: Roman legal thought the interaction between legal theory and legal practice and the relationship between law and economics.

Intelligence, Instruction, and Assessment Robert J. Sternberg, Wendy M. Williams.1998-07

Intelligence, Instruction, and Assessment shows how modern theories of intelligence can be directly applied by educators to the teaching of subject matter, regardless of the age of the students or the content being taught. It is intended primarily for teachers at all levels--elementary, secondary, tertiary--who want to apply in their classrooms what we know about intelligence. The focus is not on modifying students' intelligence, per se, but on increasing their disciplinary knowledge and understanding. Hence, this book will help teachers learn how they can teach more effectively what they are already teaching. The assumption is that what teachers care most about is how they can improve upon what they are already doing, and how they can learn what they need to do in order to be more effective in their work. The contributors are well known for their work on intelligence and education. Each chapter includes an accessible explanation of the author's theory of intelligence, and discusses the implications of that theory both for instruction and for assessment. The book is international in scope, reflecting both American and European perspectives. Anyone interested in knowing how modern theories of intelligence can be applied to education will want to read this book--particularly teachers and other education specialists, as well as developmental psychologists, cognitive psychologists, and philosophers with an interest in applying psychological theory to classroom practice. It will serve well as a text for courses on educational psychology, intelligence, cognition and instruction, and foundations of teaching.

Making Trouble Lynne Segal.2017-07-25 What happens when angry young rebels become wary older women, raging in a leaner, meaner time: a time which exalts only the "new," when the ruling orthodoxy daily disparages everything associated with the "old"? Delving into her own life and those who left their mark on it, Lynne Segal journeys through time to consider her generation of female dreamers, the experiences that formed them, what they have left to the world, and how they are remembered in a period when pessimism pervades public life. Searching for answers, she studies her family history, sexual awakening, and ethnicity, as well as the peculiarities of the time and place

that shaped her political journey, with all its urgency, significance, pleasures and absurdities.

The Law of Delict in South Africa Phumelele Jabavu, James Linscott, André CO Mukheibir. 2018 The book is a true student textbook that combines a strong theoretical foundation with a practical applied approach. A clear, concise yet rigorous introduction to the general principles of delictual law. Revised and updated, the second edition focuses more strongly on problem solving application. The text supports learning and the development of independent academic skills through various learning features which bring an applied, critical and reflective approach to the content. The structure of the book reflects the logical and systematic process of enquiry that is followed when assessing or preparing for a delictual matter, and it reflects clearly the distinctions between the Aquilian action, Germanic action and Actio iniuriarum. Pedagogically developed as a learning resource for students with varying backgrounds and skills levels. Supported by ancillary teaching materials which assist in teaching and learning.--Publisher's website.

The Lyric Poem Marion Thain. 2013-11-07 As a study of lyric poetry, in English, from the early modern period to the present, this book explores one of the most ancient and significant art forms in Western culture as it emerges in its various modern incarnations. Combining a much-needed historicisation of the concept of lyric with an aesthetic and formal focus, this collaboration of period-specialists offers a new cross-historical approach. Through eleven chapters, spanning more than four centuries, the book provides readers with both a genealogical framework for the understanding of lyric poetry within any particular period, and a necessary context for more general discussion of the nature of genre.

Translation and Translating Roger T. Bell. 2016-01-29 This book argues that the subjective evaluation of the product must give way to a descriptive and objective attempt to reveal the workings of the process (ie translating). Without such a shift, translation theory will continue outside the mainstream of intellectual activity in human sciences and fail to take its rightful place as a major field in applied Linguistics.

The Disobedient Generation Alan Sica, Stephen P. Turner. 2005-12-15 The Disobedient Generation collects newly written autobiographies by an international cross-section of well-known sociologists, all of them children of the '60s. It illuminates the human experience of living through that decade as apprentice scholars and activists, encountering the issues of class, race, the Establishment, the decline of traditional religion, feminism, war, and the sexual revolution. In each case the interlinked crises of young adulthood, rapid change, and nascent professional careers shaped this generation's private and public selves.

Contesting Transformation Marcelle C. Dawson, Luke Sinwell. 2014-04-22 Contesting Transformation is a sober and critical reflection of the wave of social movement struggles which have taken place in post-apartheid South Africa. Much of the writing on these movements was produced when they were at their peak, whereas this collection takes stock of the subsequent period of difficulty and complexity. The contributors consider how these different movements conceive of transformation and assess the extent to which these understandings challenge the narrative of the ruling African National Congress (ANC). From township revolts to labour struggles, Contesting Transformation is the definitive critical survey of the state of popular struggle in South Africa today.

Reading and Writing Public Documents Daniël Janssen, Rob Neutelings. 2001-01-01 Annotation Government documents--forms, brochures, letters, and policy papers--that are difficult to understand create problems both for the public they're intended to help and for government agencies. In this collection, researchers from five universities in the Netherlands survey recurring problems in government documents and offer possible solutions. The contributors are linguists, document designers, and other communication experts who have studied public documents both empirically and from a design point of view. Though the subject is Dutch documents, the text is in English, and the work may be of interest to those investigating government communication in other nations as well as those who produce similar documents in the private sector.
