Rio, Tokyo Paralympic Games and beyond: How to Prepare Athletes with Motor Disabilities for Peaking Pierre-Marie Leprêtre, Victoria L. Goosey-Tolfrey, Thomas W. J. Janssen, Claudio Perret. 2017-05-25

In 1960, the 9th Annual International Stoke Mandeville Games were supported, for the first time, by the Italian Olympic Committee. Taking place six days after the Closing Ceremony of the XVII Olympic Games, the paralympic games for disabled athletes were born. From Roma in 1960 to London in 2012, the Paralympic Games grew in terms of athletes' number from 400 to 4,237, and now brings together more than 164 nations (Perret, 2015). The word "Paralympic" derives from the Greek preposition "para" (beside or alongside) and the word "Olympic". Paralympics want to be the parallel Games to the Olympics and illustrate how the two movements exist side-by-side (Paralympics - History of the Movement, 2016). Now taking place after the Olympics Games, the Paralympic Games are the pinnacle of the career of athletes with physical impairments and have become the second largest sport event in the world (Perret, 2015; Paralympics - History of the Movement, 2016; Gold and Gold, 2011). The first statement of the vision of the International Paralympic Committee (IPC), i.e. "to create the conditions for athlete empowerment through self-determination" (Paralympics - History of the Movement, 2016; International Paralympic Committee, 2016), shows the importance of the place of the athlete with an impairment at the heart of the Paralympic Movement. The ultimate aim of the IPC is « to enable Paralympic athletes to achieve sporting excellence and inspire and excite the world. » (International Paralympic Committee, 2016). The performance level of athletes with an impairment improved to a point that, in the present days, sport news and world sport movements focus on the potential advantage of artificial limbs among athletes with amputations and their integration in able-bodied competitions (Burkett, 2010). However, they do not represent the totality of athletes with an impairment at the Paralympic Games. Athletes with other physical impairments (visual deficit, spinal cord injury, cerebral palsy or else) are eligible to compete. These impairments induce typical functional and physiological (e.g., cardiovascular, thermoregulatory) responses to exercise. For example, spinal cord injury (athletes with tetraplegia or paraplegia) causes thermoregulatory impairment (Goosey-Tolfrey et al., 2008) and individuals with cerebral palsy have also demonstrated higher thermal and metabolic strain than matched controls during treadmill walking in the heat (Maltais et al., 2004). Thus, hyperthermia among these athletes with an impairment alters their performance compared to their Olympic counterparts (Bhambhani, 2002). Mechanical performance analysis, the description of physiological responses according to the functional impairment or else the response to training and the relationship between laboratory and field testing responses are different parts of a package introduced here to address the aim of the IPC: to enable Paralympic athletes to achieve sporting excellence (Paralympics - History of the Movement, 2016; International Paralympic Committee, 2016). Paralympic Games, held almost immediately following the respective Olympics in the same site (Gold and Gold, 2011), also have exposed athletes to different environmental conditions. In the present 20-odd years, three of four Summer Paralympic Games have been or will be organized in the heat with or without significant humidity: Beijing 2008 (Average weather in September for Beijing, China., 2016), Rio de Janeiro 2016 (Average weather in September for Rio de Janeiro, Brazil., 2016) and Tokyo 2020 (Average weather in September for Ota, Japan., 2016). It has been established that the environmental conditions not only influences the level of cognitive and exercise performance capacity in trained able-bodied individuals (Veneroso et al., 2015), but their health status may also be affected. Due to the above-mentioned impairment in thermoregulatory capacity athletes with spinal cord injury or cerebral palsy may be more

susceptible to hyperthermia during exercise (Goosey-Tolfrey et al., 2008; Maltais et al., 2004; Bhambhani, 2002). During the Paralympic tournament, these athletes of the qualified nations were and will be exposed to heat and/or humid conditions. The hyperthermia induced by exercise among athletes with an impairment plus the effects of heat on core temperature will make their performance in the hot and warm conditions more challenging. Some studies have addressed strategies to prevent the physiologic and psychological impairments in athletic performance induced by exercise performed in the heat (Goosey-Tolfrey et al., 2008). Other proposed that wheelchair athletes should follow recommendations advocated for able-bodied individuals to minimize their risks of heat stress during competition (Bhambhani, 2002). In the present issue, the authors provide a descriptive approach of performance, and especially the preparation of athletes with a physical impairment to optimize their exercise performance. We argue that the interactions between environmental conditions and typical responses to exercise of athletes with an impairment and the equipment interactions with athlete's body should be taken into account in the preparation of Paralympic athletes in order to witness the most magnificent sporting display: the Paralympic Games. Finally, the motto of Paralympic movement « Spirit in Motion » is also the philosophy of the present compendium: to present new advances and research findings in the field of applied physiology and biomechanics in exercise, within the context of optimize Paralympic preparation and performance of athletes presented an impairment. Game Grant Hill.2022-06-07 The full, frank story of a remarkable life's journey—to the pinnacle of success as a basketball player, icon, and entrepreneur, to the depths of personal trauma and back, to a place of flourishing and peace—made possible above all by a family's love Grant Hill always had game. His choice of college was a subject of national interest, and his arrival at Duke University cemented the program's arrival at the top. In his freshman year, he led the team to its first NCAA championship, and three championship appearances in four years. His Duke career produced some of the most iconic moments in college basketball history, and Coach K proved to be a lifelong mentor. Later, as one of the NBA's best players and a new face of the Detroit Pistons franchise, Hill was the first person with the potential to give Michael Jordan a run for his money, not just as a player but as a brand. His \$45 million rookie contract was almost the least of it. He turned down Nike for Fila, and soon Method Man and Tupac Shakur were wearing his shoes. Hill writes candidly about all of it, including the transactional impermanence of life in the league and the isolation caused by his growing fame. His parents and friends helped ground him, and eventually he met a gifted musician named Tamia. The love he found with her and the arrival of their two beautiful daughters would be his rock as a brutal and mysterious injury sidelined him, coinciding with his wife's own serious health struggles. With openness and insight, Hill relates his entire path, including post-career highlights like his Hall of Fame induction, co-ownership of the Atlanta Hawks, the directorship of the USA Basketball Men's National Team, and even a yearly gig calling the Final Four. Hill's father, Calvin, used to tell him that there were always a lot of reasons but never any excuses, and Game is a distillation of a lifetime's effort to understand the reasons—the good and the bad. At his hardest moments, Hill sought out wisdom from others, stories of inspiration and overcoming obstacles. Now, with Game, he has returned the favor.

Disability Rights and Religious Liberty in Education Bruce J. Dierenfield, David A. Gerber. 2020-07-06 In 1988, Sandi and Larry Zobrest sued a suburban Tucson, Arizona, school district that had denied their hearing-impaired son a taxpayer-funded interpreter in his Roman Catholic high school. The Catalina Foothills School District argued that providing a public resource for a private, religious school created an unlawful crossover between church and state. The Zobrests, however, claimed that the district had infringed on both their First Amendment right to freedom of religion and the Individuals with Disabilities Education Act (IDEA). Bruce J. Dierenfield and David A. Gerber use the Zobrests' story to examine the complex history and jurisprudence of disability accommodation and educational mainstreaming. They look at the family's effort to acquire educational resources for their son starting in early childhood and the choices the Zobrests made to prepare him for life in the hearing world rather than the deaf community. Dierenfield and Gerber also analyze the thorny church-state issues and legal controversies that informed the case, its journey to the U.S.

Supreme Court, and the impact of the high court's ruling on the course of disability accommodation and religious liberty.
