Crypto Asset Investing in the Age of Autonomy Jake Ryan.2020-12-03 Competition, the drive for efficiency, and continuous improvement ultimately push businesses toward automation and later towards autonomy. If a business can operate without human intervention, it will minimize its operational cost. If Uber can remove the expense of a driver with an autonomous vehicle, it will provide its service cheaper than a competitor who can't. If an artificially intelligent trading company can search, find, and take advantage of some arbitrage opportunity, then it can profit where its competitors cannot. A business that can analyze and execute in real-time without needing to wait for a human to act, is a business that will be able to take advantage of brief inefficiencies from other markets or businesses. This trend following a thesis that is based on 100 years of proven economic theory. Short-wave economic cycles, those 5- to 10-year cycles, are driven by credit but the long-wave economic cycles, those 50- to 60-year cycles, are driven by technological revolution. We've had 5 cycles over the past 200 years with the last wave, the Age of Information & Telecommunications. We've seen evidence that a new cycle has begun. Technological revolutions come by way of a cluster of new innovations. About a decade ago, you started to see AI, robotics and IoT (sensors) delivering on automation. That's been powerful, but not transformational. It does not force businesses to fundamentally change how they do business. The last piece of the puzzle was cryptocurrency because it allows us to process and transfer economic value without human intervention. Soon, there will be a global race to build autonomous operations. Businesses and organizations without autonomous operations simply will not be able to compete with those that do because ... autonomy is the ultimate competitive advantage. Crypto is the mechanism that will accrue value from being the infrastructure for the next digital financial revolution. Crypto Asset Investing lays out a case that we've begun a new technological revolution similar to the Internet Age of the 1990's. Artificial intelligence, the Internet of Things, robotics and cryptocurrency are converging to deliver on a new age, what I call the Age of Autonomy. Understanding the transformation that's taken place before anyone else can yield enormous investment opportunity. In this book, you'll learn how and why to invest in crypto assets.

In the Country of Last Things Paul Auster.1988-05-02 From the author of the forthcoming 4 3 2 1: A Novel - a spare, powerful, intensely visionary novel about the bare-bones conditions of survival In a distant and unsettling future, Anna Blume is on a mission in an unnamed city of chaos and disaster. Quantile Regression Roger Koenker.2005-05-05 Quantile regression is gradually emerging as a unified statistical methodology for estimating models of conditional quantile functions. By complementing the exclusive focus of classical least squares regression on the conditional mean, quantile regression offers a systematic strategy for examining how covariates influence the location, scale and shape of the entire response distribution. This monograph is the first comprehensive treatment of the subject, encompassing models that are linear and nonlinear, parametric and nonparametric. The author has devoted more than 25 years of research to this topic. The methods in the analysis are illustrated with a variety of applications from economics, biology, ecology and finance. The treatment will find its core audiences in econometrics, statistics, and applied mathematics in addition to the disciplines cited above.

The City, Not Long After Pat Murphy.2014-04-15 A chilling postapocalyptic novel of hope, despair, art, and war from the Nebula and Philip K. Dick Award-winning author of *The Falling Woman*. A plague wiped out most of the population, but some have been spared. In San Francisco, those who were left—painters, writers, dreamers—began rebuilding the city in their image: a society based on art, community, and peace. But not everyone has the same pacifist ideals. When a mysterious young woman, Jax, appears in San Francisco, she brings disturbing news. There’s a power-hungry man, a general, moving across California, annexing cities and rebuilding his own version of America, willing to destroy anyone who stands in his way. His sights are set on the Golden Gate Bridge, and his army will soon descend, bringing guns, determination, and violence. If Jax and her allies are to survive, they’ll have to defend themselves with nothing more than their creativity—and the soul of a city that refuses to be dominated. Drawing comparisons to the mind-bending work of Gabriel García Márquez, this lush and thought-provoking dystopian novel is an examination of human spirit, for better or worse, and a magical journey into what it means to survive.

Collaborative Spaces at Work Fabrizio Montanari, Elisa Mattarelli, Anna Chiara Scapolan.2020-12-28 Collaborative spaces are more than physical locations of work and production. They present strong identities centered on collaboration, exchange, sense of community, and co-creation, which are expected to create a physical and social atmosphere that facilitates positive social interaction, knowledge sharing, and information exchange. This book explores the complex experiences and social dynamics that emerge within and between collaborative spaces and how they impact, sometimes unexpectedly, on creativity and innovation. *Collaborative Spaces at Work* is timely and relevant: it will address the gap in critical understandings of the role and outcomes of collaborative spaces. Advancing the debate beyond regional development rhetoric, the book will investigate, through various empirical studies, if and how collaborative spaces do actually support innovation and the generation of new ideas, products, and processes. The book is intended as a primary reference in creativity and innovation, workspaces, knowledge and creative workers, and urban studies. Given its short chapters and strong empirical orientation, it will also appeal to policy makers interested in urban regeneration, sustaining innovation, and social and economic development, and to managers of both collaborative spaces and companies who want to foster creativity within larger organizations. It can also serve as a textbook in master’s degrees and PhD courses on innovation and creativity, public management, urban studies, management of work, and labor relations.

Digital Libraries and Crowdsourcing Mathieu Andro.2018-03-13 Instead of outsourcing tasks to providers using labor-intensive countries, libraries around the world increasingly appeal to the crowds of Internet users, making their relationship with users more collaborative . These internet users can be volunteers or paid, work consciously, unconsciously or in the form of games. They can provide the workforce, skills, knowledge or financial resources that libraries need in order to achieve unimaginable goals.

Innovation and Scaling for Impact Christian Seelos, Johanna Mair. 2017-01-04 Innovation and Scaling for Impact forces us to reassess how social sector organizations create value. Drawing on a decade of research, Christian Seelos and Johanna Mair transcend widely held misconceptions, getting to the core of what a sound impact strategy entails in the nonprofit world. They reveal an overlooked nexus between investments that might not pan out (innovation) and expansion based on existing strengths (scaling). In the process, it becomes clear that managing this tension is a difficult balancing act that fundamentally defines an organization and its impact. The authors examine innovation pathologies that can derail organizations by thwarting their efforts to juggle these imperatives. Then, through four rich case studies, they detail innovation archetypes that effectively sidestep these pathologies and blend innovation with scaling. Readers will come away with conceptual models to drive progress in the social sector and tools for defining the future of their organizations.

Collaborative Production in the Creative Industries James Graham, Alessandro Gandini. 2017 In recent years research into creative labour and cultural work has usually addressed the politics of production in these fields, but the sociotechnical and aesthetic dimensions of collaborative creative work have been somewhat overlooked. This book aims to address this gap. Through case studies that range from TV showrunning to independent publishing, from the film industry to social media platforms such as Tumblr and Wattpad, this collection develops a critical understanding of the integral role collaboration plays in contemporary media and culture. It draws attention to diverse kinds of creative collaboration afforded via the intermediation of digital platforms and networked publics. It considers how these are incorporated into emergent market paradigms and investigates the complicated forms of subjectivity that develop as a consequence. But it also acknowledges historical continuities, not least in terms of the continued exploitation of 'support personnel' and of resulting artistic conflicts but also of alternative models that resist the precarious nature of contemporary cultural work. Finally, this volume attempts to situate creative collaboration in broader social and economic contexts, where the experience and outcomes of such work have proved more problematic than the rich potential of their promise would lead us to expect

Crowdfunding in the Public Sector Regina Lenart-Gansiniec, Jin Chen. 2021-07-27 In recent years, crowdfunding has become important and it has been enthusiastically used not only by commercial organizations but also by the public sector. This alternative source of financing in times of constrained government budgets enables citizens to vote with their dollars online to bring ideas into reality. This book sheds light on the developing concept of crowdfunding in the public sector, with an overview of current academic discussions and best practices on crowdfunding in the public sector. The volume approaches crowdfunding in the public sector from an integrated perspective, addressing the dearth of publications on the subject. The book gathers a wealth of theoretical information, ideas, best practices and lessons learned in the context of executing concrete

crowdfunding projects, and assess methodological approaches to integrating the topic of crowdfunding in public organizations curricula. The book provides definitions, insights and examples of this managerial perspective resulting in a theoretical framework of crowdfunding in the public sector. The contributors also explore different crowdfunding applications in public sectors such as local government, higher education, schools, arts & culture organizations, healthcare, energy sector, and police services, which are presented in several case studies. This is a unique book in the field that points the way forward both for policymakers and for the research community in terms of thinking about crowdfunding in the public sector and the complex issues surrounding its development.

Women and Trade World Bank;World Trade Organization.2020-09-04 Trade can dramatically improve women's lives, creating new jobs, enhancing consumer choices, and increasing women's bargaining power in society. It can also lead to job losses and a concentration of work in low-skilled employment. Given the complexity and specificity of the relationship between trade and gender, it is essential to assess the potential impact of trade policy on both women and men and to develop appropriate, evidence-based policies to ensure that trade helps to enhance opportunities for all. Research on gender equality and trade has been constrained by limited data and a lack of understanding of the connections among the economic roles that women play as workers, consumers, and decision makers. Building on new analyses and new sex-disaggregated data, *Women and Trade: The Role of Trade in Promoting Gender Equality* aims to advance the understanding of the relationship between trade and gender equality and to identify a series of opportunities through which trade can improve the lives of women.

Die Europäische Regulierung des Crowdlendings Benedikt M. Quarch.2020-07-20 Die digitale Disruption ist eine der prägenden Entwicklungen des 21. Jahrhunderts. Immer neue, sich stetig wandelnde Geschäftsmodelle müssen in den regulatorischen Rahmen der analogen Welt eingefügt werden. Besonderes Augenmerk gebührt dabei der Digitalisierung des Finanzmarkts, die regelmässig mit dem Neologismus FinTech überschrieben wird. Exemplarisch für diese Entwicklungen untersucht Benedikt M. Quarch die Europäische Regulierung der ökonomisch bedeutendsten FinTech-Erscheinung: des sog. Crowdlendings, also der kreditbasierten Schwarmfinanzierung. Auf der Grundlage einer ökonomischen Analyse beleuchtet er rechtsvergleichend die nationalen Crowdlending-Regulierungsregime in Frankreich, den Niederlanden und Deutschland sowie das einschlagige Unionsrecht samt der jüngsten Gesetzgebungspläne, welche die Europäische Kommission in ihrem FinTech-Aktionsplan vorgestellt hat. Gemeinsamkeiten und Unterschiede der verschiedenen Regulierungsansätze werden methodisch herausgearbeitet und zum Abschluss in einen eigenen Regulierungsvorschlag überführt.

High-Growth Firms Arti Grover Goswami,Denis Medvedev,Ellen Olafsen.2019-02-19 Remarkably, a small fraction of firms account for most of the job and output creation in high-income and developing countries alike. Does this imply that the path to enabling more economic dynamism lies in selectively targeting high-potential firms? Or would pursuing broad-based reforms that minimize distortions be more effective? Inspired by these questions, this book presents new evidence on the incidence, characteristics, and drivers of high-growth firms based on in-depth studies of firm dynamics in Brazil, Côte d'Ivoire, Ethiopia, Hungary, India, Indonesia, Mexico, South Africa, Thailand, Tunisia, and Turkey. Its findings reveal that

high-growth firms are not only powerful engines of job and output growth but also create positive spillovers for other businesses along the value chain. At the same time, the book debunks several myths about policies to support firm dynamism that focus on outward characteristics, such as firm size, sector, location, or past performance. Its findings show that most firms struggle to sustain rapid rates of expansion and that the relationship between high growth and productivity is often weak. Consequently, the book calls for a shift toward policies that improve the quality of firm growth by supporting innovation, managerial skills, and firms' ability to leverage global linkages and agglomeration. To help policy makers structure policies that support firm growth, the book proposes a new ABC framework of growth entrepreneurship: improving Allocative efficiency, encouraging Business-to-business spillovers, and strengthening firm Capabilities. This book is the third volume of the World Bank Productivity Project, which seeks to bring frontier thinking on the measurement and determinants of productivity to global policy makers. 'Policy makers often get carried away by the disproportionate contributions of high-growth firms to job and output growth and commit to pursuing policies targeting the potential 'stars.' This book separates fact from fiction underpinning such interventions through a comprehensive analysis of high-growth firms across a range of developing countries, making a compelling argument that public policy to pick prospective winners is neither possible nor desirable. Policy makers would be wise to consult its arguments and policy advice when designing the next generation of policies to support the growth of firms.' William R. Kerr Professor of Business Administration, Harvard University; author of *The Gift of Global Talent: How Migration Shapes Business, Economy and Society* 'How to ignite and sustain high firm growth has eluded both economic analysis and thought leaders in policy and business. Through its meticulous and thoughtful analysis, this important new book provides a tractable framework to guide policy to harness the growth and productivity potential of firms in the developing-country context.' David Audretsch Distinguished Professor and Director of the Institute for Development Strategies, Indiana University .

Demystifying Venture Capital Mohammad Mustafa.2020-11-10 Venture Capital is a marriage between 'people with money and no ideas' and 'people with ideas and no money'. It is a high-risk investment vehicle with the potential for manifold returns and the possibility of a complete investment written-off. Although it is essentially private money and smaller in size than traditional financing pillars, its impact has been phenomenal, even to the extent of transforming the way we live in the modern world. Yet the fact remains that the business of venture capital is not fully understood by startup founders and fund managers are also not familiar with the inner workings of other venture funds. And, as more public or tax-players' money flows into this asset class, it begs a shift from the existing esoteric styles to more transparent and predictable operations. It would also be beneficial if the craft of venture capital is well understood by the business community and most importantly, policymakers as *Demystifying Venture Capital: How it works and How to get primarily written to address these concerns, and to explain the subject in a nontechnical manner, as far as possible. A handbook for fund managers, startups, academicians interested in the subject, policy makers, and aspiring entrepreneurs, this book is unique as it has been written along with the top 25 venture funds in India as co-authors. The first part builds the concepts and theoretical framework of venture investing throughout the venture capital life cycle, giving readers a robust academic backdrop while the second part offer 25 first-hand accounts of how VCs invest, where they invest, what they look for while investing, providing invaluable insights into the minds and methods of VCs. All in all, this prototype is a first-of-its-kind endeavour to deliver a 360-degree + view of the Venture Capital universe.*

Chemical Ecology Anne-Geneviève Bagnères, Martine Hossaert-McKey. 2016-08-29 The book features comparative perspectives on the field of chemical ecology, present and future, offered by scientists from a wide variety of disciplines. The scientists contributing to this book –biologists, ecologists, biochemists, chemists, biostatisticians – are interested in marine, freshwater and terrestrial ecosystems and work on life forms ranging from micro-organisms to mammals, including humans, living in areas from the tropics to polar regions. Here, they cross their analyses of the present state of chemical ecology and its perspectives for the future. Those presented here include complex, multispecies communities and cover a wide range both of organisms and of the types of molecules that mediate the interactions between them. Up to now, no book has presented a solid scientific treatment of a wide range of examples. This book illustrates a diverse panel of the most advanced aspects of this rapidly expanding field.

The Billionaire Raj James Crabtree. 2019-07-02 A colorful and revealing portrait of the rise of India's new billionaire class in a radically unequal society India is the world's largest democracy, with more than one billion people and an economy expanding faster than China's. But the rewards of this growth have been far from evenly shared, and the country's top 1% now own nearly 60% of its wealth. In megacities like Mumbai, where half the population live in slums, the extraordinary riches of India's new dynasties echo the Vanderbilts and Rockefellers of America's Gilded Age, funneling profits from huge conglomerates into lifestyles of conspicuous consumption. James Crabtree's *The Billionaire Raj* takes readers on a personal journey to meet these reclusive billionaires, fugitive tycoons, and shadowy political power brokers. From the sky terrace of the world's most expensive home to impoverished villages and mass political rallies, Crabtree dramatizes the battle between crony capitalists and economic reformers, revealing a tense struggle between equality and privilege playing out against a combustible backdrop of aspiration, class, and caste. *The Billionaire Raj* is a vivid account of a divided society on the cusp of transformation—and a struggle that will shape not just India's future, but the world's.

Social and Sustainable Entrepreneurship G. Thomas Lumpkin, Jerome A. Katz. 2011-07-25 Considers the issues of social and sustainable entrepreneurship. Rethinking Global Urbanism Xiangming Chen, Ahmed Kanna. 2012 Arguing that the focus in global urban studies on cities such as New York, London, Tokyo in the global North, Mexico City and Shanghai in the developing world, and other major nodes of the world economy, has skewed the concept of the global city toward economics, this volume gathers a diverse group of contributors to focus on smaller and less economically dominant cities. It highlights other important and relatively ignored themes such as cultural globalization, alternative geographies of the global, and the influence of deeper urban histories (particularly those relating to colonialism) in order to advance an alternative view of the global city.

Women Philosophers in the Long Nineteenth Century Dalia Nassar, Kristin Gjesdal. 2021-07-19 The long nineteenth-century--the period beginning with the French Revolution and ending with World War I--was a transformative period for women philosophers in German-speaking countries and contexts. The period spans romanticism and idealism, socialism, Nietzscheanism, and phenomenology, philosophical movements we most often associate with Hegel, Schopenhauer, Kierkegaard, Nietzsche, and Marx--but rarely with women. Yet women philosophers not only

contributed to these movements, but also spearheaded debates about their social and political implications. While today their works are less well-known than those of their male contemporaries, many of these women philosophers were widely-read and influential in their own time. Their contributions shed important new light on nineteenth-century philosophy and philosophy more generally: revealing the extent to which various movements which we consider distinct were joined, and demonstrating the degree to which philosophy can transform lives and be transformed by lived experiences and practices. In the nineteenth century, women philosophers explored a wide range of philosophical topics and styles. Working within and in dialogue with popular philosophical movements, women philosophers helped shape philosophy's agenda and provided unique approaches to existential, political, aesthetic, and epistemological questions. Though largely deprived formal education and academic positions, women thinkers developed a way of philosophizing that was accessible, intuitive, and activist in spirit. The present volume makes available to English-language readers in many cases for the first time the works of nine women philosophers, with the hope of stimulating further interest in and scholarship on their works. The volume includes a comprehensive introduction to women philosophers in the nineteenth century and introduces each philosopher and her position. The translations are furnished with explanatory footnotes. The volume is designed to be accessible to students as well as scholars.

Cultural Policies in Europe Emmanuel Négrier, Félix Dupin-Meynard. 2020-08-25 At first glance, participation appears to be a constant goal throughout the history of cultural policies, adapting itself to very diverse configurations in time and space. However, some see it as a lever for social and cultural innovation that marks a breakthrough in several areas of public policy. Rapport Ambition numérique Yann BONNET, Somalina PA, Benoit THIEULIN, Valérie PEUGEOT, Charly BERTHET, Judith HERZOG, Marc TESSIER, Camille HARTMANN, François LEVIN, Marie EKELAND, Stéphane DISTINGUIN, Hugo MEUNIER, Mike FEDIDA, Mathilde BRAS, Daniel KAPLAN, Jan KREWER, Lea DOUHARD, Camille FRANCOIS. 2015-06-18 Le rapport Ambition numérique est la conclusion d'un débat ouvert avec les Français en vue de la préparation de la stratégie du gouvernement sur le numérique. Le rapport formule 70 propositions réparties en quatre volets : Loyauté et liberté dans un espace numérique en commun ; vers une nouvelle conception de l'action publique : ouverture, innovation, participation ; mettre en mouvement la croissance française : vers une économie de l'innovation ; solidarité, équité, émancipation : enjeux d'une société numérique. Pendant cinq mois (octobre 2014 - février 2015), le Conseil national du numérique a animé une vaste concertation sur l'"ambition numérique" de la France, afin de recueillir des propositions et des pistes d'action pour faire du numérique un atout, tant du point de vue économique que sociétal. Cette mission, confiée au CNNum par le Premier ministre en septembre 2014 et suivie par Axelle Lemaire, Secrétaire d'État chargée du Numérique et Thierry Mandon, Secrétaire d'État à la Réforme de l'État et à la Simplification, est une expérimentation inédite de construction des politiques publiques. La plateforme www.contribuez.cnnumerique.fr conçue avec l'association Démocratie Ouverte a permis à chaque citoyen, organisation publique ou privée de contribuer aux consultations proposées. À l'issue des phases de consultation, le CNNum a publié des synthèses ouvertes aux commentaires pour chaque consultation, retraçant de façon aussi neutre que possible les grandes controverses qui ont émergé et les pistes d'actions proposées. Au cours de la concertation, 4 journées contributives ont été organisées sur chacun des thèmes - respectivement à Lille, Strasbourg, Bordeaux et Nantes - en présence d'acteurs locaux. Lors de ces journées, des ateliers thématiques ont permis d'approfondir des propositions relevées

sur la plateforme en ligne, et de les confronter aux retours d'expérience des participants. En parallèle, des "pitches contributifs" ont donné l'opportunité à des entrepreneurs, étudiants, membres de la société civile, professionnels du droit, etc. de présenter leurs innovations et de proposer leurs idées pour "mettre à jour la France". Une concertation en réseau, mobilisant une diversité d'acteurs : pour stimuler la production d'idées collectives, le Conseil national du numérique a développé, avec l'accompagnement de la start-up Nod-A, un kit de ressources "Do it yourself", offrant la possibilité à des acteurs d'organiser eux-mêmes des ateliers sur les consultations de leur choix. Le CNNum a apporté son soutien méthodologique et de fond (à distance ou sur place) pour assurer une bonne appropriation des outils comme des problématiques abordées. Les organisateurs se sont quant à eux engagés à poster leurs contributions sur la plateforme à l'issue de ces ateliers. Un suivi régulier de la concertation avec le gouvernement : afin de coordonner les avancées de la concertation avec le travail gouvernemental (préparation du projet de loi numérique, élaboration de plans d'action), des points hebdomadaires se sont tenus, réunissant le Conseil national du numérique, les cabinets du Premier ministre, d'Axelle Lemaire et de Thierry Mandon. Des réunions interministérielles ont été organisées afin de diffuser la concertation auprès des administrations.

They further provide an assessment of startups, market structure, as well as backers and investors for each segment. Attention is given to the theoretical and empirical findings from the recent economics and finance literature. Furthermore, the authors evaluate relevant regulatory efforts in several jurisdictions. This book will appeal to finance, entrepreneurship and legal scholars as well as entrepreneurs and platform operators.

Le shadow banking, ou finance non réglementée, suscite crainte et fascination depuis la crise des subprimes. En plein développement, il rassemble l'ensemble des acteurs contribuant au financement non-bancaire de l'économie, depuis les firmes de capital-investissement jusqu'au crowdfunding. Opaque, spéculatif, à haut risque, systémique, voire criminel pour certains, le shadow banking est décrit par d'autres comme flexible, dynamique, innovant, adapté au financement de l'économie moderne, et complémentaire aux réseaux bancaires sur-réglementés. Que penser de ce phénomène complexe, dont le poids pourrait dépasser celui du système bancaire traditionnel ? Procédant à un diagnostic rigoureux du shadow banking System, les auteurs mettent en lumière ses dimensions techniques et économiques, mais aussi ses facettes politiques et culturelles, comparent ses différents modes de réglementation et explorent les nouvelles voies possibles de régulation. Ils esquissent ainsi les contours de la nécessaire transformation du système financier actuel.

Islamic Finance in Europe Valentino Cattelan. 2013-01-01 Highlighting the impact of current globalization on financial markets, this topical book challenges the universality of Western property rights and interprets Islamic finance in Europe as part of a plural financial system, where different conceptions of economic justice(s) co-exist and influence each other. The contributing authors analyse key economic development and social integration issues from an Islamic perspective and outline the European approach to accommodating Islamic finance, with particular regard to the peculiarities of individual nation-states. Set in this context, the book presents financial pluralism as a device to enhance a level playing field in the global marketplace, as well as to foster a plural open society. Providing a comprehensive and methodological guide to Islamic finance in Europe, this book will prove an illuminating and informative read for academics, students and policymakers with an interest in the impact on financial regulation of an increasingly globalized world.

Creative Labour David Hesmondhalgh, Sarah Baker. 2013-01-11 What is it like to work in the media? Are media jobs more 'creative' than those in other sectors? To answer these questions, this book explores the creative industries, using a combination of original research and a synthesis of existing studies. Through its close analysis of key issues - such as tensions between commerce and creativity, the conditions and experiences of workers, alienation, autonomy, self-realization, emotional and affective labour, self-exploitation, and how possible it might be to produce 'good work' Creative Labour makes a major contribution to our understanding of the media, of work, and of social and cultural change. In addition, the book undertakes an extensive exploration of the creative industries, spanning numerous sectors including television, music and journalism. This book provides a comprehensive and accessible account of life in the creative industries in the twenty-first century. It is a major piece of research and a valuable study aid for both undergraduate and postgraduate students of subjects including business and management studies, sociology of work, sociology of culture, and media and communications.
