The Economics of Recreation, Leisure and Tourism John Tribe.2020-04-01 One of the leading texts in the field, *The Economics of Recreation, Leisure and Tourism* is the ideal introduction to the fundamentals of economics in these industries, helping you to enjoy and pass an economics module as part of tourism, recreation, events or sport management degrees. International in its outlook, it will equip you with vital skills and knowledge for your future career as well as critical skills to help you understand and help tackle crucial challenges facing the world. It is written in a clear and engaging style that assumes no prior knowledge of economics. It applies economic theory to a range of tourism industry issues at the consumer, business, national and international level by using topical examples to give the theory real-world context. This book is richly illustrated with diagrams and contains a range of features such as international case studies showcasing current issues, review questions and extracts from journals to aid understanding and further knowledge, as well as new data and statistics. It concludes with a powerful critique of traditional economics and a set of twenty-one issues that demand action. This sixth edition has been revised and updated to include: recent and time series international economic data to provide a sense of the dynamics of world economies topical analysis to aid decision making for industry, governments and pressure groups a renewed emphasis on environmental and climate change issues new and revised international case studies that demonstrate theoretical principles of economics as applied to the sector a companion website with PowerPoint slides.

Creating Memory John Warkentin.2010 Toronto has over 600 public outdoor sculptures, works of art that provide a sense of the rich variety of life and work in the city, its peoples, cultures and aspirations. Interest in commissioning public sculpture began slowly in the nineteenth and early twentieth century, but increased rapidly after the 1950s.This is a book about the sculptures and how they disclose the city to itself. Creating Memory's two introductory sections examine the factors behind this expansion over time and the changes in style as one generation of sculptors succeeded another. It looks at the reasons behind the changes as sculptures were conceived, sculpted and erected. More than 10 categories of sculptures are defined and discussed, including Founding the City, Natural Environment, Immigration, Ethnic Groups, Economic Activities, Disaster and Calamity, War And Conflict, Leaders, Ordinary Citizens, Community Life, and Works of the Imagination.

Positive Youth Development Through Sport Nicholas L. Holt.2007-09-12 The first Positive Youth Development title to focus on the role of sport, this book brings together high profile contributors from diverse disciplines to critically examine the ways in which sport can be and has been used to promote youth development. Young people are too frequently looked upon as problems waiting to be solved. From the perspective of Positive Youth Development (PYD), young people are understood to embody potential, awaiting development. Involvement with sport provides a developmental context that has been associated with PYD, but negative outcomes can also arise from sport participation and school PE. Sport itself does not lead to PYD; rather, it is the manner in which sport is structured and delivered to children that influences their development. Positive Youth Development Through Sport fills a void in the literature by bringing together experts from diverse disciplines to critically examine the ways in which sport can be and has been used to promote youth development.

Aimed at governmental policy-makers and other stakeholders, it provides evidenced and balanced policy options supporting the effective contribution of sport towards six prioritised Sustainable Development Goals (SDGs).

Museum Theory Andrea Witcomb,Kylie Message.2020-04-06 MUSEUM THEORY EDITED BY ANDREA WITCOMB AND KYLIE MESSAGE Museum Theory offers critical perspectives drawn from a broad range of disciplinary and intellectual traditions. This volume describes and challenges previous ways of understanding museums and their relationship to society. Essays written by scholars from museology and other disciplines address theoretical reflexivity in the museum, exploring the contextual, theoretical, and pragmatic ways museums work, are understood, and are experienced. Organized around three themes—Thinking about Museums, Disciplines and Politics, and Theory from Practice/Practicing Theory—the text includes discussion and analysis of different kinds of museums from various, primarily contemporary, national and local contexts. Essays consider subjects including the nature of museums as institutions and their role in the public sphere, cutting-edge museum practice and their connections with current global concerns, and the links between museum studies and disciplines such as cultural studies, anthropology, and history.

The Pride of Havana Roberto Gonzalez Echevarria.2001-05-24 From the first amateur leagues of the 1860s to the exploits of Livan and Orlando El Duque Hernandez, here is the definitive history of baseball in Cuba. Roberto Gonzalez Echevarria expertly traces the arc of the game, intertwining its heroes and their stories with the politics, music, dance, and literature of the Cuban people. What emerges is more than a story of balls and strikes, but a richly detailed history of Cuba told from the unique cultural perch of the baseball diamond. Filling a void created by Cuba's rejection of bullfighting and Spanish hegemony, baseball quickly became a crucial stitch in the complex social fabric of the island. By the early 1940s Cuba had become major conduit in spreading the game throughout Latin America, and a proving ground for some of the greatest talent in all of baseball, where white major leaguers and Negro League players from the U.S. all competed on the same fields with the cream of Latin talent. Indeed, readers will be introduced to several black ballplayers of Afro-Cuban descent who played in the Major Leagues before Jackie Robinson broke the color barrier once and for all. Often dramatic, and always culturally resonant, Gonzalez Echevarria's narrative expertly lays open the paradox of fierce Cuban independence from the U.S. with Cuba's love for our national pastime. It shows how Fidel Castro cannily associated himself with the sport for patriotic p.r.--and reveals that his supposed baseball talent is purely mythical. Based on extensive primary research and a wealth of interviews, the colorful, often dramatic anecdotes and stories in this distinguished book comprise the most comprehensive history of Cuban baseball yet published and ultimately adds a vital lost chapter to the history of baseball in the U.S.

Nanotechnologies, Ethics and Politics H. ten Have.2007 Research in technologies at the atomic and molecular levels is rapidly growing worldwide. Their promising applications in medicine, manufacturing and communication range from the development of new drugs and diagnostic tools to pollutant removal and prevention, as well as to the production of stronger and lighter materials and revolutionary ways of storing, retrieving and disseminating information. Public opinion about nanotechnologies is already divided between hopes nourished by their potential benefits and the fear of their possible harmful effects on the environment and humankind. In the face of this divide, Nanotechnologies, Ethics and Politics engages in a rare kind of prospective ethical revolution: What health and environmental issues arise with the use of new materials produced by nanoscale technologies? How might nanoscale devices be controlled, and what concerns attend military and biomedical applications of nanotechnologies? What opportunities might these bring for international cooperation addressing the most pressing needs of developing countries? This volume brings together 14 experts from around the globe - advisors to the World Commission on the Ethics of Scientific Knowledge and Technology (COMEST) - who discuss the state of the art of nanotechnology, examine the controversy surrounding its definition and explore related ethical and political issues. The aim is stimulate a fruitful interdisciplinary dialogue about nanoscale technologies among scientists, ethicists, policymakers, special interest groups and the general

public.

Difference and Sameness as Modes of Integration Günther Schlee,Alexander Horstmann.2017-11-01 What does it mean to “fit in?” In this volume of essays, editors Günther Schlee and Alexander Horstmann demystify the discourse on identity, challenging common assumptions about the role of sameness and difference as the basis for inclusion and exclusion. Armed with intimate knowledge of local systems, social relationships, and the negotiation of people’s positions in the everyday politics, these essays tease out the ways in which ethnicity, religion and nationalism are used for social integration.

The Sociology of Sports Coaching Robyn L. Jones,Paul Potrac,Chris Cushion,Lars Tore Ronglan.2010-11-26 Sports coaching is a social activity. At its heart lies a complex interaction between coach and athlete played out within the context of sport, itself a socio-culturally defined set of practices. In this ground-breaking book, leading international coaching scholars and coaches argue that an understanding of sociology and social theory can help us better grasp the interactive nature of coaching and consequently assist in demystifying the mythical ‘art’ of the activity. The Sociology of Sports Coaching establishes an alternative conceptual framework from which to explore sports coaching. It firstly introduces the work of key social theorists, such as Foucault, Goffman and Bourdieu among others, before highlighting the principal themes that link the study of sociology and sports coaching, such as power, interaction, and knowledge and learning. The book also outlines and develops the connections between theory and practice by placing the work of each selected social theorist alongside contemporary views on that work from a current practicing coach. This is the first book to present a critical sociological perspective of sports coaching and, as such, it represents an important step forward in the professionalization of the discipline. It is essential reading for any serious student of sports coaching or the sociology of sport, and for any reflective practitioner looking to become a better coach.

Biopolyesters Wolfgang Babel,Alexander Steinbüchel.2003-07-01 Living systems synthesize seven different classes of polymers. They provide structure and form for cells and organisms, function as catalysts and energy storage and carry the genetic information. All these polymers possess technically interesting properties. Some of these biopolymers are already used commercially. This special volume of *Advances in Biochemical Engineering/Biotechnology* comprises 10 chapters. It gives an overview of the water insoluble biopolyesters, in particular of the microbially synthesized poly-hydroxyalkanoate (PHA) family. It reports the state of the art of metabolism, regulation and genetic background, the latest advances made in genetic optimization of bacteria, construction of transgenic plants and in vitro synthesis by means of purified enzymes. Furthermore, it describes relevant technologies and evaluates perspectives concerning increasing the economic viability and competitiveness of PHA and discusses applications in medicine, packaging, food and other fields.

Preventing Reading Difficulties in Young Children National Research Council,Division of Behavioral and Social Sciences and Education,Board on Behavioral, Cognitive, and Sensory Sciences,Committee on the Prevention of Reading Difficulties in Young Children.1998-07-22 While most children learn to read fairly well, there remain many young Americans whose futures are imperiled because they do not read well enough to meet the demands of our competitive, technology-driven society. This book

explores the problem within the context of social, historical, cultural, and biological factors. Recommendations address the identification of groups of children at risk, effective instruction for the preschool and early grades, effective approaches to dialects and bilingualism, the importance of these findings for the professional development of teachers, and gaps that remain in our understanding of how children learn to read. Implications for parents, teachers, schools, communities, the media, and government at all levels are discussed. The book examines the epidemiology of reading problems and introduces the concepts used by experts in the field. In a clear and readable narrative, word identification, comprehension, and other processes in normal reading development are discussed. Against the background of normal progress, *Preventing Reading Difficulties in Young Children* examines factors that put children at risk of poor reading. It explores in detail how literacy can be fostered from birth through kindergarten and the primary grades, including evaluation of philosophies, systems, and materials commonly used to teach reading.
