Stereograms: Autostereogram - Hidden 3D Pictures, the Wallpaper Effect - 3D Images - 3D Relief Images - Magic Eye Pictures MichelloZ Publishing.2021-05-28 To see the hidden 3D picture in each stereogram, basically you need to un-focus your eyes and look through the stereogram. Discrepancy in views will make your

brain see the hidden 3D image. Hold the stereogram about 15cm to 20cm from your face. Then stare through the picture, which will make your eyesight go blurry. Always hold stereogram horizontally or vertically, do not turn and do not bend it. Don't tilt your head and try not to blink. Eventually, a blurry hidden 3D picture will start to come into focus. Maintain your gaze and the 3D picture will soon become clearer, sharper and you will be able to look around the 3D picture without it disappearing. It may take some people a few seconds to see the 3D hidden picture, while for others it may take a few minutes or not at all.
