Evaluation in Foreign Language Education in the Middle East and North Africa Sahbi Hidri,Christine Coombe.2016-09-27 This book presents evaluation cases from the Middle East and North Africa (MENA) context, investigating the various facets of evaluation in different parts of the MENA region and beyond. In 19 chapters, it explores cases from Tunisia, Saudi Arabia, Egypt, Sudan, Syria, the UAE, Turkey, Iran and Morocco. The book highlights the impact of evaluation on a range of stakeholders, arguing that it has repercussions at the individual, societal, economic, cultural and political levels, that it also has an ethical dimension, and that it is tailored to people's needs, helping them to remain abreast of the effectiveness and efficiency of programs. Further, the book explores controversial issues concerning different evaluation themes, such as teacher and staff evaluation, assessment practices, text genre analysis evaluation, assessment of productive skills, textbook and ICT evaluation, evaluation of ELT certificates and programs, quality assurance, ESP needs analysis, assessment literacy, and dynamic assessment. It addresses key challenges, such as who the "right people" to implement evaluation are, and the appropriate use of evaluation results to avoid any misuse or harm to any stakeholder. In closing, the book calls for further research venues on the relevance of evaluation, testing and assessment in the MENA context and beyond.

Plato's 'Republic' Mark L. McPherran.2010-11-25 Plato's Republic has proven to be of astounding influence and importance. Justly celebrated as Plato's central text, it brings together all of his prior works, unifying them into a comprehensive vision that is at once theological, philosophical, political

and moral. The essays in this volume provide a picture of the most interesting aspects of the Republic, and address questions that continue to puzzle and provoke, such as: Does Plato succeed in his argument that the life of justice is the most attractive one? Is his tripartite analysis of the soul coherent and plausible? Why does Plato seem to have to force his philosopher-guardians to rule when they know this is something that they ought to do? What is the point of the strange and complicated closing Myth of Er? This volume will be essential to those looking for thoughtful and detailed excursions into the problems posed by Plato's text and ideas.

Plato Avi I. Mintz.2018-03-08 This book opens by providing the historical context of Plato's engagement with education, including an overview of Plato's life as student and educator. The author organizes his discussion of education in the Platonic Corpus around Plato's images, both the familiar - the cave, the gadfly, the torpedo fish, and the midwife - and the less familiar - the intellectual aviary, the wax tablet, and the kindled fire. These educational images reveal that, for Plato, philosophizing is inextricably linked to learning; that is, philosophy is fundamentally an educational endeavor. The book concludes by exploring Plato's legacy in education, discussing the use of the "Socratic method" in schools and the Academy's foundational place in the history of higher education. The characters in Plato's dialogues often debate - sometimes with great passion - the purpose of education and the nature of learning. The claims about education in the Platonic corpus are so provocative, nuanced, insightful, and controversial that educational philosophers have reckoned with them for millennia.

Reason and Persuasion John Holbo.2016-01-09 Three complete Plato dialogues - Euthyphro, Meno, Republic Book I - in a fresh English translation, with extensive commentary and original illustrations. Reason and Persuasion is suitable as an introductory textbook or for more advanced students of Plato and philosophy. The fourth edition is substantially revised, extended and improved. There is no dearth of textbooks offering an introduction to Plato's thought, but Holbo's stands apart in the scope of its introductory material and its user-friendly style ... The colloquial yet accurate translation by Belle Waring serves to reduce the distance between the student and the world of the dialogues ... Holbo's commentaries on these three dialogues serve to situate them both as individual works and also as parts of Plato's overall project of showing the problems of persuasion divorced from reason. Rather than taking a strictly scholarly approach the author has made clear the relevance of these texts for questions even non-philosophers should find worth asking. For instructors seeking an introductory text for first time readers of Plato, Holbo's book is worthy of consideration. Notre Dame Philosophical Reviews (review of the 3rd edition)

Plato 's Metaphysics of Education (RLE: Plato) Samuel Scolnicov.2013-05-07 This volume provides a comprehensive, learned and lively presentation of the whole range of Plato's thought but with a particular emphasis upon how Plato developed his metaphysics with a view to supporting his deepest educational convictions. The author explores the relation of Plato's metaphysics to the epistemological, ethical and political aspects of Plato's theory of education and shows how Plato's basic positions bear directly on the most fundamental questions faced by contemporary education.

Recollection and Experience Dominic Scott.1995-08-17 Questions about learning and discovery have fascinated philosophers from Plato onwards. Does the mind bring innate resources of its own to the process of learning or does it rely wholly upon experience? Plato was the first philosopher to give an innatist response to this question and in doing so was to provoke the other major philosophers of ancient Greece to give their own rival explanations of learning. This book examines these theories of learning in relation to each other. It presents an entirely different interpretation of the theory of recollection which also changes the way we understand the development of ancient philosophy after Plato. The final section of the book compares ancient theories of learning with the seventeenth-century debate about innate ideas, and finds that the relation between the two periods is far more interesting and complete than is usually supposed.
