Young Henry Ford Sidney Olson.2015-09-01 Young Henry Ford is a visual and textual presentation of the first forty years of Henry Ford—an American farm boy who became one of the greatest manufacturers of modern times and profoundly impacted the habits of American life. In Young Henry Ford, Sidney Olson dispels some of the myths attached to this automobile legend, going beyond the Henry Ford of mass production and the five-dollar day, and offers a more intimate understanding of Henry Ford and the time he lived in. Through hundreds of restored photographs, including some of Ford's own taken with his first camera, Young Henry Ford revisits an America now gone—of long days on the farm, travel by horse and buggy, and one-room schoolhouses. Some of the rare illustrations include the first picture of Henry Ford, photos from Edsel's childhood, snapshots of the interior and exterior of the Ford homestead, Clara and Henry's wedding invitation, and photos of the early stages of the first automobile.

My Life and Work Henry Ford,Samuel Crowther.1923 My Life and Work is a classic autobiography of the great American business mogul, Henry Ford. Henry Ford (July 30, 1863 - April 7, 1947) was an American industrialist, the founder of the Ford Motor Company, and sponsor of the development of the assembly line technique of mass production. Although Ford did not invent the automobile or the assembly line, he developed and manufactured the first automobile that many middle class Americans could afford. This is his story in his own words. Although Ford did not invent the automobile or the assembly line, [1] he developed and manufactured the first automobile that many middle-class Americans could afford. In doing so, Ford converted the automobile from an expensive curiosity into a practical conveyance that would profoundly impact the landscape of the 20th century. His introduction of the Model T automobile revolutionized transportation and American industry. As the owner of the Ford Motor Company, he became one of the richest and best-known people in the world. He is credited with Fordism mass production of inexpensive goods coupled with high wages for workers. Ford had a global vision, with consumerism as the key to peace. His intense commitment to systematically lowering costs resulted in many technical and business innovations, including a franchise system that put dealerships throughout most of North America and in major cities on six continents. Ford left most of his vast wealth to the Ford Foundation and arranged for his family to control the company permanently. Ford was also widely known for his pacifism during the first years of World War I, and for promoting antisemitic content, including The Protocols of the Elders of Zion through his newspaper The Dearborn Independent and the book The International Jew. Henry Ford was born July 30, 1863, on a farm in Greenfield Township, Michigan.[2] His father, William Ford (1826-1905), was born in County Cork, Ireland, to a family that was originally from Somerset, England.[3] His mother, Mary Ford (née Litogot; 1839-1876), was born in Michigan as the youngest child of Belgian immigrants; her parents died when she was a child and she was adopted by neighbors, the O'Herns. Henry Ford's siblings were Margaret Ford (1867-1938); Jane Ford (c. 1868-1945); William Ford (1871-1917) and Robert Ford (1873-1934). His father gave him a pocket watch in his early teens. At 15, Ford dismantled and reassembled the timepieces of friends and

neighbors dozens of times, gaining the reputation of a watch repairman.[4] At twenty, Ford walked four miles to their Episcopal church every Sunday.[5] Ford was devastated when his mother died in 1876. His father expected him to eventually take over the family farm, but he despised farm work. He later wrote, I never had any particular love for the farm--it was the mother on the farm I loved.[6] In 1879, Ford left home to work as an apprentice machinist in Detroit, first with James F. Flower & Bros., and later with the Detroit Dry Dock Co. In 1882, he returned to Dearborn to work on the family farm, where he became adept at operating the Westinghouse portable steam engine. He was later hired by Westinghouse to service their steam engines. During this period Ford also studied bookkeeping at Goldsmith, Bryant & Stratton Business College in Detroit.

The Cars That Henry Ford Built Beverly Rae Kimes.2005-08-21 At the time, in 1978, when *The Cars That Henry Ford Built* was first published, sending a copy for Henry Ford II to review seemed a vain request. Automobile Quarterly founding editor and publisher L. Scott Bailey was told that Mr. Ford (never comments on a book written about Ford. ÷ Two weeks later came an unexpected exhortation from Henry Ford II: (My grandfather would have loved this book. ÷ Ford then specially ordered 20 copies bound in white leather.needed in two weeks. The rush order was necessitated by an upcoming trip to Japan. As is culturally customary to offer a gift that honors one's ancestors, Henry Ford II specifically chose *The Cars That Henry Ford Built* to give to his Japanese hosts. Such high-level praise is derived from the book's fresh approach to the subject of Henry Ford, both in its study of the man and his cars, as well as the exceptional pictorial presentation. Presented for the first time in full color, there is every model Henry Ford produced from the Quadricycle he put together as a young man in 1896 to the famous V8 Ford on the production lines four and a half decades later during his failing years. Probably no other individual in automobile history more accurately mirrored in his cars his view of himself and of America as he saw it. Join award-winning historian and author Beverly Rae Kimes as she presents lively historical text that captures Henry growing and aging as his cars grew and aged, each lock-stepped together through history. Over 100 full-color photographs further bring the man and his creations to life.

Henry Ford Donn Paul Werling.2000-04-07 Henry Ford was one of the most misunderstood pioneers of the 20th century. *Henry Ford: A Hearthside Perspective* reveals a different side of the famous man. Werling, director of the Henry Ford Estate, University of Michigan-Dearborn, gained personal insight into Ford by researching the homesites, hearthsides, and communities where Ford had a strong influence. Through captivating anecdotes, this book offers a behind-the-scenes perspective on Ford and his business, political, and personal activities. Werling concludes that despite his shortcomings, Ford positively affected the lives of many with his contributions to the advancement of technology, his contributions to society through restoration, and his donations (over one-third of Ford's income was donated to philanthropic causes). In addition to covering the important accomplishments of Ford's life, *Henry Ford: A Hearthside Perspective* also discusses some of Ford's personal relationships, including those with his wife Clara, his son Edsel, and friends such as Thomas Edison.

Henry's Attic Ford Richardson Bryan.1995 Henry's Attic provides fascinating documentation of some of the one million artifacts in the Henry Ford Museum and Greenfield Village. The items represent both Henry Ford's passion for collecting Americana and the astonishing array of gifts-some of great historic value and others of a distinctly homegrown variety-that account for almost half of the museum's collections. It was the quantity of these gifts and the unusual and even unique nature of many of them that provided the inspiration for this book. Henry Ford Museum and Greenfield Village, which Ford established in Dearborn, Michigan in the late 1920s, was intended to recreate the slow-paced, rural character of America before the advent of the automobile. The purchases he made and the gifts he was given reflect his desire to document and preserve the lifeways of common people and to emphasize middle-class rural history, as represented by the tools of agriculture, industry, and transportation.

CHAPTER XXII AUTOMOBILES FOR THE MASSES In a short time Couzens returned from Chicago, bringing not only the delayed check, but several orders as well, which he had obtained largely because of the astounding record made by the Ford car in its race over the ice on Lake St. Clair. The Ford company was not yet firmly established, but prospects were bright. America was awaking to the possibilities of the automobile, not merely as a machine for spectacular exhibitions of daring and skill at track meetings, or as the plaything of wealthy men, but as a practical time and labor-saver for the average person. The automobile industry rose almost overnight. Orders poured into the offices of companies already organized; new companies were formed by dozens, capitalized at

millions of dollars. Fly-by-night concerns sprang up like mushrooms, flooded the country with stock-selling schemes, established factories where parts of motor cars, bought elsewhere, were assembled. Fortunes were made and lost and made again. Almost every day saw new cars on the market. Every one wanted an automobile. It was a luxury, it appealed to our longing to have something just a little better than our neighbors could afford. At the same time its obvious usefulness was an argument which overcame economy. The comic supplements, those faithful reflectors of American life in terms of the ridiculous, played with every variation of the theme, He mortgaged the home to buy an automobile. Amid this mounting excitement, in spite of millions to be made by building a car bigger, finer, more beautiful and luxurious than those of his competitors, Henry Ford still clung firmly to his Idea. He seems to have been, at that time, the only automobile manufacturer who realized that the...

David Weitzman has meticulously documented the development of the assembly line and the many innovations and adaptations Ford put to use in making his famous Tin Lizzy. When the Ford plant first opened, the crew could make 18,000 cars a year at a cost of \$950 each. In just ten years, they had refined the process enough so that they could build one million cars in a year and the price had come down to about \$350. Filled with detailed black-and-white drawings, helpful text and captions, and fascinating quotes from Ford employees, this elegant book gives young readers a look at a mechanical genius in action.

My Life and Work Henry Ford.2018-06-20 *My Life and Work* is the autobiography of Henry Ford; a businessman who revolutionized automotive manufacture in the early 20th century. This book takes us through the major episodes of Ford's life, from his early beginnings and the development of his successful commercial endeavors. Ford's ideas on achieving the greatest efficiency during the process of automobile creation remain influential today. Namely in what is now called the 'Just in Time' method of production; wherein a complex product is manufactured with each part made ready at the precise moment of assembly. Released in 1922, the autobiography was penned partly in response to the groundswell of public attention lavished upon one of the most visible technological advances to appear at the time. The famous Model T car in just a decade went from obscure gadget to worldwide symbol of the motor vehicle revolution, spearheaded by the Ford Motor Company.
