Machine Dreams Jayne Anne Phillips.2011-11-09 In her highly acclaimed debut novel, the bestselling author of *Shelter* introduces the Hampsons, an ordinary, small-town American family profoundly affected by the extraordinary events of history. Here is a stunning chronicle that begins with the Depression and ends with the Vietnam War, revealed in the thoughts, dreams, and memories of each family member. Mitch struggles to earn a living as Jeans becomes the main breadwinner, working to complete college and raise the family. While the couple fight to keep their marriage intact, their daughter Danner and son Billy forge a sibling bond of uncommon strength. When Billy goes off to Vietnam, Danner becomes the sole bond linking her family, whose dissolution mirrors the fractured state of America in the 1960s. Deeply felt and vividly imagined, this lyrical novel is among the wisest of a generation to grapple with a war that maimed us all (*The Village Voice*), by a master of contemporary fiction.

Amistad's Orphans Benjamin Nicholas Lawrance.2015-01-28 The lives of six African children, ages nine to sixteen, were forever altered by the revolt aboard the Cuban schooner *La Amistad* in 1839. Like their adult companions, all were captured in Africa and illegally sold as slaves. In this fascinating revisionist history, Benjamin N. Lawrance reconstructs six entwined stories and brings

them to the forefront of the Amistad conflict. Through eyewitness testimonies, court records, and the children's own letters, Lawrance recounts how their lives were inextricably interwoven by the historic drama, and casts new light on illegal nineteenth-century transatlantic slave smuggling.

Science Starters: Elementary Chemistry & Physics Parent Lesson Plan .2013-08-01 Science Starters: Elementary Chemistry and Physics Course Description This is the suggested course sequence that allows one core area of science to be studied per semester. You can change the sequence of the semesters per the needs or interests of your student; materials for each semester are independent of one another to allow flexibility.

Semester 1: Chemistry Investigate the Possibilities Elementary Chemistry-Matter Its Properties & Its Changes: Infused with fun through activities and applied learning, this dynamic full-color book provides over 20 great ways to learn about bubbles, water colors, salt, and the periodic table, all through interactive lessons that ground students in their faith in God. Help tap into the natural curiosity of young learners with activities utilizing common household items, teaching them why and how things work, what things are made of, and where they came from. Students will learn about the physical properties of chemical substances, why adding heat causes most chemical changes to react faster, the scientist who organized a chart of the known elements, the difference between chemical changes and physical changes.

Semester 2: Physics Investigate the Possibilities Elementary Physics-Energy Its Forms, Changes, & Function: This remarkable full-color book is filled with experiments and hands-on activities, helping 3rd to 6th graders learn how and why magnets work, different kinds of energy from wind to waves, and concepts from nuclear power to solar energy. Science comes alive as students are guided through simplified key concepts of elementary physics and through hands-on applications. Students will discover what happens to light waves when we see different colors, how you can see an invisible

magnetic field, the essential parts of an electric circuit, how solar energy can be changed into electric energy. Investigate the wonderful world God has made with science that is both exciting and educationally outstanding in this comprehensive series!

From the Mountain Top George J. Pappas.2016-12-28 Every year, Louise Belmont makes a sentimental pilgrimage to the top of Mont Ste-Anne near her small Québec village of Percé on the Gaspé Peninsula. It's a special place. It's where her beloved late husband Luc proposed many years ago. For Louise now though, it's all about her children, their spouses and her visiting six-year-old grandson Michel. She has no thoughts of romance. So when she meets the distinguished but lost tourist Laurence Bradford on the mountain top, she gives him directions, has a friendly visit and thinks little more of it. But, as she starts to be seen around the village with Laurence, tongues start wagging. Then her old school chum and confidant Harry Bernier returns to Percé for his retirement. Gradually, Louise starts to consider whether to let a new love into her life and just who that might be.

Learn to Think and Write Una McGinley Sarno.2011-10-16 This book presents the EPILLAW Paradigm, a practical method for developing writing skills. The paradigm consists of an original nine-level taxonomy and sequential methodology of listening, speaking, writing and reading. In this method, the development of writing precedes the development of reading. In the introductory book, the author explores the final three levels of the writing process.

My Trade Is Mystery Carl Phillips.2022-11 An invaluable companion for any writer seeking to make the writing life a more complex and cooperative venture In these intimate and eloquent meditations,

the award-winning poet Carl Phillips shares lessons he has learned about the writing life, an apprenticeship to what can never fully be mastered. Drawing on forty years of teaching and mentoring emerging writers, he weaves his experiences as a poet with the necessary survival skills, including ambition, stamina, silence, politics, practice, audience, and community. In the tradition of Anne Lamott's *Bird by Bird*, Rainer Maria Rilke's *Letters to a Young Poet*, and Marcus Aurelius's *Meditations*, this is an invaluable companion for writers at every stage of their journey. Phillips's book serves as a partner in speculation and an invitation to embrace mystery.

Making Connections in Elementary and Middle School Social Studies Andrew P. Johnson. 2006 Making Connections in Elementary and Middle School Social Studies is based on the idea that students learn more and are more motivated to learn when they are able to connect their own knowledge, observations, ideas, imagination, and emotions with the content at hand. This book demonstrates how personal connections can be incorporated into social studies education while meeting NCSS thematic, pedagogical, and disciplinary standards. It is written in a very direct, reader-friendly style. Each chapter describes a variety of practical strategies and creative activities that novice and experienced teachers can use to make social studies more interesting and to help students make meaningful personal and academic connections. Each chapter contains a wealth of classroom strategies, pedagogical techniques, activities, and lesson plan ideas that can be used to enhance learning and make lessons more interesting, active, and student-centered. The book covers the three types of standards that elementary and middle school teachers work with as they teach social studies. o Thinking Ahead questions invite the reader to reflect on his/her own experiences, as they relate to the material covered in the next chapter. These can be used as discussion points for a

class or small group, or simply as pre-reading prompts to enhance comprehension. o Teachers in Action boxes contain real life narratives from practicing teachers. These cases are designed to expand upon key issues presented in each chapter. Every case is accompanied by the author's personal reflection on the case. These reflections are intended to give the reader an opinion against which he/she can measure his/her own reactions. After each case, the reader is prompted to think about the narrative presented and think about the way that his/her reactions compare with those presented by the author. o Go There boxes provide links to Web sites that offer additional resources for teachers, lesson plans, and other activities to enhance a social studies classroom. This text is accompanied by a dynamic Instructor's Resources CD. The CD includes classroom video footage that can be shown in class to illustrate the concepts presented in the book and stimulate class discussion.
