Psychopathic Disorders and Their Assessment Michael Craft.2013-10-22 Psychopathic Disorders and their Assessment considers the diverse views and significant developments in understanding psychopathic disorders. This book is composed of 12 chapters, and begins with a description of the primary and negative features of the condition. The subsequent chapters are concerned with the methods of disposal of a psychopath under English law, the safeguards available both to the individual and to society within and without the Mental Health Act, and the extent to which this disposal mechanism was used. These topics are followed by discussions on the causation of psychopathic disorder; the electroencephalographic and psychological techniques for the disorder evaluation; and various methods of patient care. The last chapters consider the law and practice relating to psychopathic disorder and British facilities for the treatment of psychopaths. This book is of value to psychologists and psychiatrists.

Red Star Alexander Bogdanov.1984-06-22 "An Earth-man's journey to the planet Mars, where he is treated to a wondrous vision of a communist future, complete with flying cars and 3D color movies." —Wonders & Marvels A communist society on Mars, the Russian revolution, and class struggle on two planets is the subject of this arresting science fiction novel by Alexander Bogdanov (1873–1928), one of the early organizers and prophets of the Russian Bolshevik party. The red star is Mars, but it is also the dream set to paper of the society that could emerge on earth after the dual victory of the socialist and scientific-technical revolutions. While portraying a harmonious and rational socialist

society, Bogdanov sketches out the problems that will face industrialized nations, whether socialist or capitalist. “[A] surprisingly moving story.” —The New Yorker “The contemporary reader will marvel at [Bogdanov’s] foresight: nuclear fusion and propulsion, atomic weaponry and fallout, computers, blood transfusions, and (almost) unisexuality.” —Choice “Bogdanov’s novels reveal a great deal about their fascinating author, about his time and, ironically, ours, and about the genre of utopia as well as his contribution to it.” —Slavic Review

Characters in Fictional Worlds Jens Eder, Fotis Jannidis, Ralf

Schneider. 2011-01-01 Although fictional characters have long dominated the reception of literature, films, television programs, comics, and other media products, only recently have they begun to attract their due attention in literary and media theory. The book systematically surveys today’s diverse and at times conflicting theoretical perspectives on fictional character, spanning research on topics such as the differences between fictional characters and real persons, the ontological status of characters, the strategies of their representation and characterization, the psychology of their reception, as well as their specific forms and constellations in - and across - different media, from the book to the internet.

view of language as an embodied, semiotic, symbolic tool used for communicative and interactional purposes and an understanding of language use as the preeminent condition for language learning - perspectives that we conjoin under the umbrella term of usage based perspectives.

In Babel's Shadow Tuska Benes.2008 In contrast to fields like anthropology, the history of linguistics has received remarkably little attention outside of its own discipline despite the undeniable impact language study has had on the modern period. In *Babel's Shadow* situates German language scholarship in relation to European nationalism, nineteenth-century notions of race and ethnicity, the methodologies of humanistic inquiry, and debates over the interpretation of scripture. Author Tuska Benes investigates how the German nation came to be defined as a linguistic community and argues that the linguistic turn in today's social sciences and humanities can be traced to the late eighteenth century, emerging within a German tradition of using language to critique the production of knowledge. In this volume, Benes suggests that nineteenth-century philologists interpreted language as evidence of ethnic descent and created influential myths of cultural origin around the perceived starting points of their mother tongue. She argues that the origin paradigm so prevalent in German linguistic thought reinforced the historical and ethnic focus of German nationhood, with important implications for German theologians, cultural critics, philosophers, and racial theorists. In *Babel's Shadow* also contextualizes the importance of linguistics to modern cultural studies by arguing that the cultural significance attributed to language in twentieth-century French philosophy dates to the late eighteenth century and has clear precedents in theology. Benes links the German tradition of reflecting on the autonomous powers of language to the work of the fathers of structuralist and poststructuralist thought, Ferdinand de Saussure and Friedrich Nietzsche. In *Babel's Shadow* makes clear that comparative

philology helped make language an important model and informing metaphor for other modes of thinking in the modern human sciences. Cultural and intellectual historians, scholars of German language and literature, and linguists will enjoy this illuminating volume.

Technology and Vocational Education for Sustainable

Development Margarita Pavlova.2008-12-14 Empowerment is the overarching idea used in this book. The term has a variety of meanings in different sociocultural and political contexts, including “self-strength, control, self-power, self-reliance, own choice, life of dignity in accordance with one’s values, capable of fighting for one’s rights, independence, own decision making, being free, awakening, and capability” (The World Bank, 2002, p. 10). However, the World Bank report observed that most definitions focus on issues of “gaining power and control over decisions and resources that determine the quality of one’s life” (p. 10). This interpretation of empowerment provides a useful starting point for the development of the series of interconnected arguments explored here. Establishment of the basis for understanding, identifying and developing strategies through education necessary for individuals to be able to make choices that influence the quality of their lives is the main aim of this book. There are a number of assumptions and boundaries that frame this analysis. First, the book focuses on “agents”; however, empowerment is often conceptualised in terms of relationships between agency and structure (e. g. , Alsop, Bertelsen, & H- land, 2006). Agency could be defined as “an actor’s or group’s ability to make purposeful choices - that is, the actor is able to envisage and purposively choose options” (p. 11).

It relates the broad educational and social science rationale for the use of tasks to the principles and practices of their classroom use. The authors provide a balanced review of research as a basis for exploring a broader research agenda. Throughout, the book offers telling illustration of the contributions of a range of specialists in research, teaching methodology and materials development, and of the authors' own argument.

The Cambridge Companion to John Cage David

Nicholls. 2002-08 Publisher Description

Nationalism and Archaeology in Europe Margarita Díaz-Andreu, Timothy Champion. 2014-10-24 Archaeologists from many different European countries here explore the very varied relationship between nationalistic ideas and archaeological activity through the course of the nineteenth and twentieth centuries. The resurgence of nationalism was one of the most prominent features of the European political scene in the 1990s, when this book was originally published. The past provides a large supply of ideas and images to support the claims of national identity deeply rooted in remote generations. The remote past revealed by archaeology also plays a part – heroes, heroines, golden ages long disappeared, objects to admire, and sites to provoke the memory, all called on to further the cause of nationalism. Drawing on the authoritative insights of the indigenous contributors, this book examines the issues throughout modern Europe. All of the chapters share a concern to see archaeology and the study of the past as intimately related to contemporary social and political questions. The present shapes

the way we think about the past but the past also provides us with evidence for thinking about the present. These issues are timeless and this comprehensive examination of a host of issues remains important for historians and those pursuing nationalistic politics. Multilingual Computer Assisted Language Learning Judith Buendgens-Kosten, Daniela Elsner. 2018-08-09 Recent developments in education, such as the increasing linguistic diversity in school populations and the digital revolution which has led to new ways of being, learning and socialising, have brought about fresh challenges and opportunities. In response, this book shows how technology enriches multilingual language learning, as well as how multilingual practices enrich computer assisted language learning (CALL) by bringing together two, thus far distinct, fields of research: CALL and multilingual approaches to language learning. The collection includes contributions from researchers and practitioners from three continents to illustrate how native languages, previously studied languages, heritage languages or dialects are activated through technology in formal and informal learning situations. The studies in this book showcase multilingual language use in chat rooms, computer games, digital stories, ebook apps, online texts and telecollaboration/virtual exchange via interactive whiteboards. This volume will be of interest to researchers interested in language learning and teaching and to practitioners looking for support in seizing the opportunities presented by the multilingual, digital classroom.

Content and Foreign Language Integrated Learning Yolanda Ruiz de Zarobe, Juan Manuel Sierra, Francisco Gallardo del Puerto. 2011 This book received the XV Research Award of the Spanish Association of Applied Linguistics (XV Premio de Investigación de la Asociación Española de Lingüística Aplicada) 2012. The present volume bears witness to the Europe-wide character of the Content and Language Integrated Learning (CLIL) enterprise by featuring contributions from researchers and teacher-educators

from a range of European countries spanning the geographical expanse of the continent from east (Estonia) to west (United Kingdom) and from north (Finland) to south (Spain, Italy). More importantly, the different national contexts are characterised by diverse cultural stances and policies vis-à-vis second and foreign language learning in general and learning specific languages in particular and it is evident that such contextual factors impinge on what are identified as central concerns both in CLIL implementation and research.

Dyadic Coping: A Collection of Recent Studies Guy

Bodenmann, Mariana K. Falconier, Ashley K. Randall. 2019-09-25

Dyadic coping is a concept that has reached increased attention in psychological science within the last 20 years. Dyadic coping conceptualizes the way couples cope with stress together in sharing appraisals of demands, planning together how to deal with the stressors and engage in supportive or joint dyadic coping. Among the different theories of dyadic coping, the Systemic Transactional Model (STM; Bodenmann, 1995, 1997, 2005) has been applied to many studies on couples' coping with stress. While a recent meta-analysis shows that dyadic coping is a robust and consistent predictor of relationship satisfaction and couple's functioning in community samples, some studies also reveal the significance of dyadic coping in dealing with psychological disorders (e.g., depression, anxiety) or severe illness (e.g., cancer, diabetes, COPD, etc.). Researchers all over the world build their research on this or other concepts of dyadic coping and many typically use the Dyadic Coping Inventory (DCI) for assessing dyadic coping. So far, research on dyadic coping has been systematically presented in two books, one written by Revenson, Kayser, & Bodenmann in 2005, focussing on emerging

perspectives on couples' coping, the other by Falconier, Randall, & Bodenmann more recently in 2016, addressing intercultural aspects of dyadic coping in African, American, Asian and European couples. This eBook gives an insight into recent dyadic coping research in different areas and countries.

Studies in Bilingual Education Daniel Madrid,Stephen

Hughes.2011 This book deals with bilingual education in general, but it pays special attention to bilingual education in monolingual areas. One central aim is to study the effects of bilingual programmes during the final stages of Primary and Secondary Education in contexts where the L2 (English) is not normally used as an instrument of social communication in the students' environment, but instead is used only at school, where some subject areas are undertaken totally or partially in this language. The reader interested in bilingual education will find a valuable source of information on different bilingual programmes in the USA and Spain: what schools do and the contents they teach, their timetable and extracurricular activities; the specific objectives that they aim to achieve and the methodology they use,

with special reference to the CLIL approach, the schools and the students' level of success with bilingual education, the most common problems that they have to face in monolingual areas and how to solve them.

Invisible Walls Hella Pick. 2021-03-18 'Memoirs of such richness are rare . . . a joy' JAMES NAUGHTIE 'A remarkable personal journey, by one of the great political correspondents of our world - eloquent, enlightening, exhilarating' PHILIPPE SANDS A trailblazer for women in journalism, Hella Pick arrived in Britain in 1939 as a child refugee from Austria. Over nearly four decades she covered the volatile global scene, first in West Africa, followed by America and long periods in Europe. In her thirty-five years with the Guardian she reported on the end of Empire in West Africa, the assassination of President Kennedy, Martin Luther King's march from Selma to Montgomery, the Vietnam peace negotiation in Paris, the 1968 student revolt in France, the birth of the Solidarity movement in Poland, and the closing stages of the Cold War. A request for coffee on board a Soviet ship anchored in Malta led to a chat with Mikhail Gorbachev. A request for an interview with Willy Brandt led to a personal friendship that enabled her to come to terms with Germany's Nazi past. Her book is also a clarion call for preserving professionalism in journalism at a time when social media muddy the waters between fact and fiction, and between reporting and commentary. INVISIBLE WALLS tells the dramatic story of how a Kindertransport survivor won the trust and sometimes the friendship of world leaders, and with them a wide range of remarkable men and women. It speaks frankly of personal heartache and of a struggle over her Jewish identity. It is also the intensely touching story of how, despite a gift for friendship and international recognised achievements as a woman journalist, a continuing sense of personal insecurity has confronted her with a series of invisible walls.

A Trip to Africa Dario Salvi,Hannah Salvi.2016-06-22 In 1883, three of the masterminds of Viennese operetta collaborated on a new masterpiece; A Trip to Africa - or Die Afrikareise in the original German. They were composer Franz von Suppé and librettists Richard Genée and Moritz West. The final result was one of the best Viennese operettas of all time. The work was performed across the world for 50 years, before the advent of films and lighter musical theatre made it, and many other works belonging to the same tradition, obsolete. The last known performance was in Italy in 1922. Using sources from all over the world, this book pieces together for the first time a complete libretto, in English, German and Italian, with the original stage directions, as well as images of some of the productions. The story is full of humour, romance and suspense, with catchy melodies in a quintessentially Viennese style.

Intentional History Lin Foxhall,Hans-Joachim Gehrke,Nino Luraghi.2010 The contributions assembled in this volume study the social function and functioning of notions and ideas about the past held by groups and individuals, with a special focus on ancient Greece but including comparative contributions on early China and on the function of the classical past in modern European culture. Special attention is devoted to the past as a foundation for collective identities and to the ways in which the goals and needs of specific groups impacted its representation and transmission. Contributions range in time from the archaic age to the Roman Empire, covering aspects such as the representation of the past in visual arts, the function of myth and its representation in literary and visual genres, the relationship of

historiography to social memory, and the way that the past features in Greek religion. Monuments, literary texts, and inscriptions are investigated in order to reconstruct the rich texture of Greek social memory and its development over time. The Oxford Handbook of the Welfare State Francis G. Castles, Stephan Leibfried, Jane Lewis, Herbert

Obinger, Christopher Pierson. 2012-09-06 The Oxford Handbook of the Welfare State is the authoritative and definitive guide to the contemporary welfare state. In a volume consisting of nearly fifty newly-written chapters, a broad range of the world's leading scholars offer a comprehensive account of everything one needs to know about the modern welfare state. The book is divided into eight sections. It opens with three chapters that evaluate the philosophical case for (and against) the welfare state. Surveys of the welfare state's history and of the approaches taken to its study are followed by four extended sections, running to some thirty-five chapters in all, which offer a comprehensive and in-depth survey of our current state of knowledge across the whole range of issues that the welfare state embraces. The first of these sections looks at inputs and actors (including the roles of parties,

unions, and employers), the impact of gender and religion, patterns of migration and a changing public opinion, the role of international organisations and the impact of globalisation. The next two sections cover policy inputs (in areas such as pensions, health care, disability, care of the elderly, unemployment, and labour market activation) and their outcomes (in terms of inequality and poverty, macroeconomic performance, and retrenchment). The seventh section consists of seven chapters which survey welfare state experience around the globe (and not just within the OECD). Two final chapters consider questions about the global future of the welfare state. The individual chapters of the Handbook are written in an informed but accessible way by leading researchers in their respective fields giving the reader an excellent and truly up-to-date knowledge of the area under discussion. Taken together, they constitute a comprehensive compendium of all that is best in contemporary welfare state research and a unique guide to what is happening now in this most crucial and contested area of social and political development.

Narratology and Interpretation Jonas Grethlein, Antonios Rengakos. 2009-08-17 The categories of classical narratology have been successfully applied to ancient texts in the last two decades, but in the meantime narratological theory has moved on. In accordance with these developments, Narratology and Interpretation draws out the subtler possibilities of narratological analysis for the interpretation of ancient texts. The articles make a contribution to the theory of narrative as well as to our understanding of ancient literature including epic, lyric, tragedy and historiography.

Implicit Motives Oliver Schultheiss, Joachim Brunstein. 2010-02-18 - How do unconscious motivational needs (i.e., implicit motives) influence physiological, cognitive, affective, and behavioral responses to incentives? - How can implicit motives be measured? - How are they shaped by culture, how do

they influence political and societal processes? - Why are they often mismatched with the explicit beliefs people have about their motivational needs and what are the consequences of such mismatches? - How can we use knowledge about implicit motives in clinical, business, and school contexts to help people achieve their goals? These are some of the topics this comprehensive book presents in 18 clearly written chapters, contributed by leading authorities in the field. It represents a state-of-the-art reference for all researchers and practitioners interested in human motivation. Bringing together exciting new research on a central topic in human motivation, this volume is an important addition to the libraries of personality, social, and cognitive psychologists, affective and social neuroscientists, clinical psychologists, as well as graduate students in these fields and practitioners.

Teaching and Learning English in the Digital Age Inez De Florio-Hansen.2018-04-23 TEFL in the 21st century First of all, teaching and learning English in the digital age means using digital tools in TEFL classrooms. This introduction exemplifies how to implement them in a meaningful way in combination with reliable methods (for additional practice-oriented teaching and learning suggestions see: <https://www.deflorio.de/blog> . A further important aspect of digitization is teaching and learning about media. Teachers have to create and deploy opportunities that allow students to develop a critical stance toward media in general and digital media in particular. This introduction to TEFL shows that the rapidly increasing influences of digitization lead to more internationalized and globalized science-based approaches to teaching and learning English. In this perspective, digitization offers an opportunity to rethink and reshape didactic concepts.
