As a veterinarian, Helena was required to choose when to end the lives of the terminally ill animals in her care. Now that she has died, she is afraid to face them and finally admit to herself that her thirty-seven years of life were meaningless, error-ridden, and forgettable. So Helena lingers, a silent observer haunted by the life she left behind—her shattered attorney husband, David; her houseful of damaged but beloved animals; and her final project, Cindy, a chimpanzee trained to use sign language who may be able to unlock the mysteries of animal communication and consciousness. When Cindy is scheduled for a research experiment that will undoubtedly take her life, David must call upon everything he has learned from Helena to save her. In the explosive courtroom drama that follows, all the threads of Helena's life entwine and tear as Helena and David confront their mistakes, grief, and loss and discover what it really means to be human. *The Book of Mirrors* E. O. Chirovici. 2017-02-21 An elegant, page-turning thriller in the vein of *Night Film* and *Crooked Letter*, *Crooked Letter*, this tautly crafted novel is about stories: the ones we tell, the ones we keep hidden, and the ones that we'll do anything to ensure they stay buried. When literary agent Peter Katz receives a partial book submission entitled *The Book of Mirrors*, he is intrigued by its promise and original voice. The author, Richard Flynn, has written a memoir about his time as an English student at Princeton in the late 1980s, documenting his relationship with the protégée of the famous Professor Joseph Wieder. One night just before Christmas 1987, Wieder was brutally murdered in his home. The case was never solved. Now, twenty-five years later, Katz suspects that Richard Flynn is either using his book to confess to the murder, or to finally reveal who committed the violent crime. But the manuscript ends abruptly—and its author is dying in the hospital with the missing pages nowhere to be found. Hell-bent on getting to the bottom of the story, Katz hires investigative journalist John Keller to research the murder and reconstruct the events for a true crime version of the memoir. Keller tracks down several of the mysterious key players, including retired police detective Roy Freeman, one of the original investigators assigned to the murder case, but he has just been diagnosed with early-onset Alzheimer's. Inspired by John Keller's investigation, he decides to try and solve the case once and for all, before he starts losing control of his mind. A trip to the Potosi Correctional Centre in Missouri, several interviews, and some ingenious police work finally lead him to a truth that has been buried for over two decades...or has it? Stylishly plotted, elegantly written, and packed with thrilling suspense until the final page, *The Book of Mirrors* is a book within a book like you've never read before.

**The Female Brain** Louann Brizendine, MD. 2007-08-07 Since Dr. Brizendine wrote *The Female Brain* ten years ago, the response has been overwhelming. This New York Times bestseller has been translated into more than thirty languages, has sold nearly a million copies between editions, and has most recently inspired a romantic comedy starring Whitney Cummings and Sofia Vergara. And its profound scientific understanding of the nature and experience of the female brain continues to guide women as they pass through life stages, to help men better understand the girls and women in their lives, and to illuminate the delicate emotional machinery of a love relationship. Why are women more verbal than men? Why do women remember details of fights that men can't remember at all? Why do women tend to form deeper bonds with their female friends than men do with their male counterparts? These and other questions have stumped both sexes throughout the ages. Now, pioneering neuropsychiatrist Louann Brizendine, M.D., brings together the latest findings to show how the unique structure of the female brain determines how women think, what they value, how they communicate, and who they love. While doing research as a medical student at Yale and then as a resident and faculty member at Harvard, Louann Brizendine discovered that almost all of the clinical data in existence on neurology, psychology, and neurobiology focused exclusively on males. In response to the overwhelming need for information on the female mind, Brizendine established the first clinic in the country to study and treat women's brain function. In *The Female Brain*, Dr. Brizendine distills all her findings and the latest information from the scientific community in a highly accessible book that educates women about their unique brain/body/behavior. The result: women will come away from this book knowing that they have a lean, mean, communicating machine. Men will develop a serious case of brain envy.

**The Big Green Tent** Ludmila Ulitskaya.2015-11-10 The Big Green Tent epitomizes what we think of when we imagine the classic Russian novel. With epic breadth and intimate detail, Ludmila Ulitskaya's remarkable work tells the story of three school friends who meet in Moscow in the 1950s and go on to embody the heroism, folly, compromise, and hope of the Soviet dissident experience. These three boys—an orphaned poet; a gifted, fragile pianist; and a budding photographer with a talent for collecting secrets—struggle to reach adulthood in a society where their heroes have been censored and exiled. Rich with love stories, intrigue, and a cast of dissenters and spies, The Big Green Tent offers a panoramic survey of life after Stalin and a dramatic investigation into the prospects for individual integrity in a society defined by the KGB. Each of the central characters seeks to transcend an oppressive regime through art, a love of Russian literature, and activism. And each of them ends up face-to-face with a secret police that is highly skilled at fomenting paranoia, division, and self-betrayal. A man and his wife each become collaborators, without the other knowing; an artist is chased into the woods, where he remains in hiding for four years; a researcher is forced to deem a patient insane, damning him to torture in a psychiatric ward. Ludmila Ulitskaya's novel belongs to the tradition of Dostoevsky, Tolstoy, and Pasternak: it is a work consumed with politics, love, and belief—and a revelation of life in dark times.
