**Guidelines for Public Expenditure Management** Mr. Jack Diamond, Mr. Barry H. Potter. 1999-07-01 Traditionally, economics training in public finances has focused more on tax than public expenditure issues, and within expenditure, more on policy considerations than the more mundane matters of public expenditure management. For many years, the IMF's Public Expenditure Management Division has answered specific questions raised by fiscal economists on such missions. Based on this experience, these guidelines arose from the need to provide a general overview of the principles and practices observed in three key aspects of public expenditure management: budget preparation, budget execution, and cash planning. For each aspect of public expenditure management, the guidelines identify separately the differing practices in four groups of countries - the francophone systems, the Commonwealth systems, Latin America, and those in the transition economies. Edited by Barry H. Potter and Jack Diamond, this publication is intended for a general fiscal, or a general budget, advisor interested in the macroeconomic dimension of public expenditure management.

**PEFA, Public Financial Management, and Good Governance** Jens Kromann Kristensen, Martin Bowen, Cathal Long, Shakira Mustapha, Urška Zrinski. 2019-11-24 This project, based on the Public Expenditure and Financial Accountability (PEFA) data set, researched how PEFA can be used to shape policy development in public financial management (PFM) and other major relevant policy areas such as anticorruption, revenue mobilization, political economy analysis, and fragile states. The report explores what shapes the PFM system in low- and middle-income countries by examining the relationship between political institutions and the quality of the PFM system. Although the report finds some evidence that multiple political parties in control of the legislature is associated with better PFM performance, the report finds the need to further refine and test the theories on the relationship between political institutions and PFM. The report addresses the question of the outcomes of PFM systems, distinguishing between fragile and nonfragile states. It finds that better PFM performance is associated with more reliable budgets in terms of expenditure composition in fragile states, but not aggregate budget credibility. Moreover, in contrast to existing studies, it finds no evidence that PFM quality matters for deficit and debt ratios, irrespective of whether a country is fragile or not. The report also explores the relationship between perceptions of corruption and PFM performance. It finds strong evidence of a relationship between better PFM performance and improvements in perceptions of corruption. It also finds that PFM reforms associated with better controls have a stronger relationship with improvements in perceptions of corruption compared to PFM reforms associated with more transparency. The last chapter looks at the relationship between PEFA indicators for revenue administration and domestic resource mobilization. It focuses on the credible use of penalties for noncompliance as a proxy for the type of political commitment required to improve tax performance. The analysis shows that countries that credibly enforce penalties for noncompliance collect more taxes on average.

Climate-Sensitive Management of Public Finances—"Green PFM" Mr. Fabien Gonguet,Mr. Claude P Wendling,Ozlem Aydin Sakrak,Bryn Battersby.2021-08-11 Public financial management (PFM) consists of all the government's institutional arrangements in place to facilitate the implementation of fiscal policies. In response to the growing urgency to fight climate change, "green PFM" aims at adapting existing PFM practices to support climate-sensitive policies. With the cross-cutting nature of climate change and wider environmental concerns, green PFM can be a key enabler of an integrated government strategy to combat climate change. This note outlines a framework for green PFM, emphasizing the need for an approach combining various entry points within, across, and beyond the budget cycle. This includes components such as fiscal transparency and external oversight, and coordination with state-owned enterprises and subnational governments. The note also identifies principles for effective implementation of a green PFM strategy, among which the need for a strong stewardship located within the ministry of finance is paramount.

PUBLIC FINANCE M. MARIA JOHN KENNEDY.2012-03-05 Public Finance, which focuses on the policies of the government, especially in relation to tax, expenditure and budget, may be considered a very traditional and 'dry' subject. However, insofar as it has a huge impact on the national economy and the welfare of the citizens, Public Finance assumes tremendous significance and becomes a challenging and interesting subject of study. Divided into nine parts, this compact and concise text gives a detailed discussion on the nature and scope of public finance, theory of public goods, canons of taxation, types of taxes, theories of taxation, and incidence and shifting of taxation. The book also covers public debt, its management and its burden, government budgeting, budgeting theory and balanced budget. Finally, the text dwells on fiscal federalism, and public enterprises and black money, the last two being so important in the Indian context today. What distinguishes the text is the clear analysis of growth and welfare economics, as these have a crucial bearing on the Indian economy. What is more, the text is interspersed with many examples to illustrate the theory discussed and also gives practical insights. This book is primarily intended as a text for undergraduate students of Economics and Commerce for their course on Public Finance/Public Economics.
