The Early History of the Ancient Near East, 9000-2000 B.C. Hans J. Nissen. 2011-03-04 Hans J. Nissen here provides a much-needed overview of 7000 years of development in the ancient Near East from the beginning of settled life to the formation of the first regional states. His approach to the study of Mesopotamian civilization differs markedly from conventional orientations, which impose a sharp division between prehistoric and historic, literate, periods. Nissen argues that this approach is too rigid to explain the actual development of that civilization. He deemphasizes the invention of writing as a turning point, viewing it as simply one more phase in the evolution of social complexity and as the result of specific social, economic, and political factors. With a unique combination of material culture analysis written data, Nissen traces the emergence of the earliest isolated settlements, the growth of a network of towns, the emergence of city states, and finally the appearance of territorial states. From his synthesis of the prehistoric and literate periods comes a unified picture of the development of Mesopotamian economy, society, and culture. Lavishly illustrated, *The Early History of the Ancient Near East, 9000-2000 B.C.* is an authoritative work by one of the most insightful observers of the evolution and character of Mesopotamian civilization.

A Companion to Ancient Near Eastern Art Ann C. Gunter. 2018-09-08. Provides a broad view of the history and current state of scholarship on the art of the ancient Near East. This book covers the aesthetic traditions of Mesopotamia, Iran, Anatolia, and the Levant, from Neolithic times to the end

of the Achaemenid Persian Empire around 330 BCE. It describes and examines the field from a variety of critical perspectives: across approaches and interpretive frameworks, key explanatory concepts, materials and selected media and formats, and zones of interaction. This important work also addresses both traditional and emerging categories of material, intellectual perspectives, and research priorities. The book covers geography and chronology, context and setting, medium and scale, while acknowledging the diversity of regional and cultural traditions and the uneven survival of evidence. Part One of the book considers the methodologies and approaches that the field has drawn on and refined. Part Two addresses terms and concepts critical to understanding the subjects and formal characteristics of the Near Eastern material record, including the intellectual frameworks within which monuments have been approached and interpreted. Part Three surveys the field's most distinctive and characteristic genres, with special reference to Mesopotamian art and architecture. Part Four considers involvement with artistic traditions across a broader reach, examining connections with Egypt, the Aegean, and the Mediterranean. And finally, Part Five addresses intersections with the closely allied discipline of archaeology and the institutional stewardship of cultural heritage in the modern Middle East. Told from multiple perspectives, *A Companion to Ancient Near Eastern Art* is an enlightening, must-have book for advanced undergraduate and graduate students of ancient Near East art and Near East history as well as those interested in history and art history.

Ancient Near Eastern Art Dominique Collon.1995-01-01 Based on the unrivaled collections of the British Museum, this extensively illustrated book is a superb introduction to the art of the ancient Near East from the eighth millennium B.C. to Alexander the Great. Often described as the cradle of civilization, the ancient Near East was the birthplace of writing, monumental sculpture, and wheel-

made pottery. Dominique Collon provides a unique view into this ancient world, from village settlements to grand palaces to burial sites. Collon situates the Museum's most beautiful and interesting artifacts against their historical and cultural background. Among the works featured are painted pottery, figurines, cylinder seals, and stone amulets from the earliest village cultures before 3000 B.C. Also here are magnificent finds from graves at Alaca Huyuk in Turkey and the Royal Cemetery at Ur, including jewelry, musical instruments, and the famous Royal Standard. Sculpted reliefs from Assyrian palaces and Sasanian metalwork round out the collection. In her final chapter, Collon shows how art from the ancient Near East resonates in our own world today. A welcome addition is a Mesopotamian chronology summarizing recent astronomical and textual data, compiled by C.B.F. Walker especially for this book. The Ancient Near East, C. 3000-330 BC Amélie Kuhrt.1995 A single-authored two-volume work which makes no claims to comprehensiveness, but selectively treats periods and areas usually studied in universities (treatment of Egypt is brief because of the availability of studies of Egyptian history at all levels). The area discussed extends from Turkey (Anatolia) and Egypt in the west through the Levant (which includes Israel, Lebanon, Jordan, and Syria west of the Euphrates) to Mesopotamia into Iran. Volume I covers c.3000 BC to c.1200 BC; volume II, 1200 BC to 330 BC. The author is a Reader in Ancient History at University College London. Annotation copyright by Book News, Inc., Portland, OR.

Receptions of the Ancient Near East in Popular Culture and Beyond Agnes Garcia-Ventura,Lorenzo Verderame.2020-03-01 This book is an enthusiastic celebration of the ways in which popular culture has consumed aspects of the ancient Near East to construct new realities. The editors have brought together an impressive line-up of scholars-archaeologists, philologists, historians, and art historians-to reflect on how objects, ideas, and interpretations of the ancient Near East have been remembered, constructed, reimagined, mythologized, or indeed forgotten within our shared cultural memories. The exploration of cultural memories has revealed how they inform the values, structures, and daily life of societies over time. This is therefore not a collection of essays about the deep past but rather about the stories we tell ourselves about ourselves.

The Bible and the Ancient Near East Cyrus Herzl Gordon,Gary Rendsburg.1997 Explores the diverse origins of such stories as the creation and the flood in the cultures of the ancient Near East. This up-

Religions of the Ancient Near East Daniel C. Snell.2010-11-22 This 2011 book is a history of religious life in the Ancient Near East from the beginnings of agriculture to Alexander the Great's invasion in the 300s BCE. Daniel C. Snell traces key developments in the history, daily life and religious beliefs of the people of Ancient Mesopotamia, Egypt, Israel and Iran. His research investigates the influence of those ideas on the West, with particular emphasis on how religious ideas from this historical and cultural milieu still influence the way modern cultures and religions view the world. Designed to be accessible to students and readers with no prior knowledge of the period, the book uses fictional vignettes to add interest to its material, which is based on careful study of archaeological remains and preserved texts. The book will provide a thoughtful summary of the Ancient Near East and includes a comprehensive bibliography to guide readers in further study of related topics.

Perspectives on the History of Ancient Near Eastern Studies Agnès Garcia-Ventura,Lorenzo Verderame.2021-03-03 The present volume collects eighteen essays exploring the history of ancient Near Eastern studies. Combining diverse approaches—synthetic and analytic, diachronic and transnational—this collection offers critical reflections on the who, why, and how of this cluster of fields. How have political contexts determined the conduct of research? How do academic agendas

reflect larger social, economic, and cultural interests? How have schools of thought and intellectual traditions configured, and sometimes predetermined, the study of the ancient Near East? Contributions treating research during the Nazi and fascist periods examine the interpenetration of academic work with politics, while contributions dealing with specific national contexts disclose fresh perspectives on individual scholars as well as the conditions and institutions in which they worked. Particular attention is given to scholarship in countries such as Turkey, Portugal, Iran, China, and Spain, which have hitherto been marginal to historiographic accounts of ancient Near Eastern studies. In addition to the editors, the contributors are Selim Ferru Adali, Silvia Alaura, Isabel Almeida, Petr Charvát, Parsa Daneshmand, Eva von Dassow, Hakan Erol, Sebastian Fink, Jakob Flygare, Pietro Giammellaro, Carlos Gonçalves, Katrien de Graef, Steven W.
