No Longer at Ease Chinua Achebe. 2013-04-25 Obi Okonkwo is an idealistic young man who, thanks to the privileges of an education in Britain, has now returned to Nigeria for a job in the civil service. However in his new role he finds that the way of government seems to be backhanders and corruption. Obi manages to resist the bribes that are offered to him, but when he falls in love with an unsuitable girl - to the disapproval of his parents - he sinks further into emotional and financial turmoil. The lure of easy money becomes harder to refuse, and Obi becomes caught in a trap he cannot escape. Showing a man lost in cultural limbo, and a Nigeria entering a new age of disillusionment, *No Longer at Ease* concludes Achebe's remarkable trilogy charting three generations of an African community under the impact of colonialism, the first two volumes of which are *Things Fall Apart* and *Arrow of God*.

Dictionary of the British English Spelling System Greg Brooks. 2015-03-30 This book will tell all you need to know about British English spelling. It's a reference work intended for anyone interested in the English language, especially those who teach it, whatever the age or mother tongue of their students. It will be particularly useful to those wishing to produce well-designed materials for teaching initial literacy via phonics, for teaching English as a foreign or second language, and for teacher training. English spelling is notoriously complicated and difficult to learn; it is correctly described as much less regular and predictable than any other alphabetic orthography. However, there is more regularity in the English spelling system than is generally appreciated. This book provides, for the first time, a thorough account of the whole complex system. It does so by describing how phonemes relate to graphemes and vice versa. It enables searches for particular words, so that one can easily find, not the meanings or pronunciations of words, but the other words with which those with unusual phoneme-grapheme/grapheme-phoneme correspondences keep company. Other unique features of this book include teacher-friendly lists of correspondences and various regularities not described by previous authorities, for example the strong tendency for the letter-name vowel phonemes (the names of the letters) to be spelt with those single letters in non-final syllables.

Global Education Reform Frank Adamson, Bjorn Astrand, Linda Darling-Hammond. 2016-03-02 With contributions from Linda Darling-Hammond, Michael Fullan, Pasi Sahlberg, and Martin Carnoy, *Global Education Reform* is an eye-opening analysis of national educational reforms and the types of high-achieving systems needed to serve all students equitably. The collection documents the ideologically and educationally distinctive approaches countries around the world have taken to structuring their education systems. Focusing on three pairs of case studies written by internationally acclaimed experts, the book provides a powerful analysis of the different ends of an ideological spectrum---from strong state investments in public education to market-based approaches. An introductory chapter offers an overview of the theories guiding both neoliberal reforms such as those implemented in Chile, Sweden and the United States with efforts to build strong and equitable public education systems as exemplified by Cuba, Finland and Canada. The pairs of case studies that follow examine the historical evolution of education within an individual country and compare and contrast national educational outcomes. A concluding chapter dissects the educational outcomes of the differing economic and governance approaches, as well as the policy implications.

Historical Dictionary of the Democratic Republic of the Congo Emizet Francois Kisangani, Scott F. Bobb. 2009-10-01 The third edition of the *Historical Dictionary of the Democratic Republic of the Congo* looks back at the nearly 48 years of independence, over a century of colonial rule, and even earlier kingdoms and groups that shared the territory. This is done through a chronology, an introductory essay, a bibliography, and over 800 cross-referenced dictionary entries on civil wars, mutinies, notable people, places, events, and cultural practices.

Historia Gianna Pomata,Nancy G. Siraisi.2005 Essays examine how the genre of historia reflects connections between the study of nature and the study of culture in early modern scholarly pursuits. The early modern genre of historia connected the study of nature and the study of culture from the early Renaissance to the eighteenth century. The ubiquity of historia as a descriptive method across a variety of disciplines--including natural history, medicine, antiquarianism, and philology--indicates how closely intertwined these scholarly pursuits were in the early modern period. The essays collected in this volume demonstrate that historia can be considered a key epistemic tool of early modern intellectual practices. Focusing on the actual use of historia across disciplines, the essays highlight a distinctive feature of early modern descriptive sciences: the coupling of observational skills with philological learning, empiricism with erudition. Thus the essays bring to light previously unexamined links between the culture of humanism and the scientific revolution. The contributors, from a range of disciplines that echoes the broad scope of early modern historia, examine such topics as the development of a new interest in historical method from the Renaissance artes historicae to the eighteenth-century tension between history and system; shifts in Aristotelian thought paving the way for reevaluation of historia as descriptive knowledge; the rise of the new discipline of natural history; the uses of historia in anatomical and medical investigation and the writing of history by physicians; parallels between the practices of collecting and presenting information in both natural history and antiquarianism; and significant examples of the ease with which early seventeenth-century antiquarian scholars moved from studies of nature to studies of culture.

Understanding Statistics and Experimental Design Michael H. Herzog,Gregory Francis,Aaron Clarke.2019-08-13 This open access textbook provides the background needed to correctly use, interpret and understand statistics and statistical data in diverse settings. Part I makes key concepts in statistics readily clear. Parts I and II give an overview of the most common tests (t-test, ANOVA, correlations) and work out their statistical principles. Part III provides insight into meta-statistics (statistics of statistics) and demonstrates why experiments often do not replicate. Finally, the textbook shows how complex statistics can be avoided by using clever experimental design. Both non-scientists and students in Biology, Biomedicine and Engineering will benefit from the book by learning the statistical basis of scientific claims and by discovering ways to evaluate the quality of scientific reports in academic journals and news outlets.

Estimates of Revenue and Expenditure Zambia.2011

The Haves and the Have-Nots Branko Milanovic.2010-12-28 Who is the richest person in the world, ever? Does where you were born affect how much money you'll earn over a lifetime? How would we know? Why -- beyond the idle curiosity -- do these questions even matter? In *The Haves and the Have-Nots*, Branko Milanovic, one of the world's leading experts on wealth, poverty, and the gap that separates them, explains these and other mysteries of how wealth is unevenly spread throughout our world, now and through time.Milanovic uses history, literature and stories straight out of today's newspapers, to discuss one of the major divisions in our social lives: between the haves and the have-nots. He reveals just how rich Elizabeth Bennet's suitor Mr. Darcy really was; how much Anna Karenina gained by falling in love; how wealthy ancient Romans compare to today's super-rich; where in Kenyan income distribution was Obama's grandfather; how we should think about Marxism in a modern world; and how location where one is born determines his wealth. He goes beyond mere entertainment to explain why inequality matters, how it damages our economics prospects, and how it can threaten the foundations of the social order that we take for granted. Bold, engaging, and illuminating, *The Haves and the Have-Nots* teaches us not only how to think about inequality, but why we should.

10 Strategies for Your Success in College Susan Berry Brill De Ramirez, Ph.d..2016-06-25 Professor Brill de Ramirez's book 10 Strategies for Your Success in College provides 10 essential tips that will help college students succeed and high school students prepare for success in college. Readers will learn about the importance of relationships, collaborations, teamwork, and strong networks for success in college, career, and life. Each chapter includes specific guidance to help students make smart choices, hyperlinks to important resources to help students be more informed, and a list of key chapter take-aways as the end of each chapter and a list of the 10 Strategies at the end of the book. Most important for readers is the vital fact that each student matters. Every person matters. Each person, YOU, can potentially contribute to the world in big ways. In order to do this, students need to discover and act upon the following: * Who you are and what your strengths are, * What you are interested in and what you want to see materialize in your life and career, * And what difference you want to make in the world. No matter where you are right now, if you use this book as a guidepost for your academic, career, and life success, you will learn strategies that, when applied successfully, will make your life and career journey that much more rewarding and successful.

Quills of Desire Binwell Sinyangwe.1998

Party Systems and Cleavage Structures in Southern Africa Jürgen Langhanns.2014-04-29 For the interaction of society and political parties within the electoral system in southern Africa, it is necessary to systematically investigate the social structures (cleavage analysis) and measure the success or failure of political parties against the backdrop of the election programmes (manifesto research). The focus of this research is the six polyarchies of Botswana, Malawi, Mozambique, Namibia, Zambia and South Africa. In countries with the voting system of proportional representation, neither coalition governments nor alternative government parties have ruled since 1990. In countries with a majoritarian voting system, either coalitions have formed a government, or one party has remained unchallenged for decades. The research results show that the previous electoral outcomes are the reflection of the cleavage structure, and there are indicators in the societies examined that can meet the theoretical expectations of democratic societies in the future. In part I, the theoretical framework for the cleavage analysis and party analysis is established, which applies for the six case studies of part II. The societies are examined in terms of eight cleavages, their extension and their political relevance. The cleavages are related to the settlement area, the occupation, the income distribution, the religion, the ethnicity (race), the language heritage, the educational level and citizenship (the proportion of foreigners). In the context of the electoral system, political parties represent the social interest. Their goals are recorded as contents of the manifesto, which can be used for Wordscores to compare the political parties on the policy domains Freedom and democracy, Political system, Economy, Welfare and quality of life, Fabric of Society and Social Groups. Each domain is described by two contrasting definitions, which are used for aggregating Left-Right categorisation of the parties. The regional results in the comparative study (part III) define the categories Left, Right and Liberal of political parties. The qualitative comparative analysis (QCA) is used to define the content of the left-wing, right-wing and liberal political parties in the context of Southern Africa. At the same time, the contents of the definitions are factors in the success of parties in Southern Africa. Parties with right-wing content are found mainly among the government parties, and parties with politically left-wing or liberal content are mainly opposition parties.
