Urban Europe Mariana M. Koceva, Teodóra Brandmüller, Iuliana Lupu, Åsa Önnerfors, Louise Corselli-Nordblad, Catherine Coyette, Annika Johansson, Helene Strandell, Pascal Wolff. 2016 Statistical information is an important tool for analysing changing patterns of urban development and the impact that policy decisions have on life in our cities, towns and suburbs. Urban Europe - statistics on cities, towns and suburbs provides detailed information for a number of territorial typologies that can be used to paint a picture of urban developments and urban life in the EU Member States, as well as EFTA and candidate countries. Each chapter presents statistical information in the form of maps, tables and figures, accompanied by a description of the policy context and a set of main findings. The publication is broken down into two parts : the first treats topics under the heading of city and urban developments, while the second focuses on the people in cities and the lives they lead. Overall there are 12 main chapters, covering : the urban paradox, patterns of urban and city developments, the dominance of capital cities, smart cities, green cities, tourism and culture in cities, living in cities, working in cities, housing in cities, foreign-born persons in cities, poverty and social exclusion in cities, as well as satisfaction and the quality of life in cities.

Context Matters Peter J. Boettke, Christopher J. Coyne. 2009 Context Matters: Institutions and Entrepreneurship analyzes the connection between entrepreneurship and institutions. The goal is to provide a discussion of the literature on institutions in economics, develop the argument on the relationship between institutions and entrepreneurship and apply this logic to a variety of entrepreneurial settings - private for-profit, private non-profit and political. In addition to exploring entrepreneurship within several institutional settings, the authors also consider entrepreneurship on institutional arrangements. Context Matters: Institutions and Entrepreneurship develops the notion of institutions and provide insight into what this concept entails. The authors show how institutions matter for entrepreneurship and economic development. This is followed by a consideration of 'social entrepreneurship', 'political entrepreneurship', and the role of 'institutional entrepreneurs' and their impact on the formation and evolution of institutions. The authors end with a discussion of the implications for future research.

Slum Tourism Fabian Frenzel, Ko Koens, Malte Steinbrink. 2012-06-14 Slum tourism is a globalizing trend and a controversial form of tourism. Impoverished urban areas have always enticed the popular imagination, considered to be places of 'otherness', 'moral decay', 'deviant liberty' or 'authenticity'. 'Slumming' has a long tradition in the Global North, for example in Victorian London when the upper classes toured the East End. What is new, however, is its development dynamics and its rapidly spreading popularity across the globe. Township tourism and favela tourism have currently reached mass tourism characteristics in South Africa and in Rio de Janeiro, Brazil. In other countries of the Global South, slum tourism now also occurs and providers see huge growth potential. While the morally controversial practice of slum tourism has raised much attention and opinionated debates in the media for several years, academic research has only recently started addressing it as a global phenomenon. This edition provides the first systematic overview of the field and the diverse issues connected to slum tourism. This multidisciplinary collection is unique both in its conceptual and empirical breadth. Its chapters indicate that 'global slumming' is not merely a controversial and challenging topic in itself, but also offers an apt lens through which to discuss core concepts in critical tourism studies in a global perspective, in particular: 'poverty', 'power' and 'ethics'. Building on research by prolific researchers from ten different countries, the book provides a comprehensive and unique insight in the current empirical, practical and theoretical knowledge on the subject. It takes a thorough and critical review of issues associated with slum tourism, asking why slums are visited, whether they should be visited, how they are represented, who is benefiting from it and in what way. It offers new insights to tourism's role in poverty alleviation and urban regeneration, power relations in contact zones and tourism's cultural and political implications. Drawing on research from four continents and seven different countries, and from multidisciplinary perspectives, this ground-breaking volume will be valuable reading for students, researchers and academics interested in this contemporary form of tourism.

Youth Unemployment and Society Anne C. Petersen,Jeylan T. Mortimer.2006-11-02 As societies become more technically advanced and jobs require more expertise, young people are forced into a prolonged state of social marginality. Employment during adolescence could provide significant experiences for growth into later work roles, but most societies are not equipped to provide adolescents with meaningful work experience. In Youth Unemployment and Society, a group of historians, psychologists, economists and sociologists provide a cross-national examination of trends in youth unemployment and intervention strategies in the United States and Europe. Assessing the causes of aggregate societal unemployment rates, the authors address factors that make individuals more vulnerable to unemployment and consider the developmental consequences of this experience. The volume also examines how persistently high rates of youth unemployment affect society's values, beliefs, and institutions.

Fiefs and Vassals Susan Reynolds.1996 Fiefs and Vassals has changed our view of the medieval world. It offers a fundamental challenge to orthodox conceptions of feudalism. Susan Reynolds argues that the concepts of the fief and of vassalage, as understood by historians of medieval Europe, were constructed by post-medieval scholars from the works of medieval academic lawyers and that they provide a bad guide to the realities of medieval society. This is a radical new examination of relations between rulers, nobles, and free men, the distillation of wide-ranging research by a leading medieval historian. It has revolutionized the way we think of the Middle Ages.
