**The Enforcement of EU Financial Law** Jan Crijns, Matthias Haentjens, Rijnhard Haentjens. 2022-06-30 This book focuses on the enforcement of EU financial law on the national and supra-national levels. Emphasis is laid on the interaction between the EU and national levels (vertical interaction), as well as between the private, administrative, and criminal law levels (horizontal interaction). The book takes a multi-jurisdiction and interdisciplinary approach and covers a range of issues that are highly topical, such as the new EU Anti-Money Laundering regime, and the ReNEUAL model for administrative law. Over the last few decades, EU financial law has grown exponentially. Virtually all these new rules and regulations require enforcement. However, the EU legislator generally has been reluctant to regulate enforcement at the national level, and often does not prescribe whether enforcement should take place through national criminal, administrative, or private law. This results in both practical and fundamental questions for the legal practitioner and the academic. This book addresses those questions. With contributions by leading academics and senior members of EU and national institutions, the book will be of interest to professionals dealing with financial law in their daily practice such as lawyers, bankers, policy makers, officers at supervisory authorities, and judges, but also for academics interested in fundamental questions of interaction between legal systems.

**Research Handbook on the Enforcement of EU Law** Miroslava Scholten. 2023-09-06 This comprehensive Research Handbook investigates the success of EU law enforcement processes. Going beyond traditional analyses of administrations and courts in isolation, it focuses on the increased cooperation seen between national and EU authorities, and on the widening variety of means used to enhance compliance with EU norms.

**Financial Regulation and Civil Liability in European Law** Olha O. Cherednychenko, Mads Andenas. 2020-11-27 This insightful book provides a comprehensive analysis of the interplay between EU financial regulation and civil liability. It explores this interrelationship in order to determine whether a coordinated approach has been adopted.

**EU Securities and Financial Markets Regulation** Niamh Moloney. 2023-03-29 Over the decade or so since the global financial crisis rocked EU financial markets and led to wide-ranging reforms, EU securities and financial markets regulation has continued to evolve. The legislative framework has been refined and administrative rulemaking has expanded. Alongside, the Capital Markets Union agenda has developed, the UK has left the EU, and ESMA has emerged as a decisive influence on EU financial markets governance. All these developments, as well as the Covid-19 pandemic, have shaped the regulatory landscape and how supervision is organized. EU Securities and Financial Markets Regulation provides a comprehensive, critical, and contextual account of the intricate rulebook that governs EU financial markets and its supporting institutional arrangements. It is framed by an assessment of how the regime has evolved over the decade or so since the global financial crisis and considers, among other matters, the post-crisis reforms to key legislative measures, the massive expansion of administrative rulemaking and of soft law, the Capital Markets Union agenda, the development of supervisory convergence as the means for organizing pan-EU supervision, and ESMA's role in EU financial markets governance. Its coverage extends from capital-raising and the Prospectus Regulation to financial market intermediation and the MiFID II/MiFIR and IFD/IFR regimes, to the new regulatory regimes adopted since the global financial crisis (including for benchmarks and their administrators), to retail market regulation and the PRIIPs Regulation, and on to the EU's third country regime and the implications of the UK's departure from the EU. This is the fourth edition of the highly successful and authoritative monograph first published as EC Securities Regulation. Heavily revised from the third edition to reflect developments since the global financial crisis, it adopts the in-depth contextual and analytical approach of earlier editions and so considers the market, political, institutional, and international context of the regulatory and supervisory regime.

**The Future of Financial Regulation** Iain G MacNeil, Justin O'Brien. 2010-03-12 The Future of Financial Regulation is an edited collection of papers presented at a major conference at the University of Glasgow in spring 2009, co-sponsored by the Economic and Social Research Council World Economy and Finance Programme and the the Australian Research Council Governance Research Network. It draws together a variety of different perspectives on the international financial crisis which began in August 2007 and later turned into a more widespread economic crisis following the collapse of Lehman Brothers in the autumn of 2008. Spring 2009 was in many respects the nadir since valuations in financial markets had reached their low point and crisis management rather than regulatory reform was the main focus of attention. The conference and book were deliberately framed as an attempt to re-focus attention from the former to the latter. The first part of the book focuses on the context of the crisis, discussing the general characteristics of financial crises and the specific influences that were at work this time round. The second part focuses more specifically on

regulatory techniques and practices implicated in the crisis, noting in particular an over-reliance on the capacity of regulators and financial institutions to manage risk and on the capacity of markets to self-correct. The third part focuses on the role of governance and ethics in the crisis and in particular the need for a common ethical framework to underpin governance practices and to provide greater clarity in the design of accountability mechanisms. The final part focuses on the trajectory of regulatory reform, noting the considerable potential for change as a result of the role of the state in the rescue and recuperation of the financial system and stressing the need for fundamental re-appraisal of business and regulatory models.

*Regulating and Supervising European Financial Markets* Mads Andenas, Gudula Deipenbrock. 2016-08-16 The book analyses the institutions of the European financial market supervision and the challenges of financial markets. The current European supervisory structure for financial markets represents a major development in European supervisory history. Its operation however has to be explored and analysed critically. Has it gone far enough to provide a sufficiently comprehensive and resilient system to reduce or mitigate systemic risks and handle financial crises? Some claim it has gone too far already. Fresh and rigorous critical legal and economic analysis from an independent scholarly perspective are needed to assess whether the institutional design of the European supervisory architecture has proved itself to be an efficient and effective model. This book discusses many dimensions of the structure and workings of the European system from various angles providing different dimensions. The book makes an important contribution to the limited literature on financial market supervision.

**A Capital Market Union for Europe** Mr. Ashok Vir Bhatia, Ms. Srobona Mitra, Anke Weber, Mr. Shekhar Aiyar, Luiza Antoun de Almeida, Cristina Cuervo, Mr. Andre O Santos, Tryggvi Gudmundsson. 2019-09-10 This note weighs the merits of a capital market union (CMU) for Europe, identifies major obstacles in its path, and recommends a set of carefully targeted policy actions. European capital markets are relatively small, resulting in strong bank-dependence, and are split sharply along national lines. Results include an uneven playing field in terms of corporate funding costs, the rationing out of collateral-constrained firms, and limited shock absorption. The benefits of integration center on expanding financial choice, ultimately to support capital formation and resilience. Capital market development and integration would support a healthy diversity in European finance. Proceeding methodically, the note identifies three key barriers to greater capital market integration in Europe: transparency, regulatory quality, and insolvency practices. Based on these findings, the note urges three policy priorities, focused on the three barriers. There is no roadblock—such steps should prove feasible without a new grand bargain.

**Governing Finance in Europe** Adrienne Héritier, Magnus G. Schoeller. 2020-08-28 How do regulatory structures evolve in EU financial governance? Incorporating insights from a variety of disciplines, *Governing Finance in Europe* provides a comprehensive framework to investigate the dynamics leading to centralisation, decentralisation and fragmentation in EU financial regulation. Offering a comprehensive and generalizable theoretical account of regulatory centralisation, this book combines theoretical approaches from political science, law, sociology and economics to trace centralisation in EU financial governance. Contributors build on a rich political science and legal literature and offer empirical analyses of major EU legislative packages in financial regulation, including the Markets in Financial Instruments Directive II (MiFID II) and Capital Markets Union (CMU). This book systematically identifies and examines the forces and counter-forces on regulatory centralisation. It also offers conjectures as to who benefits from the regulation and how decision-makers are held politically and legally accountable. Featuring contributions from internationally renowned scholars, this book is key reading for academics working in finance and financial policies, particularly those investigating European politics, regulation and regional integration. It will also be of interest to practitioners and policymakers, as chapters provide unique insights into the real-world implications of financial regulation.

*Greening the Bond Market* David Ramos Muñoz, Agnieszka Smoleńska. 2023-10-19 Green bond issuance has surged in recent years in response to growing investor appetite and borrowers' needs as they embark on the sustainability transition. The EU leads the way, with over 40% of all sustainable bond issuances denominated in euro. The EU's 'Regulation on European Green Bonds and optional disclosures for bonds marketed as environmentally sustainable and sustainability-linked bonds' is the first comprehensive legislative text covering such issuance, and a cornerstone of EU's Sustainable Finance strategy. This book explores in an interdisciplinary way the challenges and opportunities of green bonds and sustainable finance from a legal, regulatory and economic perspectives. First, it analyses green bonds as a new financial instrument in the context of the existing capital markets law. Second, it studies green bond impact on the market and on investor protection. Third, it assesses green bonds' relevance for prudential supervision and central banking. The variety of viewpoints ensures a highly comprehensive analysis of green bonds' impact in a European and global context.

*Dalhuisen on Transnational and Comparative Commercial, Financial and Trade Law Volume 6* Jan H Dalhuisen. 2022-06-16 "... a wide-ranging, historically and comparatively very deep and comprehensive commentary, but which is also very contemporary and forward-looking on many or most of the issues relevant in modern transnational commercial, contract and financial transactions" (International and Comparative Law Quarterly) Volume 6 of this new edition deals with financial regulation of banks and banking activities and products. It critically reviews micro-prudential regulation, the need for macro-prudential supervision and an independent macro-prudential supervisor, the role of resolution authorities, the operation of the shadow banking system, and the extraterritorial reach and international recognition of financial regulation. The volume considers in particular the fallout from the 2008 financial crisis and the subsequent regulatory responses in the US and Europe. The complete set in this magisterial work is made up of 6 volumes. Used independently, each volume allows the reader to delve into a particular topic. Alternatively, all volumes can be read together for a comprehensive overview of transnational comparative commercial, financial and trade law.

*Financial Market Infrastructure and Economic Integration* George A Papaconstantinou. 2024-01-25 This book is the first comprehensive study of the interplay between the cutting-edge regulation of financial infrastructure and international economic integration. It tackles a series of important questions: How does the regulation of central counterparties interact with international economic law? Is the WTO able to deal with the regulatory diversity of each country's financial rulebook? Do FTAs foster deeper integration of financial infrastructure services? Can competition law effectively tackle monopolisation and anti-competitive conduct in financial infrastructure? The book discusses how the liberalisation of financial market infrastructure is achieved within the most prominent international economic integration settings: the WTO, Economic Integration Agreements, and EU competition law. It explores whether a more harmonious relationship between financial regulation and economic integration is feasible, and how it can be achieved. The book demonstrates the existence of both structural barriers to trade and trade-facilitating tools that can impede and foster the further integration of financial market infrastructure. Measuring the depth of liberalisation of financial market infrastructure services in more than 120 FTAs, as well as surveying recent case law of the WTO, the Court of Justice of the European Union, and the practice of the European Commission, the book shows how the economic integration of financial market infrastructure occurs. An essential read for those seeking to understand how the cutting-edge regulation of financial market infrastructure and transnational systems of economic integration interact with one another.

**OECD Business and Finance Outlook 2016** OECD. 2016-06-09 This edition of the OECD Business and Finance Outlook focuses on fragmentation: the inconsistent structures, policies, rules, laws and industry practices that appear to be blocking business efficiency and productivity growth.

**Rethinking EU Consumer Law** Geraint Howells, Christian Twigg-Flesner, Thomas Wilhelmsson. 2017-07-28 In *Rethinking EU Consumer Law*, the authors analyse the development of EU consumer law on the basis of a number of clear themes, which are then traced through specific areas. Recurring themes include the artificiality of the EU's consumer image, the problems created by the drive towards maximum harmonisation, and the unexpected effects EU Consumer Law has had on national law. The book argues that EU Consumer Law has the potential of enhancing the protecting of consumers throughout the EU and could offer a model for consumer law elsewhere in the world, but in order to unlock this potential, there needs to be a rethink with regard to the EU's approach to consumer law and policy.

*The Cambridge Companion to European Union Private Law* Christian Twigg-Flesner. 2010-05-20 The emergence of EU Private Law as an independent legal discipline is one of the most significant developments in European legal scholarship in recent times. In this 2010 Companion, leading scholars provide a critical introduction to the subject's key areas, while offering original and thought-provoking comment on the field. In addition to several

chapters on consumer law topics, the collection has individual chapters on commercial contracts, competition law, non-discrimination law, financial services and travel law. It also discusses the wider issues concerning EU Private Law, such as its historical evolution, the role of comparative law, language and terminology, as well as the implications of the Common Frame of Reference project. A useful 'scene-setting' introduction and further reading arranged thematically make this important publication the student's and scholar's first port of call when exploring the field.

**Digital Finance in Europe: Law, Regulation, and Governance** Emiliós Avgouleas, Heikki Marjosola.2021-12-20 Global finance is in the middle of a radical transformation fueled by innovative financial technologies. The coronavirus pandemic has accelerated the digitization of retail financial services in Europe. Institutional interest and digital asset markets are also growing blurring the boundaries between the token economy and traditional finance. Blockchain, AI, quantum computing and decentralised finance (DeFi) are setting the stage for a global battle of business models and philosophies. The post-Brexit EU cannot afford to ignore the promise of digital finance. But the Union is struggling to keep pace with global innovation hubs, particularly when it comes to experimenting with new digital forms of capital raising. Calibrating the EU digital finance strategy is a balancing act that requires a deep understanding of the factors driving the transformation, be they legal, cultural, political or economic, as well as their many implications. The same FinTech inventions that use AI, machine learning and big data to facilitate access to credit may also establish invisible barriers that further social, racial and religious exclusion. The way digital finance actors source, use, and record information presents countless consumer protection concerns. The EU's strategic response has been years in the making and, finally, in September 2020 the Commission released a Digital Finance Package. This special issue collects contributions from leading scholars who scrutinize the challenges digital finance presents for the EU internal market and financial market regulation from multiple public policy perspectives. Author contributions adopt a critical yet constructive and solutions-oriented approach. They aim to provide policy-relevant research and ideas shedding light on the complexities of the digital finance promise. They also offer solid proposals for reform of EU financial services law.

**Standing to Enforce European Union Law before National Courts** Hilde K Ellingsen.2021-03-25 Access to court has long been recognised as an essential element of a Union based on the rule of law. This book asks, how can Member States ensure that their rules on standing guarantee that right? The book answers this question by analysing the requirements of EU law from two angles: first, the effective protection of Union rights; second, the effectiveness of Union law per se. With detailed case law examination, the book formulates an autonomous Union law doctrine of standing based on the principle of effective judicial protection. It then goes further, setting out an effectiveness test of Member States' enforcement mechanisms, to ensure that EU law is rendered operative in practice. This is a rigorous study on a question of immense importance.

**The Alternative Investment Fund Managers Directive** Dirk A. Zetsche.2015-09-14 Apart from MiFID, the Alternative Investment Fund Managers Directive (AIFMD) may be the most important European asset management regulation of the early twenty-first century. In this in-depth analytical and critical discussion of the content and system of the directive, thirty-eight contributing authors – academics, lawyers, consultants, fund supervisors, and fund industry experts – examine the AIFMD from every angle. They cover structure, regulatory history, scope, appointment and authorization of the manager, the requirements for depositaries and prime brokers, rules on delegation, reporting requirements, transitional provisions, and the objectives stipulated in the recitals and other official documents. The challenging implications and contexts they examine include the following: – connection with systemic risk and the financial crisis; – nexus with insurance for negligent conduct; – connection with corporate governance doctrine; – risk management; – transparency; – the cross-border dimension; – liability for lost assets; – impact on alternative investment strategies, and – the nexus with the European Regulation on Long-Term Investment Funds (ELTIFR). Nine country reports, representing most of Europe's financial centres and fund markets add a national perspective to the discussion of the European regulation. These chapters deal with the potential interactions among the AIFMD and the relevant laws and regulations of Austria, France, Germany, Italy, Luxembourg, Liechtenstein, The Netherlands, Malta and the United Kingdom. The second edition of the book continues to deliver not only the much-needed discussion of the inconsistencies and difficulties when applying the directive, but also provides guidance and potential solutions to the problems it raises. The second edition considers all new developments in the field of alternative investment funds, their managers, depositaries, and prime brokers, including, but not limited to, statements by the European Securities and Markets Authority (ESMA) and national competent authorities on the interpretation of the AIFMD, as well as new European regulation, in particular the PRIIPS Regulation, the ELTIF Regulation, the Regulation on European Venture Capital Funds (EuVeCaR), the Regulation on European Social Entrepreneurship Funds (EUSEFR), MiFID II, and UCITS V. The book will be warmly welcomed by investors and their counsel, fund managers, depositaries, asset managers, administrators, as well as regulators and academics in the field.

**Regulating Investor Protection under EU Law** Antonio Marcacci.2018-06-27 This book analyzes the legal system for the protection of retail investors under the European Union law of investment services. It identifies the regulatory leitmotiv driving the EU lawmaker and ascertains whether and to what extent such a system is self-sufficient, using a set of EU-made and EU-enforced rules that is essentially different and autonomous from the domestic legal orders. In this regard, the book takes a double perspective: comparative and intra-firm. Given the federal dimension of the US legal system and, thus, the "role-model" it plays vis-à-vis the EU, the book compares the two systems. To fully highlight the existing gaps and measure how self-sufficient the EU system is against its American counterpart, the Union/Federal level as such is analyzed – i.e., detached from the national (in EU terms) and State (in US terms) level. Regulating Investor Protection under EU Law also showcases the unique intra-firm perspective from a European investment firm and analyzes how EU-produced public-law rules become a set of compliance requirements for investment services providers. This "within-the-firm" angle gauges the self-sufficiency of the EU system of retail investor protection from the standpoint of an EU-regulated entity. The book is intended for both compliance professionals and academic scholars interested in this topic while also including illustrative sections intended to provide a broader regulatory view for less-experienced readers.

**A Bank's Duty of Care** Danny Busch, Cees van Dam.2017-08-24 In recent years, an increasing number of clients and third parties have filed claims against banks such as for mis-selling financial products, poor financial advice, insufficient disclosure of and warning about financial risks. The scope of a bank's duty of care seems to expand, not only to include protection of consumers against unclear risks of complicated products but also protection of professional parties against more obvious risks of relatively straightforward products. This topic raises many questions, both at a theoretical and practical level. This book provides a rich source of information about how various jurisdictions (Germany, Austria, France, Italy, Spain, the Netherlands, England and Wales, Ireland, and the United States of America) deal with these questions and how answers are found or embedded in their national legal systems. The book also contains a detailed chapter on the MiFID I and II conduct-of-business provisions. Finally, the book provides a thorough comparative analysis and perspective.

**Insurance Distribution Directive** Pierpaolo Marano, Kyriaki Noussia.2021 This open access volume of the AIDA Europe Research Series on Insurance Law and Regulation offers the first comprehensive legal and regulatory analysis of the Insurance Distribution Directive (IDD). The IDD came into force on 1 October 2018 and regulates the distribution of insurance products in the EU. The book examines the main changes accompanying the IDD and analyses its impact on insurance distributors, i.e., insurance intermediaries and insurance undertakings, as well as the market. Drawing on interrelations between the rules of the Directive and other fields that are relevant to the distribution of insurance products, it explores various topics related to the interpretation of the IDD – e.g. the harmonization achieved under it; its role as a benchmark for national legislators; and its interplay with other regulations and sciences – while also providing an empirical analysis of the standardised pre-contractual information document. Accordingly, the book offers a wealth of valuable insights for academics, regulators, practitioners and students who are interested in issues concerning insurance distribution.--

**The Transformation of Economic Law** Lucila de Almeida, Marta Cantero Gamito, Mateja Djurovic, Kai Peter Purnhagen.2019-09-05 This book is written in honour of Hans-W. Micklitz for his jubilee 70th birthday and the closure of his twelve-year term as the Chair for Economic Law at the European University Institute (EUI). Hans-W. Micklitz has gained international recognition for dedicating his extensive and fruitful career to diverse areas of law: European Economic Law, European Private Law, National and European Consumer Law, Legal Theory, theories of Private Law and

Social Justice. This book is a product of the collaborative endeavors of its contributors, who all have a special connection with Hans W. Micklitz as his doctoral supervisees or research assistants. The collection of twenty chapters is to be read as the influence of Hans's dialogues in the early stage of the academic career of thirty-one young legal scholars. The volume is divided into three sections devoted to subjects that have received Hans's attention while at the EU: EU Consumer Law (part I); European Private Law and Access Justice (part II); the CJEU between the individual citizen and the Member States (part III).

**Legal Accountability in EU Markets for Financial Instruments** Carl Fredrik Bergström, Associate Professor of European Law Magnus Strand, Magnus Strand. 2022-01-22 The proper functioning of the EU financial market is protected by public actors - both national and supranational - responsible for rulemaking and supervision of investment firms and other private actors. At the same time the effectiveness of the EU legal system requires vigilance from private actors such as investment firms but also their clients, invoking their rights before national authorities and courts. This means that investment firms have a dual role within the system, turning them into subjects of control and enforcement but also agents in the maintenance of the rule of law. Legal Accountability in EU Markets for Financial Instruments brings together a group of scholars with expertise from different legal disciplines but a shared interest for the EU internal market and the way it develops. It integrates a modern study of the form and function of EU rulemaking in the internal market after the financial crisis. The book includes an evaluation of core aspects of rulemaking in the financial market and that way provides a cross-cutting treatment of EU law. The focus of the book is set on the regulatory framework in MiFID II and MiFIR and thematic questions around legal mechanisms for accountability and the role of investment firms in the operation of those mechanisms. It further discusses the implications for EU law and the EU legal system and gives readers a thorough understanding of the concept of accountability through its own findings.

**Better Regulation in EU Contract Law** Esther van Schagen, Stephen Weatherill. 2019-12-26 This book is the first to provide a critical investigation of EU better regulation from the perspective of EU contract law. The Commission's 'New Deal for EU Consumers' is one of the first EU contract law initiatives to implement both the newly revised Better Regulation Guidelines and the newly introduced combined evaluation of multiple Directives in the form of a 'fitness check'. This offers an opportunity to explore difficulties and best practices at a national level, as demonstrated by experience with the EU's Unfair Terms Directive. Both the fitness check and the impact assessment accompanying the New Deal should facilitate critical reflection on the design of EU contract law. This book addresses key questions. Do impact assessments favour business interests at the expense of a high level of consumer protection? Is the evaluation of EU contract law and the analysis in impact assessments in line with scientific standards? Has the fitness check revealed difficulties and success stories with EU measures at national level, and thereby facilitated an in-depth scrutiny of the design of EU contract law? Ultimately, is the potential of better regulation being realised?

**The Oxford Handbook of Fiduciary Law** Evan J. Criddle, Paul B. Miller, Robert H. Sitkoff. 2019-04-29 The Oxford Handbook of Fiduciary Law provides a comprehensive overview of critical topics in fiduciary law and theory through chapters authored by leading scholars. The Handbook opens with surveys of the many fields of law in which fiduciary duties arise, including agency law, trust law, corporate law, pension law, bankruptcy law, family law, employment law, legal representation, health care, and international law. Drawing on these surveys, the Handbook offers a synthetic analysis of fiduciary law's key concepts and principles. Chapters in the Handbook explore the defining features of fiduciary relationships, clarify the distinctive fiduciary duties that arise in these relationships, and identify the remedies available for breach of fiduciary duties. The volume also provides numerous comparative perspectives on fiduciary law from eminent legal historians and from scholars with deep expertise in a diverse array of the world's legal systems. Finally, the Handbook lays the groundwork for future research on fiduciary law and theory by highlighting cross-cutting themes, identifying persistent theoretical and practical challenges, and exploring how the field could be enriched through empirical analysis and interdisciplinary insights from economics, philosophy, and psychology. Unparalleled in its breadth and depth of coverage, The Oxford Handbook of Fiduciary Law represents an invaluable resource for practitioners, policymakers, scholars, and students in this essential field of law.

**Transnational Fiduciary Law** Seth Davis, Thilo Kuntz, Gregory Shaffer. 2023-10-31 This book assesses the conceptualization and legal response to the social problem of abuse of fiduciary authority in transnational context.

**EU Investor Protection Regulation and Liability for Investment Losses** Marnix Wallinga. 2020-10-30 This book examines the relationship between the EU investor protection regulations enshrined in MiFID and MiFID II and national contract and torts law. It describes how the effect of the conduct of business rules as implemented in national financial supervision legislation in private law extends to the issue of enforcement, and critically assesses this interaction from the perspective of EU law. In particular, the conclusions identified in the book will deepen readers' understanding of the interplay between the conduct of business rules and private law norms governing a firm's liability to pay damages, such as duty of care, attributability of damage, causation, contributory negligence and limitation. In turn, the book identifies the subordination and the complementarity model to conceptualise the interaction between the conduct of business rules and private law norms. Moreover, the book challenges the view that civil courts are - or should be - forced to give private law effects to violation of the MiFID and MiFID II conduct of business rules in line with the subordination model. Instead, the complementarity model is advanced as the preferred approach to this interaction in view of what MiFID and MiFID II require from Member States in terms of their implementation, as well as the desirability of each model. This model presupposes that courts should consider the conduct of business rules when adjudicating individual disputes, while preserving the autonomy of private law norms governing liability of investment firms towards clients. Based on analysis of case law of courts in Germany, the Netherlands and England & Wales, as well as scholarly literature, the book also compares the available causes of action, the conditions of liability and the obstacles investors face when claiming damages, as well as how and the extent to which investors can benefit from the conduct of business rules in clearing these obstacles. In so doing, under the approach adopted by national courts to the interplay between the conduct of business rules of EU origin and private law, the book shows how investors can benefit from the influence of these rules on private law norms. In closing, it demonstrates a hybridisation of private law remedies resulting from the accommodation of the conduct of business rules into the private law discourse according to the complementarity model, illustrating how judicial enforcement through private law means may contribute to investor protection.

**Harmonisation of Securities Law** Matthias Haentjens. 2007 Is harmonisation of European securities law a good idea? According to this original analysis, the answer is a qualified yes. If it can be done without undermining the various systems that now govern the custody and transfer of securities in national European jurisdictions, harmonisation will be well received. The author first shows that such an acceptable outcome is indeed possible, and then offers a detailed analysis of the form it might take. Along the way he compares the current infrastructure of securities law in three European countries (Belgium, France, and the Netherlands) with generally accepted standards of modern securities custody and transfer practice, as well as with the harmonisation inherent in the United States Universal Commercial Code. Among the elements of securities law discussed in this comparative context are the following: eligible categories of securities; accountholder-intermediary relationship; intermediary insolvency; shortfalls;

moment of transfer; enforcement of securities rights; and conflict of laws. In approaching the actual form of a European securities instrument, the author considers important relevant initiatives taken by various groups, such as Unidroit, the Hague Convention on Private International Law, and some industry sectors. As an in-depth contribution to this important aspect of the ongoing debate about the harmonisation of European private law, and as an assessment of the possible impact of harmonisation measures by means of a coherence account, this book will be especially valuable to European policymakers and securities regulatory officials. It will also interest practitioners and academics in such diverse fields as commercial law, European law, insolvency law, contract law, and property law.

**Routledge Handbook of Financial Technology and Law** Iris H-Y Chiu, Gudula Deipenbrock. 2021-04-29 Financial technology is rapidly changing and shaping financial services and markets. These changes are considered making the future of finance a digital one. This Handbook analyses developments in the financial services, products and markets that are being reshaped by technologically driven changes with a view to their policy, regulatory, supervisory and other legal implications. The Handbook aims to illustrate the crucial role the law has to play in tackling the revolutionary developments in the financial sector by offering a framework of legally enforceable principles and values in which such innovations might take place without threatening the *acquis* of financial markets law and more generally the rule of law and basic human rights. With contributions from international leading experts, topics will include: Policy, High-level Principles, Trends and Perspectives Fintech and Lending Fintech and Payment Services Fintech, Investment and Insurance Services Fintech, Financial Inclusion and Sustainable Finance Cryptocurrencies and Cryptoassets Markets and Trading Regtech and Suptech This Handbook will be of great relevance for practitioners and students alike, and a first reference point for academics researching in the fields of banking and financial markets law.

European Financial Regulation Veerle Colaert, Danny Busch, Thomas Incalza. 2019-12-26 Mirroring the long-established structure of the financial industry, EU financial regulation as we know it today approaches banking, insurance and investment services separately and often divergently. In recent decades however, the clear separation between financial sectors has gradually evaporated, as business lines have converged across sectors and FinTech solutions have emerged which do not fit traditional sector boundaries. As the contours of the traditional tripartition in the financial industry have faded, the diverging regulatory and supervisory treatment of these sectors has become increasingly at odds with economic reality. This book brings together insights developed by distinguished researchers and industry professionals in a series of articles analysing the main areas of EU financial regulation from a cross-sectoral perspective. For each specific research theme - including prudential regulation, corporate governance and conduct of business rules - the similarities, as well as gaps, overlaps and unjustifiable differences between banking, securities and insurance regulation, are clearly presented and discussed. This innovative research approach is aimed at informing lawmakers and policymakers on potential improvements to EU financial regulation whilst also supporting legal and compliance professionals applying the current framework or looking to streamline compliance processes.

*The Rome I Regulation on the Law Applicable to Contractual Obligations* Michael McParland. 2015 The Rome I Regulation applies to all EU Member States (except Denmark) in relation to 'contractual obligations in civil and commercial matters' in 'situations involving a conflict of laws' that arise out of contracts concluded from 17 December 2009. The Rome I Regulation has been described by the European Commission as 'a central element of the Community *acquis* in the area of civil justice'. This book is the most comprehensive work on the development of the Rome I Regulation that studies in detail the historical background, the legislative development and the teleological purpose of the Regulation. Beginning with the work that led up to the 1972 Draft Convention and the much neglected original French rapporteur's commentary, the author traces developments in the text through the 1980 Convention, highlights the legislative developments that began with the 2003 Green Paper, the Commission's 2005 Proposal and the subsequent negotiations that took place in the European Council and European Parliament that led to the final text of the Rome I Regulation itself. Particular emphasis is placed on highlighting the legislative intent reflected in the changes to the text of the draft Regulation that were made by the Civil Law Committee (Rome I) of the Council. The book marks out the borderline between the Rome I and Rome II Regulations, and considers in detail the application of the conflict-of-law rules in the Rome I Regulation to the specifically protected contracts such as consumer, insurance, carriage of passengers and individual employment contracts. It provides a primary source of reference for all readers involved in the practical interpretation of the Rome I Regulation, or who are interested in choice of law issues arising in international commercial contractual disputes.

**MiFID II and Private Law** Federico Della Negra. 2019 In the wake of the global financial crisis, investors have suffered significant losses as a result of breaches of conduct of business rules in the distribution of financial instruments. MiFID II introduced new disclosure, distribution and product governance rules to strengthen the protection of investors but, like MiFID I, did not harmonise the civil law consequences for their violation. This book asks whether, in spite of the silence of the EU legislators, the MiFID II conduct of business rules may produce civil law effects, enabling investors to enforce them against investment firms before national courts and alternative dispute resolution (ADR) mechanisms. Building on the case law of the CJEU, the book shows the conditions under which the breach of MiFID II conduct of business rules should give rise to a private law remedy, and what remedies would be compatible with EU law. MiFID II and Private Law is an essential contribution to academic research in EU and financial law and will be a key text for policy-makers and legal practitioners working in the field of investor protection regulation and mis-selling litigation.--Bloomsbury Publishing.

**Digital Finance in Europe: Law, Regulation, and Governance** Emiliós Avgouleas, Heikki Marjosola. 2021-12-20 Global finance is in the middle of a radical transformation fueled by innovative financial technologies. The coronavirus pandemic has accelerated the digitization of retail financial services in Europe. Institutional interest and digital asset markets are also growing blurring the boundaries between the token economy and traditional finance. Blockchain, AI, quantum computing and decentralised finance (DeFi) are setting the stage for a global battle of business models and philosophies. The post-Brexit EU cannot afford to ignore the promise of digital finance. But the Union is struggling to keep pace with global innovation hubs, particularly when it comes to experimenting with new digital forms of capital raising. Calibrating the EU digital finance strategy is a balancing act that requires a deep understanding of the factors driving the transformation, be they legal, cultural, political or economic, as well as their many implications. The same FinTech inventions that use AI, machine learning and big data to facilitate access to credit may also establish invisible barriers that further social, racial and religious exclusion. The way digital finance actors source, use, and record information presents countless consumer protection concerns. The EU's strategic response has been years in the making and, finally, in September 2020 the Commission released a Digital Finance Package. This special issue collects contributions from leading scholars who scrutinize the challenges digital finance presents for the EU internal market and financial market regulation from multiple public policy perspectives. Author contributions adopt a critical yet constructive and solutions-oriented approach. They aim to provide policy-relevant research and ideas shedding light on the complexities of the digital finance promise. They also offer solid proposals for reform of EU financial services law.

*European Financial Services Law* Matthias Lehmann, Christoph Kumpan. 2019-07-11 This volume analyses and explains EU legislation governing financial services. It is for legal practitioners in international law firms, the financial industry, regulators, and academics needing an in-depth understanding of financial services regulations. It is intended to serve as a handy reference book, providing both easy to understand overviews of complex topics and insightful analyses of difficult legal issues. Experts renowned in their fields explain, article-by-article, the important EU directives and regulations governing financial services. Examples illustrate how important provisions apply in practice.
