**Traité de l'agression sexuelle** Thierry H. Pham (dir.), Franca Cortoni (dir.).2017-05-11 Le Traité de l'agression sexuelle est le premier livre en français qui réunit sous la même couverture les connaissances nécessaires pour comprendre l'agression sexuelle et pour intervenir auprès des auteurs. Offert sous la forme d'un ouvrage collectif sous la direction de Franca Cortoni (Canada) et Thierry H. Pham (Belgique), l'ouvrage traite en profondeur, avec l'appui de données probantes, les théories explicatives, l'évaluation et le traitement des agresseurs sexuels. Divisé en sections, ce Traité inclut les théories et les recherches qui expliquent l'agression sexuelle envers les adultes et les enfants, les meilleures pratiques pour l'évaluation du risque de récurrence sexuelle et des besoins de traitement, les approches internationales pour le traitement de l'agression sexuelle, la psychopharmacologie et la gestion des délinquants sexuels en collectivité ainsi que les explications théoriques et les pratiques cliniques privilégiées auprès des adolescents et des femmes auteurs d'agression sexuelle, des meurtriers sexuels, des cyber-agresseurs sexuels et des personnes qui présentent des retards mentaux. Ainsi, l'ouvrage constitue un outil précieux de diffusion des connaissances et une base importante d'informations à laquelle les professionnels pourront se référer. Cet ouvrage servira de référence aux professionnels (psychologues, psychiatres, travailleurs sociaux, psychothérapeutes, intervenants

en protection de la jeunesse, experts judiciaires, agents de libération conditionnelle et de probation) qui doivent évaluer, traiter, et gérer le risque de récidive des agresseurs sexuels. Il sera également une référence scientifique pour les chercheurs, enseignants et étudiants en psychologie et psychiatrie médico-légale, criminologie, travail social et justice criminelle dans la francophonie internationale. À PROPOS DES AUTEURS Tous les auteurs du Traité sont des chercheurs ou des cliniciens spécialisés en agression sexuelle. Auteurs de nombreux articles scientifiques ou de livres, ils ont été soigneusement sélectionnés pour leur expertise établie dans un sous-domaine précis de l'agression sexuelle. Ils offrent ainsi une information large et actuelle de l'agression sexuelle basée sur les données internationales. Franca Cortoni, Ph.D., C.Psych., a longuement travaillé comme psychologue clinicienne auprès de délinquants sexuels incarcérés au Canada. Depuis 2007, elle est professeure à l'École de criminologie de l'Université de Montréal et chercheure régulière au Centre international de criminologie comparée. Ses recherches portent sur les hommes et les femmes auteurs d'agressions sexuelles. Elle est éditrice associée pour la revue scientifique *Sexual Abuse: A Journal of Research and Treatment* depuis janvier 2015 et présidente élue de l'Association for the Treatment of Sexual Abusers depuis janvier 2017. Thierry H. Pham est Docteur en psychologie. Il dirige le Centre de Recherche en Défense Sociale et est Professeur de psychologie légale à l'Université de Mons-Hainaut. Il est Professeur associé à l'Université du Québec à Trois-Rivières et Chercheur associé à l'Institut Philippe-Pinel de Montréal. Ses champs de recherche concernent notamment la psychopathie, ses corrélats émotionnels et cognitifs ainsi que l'évaluation du risque chez les agresseurs sexuels.

**The Mayo Clinic Book of Home Remedies** Mayo

Clinic.2010-10-26 Many common health problems can be treated with simple remedies you can do at home. Even if the steps you take don't cure the problem, they can relieve symptoms and allow you to go about your daily life, or at least help you until you're able to see a doctor. Some remedies, such as changing your diet to deal with heartburn or adapting your home environment to cope with chronic pain, may seem like common sense. You may have questions about when to apply heat or cold to injuries, what helps relieve the itch of an insect bite, or whether certain herbs, vitamins or minerals are really effective against the common cold or insomnia. You'll find these answers and more in Mayo Clinic Book of Home Remedies. In situations involving your health or the health of your family, the same questions typically arise: What actions can I take that are immediate, safe and effective? When should I contact my doctor? What symptoms signal an emergency? Mayo Clinic Book of Home Remedies clearly defines these questions with regard to your health concerns and guides you to choose the appropriate and most effective response.

**Les troubles liés aux événements traumatiques** Stéphane Guay, André Marchand.2006 Les événements traumatiques provoquent des troubles psychiques qui peuvent engendrer des répercussions à long terme sur la santé mentale d'un individu : stress, anxiété, toxicomanie, dépression, problèmes de sommeil, etc. Cet ouvrage fait état de la recherche sur l'épidémiologie des troubles mentaux, présente une synthèse des facteurs explicatifs du phénomène de l'état de stress post-traumatique et expose les modèles psychologiques et biologiques sous-jacents. Il propose différentes méthodes de dépistage, d'évaluation et de traitement permettant aux spécialistes d'intervenir efficacement auprès des

victimes. Jusqu'à maintenant, aucun autre ouvrage en français n'a su apporter une analyse aussi exhaustive du phénomène du trauma psychologique. Ecrit par des cliniciens et des chercheurs de grande réputation, ce livre s'adresse aux étudiants, aux chercheurs, aux professeurs et aux intervenants œuvrant dans le domaine de la santé mentale (psychologie, psychiatrie, médecine, service social, sciences infirmières, etc.). Les questionnaires de crise et les intervenants travaillant auprès des victimes d'événements traumatiques y trouveront également matière à exploration.

**Innovation in Information Systems and Technologies to Support Learning Research** Mohammed Serrhini, Carla Silva, Sultan Aljahdali. 2019-11-30 This book provides glimpses into contemporary research in information systems & technology, learning, artificial intelligence (AI), machine learning, and security and how it applies to the real world, but the ideas presented also span the domains of telehealth, computer vision, the role and use of mobile devices, brain-computer interfaces, virtual reality, language and image processing and big data analytics and applications. Great research arises from asking pertinent research questions. This book reveals some of the authors' "beautiful questions" and how they develop the subsequent "what if" and "how" questions, offering readers food for thought and whetting their appetite for further research by the same authors.

*Le Cerveau attentif* Jean-Philippe Lachaux.2011-03-24 Vous n'en avez peut-être pas conscience, mais toute votre perception du monde, votre rapport à ce qui vous entoure, aux autres et à vous-même sont déterminés par un petit quelque chose qui vaut de l'or : votre attention - sans cesse convoitée et courtisée, toujours menacée. Cet ouvrage vous propose précisément de « faire attention à votre attention » dans votre vie quotidienne, pour en tirer un meilleur parti. Pourquoi l'attention échappe-t-elle si souvent au contrôle volontaire ? Pourquoi est-il si difficile de rester concentré ? Que faire pour ne pas se laisser dériver ou pour éviter de papillonner ? C'est dans le cerveau qu'il faut chercher ces secrets, que les neurosciences modernes commencent à pénétrer. Jean-Philippe Lachaux est directeur de recherche à l'Inserm, au sein du Centre de recherche en neurosciences de Lyon. Il anime un groupe dédié à la compréhension des mécanismes cérébraux des grandes fonctions cognitives humaines.

**Visiteurs du soi (Les)** Jean Cottraux.2004 « La psychiatrie et la psychologie font désormais partie de notre panorama quotidien. Elles sont révélatrices des inquiétudes, des désirs et des attentes d'un nombre croissant d'hommes et de femmes. Encore marginales il y a trente ans, les psychothérapies se banalisent au point d'apparaître comme un phénomène de société. Mais la recherche de soi passe-t-elle nécessairement par la rencontre avec un psy ? Après tout, l'humanité a bien vécu sans psy durant

des millénaires et elle s'en est très bien portée. Que doit-on attendre réellement des psychothérapies ? Et comment se servir au mieux des pys ? » J. C. Psychiatre, enseignant à l'université Lyon-I, Jean Cottraux dirige l'Unité de traitement de l'anxiété de l'hôpital neurologique au CHU de Lyon. Ancien président de l'Association européenne de thérapie comportementale, Founding Fellow de l'Académie de thérapie cognitive de Philadelphie, il a notamment publié *Les Ennemis intérieurs* et *La Répétition des scénarios de vie*.

*Design en regards* David Bihanic.2019-04-17T00:00:00+02:00  
Qu'y aurait-il de foncièrement changé aujourd'hui dans la manière moins, peut-être, de transmettre le design (son histoire, sa culture, sa théorie) que de former au design ? selon l'acception jadis retenue notamment par Johannes Itten et Walter Gropius touchant à l'intériorité de l'être, à son accomplissement et ne se rapportant nullement ici au formatage de l'esprit, au dressage ou conditionnement de l'action ; former (ou, symétriquement, se former) au design ne serait autre, en l'espèce, que viser l'accès aux 'savoir-penser' et 'savoir-crée'r' conjugués permettant l'approfondissement de la subjectivité et favorisant la construction d'une conscience aussi éclairée que libre. Autour de cette question complexe, mais du reste essentielle, plusieurs acteurs francophones de l'enseignement du design ici réunis partagent leurs regards, leurs convictions et réflexions, tentant ainsi d'y apporter certains éléments de réponse.

**Drogues et substitution** Jean-Pierre Jacques.2006-04-13 La prise en charge du sujet dépendant de drogue a été bouleversée par les traitements de substitution. Ceux-ci ont débuté et fait leurs preuves avec la méthadone puis la buprénorphine à destination des patients dépendant d'héroïne mais ils peuvent désormais être également envisagés pour les autres dépendances. Les auteurs du présent ouvrage font le point sur la question et présentent ici de manière approfondie les données les plus récentes sur le sujet : ils rassemblent les recherches et

confrontent leurs points de vue, de la psychanalyse à la psychopharmacologie en passant par les thérapies cognitivo-comportementales, afin de dégager un certain « esprit de la substitution ». Cette dernière, avant d'être au service de l'ordre ou de la santé publique, doit servir avant tout le patient ; elle est une pratique qui puise sa source à la fois dans l'expérience et dans une science au service de la clinique pour prendre en considération chaque sujet dépendant de drogues. Cet ouvrage est constitué à la fois comme un traité objectif de la thérapeutique des dépendances (cadres légaux, listes de liens web, glossaire, pharmacologie, etc.) et comme une réflexion subjective, critique et engagée sur ces pratiques cliniques. Il s'adresse aux médecins, psychologues cliniciens, psychanalystes, psychothérapeutes, ainsi qu'aux intervenants psychosociaux, pharmaciens et juristes, qui ont la responsabilité de rencontrer ou d'accompagner les sujets dépendants de drogues.

**Rééducation de la fonction périnéale** Hélène Colangeli-Hagège. 2023-05-03 La rééducation pelvi-périnéale constitue une pratique courante pour les kinésithérapeutes tant sont nombreux les patients, femmes et hommes de tous âges atteints de troubles de cette fonction. Elle est le traitement de première intention des troubles de la continence urinaire et anale et participe au traitement des prolapsus, des troubles de l'exonération, des douleurs pelvi-périnéales et des difficultés sexuelles. Cet ouvrage, composé de quatre parties, a pour objectif de donner toutes les clés nécessaires pour comprendre ces dysfonctionnements, et de les prendre en charge de manière efficace conformément à l'éthique nécessaire à ces soins intimes. La première partie rappelle tous les prérequis à la rééducation périnéale. Ensuite, les soins font l'objet d'un développement spécifique (respect de la pudeur, consentement, mise en place des techniques, hygiène...).

La troisième partie détaille largement les techniques, qu'il s'agisse de techniques manuelles, instrumentales, globales ou comportementales. La prise en charge est ensuite abordée : du bilan aux différents tableaux cliniques. Richement illustré, cet ouvrage constitue un manuel indispensable pour les professionnels de santé confrontés à la rééducation pelvi-périnéale : kinésithérapeutes en premier lieu, mais également sages-femmes, ostéopathes, médecins de rééducation.

*On Curiosity* Franck Cochoy. 2016-07-25 What draws us towards a shop window display? What drives us to grab a special offer, to enter the privileged circle of premium newspaper subscribers, to peruse the pages of an enticing magazine? Without doubt, it is curiosity - that essential force of everyday action which invites us to break from our habits and to become transported beyond our very selves. Curiosity (whether healthy or unhealthy) is one of the favourite tricks of market seduction. Capturing a public - attracting the attention of a reader, seducing a customer, meeting the expectations of a user, persuading a voter ... - often requires the construction of a set of technical devices that can play upon people's inner motivations. Cochoy invites us to take a sociological trip into these cabinets of curiosity, accompanied throughout by Bluebeard, a fairy tale that is both a model of the genre and a pure curiosity machine. At once a work of history and economic anthropology, the book meticulously analyses the devices designed by markets to arouse, excite, and sustain curiosity: a window display, practices of 'teasing', packaging, bus shelters, mobile internet technologies, to name but a few. In the Bettencourt and Strauss-Kahn affairs and the Wikileaks controversy, Cochoy also uncovers the work of investigative journalism and its attention-grabbing 'scoops', revealing the secrets of the revealers of secrets. Available in English for the first time, this major work will arouse readers' curiosity over the course of its unusual and colourful journey. By the end, now better informed and more cautious, they will be able to identify

the traps of which they are the target. So long as curiosity is kept at bay, at least!

**Acute Stress Disorder** Richard A. Bryant.2016-03-30 Drawing on extensive research and clinical experience, leading authority Richard A. Bryant explores what works--and what doesn't work--in managing acute traumatic stress. He reviews the current state of the science on acute stress disorder (ASD) and presents diagnostic guidelines based on DSM-5. In a straightforward, highly readable style, Bryant shares rich insights into how to provide effective, compassionate care to specific populations, including those with mild traumatic brain injury, military personnel and first responders, and children. Evidence-based intervention procedures are described. Reproducible assessment tools and handouts can be downloaded and printed in a convenient 8 1/2 x 11 size.

*Metacognition* Patrick Chambres,Marie Izaute,Pierre-Jean Marescaux.2012-12-06 The object of this volume is to promote the interaction, and indeed construct a synergistic reciprocity between the functional perspective on metacognition and the analytical perspective. The authors examine the role of metacognition in activities as varied as classroom learning, piloting airplanes, and eyewitness testimony. The ideas and questions developed in the book will give a dynamic impulse to research in the field.

**Novel Approaches to the Diagnosis and Treatment of Posttraumatic Stress Disorder** M.J. Roy.2006-03-09

Posttraumatic stress disorder (PTSD) is a common and disabling condition that often goes undiagnosed for years, and even when the diagnosis is made, treatment is frequently ineffective, especially for combat veterans. Cognitive behavioural therapy with imaginal exposure is considered first-line treatment, but many cannot or will not engage in imaginal exposure, which is not surprising, since avoidance of reminders of the trauma is a

defining feature of PTSD. Novel technologies offer an alternative to facilitate exposure therapy, through virtual reality (VR). This book outlines state-of-the-art approaches to improving the diagnosis and treatment of PTSD, with a particular emphasis on the promise and pitfalls associated with VR exposure therapy. The world's leading experts in this cutting edge field describe their VR work in phobias and other mental disorders, and chart a course for future studies to improve the diagnosis and treatment of PTSD.

**Understanding Suicide** Philippe Courtet.2016-03-05 In this book international experts address a range of key current issues relating to suicide. The opening chapters discuss nosology, definitions, clinical determinants, and conceptual models of the suicide process and consider the evidence regarding potential biomarkers of suicide risk based on neuroscientific research. Adopting a neo-Durkheimian perspective, the role of various social factors in the genesis of suicidal behavior is then explored in depth. Practical user-friendly tools that facilitate risk assessment by clinicians are provided, and detailed consideration is given to efficient and innovative strategies for the prevention of suicide and the treatment of suicidal behavior, such as psychotherapy, psychopharmacological approaches, and effective organization of care, including surveillance and the use of online tools. The final part of the book focuses on the need for and development of a personalized approach within the field of suicide prevention.

**Memoirs of an Addicted Brain** Marc Lewis.2011-10-04 A gripping, ultimately triumphant memoir that's also the most comprehensive and comprehensible study of the neuroscience of addiction written for the general public. FROM THE INTRODUCTION: We are prone to a cycle of craving what we don't have, finding it, using it up or losing it, and then craving it all the more. This cycle is at the root of all addictions, addictions to drugs, sex, love, cigarettes, soap operas, wealth, and wisdom itself. But why should this be so? Why are we desperate for what we don't have, or can't have, often at great cost to what we do have, thereby risking our peace and contentment, our safety, and even our lives? The answer, says Dr. Marc Lewis, lies in the structure and function of the human brain. Marc Lewis is a distinguished neuroscientist. And, for many years, he was a drug addict himself, dependent on a series of dangerous substances, from LSD to heroin. His narrative moves back and forth between the often dark, compellingly recounted story of his relationship with drugs and a revelatory analysis of what was going on in his brain. He shows how drugs speak to the brain - which is designed to seek rewards and soothe pain - in its own language. He shows in detail the neural mechanics of a variety of powerful drugs and of the onset of addiction, itself a distortion of normal perception. Dr. Lewis freed himself from addiction and ended up studying it. At the age of 30 he traded in his pharmaceutical supplies for the life of a graduate student, eventually becoming a professor of developmental psychology, and then of neuroscience - his field for the last 12 years. This is the story of his journey, seen from the inside out.

Plus de 10% de la population souffre de cette « peur intense et irraisonnée » trop souvent invalidante et qui est l'une des principales indications de consultation. Cet ouvrage présente les prises en charge actuelles en mettant l'accent sur les thérapies virtuelles.

**Subjective Time** Valtteri Arstila, Dan Lloyd. 2021-12-14

Interdisciplinary perspectives on the feature of conscious life that scaffolds every act of cognition: subjective time. Our awareness of time and temporal properties is a constant feature of conscious life. Subjective temporality structures and guides every aspect of behavior and cognition, distinguishing memory, perception, and anticipation. This milestone volume brings together research on temporality from leading scholars in philosophy, psychology, and neuroscience, defining a new field of interdisciplinary research. The book's thirty chapters include selections from classic texts by William James and Edmund Husserl and new essays setting them in historical context; contemporary philosophical accounts of lived time; and current empirical studies of psychological time. These last chapters, the larger part of the book, cover such topics as the basic psychophysics of psychological time, its neural foundations, its interaction with the body, and its distortion in illness and altered states of consciousness. Contributors Melissa J. Allman, Holly Andersen, Valtteri Arstila, Yan Bao, Dean V. Buonomano, Niko A. Busch, Barry Dainton, Sylvie Droit-Volet, Christine M. Thomas Dowd. 2000 This book integrates cognitive therapy with hypnotherapy and provides principles and illustrations of hypnotic routines that can be used in changing cognitive self-statements, cognitive processing distortions, and tacit cognitive structures. It extends the imagery

work previously used in cognitive therapy into a complete and comprehensive hypnotherapeutic approach to help people change negative and self-defeating cognitions into more positive and adaptive ones. Dr. Dowd demonstrates the use of cognitive hypnotherapy in treating various disorders, in reconstructing memories, and in helping normally healthy individuals overcome blocks to more effective performance.
