The Pataphysician's Library Ben Fisher.2000-01-01 The Pataphysician's Library is a study of aspects of 1890s French literature, with specific reference to the traditions of Symbolism and Decadence. Its main focus is Alfred Jarry, who has proved, perhaps surprisingly, to be one of the more durable fin-de-siècle authors. The originality of this study lies in its use of the enigmatic list of books termed the livres pairs, which appears in Jarry's 1898 novel Gestes et Opinions du docteur Faustroll, pataphysicien, his best-known prose work. The greatest interest of the livres pairs lies in a group of works by Jarry's friends and contemporaries, primarily Leon Bloy, Georges Darien, Gustave Kahn, Catulle Mendès, Josephin Madan, Rachilde, and Henri de Regnier. Several of these authors feature as the lords of islands visited by the pataphysician Dr Faustroll in his curious voyage around Paris. In conjunction with Jarry's own works, the contemporary livres pairs serve to illustrate the vibrant and experimental atmosphere in which these authors worked.

Les cibles membranaires de la cellule tumorale - 1ere partie Jean-Yves Blay.2010-06-01 La question centrale posée par les stratégies de thérapie ciblée est « où viser la bête pour la stopper et/ou la tuer ? », l'animal en question étant ici le cancer qu'il convient d'atteindre au cœur, à la tête, ou au moins aux pattes. Transposée au niveau cellulaire, cette métaphore est le sujet des deux volumes de la collection (vol. 4 et 5) consacrés aux cibles membranaires, bien entendu a priori les plus accessibles. Dans ce 4e volume, le potentiel de plusieurs récepteurs présentés à la membrane plasmique des cellules cancéreuses et dotés d'une activité de tyrosine kinase d'être des cibles efficaces, létales ou

invalidantes, est évalué : EGFR (J. Robert) ; KIT et PDGFR (J.F. Émile) ; MET (J.-P. Borg) ; HER-2, 3 et 4 (F. Penault-Llorca) ; RET (C. de la Fouchardière, J.-P. Droz) ; IGF-1R (J. Dômout, A. Cioffi, A. Le Cesne). Le plus souvent, l'effet est attendu de l'inhibition d'une cible. D'autres fois, de son activation. Tel est le cas des récepteurs de mort, DR4 et DR5 (S. Vignot) et RANK (P. Clézardin). Dans chaque chapitre, les auteurs détaillent, en illustrant leur propos par des schémas à l'échelle moléculaire en couleurs, la fonctionnalité de la cible, son rôle physiologique, son rôle physio-pathologique dans des modèles choisis, les résultats thérapeutiques et les perspectives qui sont ouvertes par certains modèles. Il est notoire que le cancer est un fauve malaisé à chasser. Aussi, le 5e volume de la collection, coordonné également par Jean-Yves Blay, s'efforcera-t-il d'identifier de nouvelles zones sensibles à toucher à la membrane.

Death and Mortality in Contemporary Philosophy Bernard N. Schumacher.2010-09-30 This book contributes to current bioethical debates by providing a critical analysis of the philosophy of human death. Bernard N. Schumacher discusses contemporary philosophical perspectives on death, creating a dialogue between phenomenology, existentialism and analytic philosophy. He also examines the ancient philosophies that have shaped our current ideas about death. His analysis focuses on three fundamental problems: (1) the definition of human death, (2) the knowledge of mortality and of human death as such, and (3) the question of whether death is 'nothing' to us or, on the contrary, whether it can be regarded as an absolute or relative evil. Drawing on scholarship published in four languages and from three distinct currents of thought, this volume represents a comprehensive and systematic study of the philosophy of death, one that provides a provocative basis for discussions of the bioethics of human mortality.

Distributing Silent Film Serials Rudmer Canjels.2011-01-25

Tracing the international consumption, distribution, and cultural importance of silent film serials in the 1910s and 1920s, Canjels provides an exciting new understanding of the cultural dimension and the cultural transformation and circulation of media forms. Specifically, he demonstrates that the serial film form goes far beyond the well-known American two-reel serial—the cliffhanger. Throughout the book, Canjels focuses on the biggest producers of serials, America, France, and Germany, while imported serials, such as those in the Netherlands, are also examined. This research offers new views on the serial work of well known directors as D.W. Griffith, Abel Gance, Erich von Stroheim, and Fritz Lang, while foregrounding the importance of lesser known directors such as Louis Feuillade or Joe May. In the early twentieth-century, serial productions were constantly undergoing change and were not merely distributed in their original form upon import. As adjusted serials were present in large quantities or confronted different social spaces, nationalistic feelings and views stimulated by the unrest of World War I and the expanding American film industry could be incorporated and attached to the serial form. Serial productions were not only adaptable to local discourses, they could actively stimulate and interact as well, influencing reception and further film production. By examining the distribution, reception, and cultural contexts of American and European serials in various countries, this cross-cultural research makes both local and global observations. Canjels thus offers a highly relevant case study of transnational, transcultural and transmedia relations.

Alexander the Great and Bactria Frank L. Holt.2018-07-17 The creation of a Greek Frontier in Central Asia was one of the most famous and far-reaching achievements of Alexander the Great.

Yet the process was shaped as much by the political traditions of the natives as by the cultural traditions of the newcomers. This book examines this key historical clash from both sides, and shows that the birth of Hellenistic Bactria was a traumatic one eliciting more bitterness than 'brotherhood'. The book is composed of four major parts: Part I provides an introduction to both Bactrian and Alexander studies; Part II surveys the land and peoples of Central Asia prior to Alexander's 'conquest'; Part III covers the Graeco-Macedonian invasion and the effects of colonization; Part IV treats the aftermath, from the death of Alexander to the accession of Seleucus.

Landmark Cases in Public International Law Eirik

Bjorge,Cameron Miles.2017-12-28 The past two hundred years have seen the transformation of public international law from a rule-based extrusion of diplomacy into a fully-fledged legal system. Landmark Cases in Public International Law examines decisions that have contributed to the development of international law into an integrated whole, whilst also creating specialised sub-systems that stand alone as units of analysis. The significance of these decisions is not taken for granted, with contributors critically interrogating the cases to determine if their reputation as 'landmarks' is deserved. Emphasis is also placed on seeing each case as a diplomatic artefact, highlighting that international law, while unquestionably a legal system, remains reliant on the practice and consent of states as the prime movers of development. The cases selected cover a broad range of subject areas including state immunity, human rights, the

environment, trade and investment, international organisations, international courts and tribunals, the laws of war, international crimes, and the interface between international and municipal legal systems. A wide array of international and domestic courts are also considered, from the International Court of Justice to the European Court of Human Rights, World Trade Organization Appellate Body, US Supreme Court and other adjudicative bodies. The result is a three-dimensional picture of international law: what it was, what it is, and what it might yet become.

Roger Laporte: The Orphic Text Ian Maclachlan.2017-12-02
This is the first full-length study devoted to Roger Laporte, whose lifelong exploration of the stakes of writing has produced a body of work on the borderline of literature and philosophy. Charting the development of Laporte's writing in relation to the work of Heidegger, Levinas, Blanchot and Derrida, this study offers both a comprehensive reading of Laporte's oeuvre and a new perspective on an important strand of recent thinking about literature. In particular, it is claimed here that the imperfect reflexivity of Laporte's 'Orphic' texts effects a singular opening to reading, and that in doing so it illuminates the ethical dimension of literature which has been the subject of much recent discussion.

Spectralities in the Renaissance Caroline Callard.2022-04-21

Spectralities in the Renaissance explores the history of the idea of ghosts in early modern Europe, moving away from thinking of them as a purely religious phenomenon, but as something rooted in cultural traditions, particularly in times of violence, where the living and the dead were in close proximity. Callard focuses on ancien regime France, to explore how the notion of ghosts and the supernatural played a part in France's early modern past, in such disparate areas as politics, law, natural philosophy, and the cultural and emotional history of everyday life.

The Mystery of Chopin's Préludes Anatole Leikin.2016-03-03

Chopin's twenty-four Préludes remain as mysterious today as when they were newly published. What prompted Franz Liszt and others to consider Chopin's Préludes to be compositions in their own right rather than introductions to other works? What did set Chopin's Préludes so drastically apart from their forerunners? What exactly was 'the morbid, the feverish, the repellent' that Schumann heard in Opus 28, in that 'wild motley' of 'strange sketches' and 'ruins'? Why did Liszt and another, anonymous, reviewer publicly suggest that Lamartine's poem *Les Préludes* served as an inspiration for Chopin's Opus 28? And, if that is indeed the case, how did the poem affect the structure and the thematic contents of Chopin's Préludes? And, lastly, is Opus 28 a random assortment of short pieces or a cohesive cycle? In this monograph, richly illustrated with musical examples, Anatole Leikin combines historical perspectives, hermeneutic and thematic analyses, and a range of practical implications for performers to explore these questions and illuminate the music of one of the best loved collections of music for the piano.

Carrington.2024-01-15 Households in Context shifts the focus from monumental temples, tombs, and elite material and visual culture to households and domestic life to provide a crucial new perspective on everyday dwelling practices and the interactions of families and individuals with larger social and cultural structures. A focus on households reveals the power of the everyday: the critical role of quotidian experiences, objects, and images in creating the worlds of the people who live with them. The contributors to this book share contemporary research on houses and households in both Ptolemaic and Roman Egypt to reshape the ways we think about ancient people's lived experiences of family, community, and society. Households in Context places the archaeology and history of Greco-Roman Egypt in dialogue with research on dwelling, daily practice, and materiality to reveal how ancient households functioned as

Derrida Now John W. P. Phillips.2016-03-11 For more than 30 years and until his death in 2004, Jacques Derrida remained one of the most influential contemporary philosophers. It may be difficult to evaluate what forms his legacy will take in the future but *Derrida Now* provides some provocative suggestions. Derridas often-controversial early reception was based on readings of his complex works, published in journals and collected in books. More recently attention has tended to focus on his later work, which grew out of the seminars that he presented each year in France and the US. The full texts of these seminars are now the subject of a major publication project, to be produced over the next ten years. *Derrida Now* presents contemporary articles based on or around the study of Derrida. It provides a critical introduction to Derridas complex and controversial thought, offers careful analysis of some of his most important concepts, and includes essays that address the major strands of his thought. Derridas influence reached not only into philosophy but also into other fields concerned with literature, politics, visual art, law, ecology, psychoanalysis, gender and sexuality and this book will appeal to readers in all these disciplines. Contributors include Peggy Kamuf, Geoff Bennington, Nicholas Royle, Roy Sellars, Graham Allen and Irving Goh.

Tsvétaïéva, exilée à Paris depuis 1925, retourne avec son fils Guéorgui en Union soviétique, où elle rejoint son mari, Sergueï Efron, et leur fille, Ariadna. Deux ans plus tard, elle se suicide à Élabouga, en Tatarie. Ces deux dernières années de la vie de la grande poétesse russe sont racontées et montées scène par scène, comme un drame antique. Une grande maison abandonnée, à trente kilomètres de Moscou, où un petit groupe d'exilés rentrés de France vit en huis clos, surveillés par le NKVD. Le vide qui se fait avec les arrestations. Sergueï Efron fusillé, Ariadna déportée dans un camp où elle passera huit ans. Ne restent plus que Marina et son fils. La guerre éclate, tous deux sont évacués à Élabouga... Le livre dresse un tableau terrifiant du destin qui attendait, en Union soviétique, à la fin des années 1930, les émigrés de l'« Union pour le retour », intellectuels sincères piégés par leurs propres espoirs et manipulés par la police politique du régime stalinien. La lourde responsabilité des services secrets dans le destin tragique de Marina Tsvétaïéva se conjugue à sa poignante inaptitude à survivre. Spécialiste de littérature russe, Irma Koudrova a consacré de nombreux travaux à la vie et l'œuvre de Marina Tsvétaïéva, dont plusieurs ont été traduits en anglais, allemand et tchèque. Elle vit à Saint-Pétersbourg.

The Social Archaeology of Funerary Remains Rebecca Gowland, Christopher Knusel. 2009-04-06 Human bones form the most direct link to understanding how people lived in the past, who they were and where they came from. The interpretative value of human skeletal remains (within their burial context) in terms of past social identity and organisation is awesome, but was, for many years, underexploited by archaeologists. The nineteen papers in this edited volume are an attempt to redress this by marrying the cultural aspects of burial with the anthropology of the deceased.
