Auricular Therapy Bryan L. Frank,Nader E. Further, understanding the concepts of advanced Auricular Therapy enables the clinician to enhance his/her understanding of the patient's pathophysiology and thus to approach the patient as a true clinician rather than as simply a technician.

Ear Acupuncture and Parkinson Lise Couture.2012-03-20 Lise Couture has been in the field of Ear Acupuncture for the last twentyseven years and her work is known in many countries including Canada,France, Argentina, Uruguay, U.S.A.,Spain and many others by the token of the conferences she gave at the Lyon Symposium in 1994 and in 2006.She was also a guest speaker at the First Chinese Symposium in Toronto in May of 1986. In 2006, she heard about Dr Ulrich Werth's method with the implants in the ears for treating Parkinsons. It reminded her Dr Paul Nogier's words in one of the Auricular Magazines. One day, while treating a man in his clinic, he related that he would have liked to clobber the point with many needles rather than only one: the situation was really chronic and the patient needed help. In her practice she had experienced that feeling too and she is amazed that Dr Werth came out with those microimplants inserted in different points of the ear to stop or slow down the destructive process of the Parkinsons. D. Lise is now in her third year of practice and research in the field of Ear Acupuncture and Parkinson. At the same time, she keeps treating her regular patients, but at a lower rhythm. Like Dr Paul Nogier, she is all ears to the stories of her patients. The answer of the healing is in their life experiences. That is her truth and living passion. If she can have you walk, she'll do it! D. Lise lives in Ottawa with her son Dannie and husband Michel Andr Beauvolsk, since 1992.

Peuker,Angelika Steveling.2006 In the last fifty years, microsystem acupuncture has emerged as a safe and effective therapeutic option for a wide range of conditions, from cardiovascular and neurological disorders to obesity and nicotine dependence. Its worldwide acceptance is largely due to the ability of microsystem acupuncture to provide access for treatment, even in the event of extreme local sensitivity to pain. This book is a comprehensive overview of ear, scalp, mouth, and hand acupuncture to help you understand the relationships between these microsystems and the body. Integrating new and established methods, the book covers such topics as Yamamoto New Scalp Acupuncture, Korean hand acupuncture, and laser acupuncture with concise text and more than 350 photographs to allow for instant localization of all zones and points. The range of techniques addressed makes this one-of-a-kind work ideal for busy students and practitioners looking for an overview of some of the most rapidly growing and innovative advances in acupuncture and complementary medicine.

Auriculotherapy Raphael Nogier.2011-01-01 The continuation of Paul Nogier's findings Auriculotherapy is based on proven correspondences between locations on the external ear and the internal organs and systems of the body. The ear acts like an input/output terminal in direct contact with the central nervous system. Information on viscerosomatic states can be accessed via visual clues, skin electro-conductivity, and pressure sensitivity at specific points. The first part of Raphael Nogier's Auriculotherapy shows how acupuncture needles are used in sophisticated and powerful therapeutic interventions. The second part introduces the principles and practice of auriculomedicine, a true frequency medicine that evolved from Dr. Paul Nogier's auriculotherapy, his discovery of the VAS (Vascular Autonomic Signal) in the pulse and his consequent observations of the diagnostic and therapeutic properties of radiant light frequencies on the skin. The material presented here builds on and updates the work of the author's father, Dr. Paul Nogier, who scientifically explored and charted the auricular microsystems in the 1950s. A serviceable, contemporary work for students of acupuncture as well as practitioners, offering clear and practical information to be applied directly for the benefit of patients.

Soliman's Auricular Therapy Textbook Nader Soliman.2008 In October1968 Captain George Morgan is about to embark on what he considers to be the best job in the U.S. Army commanding a rifle company in combat. At age 27, he will be referred to as The Old Man by the soldiers under his command. He is already a seasoned veteran of service in Vietnam and is now returning for a second tour of duty in what has become an increasingly unpopular war in the U.S. During this assignment, Morgan acquires a keen sense of responsibility to his unit, which calls itself Charlie Hunter, and to the men who serve in it. He develops a special bond with many of his men, and one in particular a young Mexican who is nicknamed Mouse. The story takes this unit on many dangerous missions and recounts the bravery and compassion of the soldier called Mouse. In the course of operations, the unit comes into contact with a mysterious Vietnamese woman, who eventually brings the commander to Saigon. That visit draws the captain into the

realm of espionage and subterfuge and culminates with him on stand-by to lead a mission to rescue the Vietnamese woman. While leading his men on combat missions, Captain Morgan becomes increasingly disillusioned with the war and finds it more and more difficult to justify America's presence in Vietnam to his subordinates; yet, he must continue to set the example and project the image of the stalwart commander.
