General history of the science and practice of music. [With] vol. of portraits sir John Hawkins.1858

The Interrelatedness of Music, Religion, and Ritual in African Performance Practice Daniel Kodzo Avorgbedor.2003 This work presents critical perspectives on the dynamic configurations of music, religion (indigenous, Islam, Christian), and ritual in contemporary African societies. Examples show issues and processes of accommodation, and the construction of religious and ethnic identities.

The Parsimonious Universe Stefan Hildebrandt,Anthony Tromba.1996-07-18 Why does nature prefer some shapes and not others? The variety of sizes, shapes, and irregularities in nature is endless. Skillfully integrating striking full-color illustrations, the authors describe the efforts by scientists and mathematicians since the Renaissance to identify and describe the principles underlying the shape of natural forms. But can one set of laws account for both the symmetry and irregularity as well as the infinite variety of nature's designs? A complete answer to this question is likely never to be discovered. Yet, it is fascinating to see how the search for some simple universal laws down through the ages has increased our understanding of nature. The Parsimonious Universe looks at examples from the world around us at a non-mathematical, non-technical level to show that nature achieves efficiency by being stingy with the energy it expends.

Recollecting from the Past Ron Emoff.2002-03-27 Studies interconnections between sound production, spirit possession, colonialism and ceremonial remembering in Madagascar. The first serious ethnomusicological study of Malagasy music, *Recollecting from the Past* evokes the complex sound and performative aesthetic in Madagascar called maresaka. Maresaka pertains not only to musical expression but extends into ways of remembering the past, aesthetics of everyday life, and Malagasy concepts of self and community. Ron Emoff focuses on tromba spirit possession ceremonies in which Malagasy use devotional practice as an occasion to expressively re-figure worlds often impeded by colonialism and postcolonial phenomena, extreme material poverty, and widespread illness. Malagasy not only preserve the past, but they interpret, revalue and transform it to their own ends. Music is crucial to these performances since powerful ancestral spirits will not enter into the present if not enticed by masterful musical performances, and so music itself provides a complex symbolic system with which Malagasy can recall and reconstruct the past. This groundbreaking study will be of interest to readers in the fields of anthropology, ethnomusicology, cultural studies, African studies, postcolonial and performance studies.

Eve The Spirit of Christmas...

Trumpet Voluntarily Paul Baron (Musician).2018

Choreomania Kéline Gotman.2018 When political protest is read as epidemic madness, religious ecstasy as nervous disease, and angular dance moves as dark and uncouth, the 'disorder' being described is choreomania. At once a catchall term to denote spontaneous gestures and the unruly movements of crowds, 'choreomania' emerged in the nineteenth century at a time of heightened class conflict, nationalist policy, and colonial rule. In this book, author Kéline Gotman examines these choreographies of unrest, rethinking the modern formation of the choreomania concept as it moved across scientific and social scientific disciplines. Reading archives describing dramatic misformations of bodies and body politics-she shows how prejudices against expressivity unravel, in turn revealing widespread anxieties about demonstrative agitation. This history of the fitful body complements stories of nineteenth-century discipline and regimentation. As she notes, constraints on movement imply constraints on political power and agency. In each chapter, Gotman confronts the many ways choreomania works as an extension of discourses shaping colonialist orientalism, which alternately depict riotous bodies as dangerously infected others, and as curious bacchanalian remains. Through her research, Gotman also shows how beneath the radar of this colonial discourse, men and women gathered together to repossess on their terms the gestures of social revolt.

The Weight of the Past M. Lambek.2016-04-30 In *The Weight of the Past* , Michael Lambek explores the complex ways that history shapes, constrains, and enables daily life. Focusing on ritual performances of spirit mediumship in a multifaceted religious landscape, Lambek's analysis reveals the multiple ways that Sakalava 'bear' history. In Mahajanga, Madagascar, to bear history is at once a weighty obligation, a creative re-birthing, a

scrupulous cultivation, and an exuberant performance of the past. To bear history is to serve and to suffer it, but also to be informed, enlightened, and sanctified. Royal ancestors emerge in spirit mediums to comment on the present from multiple voices and generate a refracted, ironic historical consciousness. This book describes the division of labour, creative production (poiesis), and ethical practice (phronesis) entailed in imagining, embodying, and serving the past. It is at once a vivid ethnography of Sakalava life and a significant intervention in anthropological debates on culture and history, structure and practice, advocating a theoretical approach informed by Aristotelian categories of understanding. Ethnographically rich and engagingly written, this book will be essential reading for courses in the anthropology of religion, ritual, or historical consciousness.

Teichmüller Theory in Riemannian Geometry Anthony Tromba.2012-12-06 These lecture notes are based on the joint work of the author and Arthur Fischer on Teichmüller theory

undertaken in the years 1980-1986. Since then many of our colleagues have encouraged us to publish our approach to the subject in a concise format, easily accessible to a broad mathematical audience. However, it was the invitation by the faculty of the ETH Zürich to deliver the ETH Nachdiplom-Vorlesungen on this material which provided the opportunity for the author to develop our research papers into a format suitable for mathematicians with a modest background in differential geometry. We also hoped it would provide the basis for a graduate course stressing the application of fundamental ideas in geometry. For this opportunity the author wishes to thank Eduard Zehnder and Jürgen Moser, acting director and director of the Forschungsinstitut für Mathematik at the ETH, Gisbert Wiistholz, responsible for the Nachdiplom Vorlesungen and the entire ETH faculty for their support and warm hospitality. This new approach to Teichmüller theory presented here was undertaken for two reasons. First, it was clear that the classical approach, using the theory of extremal quasi-conformal mappings (in this approach we completely avoid the use of quasi-conformal maps) was not easily applicable to the theory of minimal surfaces, a field of interest of the author over many years. Second, many other active mathematicians, who at various times needed some Teichmüller theory, have found the classical approach inaccessible to them.

Practical Studies for Cornet and Trumpet, Book II Robert W. Getchell, Nilo W. Hovey. The Second Book of Practical Studies is designed to logically extend the techniques already presented in the First Book and also to introduce and develop new techniques and rhythms that will offer a challenge to the intermediate

student. Through the use of slightly more difficult and more extended studies, it is hoped that the material included in this book may more fully develop general musicianship and more feeling for style and interpretation and thus act as a foundation for solo literature.

Buzz to Brilliance Adrian Griffin. 2012-10-25 **Buzz to Brilliance** engages students personally, technically and musically as they begin their study on the trumpet. The book journeys with students from the moment they first open their trumpet case to years later as they prepare for college auditions. It abounds with technical information and practical tips including buying a new trumpet, mouthpiece selection, adjusting to braces, and marching band. Chapters on practice skills, sight-reading, and performing are a must-read for any musician, while special features give students a window into diverse worlds, from the workbench of a master repairman to the French horn studio of a master teacher. Drawings, diagrams and pictures invite students into each page, making even advanced technical concepts easy to understand. Following the written portion of the book, a comprehensive set of scales and technique-building exercises address topics including breathing, high range, pedal tones, lip slurs, accuracy, articulation, and pedal tones. With practice schedules, mouthpiece comparison chart, pitch tendencies and more, this book is a treasure for any trumpet player. **Buzz to Brilliance** is the perfect companion for any beginning method book, and the first text on the market that provides a comprehensive set of essential studies selected specifically for beginning and intermediate players.
