Religion, State, Society, and Identity in Transition Rob van der Laarse.2015 State-society-identity relations could be defined as interaction(s) between state institutions, societal groups and individuals living within the borders of a (political) community/ state. These relations are never static, but vibrant, being in constant transition under the influence of cultural, religious and other developmental processes happening in individual and in society. Within the democratic structures the relation between state, society and individual is more open-minded placing the protection of citizens, preservation of citizens' rights, freedoms, and responsibilities as a departing point of dialogue taking in the perspective of the citizens' cultural, religious, and ethnic affiliations and backgrounds. Within totalitarian structures this relation is hindered and is not fully developed. The present publication addresses the transition in religion-state-society-identity relations in Ukraine within the three-dimensional approach focusing on transdisciplinary perspectives on (1) political protests, (2) civil movements and/ or (3) revolution of dignity. Can the current events in Ukraine be defined mainly as political protests, i.e. a transition in state structure? Or more as civil movements, i.e. transition in society? Or is it a revolution of dignity, i.e. a transition in/of religion? An international group of researchers and experts from universities in Australia, Belgium, Canada, France, Germany, The Netherlands, New Zealand, Poland, Russia, Ukraine, United Kingdom, and the United States of America have offered their perspective on the events in Ukraine in attempting to equip the reader with a glimpse of understanding of what happens in Ukraine and what consequences could be expected. Fair recognition of the events happening in Ukraine at the present time is already a first step towards reconciliation in the future.

Wealth, Poverty and Politics Thomas Sowell.2016-09-06 In *Wealth, Poverty, and Politics*, Thomas Sowell, one of the foremost conservative public intellectuals in this country, argues that political and ideological struggles have led to dangerous confusion about income inequality in America. Pundits and politically motivated economists trumpet ambiguous statistics and sensational theories while ignoring the true determinant of income inequality: the production of wealth. We cannot properly understand inequality if we focus exclusively on the distribution of wealth and ignore wealth production factors such as geography, demography, and culture. Sowell contends that liberals have a particular interest in misreading the data and chastises them for using income inequality as an argument for the welfare state. Refuting Thomas Piketty, Paul Krugman, and others on the left, Sowell draws on accurate empirical data to show that the inequality is not nearly as extreme or sensational as we have been led to believe. Transcending partisanship through a careful examination of data, *Wealth, Poverty, and Politics* reveals the truth about the most explosive political issue of our time.

Narrative Architecture Nigel Coates.2012-03-26 The first book to look architectural narrative in the eye Since the early eighties, many architects have used the term narrative to describe their work. To architects the enduring attraction of narrative is that it offers a way of engaging with the way a city feels and works. Rather than reducing architecture to mere style or an overt emphasis on technology, it foregrounds the experiential dimension of architecture. *Narrative Architecture* explores the potential for narrative as a way of interpreting buildings from ancient history through to the present, deals with architectural background, analysis and practice as well as its future development. Authored by Nigel Coates, a foremost figure in the field of narrative architecture, the book is one of the first to address this subject directly Features architects as diverse as William Kent, Antoni Gaudí, Eero Saarinen, Ettore Sottsass, Superstudio, Rem Koolhaas, and FAT to provide an overview of the work of NATO and Coates, as well as chapters on other contemporary designers Includes over 120 colour photographs Signposting narrative's significance as a design approach that can aid architecture to remain relevant in this complex, multi-disciplinary and multi-everything age, *Narrative Architecture* is a must-read for anyone with an interest in architectural history and theory.

Second Language Learning and Language Teaching Vivian Cook.2016-05-05 *Second Language Learning and Language Teaching* provides an introduction to the application of second language acquisition research to language teaching. Assuming no previous background in second language acquisition or language teaching methods, this text starts by introducing readers to the basic issues of second language acquisition research. It then examines how people learn particular aspects of the second language, such as grammar, vocabulary, pronunciation and the writing system, and at the strategies they adopt in their learning and the differences between individuals. Final chapters look at second language learning in a broader context - the goals of language teaching and how teaching methods relate to SLA research. This newly updated fifth edition builds on the comprehensive scope of earlier editions while also addressing more recent developments in the field, particularly multilingual approaches to language teaching.

Jackson Pollock Kirk Varnedoe, Pepe Karmel, Museum of Modern Art (New York, N.Y.).1999 Based on a symposium held in 1999 during The Museum of Modern Art's retrospective, this volume presents nine critical essays offering dramatically different ways of understanding Pollock's art and influence. The essays reveal not just the richness of Pollock's work, but also the vitality and diversity of contemporary criticism. The essays were written by Robert Storr, Pepe Karmel, James Coddington and Carol Mancusi-Ungaro, Kirk Varnedoe, T. J. Clark, Jeremy Lewison, Rosalind Krauss, and Anne Wagner.

Architecture's Historical Turn Jorge Otero-Pailos.2010 *Architecture's Historical Turn* traces the hidden history of architectural phenomenology, a movement that reflected a key turning point in the early phases of postmodernism and a legitimating source for those architects who first dared to confront history as an intellectual problem and not merely as a stylistic question. Jorge Otero-Pailos shows how architectural phenomenology radically transformed how architects engaged, theorized, and produced history. In the first critical intellectual account of the movement, Otero-Pailos discusses the contributions of leading members, including Jean Labatut, Charles Moore, Christian Norberg-Schulz, and Kenneth Frampton. For architects maturing after World War II, Otero-Pailos contends, architectural history was a problem rather than a given. Paradoxically, their awareness of modernism's historicity led some of them to search for an ahistorical experiential constant that might underpin all architectural expression. They drew from phenomenology, exploring the work of Bachelard, Merleau-Ponty, Heidegger, and Ricoeur, which they translated for

architectural audiences. Initially, the concept that experience could be a timeless architectural language provided a unifying intellectual basis for the stylistic pluralism that characterized postmodernism. It helped give theory--especially the theory of architectural history--a new importance over practice. However, as Otero-Pailos makes clear, architectural phenomenologists could not accept the idea of theory as an end in itself. In the mid-1980s they were caught in the contradictory and untenable position of having to formulate their own demotion of theory. Otero-Pailos reveals how, ultimately, the rise of architectural phenomenology played a crucial double role in the rise of postmodernism, creating the antimodern specter of a historical consciousness and offering the modern notion of essential experience as the means to defeat it.

Up, Down & Other Opposites with Ellsworth Kelly Ellsworth Kelly.2018-03-09 A groundbreaking set of visual opposites for the toddler set, featuring the popular art of Ellsworth Kelly Ellsworth Kelly's paintings and sculptures take center stage in this creative visual presentation of opposites. The Great Escape Angus Deaton.2024-05-21 A Nobel Prize-winning economist tells the remarkable story of how the world has grown healthier, wealthier, but also more unequal over the past two and half centuries The world is a better place than it used to be. People are healthier, wealthier, and live longer. Yet the escapes from destitution by so many has left gaping inequalities between people and nations. In *The Great Escape*, Nobel Prize-winning economist Angus Deaton—one of the foremost experts on economic development and on poverty—tells the remarkable story of how, beginning 250 years ago, some parts of the world experienced sustained progress, opening up gaps and setting the stage for today's disproportionately unequal world. Deaton takes an in-depth look at the historical and ongoing patterns behind the health and wealth of nations, and addresses what needs to be done to help those left behind. Deaton describes vast innovations and wrenching setbacks: the successes of antibiotics, pest control, vaccinations, and clean water on the one hand, and disastrous famines and the HIV/AIDS epidemic on the other. He examines the United States, a nation that has prospered but is today experiencing slower growth and increasing inequality. He also considers how economic growth in India and China has improved the lives of more than a billion people. Deaton argues that international aid has been ineffective and even harmful. He suggests alternative efforts—including reforming incentives to drug companies and lifting trade restrictions—that will allow the developing world to bring about its own Great Escape. Demonstrating how changes in health and living standards have transformed our lives, *The Great Escape* is a powerful guide to addressing the well-being of all nations.

Youth, Arts, and Education Anna Hickey-Moody.2013-02-11 How are the arts important in young people's lives? *Youth, Arts and Education* offers a groundbreaking theory of arts education. Anna Hickey-Moody explores how the arts are ways of belonging, resisting, being governed and being heard. Through examples from the United Kingdom and Australia, Anna Hickey-Moody shows the cultural significance of the kinds of learning that occur in and through arts. Drawing on the thought of Gilles Deleuze, she develops the theory of affective pedagogy, which explains the process of learning that happens through aesthetics. Bridging divides between critical pedagogical theory, youth studies and arts education scholarship, this book: Explains the cultural significance of the kinds of learning that occur in and through arts Advances a theory of aesthetic citizenship created by youth arts Demonstrates ways in which arts practices are forms popular and public pedagogy Critiques popular ideas that art can be used to fix problems in the lives of youth at risk *Youth, Arts and Education* is the first post-critical theory of arts education. It will be of interest to students and scholars across the social sciences and humanities, in particular in the sociology of education, arts education, youth studies, sociology of the arts and cultural studies.

The Production of Consumer Society Ernst Mohr.2021-04 With a novel quality theory of consumption which treats opulence and self-restraint in consumption styles symmetrically, Ernst Mohr shows how social distance and proximity are communicated by consumption and produced by communication. He positions fringe styles with those of the mainstream in an overall stylistic system of society and analyses their encounters. Rigorously derived, the approach casts fresh light on the cultural and social evolution as well as the business models of the consumer industry. It provides a coherent interdisciplinary access to the aesthetic turn of society that has so far been treated with contradictory paradigms.

Dictionary of Media and Communications Marcel Danesi.2014-12-18 Accessible to wide range of readers from student to lay people, this authoritative reference provides a complete listing of media concepts, figures, and techniques with illustrations and historical commentaries. Written by distinguished scholar and author Marcel Danesi, and with an Introduction by Arthur Asa Berger, a leading figure in the world of media and communications, the dictionary also includes terms related to psychology, linguistics, aesthetics, computer science, semiotics, culture theory, anthropology, and more that have relevance in media studies. Each entry includes a definition in simple, clear language; an illustration where applicable; and, historical commentary (who coined a term for example, why, who uses it, etc.). A bibliography, a directory of online resources, and a time-line of media genres add to the dictionary's usefulness and appeal.

Privacy and Identity Management Michael Friedewald, Stefan Schiffner, Stephan Krenn.2021-03-31 This book contains selected papers presented at the 15th IFIP WG 9.2, 9.6/11.7, 11.6/SIG 9.2.2 International Summer School on Privacy and Identity Management, held in Maribor, Slovenia, in September 2020.* The 13 full papers included in this volume were carefully reviewed and selected from 21 submissions. Also included is a summary paper of a tutorial. As in previous years, one of the goals of the IFIP Summer School was to encourage the publication of thorough research papers by students and emerging scholars. The papers combine interdisciplinary approaches to bring together a host of perspectives, such as technical, legal, regulatory, socio-economic, social or societal, political, ethical, anthropological, philosophical, or psychological perspectives. *The summer school was held virtually.

The Underground History of American Education John Taylor Gatto.2001 The underground history of the American education will take you on a journey into the background, philosophy, psychology, politics, and purposes of compulsion schooling.

Venturi, Scott Brown & Associates Stanislaus von Moos.1999 Also presented are spectacular renovations for the Frank Furness library building at the University of Pennsylvania and Harvard's Memorial Hall and designs for houses, exhibitions, fabrics, furniture, and decorative items. The catalog, written by the architects, focuses on important aspects of their practice in the late 1980s and the 1990s, notably the juxtaposition of a hype sensibility in decoration - manifested in large-scale LED signs and colorful supergraphics - and a generic architecture. The introductory essay, by Stanislaus von Moos, discusses five major themes in Venturi and Scott Brown's architecture: its dialogue with their hometown, Philadelphia, as both a national shrine and a center of architectural innovation; the importance of the American campus as a model for planning and design; organicism as a source of their design theory; the role of realism and abstraction in the firm's architecture; and the Venturis' recent interest in Japan and its traditions.

A Dictionary of Media and Communication Daniel Chandler, Rod Munday.2020-02-21 This authoritative and up-to-date A-Z covers all aspects of interpersonal, mass, and networked communication, including digital and mobile media, advertising, journalism, and nonverbal communication. This new edition is particularly focused on expanding coverage of social media terms, to reflect its increasing prominence to media and communication

studies as a whole. More than 2,000 entries have been revised, and over 500 new terms have been added to reflect current theoretical terminology, including concepts such as artificial intelligence, cisgender, fake news, hive mind, use theory, and wikiality. The dictionary also bridges the gap between theory and practice, and contains many technical terms that are relevant to the communication industry, including dialogue editing, news aggregator, and primary colour correction. The text is complemented by biographical notes and extensively cross-referenced, while web links supplement the entries. It is an indispensable guide for undergraduate students of media and communication studies, and also for those taking related subjects such as television studies, video production, communication design, visual communication, marketing communications, semiotics, and cultural studies.

Art as We Don't Know it. 2020 What worlds are revealed when we listen to alpacas, make photographs with yeast or use biosignals to generate autonomous virtual organisms? Bioart invites us to explore artistic practices at the intersection of art, science and society. This rapidly evolving field utilises the tools of life sciences to examine the materiality of life; the collision of human and nonhuman. Microbiology, virtual reality and robotics cross disciplinary boundaries to engage with arts as artists and scientists work together to challenge the ways in which we understand and observe the world. This book offers a stimulating and provocative exploration into worlds emerging, seen through art as we don't know it? yet.00'Art as We Don't Know It' showcases art and research that has grown and flourished within the wider network of both the Bioart Society and Biofilia during the previous decade. The book features a foreword by curator and art historian Mónica Bello, and a selection of peer-reviewed articles, personal accounts and interviews, artistic contributions and collaborative projects which illustrate the breadth and diversity of bioart. The resulting book is a tantalising and invaluable indicator of trends, visions and impulses in the field.

American Extremism D. J. Mulloy. 2004-08-02 American Extremism explains how at the heart of the politics practiced by the militia movement is an attempt to define the nature of 'Americanism', and shows how militia members employ the myths, metaphors and perceived historical lessons of the American Revolution, the constitutional settlement and America's frontier experience to do so. Mulloy argues that militia members' search for the 'authority of history' leads them to a position best characterized as 'ahistorical historicism', in which political interests in the present are given greater weight than the demands of a historically accurate reading of the past. With discussion of such recent events as the Oklahoma City bombing, Waco and the September 11th attacks alongside topical issues including militia conspiracy theories and the origins of Americans' right to keep and bear arms, this work provides the deepest understanding to date of the American militia movement.

Cold War Anthropology David H. Price. 2016-04-01 In Cold War Anthropology, David H. Price offers a provocative account of the profound influence that the American security state has had on the field of anthropology since the Second World War. Using a wealth of information unearthed in CIA, FBI, and military records, he maps out the intricate connections between academia and the intelligence community and the strategic use of anthropological research to further the goals of the American military complex. The rise of area studies programs, funded both openly and covertly by government agencies, encouraged anthropologists to produce work that had intellectual value within the field while also shaping global counterinsurgency and development programs that furthered America's Cold War objectives. Ultimately, the moral issues raised by these activities prompted the American Anthropological Association to establish its first ethics code. Price concludes by comparing Cold War-era anthropology to the anthropological expertise deployed by the military in the post-9/11 era.

Solomon's Child William Lynch. 2001 This book challenges the accepted view of the early Royal Society of London that holds that its fellows did not seriously attempt to implement Francis Bacon's program for the methodological reform of the sciences. Instead, the book shows that Bacon's program shaped the Society's earliest work in important, if often contradictory, ways as fellows wedded Bacon's ideas to their various interests and problem areas. Developing Bacon's program in different directions resulted in a richer understanding of his method than the undirected empiricism often associated with his name. The author demonstrates that Bacon's call for a focus on "things themselves" was built upon three distinct images of objects of knowledge, in opposition to recent accounts that focus on the collective witnessing of matters of fact. He identifies at the core of Bacon's method a threefold metaphorical ontology of objects of knowledge and corresponding objectivities. The book reveals a picture of the Royal Society as more sophisticated and unified than previously depicted, while simultaneously demonstrating how the fellows' development of Bacon's legacy ultimately pulled in different directions. Specular objects of knowledge privileged passive observation and justified an empiricist objectivity. Manipulated objects of art or manual objects emphasized an engaged, constructivist objectivity in which knowing is doing. And, a vision of underlying forms as generative objects of knowledge, which could be combined like letters of the alphabet to produce phenomena at will, defined a theoretical concept of objectivity. These components of Bacon's method inform in varying ways the early publications of the Royal Society by John Evelyn, Robert Hooke, John Wilkins, Thomas Sprat, and John Graunt, which are examined in detail to demonstrate the collective negotiation of an ambitious inductive program employing hypotheses, active powers, and the disciplined use of analogy. Examining the Royal Society's activity in the areas of horticulture, experimentation, language reform, cultural criticism, and political arithmetic, the author synthesizes philosophical and sociological approaches to science in developing a new understanding of the Royal Society and its legacy for science, culture, and politics.

History of Computer Art Thomas Dreher. 2020 The development of the use of computers and software in art from the Fifties to the present is explained. As general aspects of the history of computer art an interface model and three dominant modes to use computational processes (generative, modular, hypertextual) are presented. The History of Computer Art features examples of early developments in media like cybernetic sculptures, computer graphics and animation (including music videos and demos), video and computer games, reactive installations, virtual reality, evolutionary art and net art. The functions of relevant art works are explained more detailed than usual in such histories.

Arts Based Research Tom Barone, Elliot W. Eisner. 2011-03-28 Designed to be used as both a class text and a resource for researchers and practitioners, Arts Based Research provides a framework for those who seek to broaden the domain of qualitative inquiry in the social sciences by incorporating the arts as forms that represent human knowing.

Twelve Years a Slave Solomon Northup. 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Pollock Painting Barbara Rose. 1980

Saints of Hysteria David Trinidad, Denise Duhamel, Maureen Seaton. 2007-03-06 Collaborative poetry — poems written by one or more people — grew out of word games played by French surrealists in the 1920s. It was taken up a decade later by Japan's Vou Club and then by Charles Henri Ford, who created the chainpoem, composed by poets who mailed their lines all over the world. After WW II, the Beat writers' collaborative experiments resulted in the famous Pull My Daisy. The concept was embraced in the 1970s by feminist poets as a way to find a collective female voice. Yet, for all its rich history, virtually no collections of collaborative poetry exist. This exhilarating anthology remedies the omission. Featured are poems by two, four, even as many as 18 people in a dizzying array of forms: villanelles to ghazals, sonnets to somonkas, pantoums to haiku, even quizzes, questionnaires, and other nonliterary forms. Collaborators' notes accompany many of the poems, giving a fascinating glimpse into the creative process.
