*The Reconnection* Eric Pearl. 2011-04 Why are prominent doctors and medical researchers all over the world interested in the extraordinary healings reported by the patients of Dr. Eric Pearl? What does it mean when these patients report the sudden disappearance of afflictions such as cancers, AIDS-related diseases, and cerebral palsy? And what does it mean when people who interact with Dr. Pearl report a sudden ability to access this healing energy not just for themselves, but for others, too? What is this phenomenon? Well, you might have to reconsider everything you've read up until now about conventional healing. The "new" frequencies of healing described by Dr. Pearl transcend "technique" entirely and bring you to levels beyond those previously accessible to anyone, anywhere. This book takes you on Dr. Pearl's journey from the discovery of his ability to facilitate healings, to his well-deserved reputation as the instrument through which this process is being introduced to the world. But most important, The Reconnection reveals methods you can use to personally master these new healing energies.

**All Chained Up** Sophie Jordan. 2016-03-29 There are bad boys and then there are the men of Devil's Rock . . . Some men come with a built-in warning label. Knox Callaghan is one of them. Danger radiates from every lean, muscled inch of him, and his deep blue eyes seem to see right through to Briar Davis's most secret fantasies. But there's one major problem: Briar is a nurse volunteering at the local prison, and Knox is an inmate who should be off-limits in every way. Knox feels it too—a shocking animal magnetism that drives him to risk his own life to protect Briar's. Paroled at last, he tries to resist her. She's too innocent, too sweet, and she has no idea what Knox is capable of. But a single touch can lead to a kiss—and a taste . . . until the only crime is denying what feels so right . . . “When the prison doors are open, the real dragon will fly out.”—Ho Chi Minh

Baby Boomer Health Dynamics Andrew V. Wister. 2005-01-01 Are the baby boomers in Canada more or less healthy than previous generations? What are the implications of this for the national health care system? Baby Boomer Health Dynamic responds to the growing interest in the generation that makes up over one-third of the Canadian population - the largest segment of society - with the leading edge reaching their sixty-fifth birthday in 2011 and eighty-five by 2031. Focusing on four health behaviours that have been proven to be major risk factors for disease: smoking, unhealthy exercise, obesity, and heavy drinking - Andrew V. Wister researches the long-term implications of several key lifestyle-health conundrums, most notably the paradoxical relationship in the concurrent trends over the last two decades of increased exercise levels and a significant rise in obesity. This invariably leads to questions about the eating habits of North Americans, and in particular, the quantity and quality of fast-food and convenience-food consumption. Recent public declarations by a number of health organizations and institutes that we are experiencing an obesity crisis, and moreover, that obesity is the 'new tobacco' makes Baby Boomer Health Dynamics both timely and topical.

**Living in Berlin** Barbara Sichtermann, Ingo Rose. 2002 Berlin has triumphed over its own history as a divided city to become one of the most vibrant

and thrilling capitals in Europe. Entire districts have been rebuilt in only ten years, making the city a showcase of great architectural achievement. Living in Berlin seeks out both the new and the old of Berlin's most eye-catching attractions from the fabulous eighteenth-century palace of Sans-Souci to breathtaking new buildings designed by moderns like Foster, Starck, and Gehry. This sumptuously illustrated book offers an insider's tour of the city's unique architectural and cultural heritage-and beyond, to the hidden jewels and neglected treasures of the Berlin that most travelers pass by. Living in Berlin pauses at the river and the lakes that lie at the heart of the city, and visits hidden courtyards and market squares. The classic Berlin of Kurt Weill's songs is still there; the voice of Marlene Dietrich still hangs in the smoke-filled bars-if only you know where to look! Living in Berlin also visits cutting-edge contemporary designs for living in the city; from minimalist modern settings to the organized chaos of young artists' studios. The book is completed by details on the best places for excursions and shopping trips, where to eat and where to stay, all selected by true Berliners.

**Zeolites for Cleaner Technologies** Michel Guisnet, Jean-Pierre Gilson. 2002-09-19 This book, written and edited by leading authorities from academia and industrial groups, covers both preventive- and curative-zeolite-based technologies in the field of chemical processing. The opening chapter presents the state of the art in zeolite science. The two subsequent chapters summarize the chemistries involved in the processes and the constraints imposed on the catalyst/adsorbent. Three major areas are covered: oil refining, petrochemicals and fine chemicals. A chapter on the (curative) use of zeolites in pollution abatement completes this overview. In the area of oil refining, a general lecture sets the scene for present and future challenges. It is followed by in-depth case studies involving FCC, hydrocracking and light naphtha isomerization. Also, an entire chapter is devoted to the often-overlooked subject of base oils. In the area of petrochemicals, the processing of aromatics and olefins is described and special attention is paid to the synergy between catalysis and separation on molecular sieves. Contents: Introduction to Zeolite Science and Technology (M Guisnet & J-P Gilson) The Chemistry of Catalytic Processes (A Corma & A Martínez) Preparation of Zeolite Catalysts (T G Roberie et al.) Refining Processes: Setting the Scene (R H Jensen) Advances in Fluid Catalytic Cracking (E T Habib et al.) Hydrocracking (J A R Van Veen) C4-C6 Alkane Isomerisation (F Schmidt & E Köhler) Base Oil Production and Processing (M Daage) Para-Xylene Manufacturing Catalytic Reactions and Processes (F Alario & M Guisnet) Separation of Paraxylene by Adsorption (A Méthivier) Aromatic Alkylation: Towards Cleaner Processes (J S Beck et al.) Methanol to Olefins (MTO) and Beyond (P Barger) Zeolite Effects on Catalytic Transformations of Fine Chemicals (D E De Vos & P A Jacobs) Functionalization of Aromatics over Zeolite Catalysts (P Marion et al.) Zeolites and 'Non-Zeolite' Molecular Sieves in the Synthesis of Fragrances and Flavors (W F Hoelderich & M C Laufer) Pollution Abatement Using Zeolites: State of the Art and Further Needs (G Delahay & B Coq) Readership: Undergraduates, graduate students, academics and researchers in catalyst chemistry. Reviews: "Chapter authors have provided a teaching text that gives excellent introductory chapters to zeolites, and to the nature and significance of the processes that they can catalyse ... This excellent book should be required reading for all scientists who have an interest in improving the environment." *Chemistry & Industry*

*Towards the Semantic Web* John Davies, Dieter Fensel, Frank van Harmelen. 2003-06-13 With the current changes driven by the expansion of the World Wide Web, this book uses a different approach from other books on the market: it applies ontologies to electronically available information to improve the quality of knowledge management in large and distributed organizations. Ontologies are formal theories supporting knowledge sharing and reuse. They can be used to explicitly represent semantics of semi-structured information. These enable sophisticated automatic support for acquiring, maintaining and accessing information. Methodology and tools are developed for intelligent access to large volumes of semi-structured and textual information sources in intra- and extra-, and internet-based environments to employ the full power of ontologies in supporting knowledge management from the information client perspective and the information provider. The aim of the book is to support efficient and effective knowledge management and focuses on weakly-structured online information sources. It is aimed primarily at researchers in the area of knowledge management and information retrieval and will also be a useful reference for students in computer science at the postgraduate level and for business managers who are aiming to increase the corporations' information infrastructure. The Semantic Web is a very important initiative affecting the future of the WWW that is currently generating huge interest. The book covers several highly significant contributions to the semantic web research effort, including a new language for defining ontologies, several novel software tools and a coherent methodology for the application of the tools for business advantage. It also provides 3 case studies which give examples of the real benefits to be derived from the adoption of semantic-web based ontologies in real world situations. As such, the book is an excellent mixture of theory, tools and applications in an important area of WWW research.

\* Provides guidelines for introducing knowledge management concepts and tools into enterprises, to help knowledge providers present their knowledge efficiently and effectively. \* Introduces an intelligent search tool that supports users in accessing information and a tool environment for maintenance, conversion and acquisition of information sources. \* Discusses three large case studies which will help to develop the technology according to the actual needs of large and or virtual organisations and will provide a testbed for evaluating tools and methods. The book is aimed at people with at least a good understanding of existing WWW technology and some level of technical understanding of the underpinning technologies (XML/RDF). It will be of interest to graduate students, academic and industrial researchers in the field, and the many industrial personnel who are tracking WWW technology developments in order to understand the business implications. It could also be used to support undergraduate courses in the area but is not itself an introductory text.

**Effects of Intensive Fertilizer Use on the Human Environment** .1978 A number of countries in Europe and North America have been using fertilizers heavily for a number of years and particularly since 1945. This high level of fertilizer applications is essential to supply the necessary food for increasing populations and to meet higher demands for animal and plant products. Effects of fertilizer use on the environment should show first in countries where fertilizers have been used intensively for some time and where consumption is steadily rising. It is the experience gained in such countries which is being discussed below with a view to assessing the impact of fertilizers on the human environment, including the development of methods for recognizing and minimizing any undesirable consequences which may be produced. It should be realized that high densities of human population combined with intensive crop and livestock production have led to the production of organic wastes at a rate too high for natural processes to convert it in ecologically safe compounds. Therefore both direct and indirect effects of intensive fertilizer use have been reviewed.

*PRICAI 2021: Trends in Artificial Intelligence* Duc Nghia Pham, Thanaruk Theeramunkong, Guido Governatori, Fenrong Liu. 2021-11-01 This three-volume set, LNAI 13031, LNAI 13032, and LNAI 13033 constitutes the thoroughly refereed proceedings of the 18th Pacific Rim Conference on Artificial Intelligence, PRICAI 2021, held in Hanoi, Vietnam, in November 2021. The 93 full papers and 28 short papers presented in these volumes were carefully reviewed and selected from 382 submissions. PRICAI covers a wide range of topics in the areas of social and economic importance for countries in the Pacific Rim: artificial intelligence, machine learning, natural language processing, knowledge representation and reasoning, planning

and scheduling, computer vision, distributed artificial intelligence, search methodologies, etc. Part II includes two thematic blocks: Natural Language Processing, followed by Neural Networks and Deep Learning.

Aristotle's Problemata in Different Times and Tongues Pieter de Leemans, Michèle Goyens.2006 Mediaevalia Lovaniensia 39 Communication leads to an evolution of knowledge, and the free exchange of knowledge leads to fresh findings. In the Middle Ages things were no different. The inheritance of ancient knowledge deeply influenced medieval thought. The writings of ancient Greek philosophers such as Aristotle reached medieval readers primarily through translations. Translators made an interpretation of the source-text, and their translations became the subject of commentaries. An understanding of the complex web of relations among source-texts, translations, and commentaries reveals how scientific thinking evolved during the Middle Ages. Aristotle's Problemata, a text provoking various questions about scientific and everyday topics, amply illustrates the communication of ideas during the transition between antiquity and the Renaissance.

**Make: Sensors** Tero Karvinen, Kimmo Karvinen, Ville Valtokari.2014-05-06 Make: Sensors is the definitive introduction and guide to the sometimes-tricky world of using sensors to monitor the physical world. With dozens of projects and experiments for you to build, this book shows you how to build sensor projects with both Arduino and Raspberry Pi. Use Arduino when you need a low-power, low-complexity brain for your sensor, and choose Raspberry Pi when you need to perform additional processing using the Linux operating system running on that device. You'll learn about touch sensors, light sensors, accelerometers, gyroscopes, magnetic sensors, as well as temperature, humidity, and gas sensors.
