Narrative Skills of Dual Language Learners Ulla

Licandro. 2016-07-11 The current work follows the premise that fictional oral narratives represent socio-emotionally and academically relevant communicative practices. Two studies are presented, aiming to (1) analyze the narrative skills of preschool-age Turkish-German dual language learners (DLLs) and (2) explore a peer-assisted approach to supporting DLLs' narrative skills in early childhood education and care. The findings relate to the influence of dual language learning on narrative production and provide emerging evidence for the effectiveness of a peer-assisted narrative intervention approach.

Developing Narrative Comprehension Ute Bohnacker, Natalia Gagarina. 2020-12-15 Comprehension of texts and understanding of questions is a cornerstone of successful human communication. Whilst reading comprehension has been thoroughly investigated in the last decade, there is surprisingly little research on children's comprehension of picture stories, particularly for bilinguals. This can be partially explained by the lack of cross-culturally robust, cross-linguistic instruments targeting early

narration. This book presents an inference-based model of narrative comprehension and a tool that grew out of a large-scale European project on multilingualism. Covering a range of language settings, the book uses the Multilingual Assessment Instrument for Narratives to answer the question which narrative comprehension skills (bilingual) children can be expected to master at a certain age, and explores how such comprehension is affected (or not affected) by linguistic and extra-linguistic factors. Linking theory to method, the book will appeal to researchers in linguistics and psychology and graduate students interested in narrative, multilingualism, and language acquisition.

unbeantworteten Frage geht die vorliegende Monographie in Bezug auf frühen Fremdsprachenerwerb nach. Untersucht werden narrative Texte von Grundschülerinnen und Grundschulern, die an einem englischsprachigen Immersionsprogramm in Deutschland teilnehmen, einer intensiven Form von CLIL bzw. bilinguaalem Unterricht. Ausgehend von einem psycholinguistischen Modell der Diskursproduktion betrachtet der vorliegende Band einerseits, auf der Makroebene der Textualität, die Entwicklung der Kohärenz der Erzählungen und andererseits, auf der Mikroebene, die Entwicklung der Kohäsion. Die gewählten Analysemodelle basieren auf Geschichtengrammatik und kohäsiven Mittel nach Halliday und Hasan (1976). Der Band ist eine der ersten Studien zu Kohärenz und Kohäsion im Zweitsprachenerwerb und die bisher einzige solche Studie im Kontext frühen Fremdsprachenunterrichts. Hauptzielgruppen sind Linguistinnen und Linguisten, die an Spracherwerb, frühkindlichen Erzählungen, Text-/Diskurslinguistik interessiert sind, sowie Fachdidaktikerinnen und Fachdidaktiker, die an frühem Fremdsprachenunterricht und bilinguaalem Unterricht interessiert sind.

Narrative Development in a Multilingual Context Ludo Th Verhoeven,Sven Strömquist.2001-01-01 In this volume, the results of a number of empirical studies of the development of narrative construction within a multilingual context are presented and discussed. It is explored what operating principles underlie the process of narrative production in L1 and L2. Developmental relations between form and function will be studied across a broad range of functional categories, such as temporality, perspective, connectivity, and narrative coherence. Moreover, a variety of language contact situations is considered with broad variation in the typological distances between the languages in order to enable cross-linguistic comparison. The analysis of learner data in various cross-linguistic settings may thus offer

new information on the role of the structural properties of unrelated languages on the process of narrative acquisition. In the present volume, an attempt is also made to find out how transfer from one language to the other is facilitated. Finally, the effects of input on narrative construction in children's first and second language are examined in several studies.

a practical manual for teachers, to be used directly in the classroom. The book begins with a series of language games, designed to warm up creativity and strengthen the imagination. This is followed by a series of creative story workshops, based on the writer's own experience both as a teacher and poet running workshops in schools. These workshops focus on growing the roots of story writing through story telling and reading, and begin with the importance of learning a few well-known tales. There are ideas for drama, role-play and art, and a few model stories are provided for story telling. Other workshops explore simple ideas for creating new stories, based around simple familiar patterns. The book also offers advice on how to organize an effective workshop for younger children, and demonstrates how to teach story writing in a dynamic, creative and imaginative way in relationship with the KS1 national literacy framework. Workshops include the story of our lives; stories that make a circle; stories about problems; days of the week tales; humbug, stuff and nonsense stories; quests; repetitive tales; wishing stories; warning stories; and cooking the story soup.

Pictures of the Mind Miriam Boleyn-Fitzgerald.2010-01-08

Neuroscientists once believed your brain was essentially locked down by adulthood. No new cells. No major changes. If you grew up depressed, angry, sad, aggressive, or nasty, you'd be that way for life. And, as you grew older, there'd be nowhere to go but down, as disease, age, or injury wiped out precious, irreplaceable brain cells. But over the past five, ten, twenty years, all that's changed. Using fMRI and PET scanning technology, neuroscientists can now look deep inside the human brain and they've discovered that it's amazingly flexible, resilient, and plastic. *Pictures of the Mind: What the New Neuroscience Tells Us About Who We Are* shows you what they've discovered and what it means to all of us. Through author Miriam Boleyn-Fitzgerald's masterfully written narrative and use stunning imagery, you'll watch human brains healing, growing, and

adapting to challenges. You'll gain powerful new insights into the interplay between environment and genetics, begin understanding how people can influence their own intellectual abilities and emotional makeup, and understand the latest stunning discoveries about coma and locked-in syndrome. You'll learn about the tantalizing discoveries that may lead to cures for traumatic brain injury, stroke, emotional disorders, PTSD, drug addiction, chronic pain, maybe even Alzheimer's. Boleyn-Fitzgerald shows how these discoveries are transforming our very understanding of the self, from an essentially static entity to one that can learn and change throughout life and even master the art of happiness.

The Writing Revolution Judith C. Hochman, Natalie

Wexler. 2017-08-07 Why you need a writing revolution in your classroom and how to lead it The Writing Revolution (TWR)

provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, The Writing Revolution can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities The Writing Revolution is as much a method of teaching content as it is a method of teaching

writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.

Agrammatic Aphasia Lise Menn,Loraine K. Obler,Gabriele Miceli.1990 This major reference work fills a need long recognized in neurolinguistics: a source for analyzable speech transcripts from agrammatic aphasic patients that provides detailed grammatical descriptions and distributional analyses. This 3-volume set is unique in that it presents narrative speech from carefully selected clinically comparable patients, speakers of 14 languages, and parallel narratives by normal speakers. For each of the 14 languages there is a case presentation chapter analyzing and discussing the language of agrammatic patients, followed by primary data, which are organized as follows: running text of speech by two patients; interlinear morphemic translations of those texts; running text of speech elicited from two normal control subjects (plus interlinear translations); tables and figures analyzing distributional properties of the patients' speech; results

of comprehension tests of the patients; transcriptions of patients' oral reading and writing samples. Neurological information is included with the case presentations, and a short grammatical sketch of each language is added to make the work on all languages accessible even to those who only read English. Language findings are presented for English, Dutch, German, Icelandic, Swedish, French, Italian, Polish, Serbo-Croatian, Hindi, Finnish, Hebrew, Chinese and Japanese. The book is an indispensable reference work for all linguists, psycholinguists and neurolinguists who wish to test their theories against a massive body of data.

Assessing Multilingual Children Sharon Armon-Lotem, Jan de Jong, Natalia Meir. 2015-04-28 Second language learners often produce language forms resembling those of children with Specific Language Impairment (SLI). At present, professionals working in language assessment and education have only limited diagnostic instruments to distinguish language impaired migrant children from those who will eventually catch up with their monolingual peers. This book presents a comprehensive set of tools for assessing the linguistic abilities of bilingual children. It aims to disentangle effects of bilingualism from those of SLI, making use of both models of bilingualism and models of language impairment. The book's methods-oriented focus will make it an essential handbook for practitioners who look for measures which could be adapted to a variety of languages in diverse communities, as well as academic researchers.

It examines the role narratives can play in encouraging growth in contexts and domains such as personal and family identity, creative movement, memory and self-concept, social relationships, or developing a sense of humor. Each chapter describes innovative and research-based applications of narratives such as movement stories, visual narratives to develop historical thinking, multimodal storytelling, bibliotherapy,

mathematics stories, family stories, and social narratives. The chapters elaborate on the strength of narratives in supporting the whole child in diverse contexts from young children on the autism spectrum improving their social skills at school, to four- and five-year-olds developing historical thinking, to children who are refugees or asylum-seekers dealing with uncertainty and loss. Written by accomplished teachers, researchers, specialists, teaching artists and teacher educators from several countries and backgrounds, the book fills a gap in the literature on narratives. "...this work delves into the topic of narratives in young children's lives with a breadth of topics and depth of study not found elsewhere." "Collectively, the insights of the contributors build a convincing case for emphasizing story across the various disciplines and developmental domains of the early childhood years." "The writing style is scholarly, yet accessible. Authors used a wide array of visual material to make their points clearer and show the reader what meaningful uses of story "look like"."

Storytelling, Narrative, and the Thematic Apperception

Test Phebe Cramer.1996-05-03 This volume is about a particular kind of story-telling. Known as the Thematic Apperception Test (TAT), it is a systematic approach to story-telling that provides clinicians with an effective method for investigating those original and highly personal themes that constitute the unique personality of each individual. The first half of the book illuminates the meaning of narratives and the second half explores their implications for therapeutic understanding and treatment. Topics covered include: The history and development of the TAT The importance of context in storytelling How stories are transformed over time What narratives may reveal about personality organization How narratives may alter according to age, gender, or as a result of defense mechanisms The use of the TAT for research studies

TEMAS (Tell-Me-A-Story) Assessment in Multicultural Societies

Giuseppe Costantino, Richard H. Dana, Robert G.

Malgady. 2020-08-26 Ethnic minority children now comprise over 75 percent of students in 100 of the largest cities in the United States. However, these students have not been given equal access to, nor benefited from, the contemporary mental health system as have their non-minority peers. TEMAS (Tell-Me-A-Story) Assessment in Multicultural Societies examines the health/mental care system in which professional service providers, including psychologists, labor to offer quality care for youth in the United States. The authors ardently support the use of the TEMAS assessment instrument as a useful tool for diagnosis of all youngsters, particularly its use on the growing population of minority children and adolescents. Part I presents a rationale and context for employing TEMAS. Introductory chapters describe the mental health status of the population at-risk, as well as systems of care for youth where assessment and intervention are components. Topics to follow highlight a history of positive TEMAS test reviews with the detail required by instructors for preparing dedicated TEMAS courses. The volume thoroughly outlines cross-cultural studies and illustrates case examples of European-American, Hispanic/Latino, Asian-American, and forensic studies. TEMAS (Tell-Me-A-Story) Assessment in Multicultural Societies brings practical insight to instructors who teach standard assessment courses; clinicians, counselors, and school psychologists; assessment specialists; and administrators concerned with mental health services designed for children and adolescents.

Aphasiology Patrick Doyle. 2002-05-02 The First Annual Clinical Aphasiology Conference (CAC) was convened in Albuquerque in 1971. It was attended by a small group of primarily practicing clinicians dedicated to meeting the human service needs of their clients, while recognizing the importance of contributing to the

collective knowledge base of their discipline by providing empirical evidence supporting the links between their clinical interventions and outcomes. Thirteen years later Barlow, Hays, and Nelson (1984) would describe, in their now seminal publication *The Scientist Practitioner*, an integrated model of applied behavioral research, its strategies and methods, and the role of the practitioner in the acquisition of knowledge directed toward improving clinical procedures and outcomes. By this time, 13 Volumes of CAC publications had already been published and comprised the single largest source of applied clinical data addressing the nature of aphasia and its clinical management. These documents represented the product of the scientist-practitioner model in action prior to its formalization by Barlow et al., and provide a rich source of evidence supporting the efficacy of aphasia rehabilitation. Unfortunately, these and subsequent CAC publications remain unavailable to the larger clinical and scientific community due to their limited distribution. Much has changed in the ensuing years. Indeed, many of the healthcare delivery systems in which aphasia rehabilitation is now practiced in 2002 severely restrict the frequency and duration of clinical services. Increasingly, practitioners are required to be more accountable for their clinical outcomes, and to measure behavioral change in units that represent meaningful differences to consumers. Now more than ever, it is critical that the scientist-practitioner model be promoted in order to better serve individuals with aphasia, and to further advance the collective knowledge and evidence base of the discipline. Now more than ever, the available evidence needs to be disseminated as broadly as possible. These goals are in keeping with the mission of CAC as envisioned by its founding members and remain the focused commitment of its many participants, steering committee and publication board. In keeping with these goals, the papers that appear in this special edition of *Aphasiology* were selected based upon their theoretical importance, clinical relevance, and

The Adult Attachment Projective Picture System Carol

George, Malcolm L. West. 2012-03-12 This book presents cutting-edge research on adult attachment together with a complete overview of the Adult Attachment Projective Picture System (AAP), the authors' validated developmental assessment. In addition to research applications, the AAP can be of great use for clinicians seeking to understand the attachment strengths and challenges that clients bring to therapy. The book describes how the AAP identifies attachment classification groups and yields important information about dimensions--including defensive processes--not evaluated by other available measures. Part I examines the theoretical underpinnings of the AAP and compares it to other adult attachment assessments. The authors explain how autobiographical narrative, as elicited and analyzed by the AAP, can offer strong insights into essential features of attachment. Part II reviews the nuts and bolts of the AAP: its development and validation, how it is administered, and how the coding and classification system works. Chapters in Part III contain detailed case illustrations that show what the AAP looks like in action and what it reveals about individuals' early experiences, sense of self, and capacity to engage in close, protective relationships. Cases, which include childhood history and verbatim AAP transcripts, represent the four major adult attachment classification groups: secure, dismissing, preoccupied, and unresolved. The concluding chapter discusses promising uses of the AAP in neurobiological research. A unique

Crosslinguistic Approaches to the Psychology of Language Jiansheng Guo,Elena Lieven,Nancy Budwig,Susan Ervin-Tripp,Keiko Nakamura,Seyda Ozcaliskan.2010-10-18 Inspired by the pioneering work of Dan Slobin, this volume discusses language learning from a crosslinguistic perspective, integrates language specific factors in narrative skill, covers the major theoretical issues, and explores the relationship between language and cognition.

Discourse Analysis and Applications Ronald L. Bloom,Loraine K. Obler,Susan De Santi,Jonathan S. Ehrlich.2013-06-17 Application of analytic discourse techniques to clinical practice is relatively recent. This book's contributors begin with the notion that systematic examination of discourse provides a rich source of data for describing the complex relationships among language, social context, and the cognitive processes that underlie discourse comprehension and production. Evidence is provided that when discourse is studied across different clinical populations, analysis yields an optimal opportunity for developing dynamic models of brain and language that more thoroughly account for the complexity of language use in social contexts. Accordingly, studies presented in this volume have a dual focus -- to examine the implications of discourse research on neurolinguistic theories and to evaluate the contribution of discourse analysis to understanding the clinical status of patients with brain damage. As such, this volume reports patterns of preserved and impaired discourse behavior in normal adults and

in different adult clinical populations. It also describes numerous tasks designed to elicit a variety of discourse genres and a host of techniques created to describe how subjects order information and relate ideas across sentences. In addition, it includes numerous abstract units and linguistic devices targeted to examine those aspects of discourse that govern cohesion, organization, and topic manipulation. This volume is unique because it presents both theoretical and clinical papers that examine a variety of communication pathologies. Clinicians often report dissatisfaction with formal test batteries in that results are often at variance with clinical observation of performance in real life situations. To address this concern, this work proposes methods for examining discourse that move the examiner closer to naturalistic sampling. The research presented demonstrates that discourse analysis provides clinically significant information that contributes to the understanding of the cognitive, linguistic, and social status of people with communication disorders. These studies also offer a framework to support continuously evolving diagnostic and treatment paradigms for adults with neurological communication pathologies.

Communication in Autism Joanne Arciuli,Jon Brock.2014-10-15 Communication in Autism adopts a multidisciplinary approach to explore one of the most common developmental disorders associated with communication impairment. Perhaps the most fascinating thing about communication in autism is that variation is as extreme as it could possibly be. While some individuals with

autism have age-appropriate language, a number have exceptional language skills; others have little or no spoken language. In between these extremes are individuals who experience significant linguistic impairments. These impairments can affect peer relations and literacy skills. The chapters in this volume provide comprehensive coverage of both the theoretical underpinnings and the practical aspects of autistic communication. The result is a volume that showcases the wide range of methodologies being used in this field of research. It is invaluable for scientists, service providers, parents, individuals with autism, and students learning about communication and autism (e.g., in psychology, speech pathology, and education).
