intellectual property rights, environmental protection, bankruptcy, accounting, tax, and more that is sophisticated but straightforward enough to be understood by non-experts. This book identifies and explains those general principles, and it does so in a lively narrative with helpful illustrations and references to further reading.

*General Principles of Law and International Due Process* Charles T. Kotuby, Jr., Luke A. Sobota, Center for International Legal Education (CILE) University of Pittsburgh School of Law. 2017-02-15 Article 38 of the Statute of the International Court of Justice defines international law to include not only custom and convention between States but also the general principles of law recognized by civilized nations within their municipal legal systems. In 1953, Bin Cheng wrote his seminal book on general principles, identifying core legal principles common to various domestic legal systems across the globe. This monograph summarizes and analyzes the general principles of law and norms of international due process, with a particular focus on developments since Cheng's writing. The aim is to collect and distill these principles and norms in a single volume as a practical resource for international law jurists, advocates, and scholars. The information contained in this book holds considerable importance given the growth of inter-state intercourse resulting in the increased use of general principles over the past 60 years. General principles can serve as rules of decision, whether in interpreting a treaty or contract, determining causation, or ascertaining unjust enrichment. They also include a core set of procedural requirements that should be followed in any adjudicative system, such as the right to impartiality and the prohibition on fraud. Although the general principles are, by definition, basic and even rudimentary, they

hold vital importance for the rule of law in international relations. They are meant not to define a rule of law, but rather the rule of law.

**Chinese Contract Law** Larry A. DiMatteo,Chen Lei.2017-10-26

This book is the product of a unique collaboration between Mainland Chinese scholars and scholars from the civil, common, and mixed jurisdiction legal traditions. It begins by placing the current Chinese contract law (CCL) in the context of an evolutionary process accelerated during China's transition to a market economy. It is structured around the core areas of contract law, anticipatory repudiation (common law) and defense of security (German law); and remedies and damages, with a focus on the availability of specific performance in Chinese law. The book also offers a useful comparison between the CCL and the UNIDROIT Principles of International Commercial Contracts, as well as the Convention on Contracts for the International Sale of Goods. The analysis in the book is undertaken at two levels - practical application of the CCL and scholarly commentary.

*General Principles of Commercial Law* Heinrich Schulze, Tukishi Manamela, Philip N. Stoop, Eddie Hurter, Ernest Manamela, Chrizell Stoop, Boaz Masuku. 2020

*Foundations of Commercial Law* Robert E. Scott, George Gregory Triantis. 2010 This reader examines the foundational principles of commercial law, including the choice between default rules and mandatory rules, between liability and property rules, between rules and standards, and between legislative and judge-made law. It explores these themes across a range of commercial law topics: sales law, payment systems, letters of credit and secured transactions. Commercial law is often viewed as a settled field with little controversy. Yet, the authors have written a series of notes that often guide their audience to challenge the orthodoxy. Thus, the Reader is excellent companion reading for a core course in commercial law or an advanced seminar in contract theory.

*Force Majeure and Hardship Under General Contract Principles* Christoph Brunner. 2009-01-01 Lawyers involved in international commercial transactions know well that unforeseen events affecting the performance of a party often arise. Not surprisingly, exemptions for non-performance are dealt with in a significant number of arbitral awards. This very useful book thoroughly analyzes contemporary approaches, particularly as manifested in case law, to the scope and content of the principles of exemption for non-performance which are commonly referred to as 'force majeure' and 'hardship.' The author shows that the 'general principles of law' approach addresses this concern most effectively. Generally accepted and understood by the business world at large, this approach encompasses principles of

international commercial contracts derived from a variety of legal systems. Its most important 'restatements' are found in the 1980 United Nations Convention on Contracts for the International Sale of Goods (CISG) and the UNIDROIT Principles of International Commercial Contracts (UPICC). Establishing specific standards and case groups for the exemptions under review, the analysis treats such recurring elements as the following: contractual risk allocations; unforeseeability of an impediment; impediments beyond the typical sphere of risk and control of the obligor; responsibility for third parties (subcontractors, suppliers); legal impediments (acts of public authority) and effect of mandatory rules; involvement of states or state enterprises; interpretation of force majeure and hardship clauses; hardship threshold test; frustration of purpose; irreconcilable differences; comparison with exemptions under domestic legal systems (impossibility of performance, frustration of contract, impracticability) The book is a major contribution to the development of the use of general principles of law in international commercial arbitration. It may be used as a comprehensive commentary on the force majeure and hardship provisions of the UPICC, as well as on Art. 79 of the CISG. In addition, as an insightful investigation into the fundamental question of the limits of the principle of sanctity of contracts, this book is sure to capture the attention of business lawyers and interested academics everywhere.

Petri Mäntysaari. 2009-11-11 1.1 Cash Flow, Risk, Agency, Information, Investments

The first volume dealt with the management of: cash flow (and the exchange of goods and services); risk; agency relationships; and information. The firm manages these aspects by legal tools and practices in the context of all commercial transactions. The second volume discussed investments. As voluntary contracts belong to the most important legal tools available to the firm, the second volume provided an introduction to the general legal aspects of generic investment contracts and payment obligations. This volume discusses funding transactions, exit, and a particular category of decisions raising existential questions (business acquisitions). Transactions which can be regarded as funding transactions from the perspective of a firm raising the funding can be regarded as investment transactions from the perspective of an investor that provides the funding.
