Good Luck Alex Rovira,Fernando Trías De Bes.2004-08-24

Good Luck is a whimsical fable that teaches a valuable lesson: good luck doesn't just come your way—it's up to you to create the conditions to bring yourself good luck. Written by Alex Rovira and Fernando Trias de Bes—two leading marketing consultants—this simple tale is universally applicable and uniquely inspirational. Good Luck tells the touching story of two old men, Max and Jim, who meet by chance in Central Park fifty years after they last saw each other as children. Max achieved great success in life; Jim sadly did not. The secret to Max's success lies in a story his grandfather told him long ago. This story within a story has a tone reminiscent of the classic *The Alchemist* and shows how to seize opportunity and achieve success in life. In a surprise ending, Good Luck comes full circle, offering the reader inspiration, instruction, and an engaging tale.

Kumba Africa Sampson Ejike Odum.2020-11-03 'KUMBA AFRICA', is a compilation of African Short Stories written as fiction by Sampson Ejike Odum, nostalgically taking our memory back several thousands of years ago in Africa, reminding us about our past heritage. It digs deep into the traditional life style of the Africans of old, their beliefs, their leadership, their courage, their culture, their wars, their defeat and their victories long before the emergence of the white man on the soil of Africa. As a talented writer of rich resource and superior creativity, armed with in-depth knowledge of different cultures and traditions in Africa, the Author throws light on the rich cultural heritage of the people of Africa when civilization was yet unknown to the people. The book reminds the readers that the Africans of old kept their pride and still enjoyed their own lives. They celebrated victories when wars were won, enjoyed their New yam festivals and villages engaged themselves in seasonal wrestling contest etc; Early morning during harmattan season, they gathered firewood and made fire inside their small huts to hit up their bodies from the chilling cold of the harmattan. That was the Africa of old we will always remember. In Africa today, the story have changed. The people now enjoy civilized cultures made possible by the influence of the white man through his scientific and technological process. Yet there are some uncivilized places in Africa whose people haven't tested or felt the impact of civilization. These people still maintain their ancient traditions and culture. In everything, we believe that days when people paraded barefooted in Africa to the swamp to tap palm wine and fetch firewood from there farms are almost fading away. The huts are now gradually been replaced with houses built of blocks and beautiful roofs. Thanks to modern civilization. Donkeys and camels are no longer used for carrying heavy loads for merchants. They are now been replaced by heavy

trucks and lorries. African traditional methods of healing are now been substituted by hospitals. In all these, I will always love and remember Africa, the home of my birth and must respect her cultures and traditions as an AFRICAN AUTHOR.

Design Ecologies Lisa Tilder,Beth Blotstein.2012-03-20

Contemporary architects are under increasing pressure to offer a sustainable future. But with all the focus on green building there has been little investigation into the meaningful connections between architectural design, ecological systems, and environmentalism. A new generation of architects, landscape architects, designers, and engineers aims to recalibrate what humans do in the world according to how the world works as a biophysical system. Design in this sense is a larger concept having to do as much with politics and ethics as with aesthetics and technology. This recasting of the green movement for the twenty-first century transforms design into a positive agent balancing societal values with environmental needs. *Design Ecologies* is a ground-breaking collection of never-before-published essays and case studies by today's most innovative designers and critics. Their design strategies—social, material, and biological—run the gamut from the intuitive to the highly technological. One essay likens window-unit air conditioners in New York City to weeds in order to spearhead the development of potential design solutions. Latz + Partner's Landscape Park integrates vegetation and industry in an urban park built amongst the monumental ruins of a former steelworks in Duisburg Nord, Germany. The engineering firm Arup presents its thirty-three-

square-mile masterplan for Dongtan Eco City, an energy-independent city that China hopes will house half a million people by 2050. An essay by designer Bruce Mau leads off a stellar list of emerging designers, including Jane Amidon, Blaine Brownell, David Gissen, Gross.Max, Robert Sumrell and Kazys Varnelis, Stephen Kieran and James Timberlake, R&Sie(n), Studio 804, and WORKac.

A Voice Through a Cloud Denton Welch.2004 Denton Welch, one of the most gifted creative artists of his generation, died in 1948 at the age of thirty-one, leaving this, perhaps his finest work, almost but not quite completed. Under the thin disguise of fiction Denton Welch recreates the world of hospitals and nursing homes in which he spent so many months after the accident which was eventually to prove fatal to him. The details of daily routine, the

fellow patients, the nurses and doctors, the comedies and tragedies which loom so large in the confined existence of the sick, all are described so vividly, with so much humour and pathos, with so accurate a listening ear, so watchful and penetrating an eye, that it is almost impossible to believe that the experience on which it is based was one of long exhausting pain to the author himself, and that book was conceived in pain and carried through with failing physical powers.

History of the Electric Automobile Ernest Henry

Wakefield.1993-08-01 *History of the Electric Automobile* covers the evolution from the first electric vehicles of the 1880s to the advances of today. Beginning with early electric vehicle development in England, France, and the United States, this book provides an in-depth look at the so-called golden age of electric vehicles (1895-1905), demonstrating the technological improvements and business risks of this era. This history also explores the dead period of the 1930s, 1940s and 1950s, and the subsequent re-birth of interest in electric vehicles in the early 1960s. Events which have impacted the development of electric cars since then -- most notably the Electric Vehicle Act of 1976 -- are also examined. The book also features an appendix section containing such information as a name table of American electric cars, the Electric Vehicle Act of 1976, nostalgia, and more. A glossary and index are also included. For more than a century, nearly all seers who have predicted the role of electric vehicles in personal transportation have been wrong. This book records what actually happened, both within America and internationally. - Ernest H. Wakefield
