Time is Cows: Timeless Wisdom of the Maasai Tanya Pergola Ph.D..2014-08-24 When American sociologist and wellness expert Tanya Pergola first visited Tanzania and Maasailand, she became startingly aware that she was in a place and with people who could teach her something profound. She sensed that lodged within the colorful and beautiful rituals and ceremonies of the indigenous Maasai people were gems of wisdom that could be

harvested and shared as antidotes for our increasingly complex, stressful, and often enigmatic modern lives. Dr. Pergola undertook a ten-year apprenticeship with Maasai traditional healers, led by her guide Lekoko Ole Sululu, in exchange for implementing sustainable development projects in Tanzania. In *Time is Cows* she shares the mind-body-spirit medicine of the Maasai, the proud pastoral people of East Africa. In a voice that is at once crystal clear and spiritually alive—one that thousands around the world have already come to know in her talks and classes on wellness, yoga, and nature healing—her insight, inspiration, and empathy are present on every page as she shares her own knowledge and the wisdom of the Maasai compassionately and wholly. Enriched with photographs, stories and suggested practice tips, *Time is Cows* is a handbook to help you simplify your life as you uncover its profound meaning.

Evidence-based Ayurveda C. P. Khare.2019-10-16 This groundbreaking work calls for the overhaul of traditional Ayurveda and its transformation into a progressive, evidence-based practice. This book begins by looking back at the research of the last three centuries, Indian medicinal plants, and Ayurveda in a twenty-first-century context. The first part of this book explores the limitations of contemporary Ayurvedic pharmacognosy and pharmacology, discussing the challenges the practice faces from research and clinical trials. It makes a compelling argument for the necessity of change. The second part of the book defines and elaborates upon a new, scientific path, taking the reader from identification of the herb through all stages of drug development. An essential tool for herbal drug development, this text is designed for knowledgeable students, practitioners, and scholars of Ayurveda, pharmacy, and herbal medicine.

Terra Nova. Global Revolution and the Healing of Love Dieter Duhm.2015-09-18 *Terra Nova* describes a vision for a new culture: an Earth free of war, a society free of violence, a love free of lies, and a life free of fear. The author outlines this new Earth not only in theory, but also writes from his direct experience of its emergence. This book presents the essence of nearly forty years of pioneering work in establishing functioning communities. How do we generate a new form of humaneness based on trust and mutual support? Where could the solution for the topics of sex, love, and partnership be found? How could the human community be integrated into the community of all beings and eventually into the order of the universe? Only if we succeed in answering these questions can global healing be possible. The book is a blueprint for the creation of a society based on trust: trust among people, trust between people and animals, and an original trust in life.

Cross Currents Robert O. Becker.1990-12-01 “A fascinating, thoughtful, and accessible account of the emerging field of electromedicine. A timely and eloquent warning on the hazards of electronic pollution.”—Jeremy Rifkin, author of *The Hydrogen Economy* At the same time that exciting insights about electromedicine’s powerful ability to use the body’s inherent healing abilities are emerging, electromagnetic fields radiating from power lines, radar, microwave ovens, VDTs, satellites, radios, and even electric blankets are putting our health at serious risk. Researchers are finding that this radiation correlates with increases in cancer, birth defects, depression, learning disabilities, chronic fatigue syndrome, Alzheimer’s, AIDS, and sudden infant death syndrome. In this groundbreaking book, Robert O Becker explains how new and nontraditional healing techniques such as acupuncture, homeopathy, visualization, hypnosis, and electrotherapy work through an invisible common source—the body’s electrical system. He also offers practical ways to protect ourselves in our homes and offices from the hazardous effects of electromagnetic pollution and teaches us how to engage the healing energies of electromagnetism. Dr. Becker’s powerful synthesis reshapes the future of medicine by putting life energy into our medical perspective and enabling us to see the body in its total living environment—the earth’s electromagnetic field.

Evolutionary Aesthetics Eckart Voland,Karl Grammer.2013-04-17 Evolutionary aesthetics is the attempt to understand the aesthetic judgement of human beings and their spontaneous distinction between beauty and ugliness as a biologically adapted ability to make important decisions in life. The

hypothesis is - both in the area of natural beauty and in sexuality, with regard to landscape preferences, but also in the area of artificial beauty (i.e. in art and design) - that beauty opens up fitness opportunities, while ugliness holds fitness risks. In this book, this adaptive view of aesthetics is developed theoretically, presented on the basis of numerous examples, and its consequences for evolutionary anthropology are illuminated.

Ritual Abuse and Mind Control Orit Badouk Epstein. 2018-03-22 People who have survived ritual abuse or mind control experiments have often been silenced, accused of lying, mocked and disbelieved. Clinicians working with survivors often find themselves isolated, facing the same levels of disbelief and denial from other professionals within the mental health field. This report - based on proceedings from a conference on the subject - presents knowledge and experience from both clinicians and survivors to promote understanding and recovery from organized and ritual abuse, mind control and programming. The book combines clinical presentations, survivors' voices, and research material to help address the ways in which we can work clinically with mind control and cult programming from the perspective of relational psychotherapy.

[Bio-Resonance According to Paul Schmidt](#) Dietmar Heimes. 2004

Forgetting Whose We are David Keck. 1996 Alzheimer's disease - a degenerative disease of the central nervous system characterized especially by premature mental deterioration - is the most publicly visible and widely discussed form of a range of disorders known as senile dementia. The nature of Alzheimer's disease, especially its progressive debilitation of the memory, raises key theological issues. What does it mean to be truly human? Does our ability to remember define who we are as persons? When the mind loses its ability to remember, what happens to the life of the soul? When

we forget God, does God still remember us? Forgetting Whose We Are offers a Christian understanding of and response to the difficult theological, spiritual, and pastoral problems raised by Alzheimer's disease. Filling an important gap in existing literature by directly confronting the theological challenges of Alzheimer's disease to victims, caregivers, and their communities, the book affirms the classic Christian doctrines that witness to the reality of grace and the promises of salvation even for those who can no longer remember themselves, their families, or their relationship with God.

Nature Cures James C. Whorton.2004 From reflexology and rolfing to shiatsu and dream work, we are confronted today by a welter of alternative medical therapies. But as James Whorton shows in Nature Cures, the recent explosion in alternative medicine actually reflects two centuries of competition and conflict between mainstream medicine and numerous unorthodox systems. This is the first comprehensive history of alternative medicine in America, examining the major systems that have emerged from 1800 to the present. Writing with wit and with fairness to all sides, Whorton offers a fascinating look at alternative health systems such as homeopathy, water cures, Mesmerism, Christian Science, osteopathy, chiropractic, naturopathy, and acupuncture. He highlights the birth and growth of each system (including European roots where appropriate) and vividly describes both the theories and the therapies developed within each system, including such dubious practices as hour-long walks barefoot in snow or Samuel Thompson's puking and steaming regimen. In particular, Whorton illuminates the philosophy of natural healing that has been espoused by alternative practitioners throughout history and the distinctive interpretations of nature cure developed by the different systems. Though he doesn't hesitate to point out the failings of these systems, he also shows that some cult medicines have eventually won recognition from practitioners of mainstream medicine. Throughout, Whorton writes with a light touch and quotes from contemporary humorists such as Mark Twain. His book is an engaging and authoritative history that highlights the course of alternative medicine in the U.S., providing valuable background to the wide range of therapies available today.

Beyond Pleasure Evert Peeters, Leen Van Molle, Kaat Wils.2011-04-30 Asceticism, so it is argued in this volume, is a modern category. The ubiquitous cult of the body, of fitness and diet equally evokes the ongoing success of ascetic practices and beliefs. Nostalgic memories of hardship and discipline in the army, youth movements or boarding schools remain as present as the fashionable irritation with the presumed modern-day laziness. In the very texture of contemporary culture, age-old asceticism proves to be remarkably alive. Old ascetic forms were remoulded to serve modern desires for personal authenticity, an authenticity that disconnected asceticism in the course of the nineteenth century from two traditions that had underpinned

it since classical antiquity: the public, republican austerity of antiquity and the private, religious asceticism of Christianity. Exploring various aspects such as the history of the body, of aesthetics, science, and social thought in several European countries (Great Britain, France, Germany, Austria and Belgium), the authors show that modern asceticism remains a deeply ambivalent category. Apart from self-realisation, classical and religious examples continue to haunt the ascetic mind.

The Nature of Things Anthony M. Quinton.2019-03-07 Originally published in 1973. In this systematic treatise, Anthony Quinton examines the concept of substance, a philosophical refinement of the everyday notion of a thing. Four distinct, but not unconnected, problems about substance are identified: what accounts for the individuality of a thing; what confers identity on a thing; what is the relation between a thing and its appearances; and what kind of thing is fundamental, in the sense that its existence is logically independent of that of any other kind of thing? In Part 1, the first two problems are discussed, while in Part 2, the third and fourth are considered. Part 3 examines four kinds of thing that have been commonly held to be in some way non-material: abstract entities; the un-observable entities of scientific theory; minds and their states; and, finally, values. The author argues that theoretical entities and mental states are, in fact, material. He gives a linguistic account of universals and necessary truths and advances a naturalistic theory of value.

Sit Down and Shut Up Brad Warner.2010-10-05 In 2003, Brad Warner blew the top off the Buddhist book world with his irreverent autobiography/manifesto, *Hardcore Zen: Punk Rock, Monster Movies, and the Truth about Reality*. Now in his second book, *Sit Down and Shut Up*,

Brad tackles one of the great works of Zen literature, the *Shobogenzo*, by thirteenth-century Zen master Dogen. Illuminating Dogen's enigmatic teachings in plain language, Brad intertwines musings on sex, meditation, death, God, sin, and happiness with an exploration of the punk rock ethos. In chapters such as "Evil Is Stupid," "Kill Your Anger," and "Enlightenment Is for Sissies," Brad melds the antiauthoritarianism of punk with that of Zen, mixing in a travelogue of his triumphant return to Ohio to play in a reunion concert of Akron punk bands. For those drawn to Buddhist teachings but scared off by their stiff austerity, Brad writes with a sharp smack of truth, in teachings and stories that cut to the heart of reality.

Eating Nature in Modern Germany Corinna Treitel. 2017-04-27 Adolf Hitler was a vegetarian and the Dachau concentration camp had an organic herb garden. Vegetarianism, organic farming, and other such practices have enticed a wide variety of Germans, from socialists, liberals, and radical anti-Semites in the nineteenth century to fascists, communists, and Greens in the twentieth century. Corinna Treitel offers a fascinating new account of how Germans became world leaders in developing more 'natural' ways to eat and farm. Used to conserve nutritional resources with extreme efficiency at times of hunger and to optimize the nation's health at times of nutritional abundance, natural foods and farming belong to the biopolitics of German modernity. *Eating Nature in Modern Germany* brings together histories of science, medicine, agriculture, the environment, and popular culture to offer the most thorough and historically comprehensive treatment yet of this remarkable story.
