Internationalizing the Teaching of Psychology Uwe Gielen, Grant J. Rich, Harold Takooshian. 2017-08-01 How can psychology professors in the USA and other nations make their courses more international? This question is addressed in this indispensable new sourcebook, co-authored by 73 contributors and editors from 21 countries. In recent decades psychology has evolved from an American-dominated discipline to a much more global discipline. Preliminary estimates by Zoma and Gielen (2015) suggest that approximately 76%-78% of the world's one million or so psychologists reside outside the U.S. However, most textbooks in the field continue to rely predominantly on research conducted in North America and Europe. Our book is intended to introduce psychology instructors to a variety of broad perspectives as well as specific suggestions that can support their efforts to internationalize their course offerings at both the undergraduate and graduate levels. In this way they can prepare their students to become more culturally sensitive and function more effectively as citizens and psychologists in the evolving globalized world. To achieve these ambitious goals the editors have assembled an international group of 73 distinguished contributors who, taken together, have taught and conducted research in all regions of the world. The chapters in the book include both core areas of psychology and subdisciplines that represent rapidly expanding and internationally important areas such as cross-cultural psychology and the psychology of gender. The chapters cover key topics and areas included in the course offerings of psychology departments both in the United States and in other countries. In addition to a discussion of international perspectives relevant to a given area, all chapters include an annotated bibliography of pertinent books, articles, web-related materials, films, videos, and so on. Based on this information, both highly experienced and less experienced psychology instructors can add globally and culturally oriented dimensions to their respective courses. This is important because universities, departments, and accrediting agencies increasingly put pressure on instructors to broaden and internationalize their courses. As a long-time international psychologist myself, I see this bold new volume as a great leap forward for international psychology. The 73 distinguished contributors and editors from 21 countries have carefully crafted a handbook that will be the go-to resource on the topic for years to come. For psychology to continue to be relevant in the 21st century it must become more international; I am grateful this book will help us accomplish this challenging but rewarding goal. ~ Philip G. Zimbardo, Ph.D Past-President American Psychological Association What could be more important than understanding human behavior and the thoughts and emotions that underlie it? By teaching psychology to the world, we offer the possibility of using our discipline to create a better future for all of us. The chapters in this excellent book help teachers of psychology move from an ethnocentric perspective to a global way of thinking about and telling about a truly international psychology. ~ Diane F. Halpern, Ph.D Past-President of the American Psychological Association and Professor of Psychology This is a brilliant, unprecedented collection of international scholarship that every psychology professor and student should read. The 21st century in the teaching of psychology has truly arrived with this book, creating a thoroughly needed international focus for our pedagogy. ~ Frank Farley, Ph.D, L. H. Carnell Professor, Temple University; Former President, American Psychological Association (APA), International Council of Psychologists, American Educational Research Association (AERA), and the Society for International Psychology (Division 52 of APA) Internationalizing Teaching of Psychology contains chapters authored by eminent psychologists of diverse cultural background, inclusive of different cultural perspectives on range of topics of contemporary importance. Thus, the volume integrates research emanating from varied cultural contexts facilitating development of a truly universal psychological science. The volume is a major resource for teaching courses on Cultural/Cross-cultural /Global psychology and in enhancing internationalization of psychology. ~ Prof. Janak Pandey, University of Allahabad, India, Editor, Psychology in India: The State-of-the-Art All involved in the training of psychologists will want to recommend this book, which thoroughly presents an international perspective on the teaching of psychology. Rich, Gielen and Takooshian consider the basic nature of psychology, at the same time emphasizing cultural differences and relating it all to real life. As expert, cross-cultural researchers, the contributors provide a much needed resource and up-to-date reference for psychologists and students, as well as for any scholar interested in our discipline around the globe. ~ Laura Hernández-Guzmán, Ph. D. Professor of Psychology, Universidad Nacional Autónoma de México, Past-President of the Mexican Psychological Society Since the mid-twentieth century the world has become an increasingly smaller place, at least in the figurative sense. And yet, Western psychology has been slow to grasp the culturally limited scope of much of our science. Although the movement toward a more culturally inclusive psychology had its roots at least as early as the 1960s, more recent meta-analyses have shown that a large percentage of the psychological literature has represented a small percentage of the world's population. In Internationalizing the Teaching of Psychology, Grant Rich, Uwe Gielen, and Harold Takooshian are making a noteworthy effort to inform and support teachers who would move the field toward a psychology of all people. From advice about getting involved in international psychology, to stand-alone international psychology courses, to the problems of culture-bound specialized courses, these well-traveled and experienced editors have assembled a resource that psychology teachers will find both interesting and valuable. ~ Kenneth D. Keith, President, Society for the Teaching of Psychology, University of San Diego This volume is a positive contribution to the internationalization of the psychology curriculum. Given the very large numbers of psychology undergraduate and graduate students across the world, such internationalization has significant potential to provide learners with opportunities to better understand the similarities and differences in the behavior of humans in different local, national and international contexts. Such understanding can lead to a greater appreciation of, and perhaps respect for and celebration of, these similarities and differences, thus potentially leading to actions that reduce global human suffering. This volume should become an indispensable tool for psychology educators interested in such outcomes. ~ Jacquelyn Cranney, Psychology, UNSW Sydney, Australia This book is a necessity, given the increasing mobility of psychologists, use of technology in psychology practice, and need to regulate the psychology profession globally. The content in this book will go a long way to improve psychological literacy in our East and Central Africa region. I chaired the first ever East and Central African Regional Psychology Conference in Uganda in 2013 and am on the Board of Directors of the International Association of Applied

Psychologists (IAAP), so am keenly aware that the internationalization of scientific psychology knowledge and skills is an imperative. ~ James Kagaari, Ph.D, President, Uganda Council of Psychologists Teaching psychology in your own country—especially when it is a country as vast and diverse as the United States, where fewer than half its citizens hold a passport—makes it all too easy to give courses in which students come away with the impression that what psychological scientists have learned about behavior and mental processes at home applies equally in the rest of the world. That is not always the case, of course, and the chapters in this valuable volume serve not only to remind us of that fact, but to stimulate us to consider adjusting the content of our courses to make them, as they should be, more international in scope. ~ Douglas Bernstein, Courtesy Professor of Psychology, University of South Florida USA Bravo to this all-star cast of international contributors for showing us how to help students appreciate both our cultural diversity and our human kinship—and for providing us with accessible articles, books, media, and online materials for teaching every area of psychology from a more international perspective. ~ David G. Myers, Hope College, co-author, Psychology 12th Edition and Social Psychology, 12th Edition Imagine that you convened an invitation-only panel of 73 experts from around the world and asked that they guide the profession in internationalizing the teaching of psychology. This book would be the impressive result! Here's the definitive, how-to guide on adding global and cross-cultural perspectives to courses throughout the psychology curricula. ~ John C. Norcross, Ph.D, ABPP, Distinguished Professor of Psychology at University of Scranton, Adjunct Professor of Psychiatry at SUNY Upstate Medical University In today's increasingly interconnected world, the ever-emerging importance and impact of integrating psychology into education is powerfully presented in this book. The editors - themselves outstanding experts in the field - have assembled an exceptionally impressive collection of 28 chapters by 73 expert contributors covering varied aspects of teaching psychology from an international and multicultural perspective. Educators, students, psychologists, as well as stakeholders in related disciplines will find the theories and practical guides as essential and useful resources. ~ Judy Kuriansky, PhD, United Nations NGO representative, the International Association of Applied Psychology; Department of Psychology, Columbia University Teachers College

The Power of Numbers and Networks Julia Resnik.2019-07-23 This book is an important contribution to the understanding of the complex education policies of the twenty-first century. It unites world renowned comparatists of education in an effort to respond to the challenges raised by the multidimensional and multi-scalar aspects of education policies. In their attempt to decipher the tangled world of education policies, the authors underline the power of numbers, the power of networks and the power of new concepts and methodologies. The power of numbers - education through numbers via students' assessments and national or international testing impacts upon our educational choices and reinforces its instrumental aspects. The power of networks - sheds light on the complexity of the education global governance network by focusing on how international governmental organisations (IGOs), such as UNESCO, the OECD and the World Bank carry out policy and on the intricate ways an educational concern becomes part of the international agenda. The power of concepts and methods - policymaking is increasingly dynamic and involves many different stakeholders, including states, private corporations, IGOs, scholars and non-profit organisations. Contributors to this volume have developed new conceptual and methodological perspectives to study the circulation of educational models worldwide. A relational notion of space, the concept of 'diaspora' as a space of relations of social actors or the global comparative approach and a methodology drawn on actors-network theory are among the propositions yielded by the authors in order to make sense of and grasp the complexity of education policies today. This book was originally published as a special issue of Globalisation, Societies and Education.

The Oxford Handbook of Assessment Policy and Practice in Music Education Timothy S. Brophy.2019-01-02 In the music classroom, instructors who hope to receive aid are required to provide data on their classroom programs. Due to the lack of reliable, valid large-scale assessments of student achievement in music, however, music educators in schools that accept funds face a considerable challenge in finding a way to measure student learning in their classrooms. From Australia to Taiwan to the Netherlands, music teachers experience similar struggles in the quest for a definitive assessment resource that can be used by both music educators and researchers. In this two-volume Handbook, contributors from across the globe come together to provide an authority on the assessment, measurement, and evaluation of student learning in music. The Handbook's first volume emphasizes international and theoretical perspectives on music education assessment in the major world regions. This volume also looks at technical aspects of measurement in music, and outlines situations where theoretical foundations can be applied to the development of tests in music. The Handbook's second volume offers a series of practical and US-focused approaches to music education assessment. Chapters address assessment in different types of US classrooms; how to assess specific skills or requirements; and how assessment can be used in tertiary and music teacher education classrooms. Together, both volumes of The Oxford Handbook of Assessment in Music Education pave the way forward for music educators and researchers in the field.

How Global Capital is Remaking International Education Hyejin Kim.2019-08-14 This book offers a first look at transnational education corporations, new firms that operate international schools. The quiet rise of transnational education corporations - or TECs - has implications for education systems around the globe, as corporate interests gain a greater stake in the way schools operate. The story of their ascendance links government policies in one corner of the world with profound effects in others. In the past decade, TECs have burst onto the international schooling scene. Private firms, publicly listed firms, and private equity groups have transformed international education into an industry valued at over USD 30 billion. Nowhere has the impact been stronger and more sudden than in Asia. The top three international education firms with a presence in Asia run more than 20 schools in East and Southeast Asia with another six in India. Each educates tens of thousands of students around the globe and has an annual revenue of over USD 300 million. TECs offer a window onto the creation of new markets and the complex positions of governments in regulating social affairs. This book helps readers to understand who these firms are, what they do and how they have grown.

Recruiting, Retaining, and Engaging African-American Males at Selective Public Research Universities Louis A. Castenel, Tarek C. Grantham, Billy J. Hawkins. 2018-06-01 A problematic, yet uncommon, assumption among many higher education researchers is that recruitment, retention, and engagement of African-American males is relatively similar and stable across all majority White colleges and universities. In fact, the harsh reality is that selective public research universities (SPRUs) have distinctive academic cultures that increase the difficulty of diversifying their faculty and student populations. This book will discuss how traditions and elitist assumptions make it very difficult to recruit, retain, and engage African-American males. The authors will examine these issues from multiple perspectives in three sections that highlight research, policies and practices impacting the experiences of African American males, including Pre-Collegiate Preparation, African American Male Student Athletes, and Undergraduate and Graduate Considerations for African American Male Initiatives.

Internationalization and Global Citizenship Miri Yemini. 2016-12-31 This book examines the integration of the international, global, and intercultural dimensions in contemporary education systems. Yemini provides a comprehensive understanding of the process of internationalization from different angles including policy-making, curriculum implementation, media discourse, and individual agency. The book illuminates and analyzes a set of key tensions of internationalization across multiple levels of schooling and across the domains of popular discourse, policy, curriculum, pedagogy, and students' identity, by connecting or re-connecting the process of internationalization and its outcomes at individual level of global citizenship. The author uses solid empirical embedding of each of those aspects together with development of novel theoretical insights in each of the investigated domains.

Credential Market Quentin Maire. 2021-09-22 This book makes an original contribution to credential sociology by analysing how high school certificates become and remain valuable in a context of mass high school participation (i.e. credentialism). Building on a detailed analysis of the International Baccalaureate (IB) Diploma, a senior secondary school certificate offered in over 150 countries, Quentin Maire argues that the advent of new private credentials can be understood as a phenomenon of credential stratification in a context of intensified academic competition. Using original data on high school credentials in Australia and internationally, the author makes a strong case for certificates to be studied relationally, by locating them in the credentialing structures in which they are inserted. He systematically applies the comparative method to explain the role of the curriculum, family resources, school segregation and higher education selection in creating a credential hierarchy. His robust combination of theoretical construction and detailed empirical work allows him to offer new insights into social inequality in education systems, credential theory and the IB Diploma.

Teaching and Learning Shakespeare through Theatre-based Practice Tracy Irish, Jennifer Kitchen. 2023-12-28 How can the study of Shakespeare contribute to equipping young people for the challenges of an uncertain future? This book argues for the necessity of a Shakespeare education that: finds meaning in the texts through inviting in the prior knowledge, experiences and ideas of students; combines intellectual, social and emotional learning; and develops a critical perspective on what a cultural inheritance is all about. It offers a comprehensive exploration of the educational principles underpinning theatre-based practice and explains how and why this practice can open up the possibilities of Shakespeare study in the classroom. It empowers Shakespeare educators working with young people aged 5-18 to interact critically, creatively and collaboratively with Shakespeare as a living artist. Drawing on the authors' research and experience with organizations including the Royal Shakespeare Company, Shakespeare's Globe, the Folger and Coram Shakespeare Schools Foundation, Part One consolidates recent developments in the field and engages in lively dialogue with core questions of Shakespeare's place in the classroom. Part Two curates a series of interviews with leaders and practitioners from the above and other Shakespeare institutions, exploring their core principles and practices. Part Three presents chapters from and about classroom teachers, who share their experiences of successfully embedding theatre-based approaches to Shakespeare in their own diverse contexts.

Teaching the World's Teachers Lauren Lefty, James W. Fraser.2020-07-07 Examining teacher education in an international context, this book captures the diversity of the world's educators. Many countries confront surprisingly similar challenges in preparing K-12 educators for success, while national contexts also make for surprising differences. In Teaching the World's Teachers, education historians Lauren Lefty and James W. Fraser and their contributors make a convincing case for approaching these shared challenges from a more global and historically minded perspective. Written by education scholars from eleven different countries—Argentina, Brazil, Catalonia-Spain, China, England, Finland, Ghana, Israel, Singapore, South Africa, and the United States—this book provides histories of teacher education reforms between roughly 1980 and 2020. The authors show how international trends that emerged during this period collided with national and regional contexts to produce unique teacher education systems in different nations. While in some countries the embrace of markets and competition led to a deregulation of the teacher preparation field, in others teaching became a highly regulated and centralized affair. At the same time, ideas and structural models cross borders and education leaders borrow from each other while reshaping plans in each place. Opening with a broad historical overview of global teacher education models beginning in the late eighteenth century, Teaching the World's Teachers argues that the field has long been characterized by cross-border connections—but shaped by geopolitical hierarchies of power. In an era when teacher quality is widely recognized as one of the most important factors in a child's education, this volume encourages dialogue among teacher educators and policymakers around the world. By understanding the context and contingency of where we have been, the authors hope that readers will walk away with a more empowered sense of where we are headed in the all-important task of teaching the world's teachers. In this remarkable first book, Brianna tells students who they can maximize the return on their educational effort by cultivating three habits of mind: focus, resourcefulness and 'stacking' - approaching a task with an eye to what else it might be used for in addition to the stated purpose. These strategies directly respond to the challenges of 21st Century education, but are also crucial to future career success. A mixture of anecdotes, references to pedagogical and cognitive research, and practical strategies are perfectly woven together to convey these ideas.

The Fractured College Prep Pipeline Heather E. Price. 2021 This book walks readers through the stages of the high school college prep pipeline that introduces interlocked structural barriers to students. The author shows how these barriers reinforce segregated structures that unfairly distribute the public good of education to some students and not others. Price argues that the college prep pipeline of Advanced Placement and International Baccalaureate coursework in American high schools constitutes a new form of tracking in the 21st century. Even further, this new tracking introduces a facade of "college readiness" that veils the unequal learning opportunities that send some students out into the college world with pockets full of counterfeit credentials that serve only to reinforce the historically oppressive system. Whether intentional or not, this new form of tracking is embedded in schools across the United States and have lifetime consequences for individual students that reinforce historically racial, ethnic, and spatial inequalities. "This book is a rigorous and engaging portrait of the architecture of opportunity in American schools. With a fine-grained analysis that never loses sight of the big picture, Heather Price reveals structural realities of college readiness in the United States that are ripe for change." —Sean Kelly, University of Pittsburgh
