**A Brief History of Qi** Yu Huan Zhang, Ken Rose. 2001 A Brief History of Qi takes the reader through the mysterious terrain of Chinese Medicine, Chinese language, Chinese martial arts and Qi Gong - a truly evocative guide to virtually all the traditional Chinese arts and sciences. This book is devoted to a topic represented by a single Chinese character, Qi. When presented with the concept of Qi, students of Chinese culture, Chinese medicine, Chinese martial arts and a wide range of Chinese traditional arts and sciences face one of the most perplexing challenges of their tenure. The book begins with an examination of Qi's linguistic and literary roots, stretching back through the shadowy mists of Chinese pre-civilisation. The authors then trace the development of the concept of Qi through a number of related traditional Chinese disciplines including painting, poetry, medicine and martial arts. The book concludes with an examination of the depth and breadth of Qi as manifested in life's cycles.

The World of Thought in Ancient China Benjamin Isadore Schwartz. 2009-06-30 The center of this prodigious work of scholarship is a fresh examination of the range of Chinese culture thought during the formative period of Chinese culture. Benjamin Schwartz looks at the surviving texts of this period with a particular focus on the range of diversity to be found in them. While emphasizing the problematic and complex nature of this thought he also considers views which stress the unity of Chinese culture. Attention is accorded to pre-Confucian texts, to the evolution of early Confucianism, to Mo-Tzu, to the Taoists the legalists, the Ying-Yang school, the five classics as well as to intellectual issues which cut across the conventional classification of schools. The main focus is on the high cultural texts, but Mr. Schwartz also explores the question of the relationship of these texts to the vast realm of popular culture.

*Risk Governance* Ortwin Renn. 2017-12-04 Risk Governance is a tour de force. Every risk manager, every risk analyst, every risk researcher must read this book - it is the demarcation point for all further advances in risk policy and risk research. Renn provides authoritative guidance on how to manage risks based on a definitive synthesis of the research literature. The skill with which he builds practical recommendations from solid science is unprecedented. Thomas Dietz, Director, Environmental Science and Policy Program, Michigan State University, USA A masterpiece of new knowledge and wisdom with illustrative examples of tested applications to realworld cases. The book is recommendable also to interested students in different disciplines as a timely textbook on 'risk beyond risk'. Norio Okada, Full Professor and Director at the Disaster Prevention Research Institute (DPRI), Kyoto University, Japan There are classic environmental works such as The Tragedy of the Commons by Hardin, Risk Society by Beck, The Theory of Communicative Action by Habermas, and the seminal volumes by Ostrom on governing the commons. Renns book fits right into this series of important milestones of environmental studies. Jochen Jaeger, Professor at Concordia University, Montreal, Canada Risk Governance provides a valuable survey of the whole field of risk and demonstrates how scientific, economic, political and civil society actors can participate in inclusive risk governance. Jobst Conrad, Senior Scientist, Social Science Research Center Berlin, Germany Renn offers a remarkably fair-minded and systematic approach to bringing together the diverse fields that have something to say about 'risk'. Risk Governance moves us along the path from the noisy, formative stage of thinking about risk to one with a stronger empirical, theoretical, and analytical foundation. Baruch Fischhoff, PhD, Howard Heinz University Professor, Carnegie Mellon University, Pittsburgh, USA 'I cannot describe how impressed I am at the breadth and coherence of Renn's career's work! Written with remarkable clarity and minimal technical jargon... [this] should be required reading in risk courses!' John Graham, former director of the Harvard Risk Center and former deputy director of the Office of Budget and Management of the United States Administration This book, for the first time, brings together and updates the groundbreaking work of renowned risk theorist and researcher Ortwin Renn, integrating the major disciplinary concepts of risk in the social, engineering and natural sciences. The book opens with the context of risk handling before flowing through the core topics of assessment, evaluation, perception, management and communication, culminating in a look at the transition from risk management to risk governance and a glimpse at a new understanding of risk in (post)modern societies.

**Chinese Script** Thomas O. Höllmann. 2017-11-14 In this brisk and accessible history, sinologist Thomas O. Höllmann explains the development of the Chinese writing system and its importance in literature, religion, art, and other aspects of culture. Spanning the earliest epigraphs and oracle bones to writing and texting on computers and mobile phones today, Chinese Script is a wide-ranging and versatile introduction to the complexity and beauty of written text and calligraphy in the Chinese world. Höllmann delves into the origins of Chinese script and its social and political meanings across millennia of history. He recounts the social history of the writing system; written and printed texts; and the use of writing materials such as paper, silk, ink, brush, and printing techniques. The book sheds light on the changing role of literacy and education; the politics of orthographic reform; and the relationship of Chinese writing to non-Han Chinese languages and cultures. Höllmann explains the inherent complexity of Chinese script, demonstrating why written Chinese expresses meaning differently than oral language and the subtleties of the relationship between spoken word and written text. He explores calligraphy as an art, the early letter press, and other ways of visually representing Chinese languages. Chinese Script also provides handy illustrations of the concepts discussed, showing how ideographs function and ways to decipher them visually.

Reconstructing Illness Anne Hunsaker Hawkins. 1999 Serious illness and mortality, those most universal, unavoidable, and frightening of human experiences, are the focus of this pioneering study which has been hailed

as a telling and provocative commentary on our times. As modern medicine has become more scientific and dispassionate, a new literary genre has emerged: pathography, the personal narrative concerning illness, treatment, and sometimes death. Hawkins's sensitive reading of numerous pathographies highlights the assumptions, attitudes, and myths that people bring to the medical encounter. One factor emerges again and again in these case studies: the tendency in contemporary medical practice to focus primarily not on the needs of the individual who is sick but on the condition that we call disease. Pathography allows the individual person a voice—one that asserts the importance of the experiential side of illness, and thus restores the feeling, thinking, experiencing human being to the center of the medical enterprise. Recommended for medical practitioners, the clergy, caregivers, students of popular culture, and the general reader, *Reconstructing Illness* demonstrates that only when we hear both the doctor's and the patient's voice will we have a medicine that is truly human.

Ancient Natural History Roger French. 2005-08-08 Ancient Natural History surveys the ways in which people in the ancient world thought about nature. The writings of Aristotle, Theophrastus, Strabo, Pliny are examined, as well as the popular beliefs of their contemporaries. Roger French finds that the same natural-historical material was used to serve the purposes of both the Greek philosopher and the Christian allegorist, or of a taxonomist like Theophrastus and a collector of curiosities like Pliny. He argues convincingly that the motives of ancient writers on nature were rarely 'scientific' and, indeed, that there was not really any science at all in the ancient world. This book will make fascinating reading for students, academics and anyone who is interested in the history of science, or in the ancient history of ideas.

*Wood - The Internal Optimization of Trees* Claus Mattheck, Hans Kubler. 2012-12-06 Here are two physicists looking over the fence of physics, getting thrilled by the life and growth of trees, taking an altogether different, exciting view of wood: trees produce wood for their own benefit. They do not live for the benefit of man who builds his world using wood as a raw material. Timber is revealed in a different light, and the reader is taught to stop thinking of it in terms of defective beams and boards. Wood only fails as a part of the living tree. To us, the tree and wood biologists, this new definition is a real, inspiring challenge, which is just what Kubler and Mattheck intended it to be. Their answers may seem too simple or little logical to some of us; but the authors are not at a loss for sound and solid arguments. Their field studies prove the incredible, their hypotheses makes us want to get to the bottom of the unproven unbelievable. The authors' answers and arguments are bold and courageous. They arouse our curiosity and force us to fathom the facts. It seems as if Kubler and Mattheck wanted to trick us into believing that trees only live and react following mechanical rules and strategies. To tell the truth, that was what I first suspected the authors of: but I was wrong.

*Chinese Medicine in Fertility Disorders* Andreas A. Noll, Sabine Wilms. 2011-01-01 Written by experts in Chinese medicine, this textbook provides a comprehensive overview of Chinese medicine therapies for fertility disorders. It opens by reviewing the basics of current Western reproductive medicine in terms of diagnosis, treatment options, and possible risks. The book then introduces the reader to traditional Chinese fertility treatments, providing information about how they complement Western reproductive medicine. The authors describe in detail the different treatment methods, ranging from qi gong and tui na to moxibustion and acupuncture to Chinese dietetics and medicinal therapy. The main section of the book provides in-depth discussion of specific fertility disorders and their management, including menstrual disorders, early menopause, sexual disorders, male infertility, endometriosis, and polycystic ovary syndrome. It closes with a section on patient support, addressing issues such as the mind-body relationship and the impact of stress. Key features: Case studies with real-life examples of specific treatment approaches Information on both Chinese and Western therapies Perspectives from numerous Chinese medicine specialists Extensive quotations from classical texts in translation Historical, cultural, and social perspectives on the issue of fertility in Chinese culture, modern and ancient Chinese Medicine in Fertility Disorders is an invaluable resource for practitioners in complementary medicine, including acupuncturists and Chinese herbalists who wish to include fertility treatment in their practice, and a useful reference for all physicians who seek to expand their perspective on managing fertility issues.

The Book of Questions Edmond Jabès. 1984 The Book of Questions, of which volumes IV, V, VI are together published here, is a meditative narrative of Jewish Experience, and, more generally, man's relation to the world. In these volumes the word is personified in the woman Yael, silence in her still-born child Elya. Even though words imply ambiguity and lies, they are the home of the exile. A book becomes the Book, fragments of the law that are in some way unified, where past and present, the visionary, and the common place, encounter each other. For Jabès every word is a question in the book of being. Man defines himself in the world against all that threatens his existence— death, the infinite, silence, that is, God, his primal opponent. How can one speak what cannot be spoken?

**Balinese Worlds** Fredrik Barth. 1993-04 In *Balinese Worlds*, Fredrik Barth proposes a new model for anthropological analysis of complex civilizations that is based on a fresh, synthetic account of culture and society in North Bali and one that takes full notice of individual creativity in shaping the contours of this dynamic culture. In this detailed ethnography of the Northern district of Buleleng, Barth rejects mainstream anthropological generalizations of Bali as a cultural system of carefully articulated parts. Instead—drawing on many sources, including the sociology of knowledge, interactional analysis, postmodern thought, and his own exceptionally varied field experience—Barth presents a new model that actually generates variation. Barth's innovative analysis of Balinese life highlights both the constructive and the disorganizing effects of individual action, the constant flux of interpretation, and the powerful interaction of memory and social relationships, and knowledge as a cultural resource. *Balinese Worlds* is a unique contribution not only to Balinese studies but also to the theory and methods of the anthropology of complex societies.

Chinese Indonesians Tim Lindsey, Helen Pausacker. 2005 This volume honours, and reflects on, the life and work of the Australian Indonesianist, Charles A. Coppel. His interests -- reflected in this volume -- are broad,

ranging from history, politics, legal issues, and violence against the Chinese, through to culture and religion. The chapters in the volume, contributed by scholars from Australia, Indonesia, Europe, and Singapore, also all reflect a theme, inspired by Charles Coppels expression, remembering, distorting, forgetting, by which he drew attention to misrepresentations of the Chinese, seeking to locate the realities behind the myths that form the basis for the racism and xenophobia the Chinese have often experienced in Indonesia.

**Cretan Sanctuaries and Cults** Mieke Prent.2005-06-01 This volume offers a contextual study of sanctuaries and cults in Crete in the transitional period from the end of the Late Bronze Age into the Archaic period (c.1200 to 600 BC). It provides a dynamic picture of the interplay of religious tradition and societal change in a period long considered a 'Dark Age' by Classical scholarship.

Its 630 questions cover all aspects of the theory and practice of Chinese herbal medicine including materia medica; medicinal combinations; processing of medicinals; formulas and prescriptions; additions and subtractions; case history analysis. This book is extremely useful for preparing for various school, state, or national Chinese herbal exams. However, no matter what your degree of expertise, answering the questions in this book can help you reach a higher level of Chinese herbal practice. -- Provided by publisher.

**Status Passage** Anselm L. Strauss.2017-07-05 The French writer Arnold van Gennep first called attention to the phenomena of status passages in his Rites of Passage one hundred years ago. In Status Passage, first published in 1971, the movement of individuals and groups in contemporary society from one status to another is examined in the light of Gennep's original theory. Glaser and Strauss demonstrate that society emerges as a comparative order. In this order, every organized action, collective or individual, can be seen as a form of status passage.From one status to another-from childhood to adolescence to adulthood, from being single to being married, movement from one income group, social class or religion to another-there are passages that entail movement into different parts of a social structure and loss or gain in privileges. Types of status passage are described by their proper ties. The authors present a formal theory of status passage in the form of a running theoretical discussion.The concepts and categories discussed in Status Passage are illuminated by a large number of examples chosen from a wide range of human behavior, and the applicability of the theory to still other examples is made apparent. The result is a stimulating and provocative book that will interest a wide range of sociologists, social psychologists, and other social scientists, and will be useful in a variety of courses.

Celestial Lancets Gwei-Djen Lu,Joseph Needham.2012-11-12 Using modern knowledge to shed light on ancient techniques, this text examines two of the earliest therapeutic techniques of Chinese medicine: acupuncture and moxibustion. Acupuncture is the implantation of very thin needles into subcutaneous connective tissue and muscle at a great number of different points on the body's surface; moxibustion is the burning of Artemisia tinder (moxa) either directly on the skin or just above it. For 2500 years the Chinese have used both techniques to relieve pain and to heal a wide variety of illnesses and malfunctions. Providing a full historical account of acupuncture and moxibustion in the theoretical structure of Chinese medicine, Doctors Lu and Needham combine it with a rationale of the two techniques in the light of modern scientific knowledge.

**Shonishin** Thomas Wernicke.2014-05-21 Thomas Wernicke's authoritative book is one of the first resources in English on Shonishin, a non-invasive form of acupuncture developed specifically to respond to the needs of children. With its safe, quick and effective treatments, Shonishin is increasingly catching the attention of therapists world-wide. Covering the history, theory and clinical practice, Wernicke explores how Shonishin is used with young children, from babies and toddlers to school-age children, to treat a range of behavioural issues and physical conditions such as KISS syndrome, allergies and asthma. He also examines how the techniques can be adapted for use with adults and older people to provide an alternative, non-invasive treatment. With access to downloadable handouts that can be used with patients, and international case studies that demonstrate its effectiveness, his book provides a complete and practical handbook on Shonishin for existing practitioners. Written in an accessible style, it will also be of value to any therapist interested in learning more about the treatment, including practitioners of Chinese and Japanese medicine, traditional acupuncture and shiatsu, craniosacral and occupational therapists, and physiotherapists.

**Mo Zi** Mo Zi. Mozi (Chinese: 墨子; pinyin: Mòzǐ; c. 470 - c. 391 BC), original name Mo Di (墨狄), was a Chinese philosopher during the Hundred Schools of Thought period (early Warring States period). A book named after him, the Mozi, contains material ascribed to him and his followers. Born in what is now Tengzhou, Shandong Province, he founded the school of Mohism that argued strongly against Confucianism and Taoism. His philosophy emphasized self-restraint, self-reflection and authenticity rather than obedience to ritual. During the Warring States period, Mohism was actively developed and practiced in many states but fell out of favour when the legalist Qin dynasty came to power. During that period, many Mohist classics are by many believed to have been ruined when the emperor Qin Shi Huang supposedly carried out the burning of books and burying of scholars. The importance of Mohism further declined when Confucianism became the dominant school of thought during the Han Dynasty, until mostly disappearing by the middle of the Western Han dynasty. The concept of Ai (愛) was developed by the Chinese philosopher Mozi in the 4th century BC in reaction to Confucianism's benevolent love. Mozi tried to replace what he considered to be the long-entrenched Chinese over-attachment to family and clan structures with the concept of universal love (jiān'ài, 兼愛). In this, he argued directly against Confucians who believed that it was natural and correct for people to care about different people in different degrees. Mozi is also the name of the philosophical text compiled by Mohists from Mozi's thought. This text originally consisted of 71 chapters. Because Mohism disappeared as a living tradition from China, its texts were not well maintained, and many chapters are missing or in a corrupted state.
